Kyana. The extinct Water clan of Zuñi pueblo, N. Mex.

K'yána-kwe.—Cushing in 13th Rep. B. A. E., 368, 1896 (*kwe* = 'people').

Kyatiikya (*K'yätiik'yä*, 'water drops come out'). A ruined pueblo at the mouth of the canyon opposite the E. end of Thunder mt., near Zuñi, N. Mex.; so named because the water on which its inhabitants depended oozed from the canyon walls. (F. H. C.)

Chat-e-cha.—Fewkes in Jour. Am. Eth. and Arch., I, 100, 1891. **K'yätiik'yä**.—Cushing, inf'n, 1892.

Kyatsutuma (*K'yä-tsu-tu-ma*, 'town of the dewdrops'). A former town which, with Kyamakyakwe and Pikyiaawan, was the northernmost home of the Snail people and one of the outposts or strongholds of Matyala (q. v.), which were conquered by the Zuñi in late prehistoric times. (F. H. C.)

Kyaukuhu (*K'ya'u'-ku-hu*). A former Yaquina village on the n. side of Yaquina r., Oreg.—Dorsey in Jour. Am. Folk-lore, III, 229, 1890.

Kyawana-tehuatsana (*K'yáwana-téhuatsana*, 'little gateway of Zuñi river'). A prehistoric Zuñi village, now in ruins, about 7 m. E. of Zuñi pueblo, on a mesa above the "gateway," whence its name. **Cha-wa-na**.—Fewkes in Jour. Am. Eth. and Arch., I, 100, 1891. **Ky-a-wa-na Tehua-tsana**.—Ibid., 96. **K'yawana Tehua-tsana**.—Cushing, Zuñi Folk Tales, 297, 1901.

Kyekykenok (*K'ek'-k'énók*). A gens of the Awaitlala, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Kyiah. The Crow clan of Jemez pueblo, N. Mex. A corresponding clan existed at the former related pueblo of Pecos.

Kyá'hl+.—Hodge in Am. Anthropol., IX, 350, 1896 (Pecos name; + = *ash*, or *tsásh*, 'people'). **Kyialish**.—Ibid. (Jemez name).

Kyunggang. The Hawk clan of San Ildefonso pueblo, N. Mex.

Kyu'gän-tóá.—Hodge in Am. Anthropol., IX, 351, 1896 (*tóá* = 'people').

Kyunu. The Corn clan of Jemez pueblo, N. Mex. A corresponding clan existed at the former related pueblo of Pecos.

Kyunu'+.—Hodge in Am. Anthropol., IX, 349, 1896 (Pecos form; + = *ash*, or *tsásh*, 'people'). **Kyunutsa-ásh**.—Ibid. (Jemez form).

Kyuquot. A Nootka tribe on Kyuquot sd., w. coast of Vancouver id.; pop. 305 in 1902, 281 in 1904. Its principal villages are Aktese and Kukamukamees.

Cayoquits.—Armstrong, Oregon, 136, 1857. **Cayoquets.**—Jewitt, Narr., 77, 1849. **Kayo'kath.**—Boas in 6th Rep. N. W. Tribes Can., 31, 1890. **Kayo-kuah.**—Brit. Col. map, 1872. **Kyū-cūt.**—Mayne, Brit. Col., 251, 1861. **Ky-u-kaht.**—Can. Ind. Aff., 276, 1894. **Ky-uk-ahts.**—Ibid., 52, 1875. **Kyūquot.**—Swan, MS., B. A. E. **Ky-wk-aht.**—Can. Ind. Aff., 188, 1883. **Ky-yoh-quah.**—Sproat, Sav. Life, 308, 1868.

Kyuwatkál (*Kyū'-wāt-kāl*). A former Yaquina village on the N. side of Yaquina r., Oreg.—Dorsey in Jour. Am. Folk-lore, III, 229, 1890.

LaalakSENTaio. A gens of the true Kwakiutl, embracing the subdivisions LaalakSENTaio, Alkunwea, and Hehametawe. **Laa'laqSENTaio.**—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. **Lā'alaxSENTaio.**—Boas in Rep. Nat. Mus. 1893, 330, 1897. **Lā'alaxSENTaio.**—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Labor, Division of. The common impression that the Indian woman was a mere slave and drudge for her husband is an error due to ignorance of the Indian division of labor in accordance with the necessities of savage life. Briefly stated, it was the man's business to provide meat and skins from the forest and plain and to protect the home from enemies, while the woman attended to the household duties of preparing the food, arranging the house interior, and caring for the children. The preparation of the food implied also the principal work of cultivation among the agricultural tribes, with the bringing of the wood and water, while household work included the making of pottery, basketry, and mats. The men themselves frequently made their own buckskin dress, and almost always their ceremonial costume. Among the Pueblos the greater part of the buckskin clothing, including leggings and moccasins, for both sexes, was made by the men. The heavier part of the Pueblo weaving also was the work of the men, the women confining themselves for the greater part to the production of belts and other small pieces. Among the Navaho, on the other hand, the weaving work was about evenly divided. The men fashioned their weapons, and the articles of more laborious construction, as stone hatchets, canoes, fish weirs, etc. As tribes were constantly at war one with another and the pursuit of game carried the hunter into disputed territory, the first business of every man was to be a warrior, forever on the alert for danger. This condition left him very little leisure for other pursuits excepting during the season when his enemies also were unable to travel. His wife, recognizing this fact, took up her share of the burden cheerfully, and would have scorned as effeminate the husband who took any other view of the situation. Among the more sedentary and agricultural tribes, where the procuring of food did not necessitate hostile collision with other tribes, the men usually did their

fair share of the home work, laboring in the fields together with the women. In general, it may be said that the man assumed the dangerous duty, the woman the safer routine work. The frequent sacrifice ordeals, intended to win the favor of the gods of the tribe, were borne almost entirely by the men, the part of the women being chiefly that of applauding spectators. The woman remained mistress of the home, and in spite of the variety of her duties, the number of women's games furnish testimony that she enjoyed her leisure in her own way. See *Popular fallacies, Women.* (J. M.)

Labrets. Ornaments worn in holes that are pierced through the lips. Cabeza de Vaca notes of Indians of the Texas coast: "They likewise have the nether lip bored, and within the same they carry a piece of thin cane about half a finger thick." It is quite certain that this custom prevailed for some distance inland along the Colorado r. of Texas and in neighboring regions, while large labrets were also found by Cushing among the remains on the W. coast of Florida. Outside of this region they were almost restricted to an area in the N. W., the habitat of the Aleut, Haida, Heiltsuk, Tlingit, Tsimshian, and Eskimo tribes, extending from Dean inlet to Anderson r. on the Arctic coast. They were also adopted by some of the western Athapascans. Here the lower lip alone was pierced. While the southern tribes made a single aperture in the middle of the lip, and consequently used but one labret, the Aleut and Eskimo usually punctured a hole below each corner of the mouth and inserted two. Moreover, among the southern tribes the ornament was worn only by women, while Aleut men used it occasionally and Eskimo men more and more generally, as one proceeded northward, until beyond the Yukon the use of labrets was confined to males. Among the Haida, Heiltsuk, Tlingit, and Tsimshian the labret was a mark of high birth, superseding in this respect the head-flattening of the tribes living farther S. The piercing was consequently done during potlatches, a small aperture being bored first, which was enlarged from year to year until it sometimes became so great that the lip proper was reduced to a narrow ribbon, which was liable to break, and sometimes did. The labrets were made of wood, stone, bone, or abalone shell, often inlaid, and present two general types, namely, a long piece inserted into the lip at one end, or a round or oval stud hollowed on each side and protruding but slightly from the face. George Dixon noted one of this latter type that was $3\frac{7}{8}$ in. long by $2\frac{5}{8}$ in. broad. The last labrets used were small plugs of silver, and the custom has now been

entirely abandoned. On account of the use of these ornaments the Tlingit were called Kolosch by their northern neighbors and the Russians, whence the name Koluschan, adopted for the linguistic stock.

Among the Eskimo and Aleut bone labrets predominated, though some very precious specimens were of jade. They were shaped like buttons or studs, or, in the case of some worn by women, like sickles. The lips of men were pierced only at puberty, and the holes were enlarged successively by means of plugs,

LABRETS, WESTERN ESKIMO. (NELSON)

which were often strung together afterward and preserved. For further illustration of the use of labrets, see *Adornment*.

Consult Dall (1) in 3d Rep. B. A. E., 1884, (2) in Cont. N. A. Ethnol., 1, 1877; Dawson, Rep. on Queen Charlotte Ids., Geol. Surv. Canada, 1880; Murdoch in 9th Rep. B. A. E., 1892; Nelson in 18th Rep. B. A. E., 1899. (J. R. S.)

Lacame. A province visited by Moscoso, of De Soto's expedition, toward the close of the year 1542; probably in s. w. Arkansas.

Lacame.—Biedma (1544) in French, Hist. Coll. La., II, 108, 1850. **Lacane.**—Gentl. of Elvas in Hakluyt Soc. Pub., IX, 135, 1851.

Lacayamu. Two former Chumashan villages, one on Santa Cruz id., the other in Ventura co., Cal.

Lacayamu.—Taylor in Cal. Farmer, Apr. 24, July 24, 1863. **Lucuyumu.**—Bancroft, Native Races, I, 459, 1874.

Lac Court Oreilles. A Chippewa band, named from the lake on which they lived, at the headwaters of Chippewa r., in Sawyer co., Wis. In 1852 they formed a part of the Betonukeengainubejig division of the Chippewa, and in 1854 were assigned a reservation. In 1905 they were officially reported to number 1,214, to whom lands had been allotted in severalty.

Lac Court d'Oreille band.—Ind. Aff. Rep., 254, 1877. **Lac Court Oreille band.**—U. S. Stat. L., X, 223, 1854. **Lac Court Oreilles.**—La Pointe treaty (1854) in U. S. Ind. Treat., 224, 1873. **Lac Court, Orville.**—Fitch in Ind. Aff. Rep. 1857, 28, 1858. **Lac Couter-eille.**—Warren (1852) in Minn. Hist. Soc. Coll., V, 191, 1885. **Ottawa lake men.**—Ibid., 39.

Lachalsap. A village of the Hwotsotenne on Bulkley r., Brit. Col.; pop. 157 in 1904.

Lachalsap.—Can. Ind. Aff., pt. 2, 70, 1902. **Lackalsap.**—Ibid., 1903, pt. 2, 73, 1904. **Moricetown.**—Ibid., 70, 1902.

Lackawanna. A variety of coal. From *Lackawanna*, the name of a tributary of the Susquehanna and a county in Pennsylvania, which represents *lechawanne* in the Lenape (Delaware) dialect, signifying 'the stream forks'; from *lechau*, 'fork', and *-hanne*, 'stream,' 'river'. (A. F. C.)

Lackawaxen (*Lechawéksink*, 'the forks of the road'). Mentioned by Alcedo (Dic. Geog., II, 565, 1787) as a former Indian (Delaware?) settlement on the E. branch of Delaware r., Pa. The E. branch of the Delaware is in New York, and the settlement, if ever existing, was probably on Lackawaxen cr., a tributary of the Delaware in N. E. Pennsylvania. Heckewelder (Trans. Am. Philos. Soc., IV, 359, 1834) mentions this as the Delaware name for two places, one in Wayne co. and the other in Northampton co., Pa.

Lechavaksein.—Alcedo, op. cit. **Lechawaxen.**—Heckewelder, op. cit.

Lacrosse. See *Ball play*.

Ladles.—See *Dishes, Gourds, Receptacles*.

Lady Rebecca. See *Pocahontas*.

Laenukhuma (*La'nuhuma*). Given by Boas (Petermanns Mitt., pt. 5, 131, 1887) as the ancestor of a gens of the Quatsino; also applied to the gens itself.

La Flesché, Francis. Son of Estamaza, or Joseph La Flesché, former head chief of the Omaha, born in Thurston co., Nebr., Dec. 25, 1857. He attended the Presbyterian mission school on the Omaha res., where he laid the foundation of his later education. In 1878-79 he accompanied the Ponca chief Standing Bear on his eastern tour and interpreted his presentation of the wrongs his people had suffered in the removal from their home in South Dakota. During an investigation of the Ponca removal by a committee of the U. S. Senate he served again as interpreter and attracted the attention of the chairman by the impartial manner in which he performed his work. In

1881, when Hon. S. J. Kirkwood, the chairman of that committee, became Secretary of the Interior, he called Mr La Flesche to Washington and gave him a position in the Office of Indian Affairs, where he remains. In 1893 he was graduated from the National University Law School. The memory of the tribal life of his childhood stimulated him to study his people, for which his father's position gave him unusual advantage. His mastery of English has enabled him accurately to set forth the results of his ethnological investigations, in which he is still actively engaged. His published writings have appeared in the *Journal of American Folk-lore* and other scientific periodicals, in the "Study of Omaha Indian Music," by Alice C. Fletcher (Peabody Museum Pub.), and in popular magazines. He is the author also of "The Middle Five," a book giving the story of his school days. Mr La Flesche has made ethnological collections for the University of Berlin, the University of California, the Peabody Museum of American Archaeology and Ethnology, and other institutions of learning. He is a fellow of the American Association for the Advancement of Science, and a member of the American Anthropological Association and of the Anthropological Society of Washington. In 1906 Mr La Flesche married Miss Rosa Bourassa, of Chipewewa descent.

(A. C. F.)

La Flesche, Susette. See *Bright Eyes*.

Lagcay. A former Chumashan village near Santa Barbara, Cal.

Laco.—Taylor in Cal. Farmer, Apr. 24, 1863.

Lagcay.—Ibid.

Lagrimas de San Pedro (Span.: 'tears of St Peter'). A former group of Alchedomá rancherías, on or near the Rio Colorado, in California, more than 50 m. below the mouth of Bill Williams fork. They were visited and so named by Fray Francisco Garcés in 1776.—Garcés, *Diary*, 427, 1900.

Laguna (Span.: 'lagoon', on account of a large pond west of the pueblo; aboriginal name Ka-waik', an old Keresan word of unknown signification). A Keresan tribe whose principal pueblo, which bears the same popular name, is situated on the s. bank of San José r., Valencia co., N. Mex., about 45 m. w. of Albuquerque. It was formerly the seat of a Spanish mission, dating from its establishment as a pueblo in July, 1699, and having Acoma as a visita after 1782. The lands of the Lagunas consist of a Spanish grant of 125,225 acres, mostly of desert land. The Laguna people are composed of 19 clans, as follows, those marked with an asterisk being extinct: Kohaia (Bear), Ohshahch (Sun), Chopi (Badger), Tyami (Eagle), Skurshka (Water-snake), Sqowi (Rattlesnake), Tsushki (Coyote), Yaka (Corn; divided into Kochinish-yaka, or

Yellow-corn, and Kukinish-yaka, or Red-corn), Sits (Water), Tsina (Turkey), Kakhah (Wolf), Hatsi (Earth)*, Mokaiqch (Mountain lion)*, Shawiti (Parrot), Shuwimi (Turquoise), Shiaska (Chaparral-cock), Kurtzi (Antelope), Moyo (Lizard), Hapai (Oak). Most of the clans constitute phratral groups, as follows: (1) Bear, Badger, Coyote, and Wolf; (2) Mountain-lion and Oak; (3) Water-snake, Rattlesnake, Lizard, and Earth; (4) Antelope and Water. According to Laguna tradition, the Bear, Eagle, Water, Turkey, and Corn clans, together with some members of the Coyote clan, came originally from Acoma; the Badger, Parrot, Chaparral-cock, and Antelope clans, and some members of the Coyote clan, came from Zuñi; the Sun people originated probably in San Felipe; the Water-snake in Sia; the

JOSÉ PAISANO—LAGUNA

Rattlesnake probably in Oraibi; the Wolf and Turquoise in Sandia; the Earth clan in Jemez; the Mountain-lion and Oak people claim to have come from Mt Taylor; the Lizard clan is of unknown origin. Laguna therefore is not only the most recent of the New Mexican pueblos, but its inhabitants are of mixed origin, being composed of at least four linguistic stocks—Keresan, Tanoan, Shoshonean, and Zuñian. It is said that formerly the people were divided into two social groups, or phratries, known as Kapaitis and Kayomasho, but these are now practically political parties, one progressive, the other conservative. Until 1871 the tribe occupied, except during the summer season, the single pueblo of Laguna, but this village is gradually becoming depopulated,

the inhabitants establishing permanent residences in the former summer villages of Casa Blanca, Cubero, Hasatch, Paguate, Encinal, Santa Ana, Paraje, Tsiana, and Puertecito. Of these, Paguate is the oldest and most populous, containing 350 to 400 inhabitants in 1891. Former villages were Shinats and Shunaiki. The Laguna people numbered 1,384 in 1905. See *Keresan Family, Moquino, Pueblos, Rito, Shumasitscha*, and the villages above named.

(F. W. H.)

Biérai.—Gatschet, *Isleta MS. vocab.*, 1885 (*Isleta* name of pueblo). **Biérde**.—*Ibid.* (pl. *Biérnin*; *Isleta* name of people). **Ka-hua-i-ko**.—*Jouven-veau* in *Cath. Pion.*, i, no. 9, 13, 1906. **Kairai-kome**.—*Kingsley, Stand. Nat. Hist.*, vi, 183, 1885. **Kaiwaika**.—*Stephen* in *8th Rep. B. A. Monthly*, v, 584, 1874 (misprint). **San José de la Laguna**.—*Ward* in *Ind. Aff. Rep.*, 1867, 213, 1868 (mission name). **San José de La Laguna**.—*Alencaster* (1805) in *Prince, N. Mex.*, 37, 1883. **Seguna**.—*Pike, Exped.*, 3d map, 1810 (misprint). **Sitsimé**.—*Gatschet* in *Mag. Am. Hist.*, 263, Apr. 1882 (*Laguna* name for themselves). **Taguna**.—*Wallace, Land of the Pueblos*, 45, 1888 (misprint). **To-zán-ne'**.—*ten Kate, Synonymie*, 6, 1884 ('much water'; *Navaho* name). **Tozjána**.—*ten Kate, Reizen* in *N. A.*, 231, 1885 (*Navaho* name). **Tuzhlani**.—*Hodge, field notes*, B. A. E., 1895 (*Navaho* name of people).

Laguna. A Pomo band on the w. shore of Clear lake, Cal.—*Revere, Tour of Duty*, 120, 1849. See *Clear Lake Indians*.

Laguna. A Diegueño village in w. San Diego co., Cal. (*Jackson and Kinney, Rep. Miss. Ind.*, 24, 1883). The name is now applied to one of the so-called Campo reservations, comprising 320 acres, mostly of desert land, and containing only 5 inhabitants in 1906 (*Kelsey, Rep.*, 25, 1906).

Lahanna. A name applied by Lewis and Clark in 1805 to a body of Indians, said to number 2,000 in 120 houses, on both sides of

Columbia r. about Clarke's fork. This is in the country of the *Pend d'Oreilles* and *Senjextee*, but *Lahanna* corresponds to no known division.

Lahama.—*Baneroft, Nat. Races*, i, 314, 1882 (misquoting *Mojo*). **Lahanna**.—*Lewis and Clark, Exped.*, II, 475, 1814. **La-hanna**.—*Orig. Jour. Lewis and Clark*, VI, 119, 1905.

Lahau (*La'qau*). A village of the *Nicomen* tribe of *Cowichan* at the mouth of *Wilson cr.*, on the s. side of *Fraser r.*, *Brit. Col.*—*Boas* in *Rep. Brit. A. A. S.*, 454, 1894.

Lahoocat. Mentioned by *Lewis and Clark* as an old *Arikara* village, occupied in 1797, abandoned about 1800. It was situated on an island in *Missouri r.*, below the present *Cheyenne River* agency, *S. Dak.*, and when occupied consisted of 17 lodges arranged in a circle and walled. **Lahoocat**.—*Lewis and Clark, Exped.*, i, 97, 1814. **La hoo catt**.—*Orig. Jour. Lewis and Clark*, i, 179, 1904.

Laidukatuwiwait (*Lai'-du-ka-tu-wi-wait*). A *Paviotso* band formerly living about the sink of the *Humboldt*, in w. Nevada.—*Powell, Paviotso MS.*, B. A. E., 1881.

Laimon. *Venegas* (*Hist. Cal.*, i, 55, 1759) states that the *Indians of Loreto-Concho* mission have specific names for the tribes of Lower California according to the regions occupied by them, as the *Edu*, *Eduu*, or *Edues* in the s.; that they call themselves *Monquis*, and those n. of *Loreto* are called *Laymones*; the latter are in fact *Cochimi*, the *Edues* virtually *Pericu*, though both, the *Edues* and the *Laymones*, contain some tribes of the *Monquis*. *Cagnaguet* and *Kadakaman* are given as *Laimon* divisions.

Lamoines.—*Taylor* in *Cal. Farmer*, May 18, 1860. **Layamon**.—*Latham* in *Trans. Philol. Soc. Lond.*, 88, 1856. **Laymon**.—*Frishard, Nat. Hist. Man.*, II, 553, 1855. **Laymóna**.—*Baegert* in *Smithson. Rep.*, 1864, 393, 1865. **Laymones**.—*Venegas, Hist. Cal.*, i, 55, 1759. **Limonies**.—*Taylor* in *Browne, Res. Pac. Slope*, app., 54, 1869.

Lajas (Span.: 'stone slabs,' translation of the native name). A *Tepehuane* pueblo, of 900 inhabitants, in the extreme n. part of the territory of *Tepic, Mexico*, about lat. 23°, lon. 105°. The children of the town, who prior to about 1890 had never seen a white person, are now instructed in Spanish and the rudiments of civilization and Christianity.

Eityam.—*Lumboltz, Unknown Mexico*, i, 457, 1902 (native name). **Lajas**.—*Orozco y Berra, Geog.*, 319, 1864. **San Francisco Lajas**.—*Ibid.* (full Spanish name).

La Joya (Span.: 'the jewel'). A *Luiseño* village n. of *San Luis Rey*, in *San Diego co.*, Cal., from which 180 *Indians* are said to have been present at the *Temecula* meeting in 1865 (*Lovett* in *Rep. Ind. Aff.*, 124, 1865). The settlement is now on *Potrero res.*, 75 m. from *Mission Tule River* agency.

La Jolla.—*Jackson and Kinney, Rep. Mission Inds.*, 29, 1883. **La Joya**.—*Hayes* (1850) quoted by *Baneroft, Nat. Races*, i, 460, 1882.

Lajuchu. A former Chumashan village near Purisima mission, Santa Barbara co., Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Lake Indians. A term used by English writers of the 18th century to designate the Indians living on the great lakes, especially the Chippewa and the Ottawa.

Lakisumne. A village of California whose language, according to Pinart, showed differences from that of the Cholo-vone (Mariposan stock), but was understood by them. If not related to the Cholo-vone, this village was probably Moquelumnan.

Lacquesumne.—Pinart, Cholo-vone MS., B. A. E., 1880. **Lakisumne.**—Bancroft, Nat. Races, I, 450, 1874. **Sakisimne.**—Ibid.

Lakkulzap ('on the town'). A modern Chimmesyan town, founded in 1872 by a Mr Green from Niska, the inhabitants having been drawn from the villages of Kitaix and Kitkahta. Pop. 183 in 1902, 145 in 1904.

Greenville.—Can. Ind. Aff. for 1889, 272 (name given by whites). **Kach-als-ap.**—Dorsey in Am. Antiq., XIX, 281, 1897 (misquoted from Can. Ind. Aff.). **Lachalsap.**—Can. Ind. Aff., 416, 1898. **Lack-al-sap.**—Ibid., 272, 1889. **Lak-kul-zap.**—Dorsey in Am. Antiq., XIX, 281, 1897.

Lakloukst (*Laqlō'ukst*). A Niska division of the Lakskiyek clan, living in the town of Kitwinhilk, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Lakmiut. A Kalapooian tribe formerly residing on a river of the same name, a western tributary of the Willamette, in Oregon. They are now on Grande Ronde res., where they were officially stated to number 28 in 1905. They are steadily decreasing. The following were Lakmiut bands as ascertained by Gatschet in 1877: Ampalamuyu, Chantkaip, Chepenafa, Mohawk, Tsalakmiut, Tsampiak, Tsantatawa, and Tsantuisha.

Alakēma'yuk.—Gatschet, Atfalati MS., B. A. E. (Atfalati name). **Chelukamanches.**—Ind. Aff. Rep., 1864, 503, 1865. **Chelukimaukes.**—Ind. Aff. Rep., 221, 1861. **Lakmiuk.**—Gatschet in Jour. Am. Folk-lore, XII, 213, 1899. **Lakmiut.**—Gatschet, Atfalati MS., B. A. E., 1877 (own name). **Luck-a-mi-ute.**—Pres. Mess., Sen. Ex. Doc. 39, 32d Cong., 1st sess., 2, 1852. **Luckamuke.**—Palmer in Ind. Aff. Rep., 1856, 196, 1857. **Luckamutes.**—Keane in Stanford Compend., 519, 1878. **Luckiamut.**—Smith in Ind. Aff. Rep., 56, 1875. **Luckiamute.**—Victor in Overland Monthly, VII, 346, 1871. **Luckimute.**—McClane in Ind. Aff. Rep., 184, 1887. **Luckimute.**—Huntington in Ind. Aff. Rep., 1867, 62, 1868. **Lukemayuk.**—Gatschet, Atfalati MS., B. A. E., 1877 (Atfalati name). **Sackanoir.**—Schoolcraft, Ind. Tribes, VI, 701, 1857 (after Lane). **Suchamier.**—Ibid., 689. **Suck-a-mier.**—Lane in Ind. Aff. Rep., 161, 1850.

Lakseel (*Laqsē'el*, 'on the ocean'). A Niska division belonging to the Kanhada clan, living in the towns of Andeguale and Kitlakdamix on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Lakskiyek (*Laqski'yek*, 'on the eagle'). One of the 4 Chimmesyan clans. Local subdivisions bearing the same name are found in the Niska towns of Lakkulzap and Kitlakdamix, and in the Kitskan town

of Kitwingach.—Boas in 10th Rep. N. W. Tribes Can., 49, 50, 1895.

Laktiaktl (*Laql'ia'k'tl*). A Niska division of the Lakeybo (Wolf) clan, settled in the town of Kitwinshilk, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Laktsemelik (*Laql's Emē'liu*, 'on the beaver'). A Niska division of the Lakskiyek clan, living in the town of Kitlakdamix, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Lakungida (perhaps a Haida name). A Niska town near the mouth of Nass r., Brit. Col. In 1870 its inhabitants, exceeded 400, but in 1897 it contained not more than 50.—Dorsey in Am. Antiq., XIX, 279, 1897.

Lakweip (Niska: *Lāq'uyi'p*, 'on the prairie.'—Boas). An isolated Athapaskan tribe, related to the Tahltan, formerly living on Portland canal, Alaska, but having quarreled with the Niska are now on the headwaters of Stikine r., Brit. Col. Their chief village is Gunakhe.

Lackweips.—Scott in Ind. Aff. Rep., 1869, 563, 1870. **Laq'uyi'p.**—Boas in 10th Rep. N. W. Tribes Can., 34, 1895. **Naqyina.**—Ibid. (Tsetsaut name: 'on the other side').

Lakeybo (*Laqkyebō*, 'on the wolf'). One of the 4 clans into which all the Chimmesyan are divided. The name is applied specifically to various local subdivisions as well, there being one such in the Niska town of Lakkulzap and another in the Kitskan town of Kishpiyeux.—Boas in 10th Rep. N. W. Tribes Can., 49, 50, 1895.

Lalanitela (*Lā'laui'ela*, 'always crossing the sea'). Agents of the Tlatlasikoala, subdivided into the Gye-gyote and Hahekolatl.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

Lamasconson. One of several tribes or bands displaced from their homes in St Mary and Charles cos., Md., in 1651, and settled on a reservation at the head of Wiconico r. (Bozman, Maryland, II, 421, 1837). Perhaps a small branch of the Conoy.

Lamochattee. See *Weatherford, William*.

La Montagne (Fr.: 'the mountain'). A mission village established in 1677 for Caughnawaga and other Catholic Iroquois on a hill on Montreal id., Quebec. They were afterward joined by others, many of whom were not Christians. The village was temporarily deserted in 1689 on account of the Iroquois. In 1696 a part of the converts established a new mission village at Sault au Re-collet, and were joined by the others until in 1704 La Montagne was finally abandoned. (J. M.)

The Mountain.—Shea, Cath. Miss., 309, 1855.

Lamps. See *Illumination*.

Lamsim. A former village, presumably Costanoan, connected with Dolores mission, San Francisco, Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Lamtama. A Nez Percé band living on White Bird cr., a tributary of Salmon r., Idaho, so called from the native name of the stream.—Gatschet, MS., 1878, B. A. E. Buffalo Indians.—Owen in Ind. Aff. Rep. 1859, 424, 1860. **Lamtama.**—Gatschet, MS., 1878, B. A. E. White Bird Nez Percés.—Ibid. (so called from the name of their chief).

Lana-chaadus (*Lā'na tcā'ad-as*). A family of low social rank belonging to the Eagle clan of the Haida. Before becoming extinct they occupied, with the Gitin-gidjats, a town on Shingle bay, Queen Charlotte ids., Brit. Col. Some are said to have lived with the Kaiahl-lanas.—Swanton, Cont. Haida, 274, 1905.

Lanadagunga (*Lā'na dā'gaña*, 'bad [or common] village'). A former Haida town, owned by the Saki-kegawai, on the coast of Moresby id., s. of Tangle cove, Queen Charlotte ids., Brit. Col. It was so called by the people of Hagi, opposite, because the Lanadagunga people used to talk against them.—Swanton, Cont. Haida, 277, 1905.

Lanagahlkehoda (*Lānā'ga tqē'xoda*, 'town that the sun does not shine on'). A Haida town on a small island opposite Kaisun, w. coast of Moresby id., Queen Charlotte ids., Brit. Col. It was so named because it faces n. This is a semi-mythical town, said to have been occupied by the Kas-lanas.—Swanton, Cont. Haida, 280, 1905.

Lanagukunhlin-hadai (*Lā'na gu qā'n-ūn xā-da-i*, 'resting-the-breast-on-a-town people'). A subdivision of the Chaahl-lanas, a family of the Eagle clan of the Haida. Lanagukunhlin was the name of a chief.—Swanton, Cont. Haida, 276, 1905.

Lanahawa (*Lā'na xā'wa*, 'swampy village'). A former Haida town on the w. coast of Graham id., opposite Hippa id., Queen Charlotte group, Brit. Col. It was also called Lanahegus (*Lā'na xē'-gans*, 'town where there is a noise [of drums]') and Lanahlungua (*Lā'na ū'ngua*, 'town where there are plenty of feathers'). It was occupied by the Skwah-ladas and Nasto-kegawai before they moved to Rennell sd., and afterward by the Kianusili.—Swanton, Cont. Haida, 280, 1905.

Lanahawa. A former Haida town on the w. coast of Burnaby id., Queen Charlotte ids., Brit. Col., s. of the Ninstints town of Ket.—Swanton, Cont. Haida, 278, 1905.

Lanahilduns (*Lā'na hī'ldans*, 'moving village'); also called Chahlolnagai, from the name of the inlet on which it was situated). A former Haida town on the s. w. side of Rennell sd., Graham id., Queen Charlotte group, Brit. Col.; occupied by the Nasto-kegawai or the Skwah-ladas family group.—Swanton, Cont. Haida, 280, 1905.

Lanaslnagai (*Lā'nas lnagā'-i*, 'peoples' town'). The name of three distinct Haida towns on Queen Charlotte ids., Brit. Col. One stood on the e. coast of Graham id., s. of C. Ball, and was owned by the Naikun-kegawai; another belonged to the Kuna-lanas and was on the w. side of Masset inlet where it broadens out; the third, which belonged to the Yagunstan-lnagai, was on Yagun r.—Swanton, Cont. Haida, 280, 281, 1905.

Lanaungsuls (*Lā'na ū'nsals*, 'town [that] hides itself'). A Haida town on Masset inlet, Queen Charlotte ids., Brit. Col., belonging to the Aoyaku-lnagai.—Swanton, Cont. Haida, 281, 1905.

Lances. As an implement of the chase or of war the lance had a wide distribution among the ancient and the modern tribes of the United States. Though none of the objects of chipped stone called lance-heads that have been found in numbers on widely separated archeological sites are attached to shafts, there is reason to believe that many of the leaf-shaped blades were lance-heads. The only survivals of the use of the ancient lance are found among the Hupa of California and the western Eskimo, but earlier writers have mentioned their existence among various tribes. Lances for the chase were used occasionally in war by the Eskimo, but the Plains Indians, whenever possible, used two distinct varieties for war and for hunting, the hunting lance blade being shorter and heavier. The lance appears to have originated through the need of striking animals from some distance in order to escape personal danger and to produce surer results than were possible with a stone knife or other implement used at close quarters. The efficiency and range of the lance when thrown from the hand was increased by the throwing stick (q. v.), and the original lance or spear developed into a number of varieties under the influences of environment, the habits of animals, acculturation, etc. The greatest number of forms sprang up among the Eskimo, whose environment was characterized by a great variety and alternation of animal life, while in most other regions a simple lance was perpetuated.

The Plains tribes, as a rule, living in a region conducive to warfare and aggression through its lack of physical boundaries, made more use of the lance in war than did coast, woodland, desert, or mountain tribes. Since the general occupancy of the plains appears to have been coincident with the introduction of the horse, the

LANCE HEAD; WESTERN ESKIMO. (MURDOCH)

use of the war lance has been associated with that animal, but it is evident that the tribes that occupied the plains were acquainted with the lance with a stone head as a hunting implement before they entered this vast region. A Kiowa lance in the National Museum is headed with a part of a sword blade and is reputed to have killed 16 persons.

In accord with the tendency of objects designed for especially important usage to take on a religious significance, the lance has become an accessory of ceremonies among the Plains Indians. Elaborately decorated sheaths were made for lances, varying according to the society or office of the owner. At home the lance was leaned against the shield tripod, tied horizontally above the tipi door, or fastened lengthwise to an upright pole behind the tipi. In both earlier and recent times offerings of lance-heads were made to springs, exquisitely formed specimens having been taken from a sulphur spring at Afton, Okla.

Consult Holmes (1) in 15th Rep. B. A. E., 1897, (2) in Am. Anthropol., iv, 108-129, 1902; Mooney in 14th Rep. B. A. E., 988-990, 1896. See *Arrowheads, Hunting, Spears, War and War discipline.* (W. H.)

Land tenure. The Indian conceived of the earth as mother, and as mother she provided food for her children. The words in the various languages which refer to the land as "mother" were used only in a sacred or religious sense. In this primitive and religious sense land was not regarded as property; it was like the air, it was something necessary to the life of the race, and therefore not to be appropriated by any individual or group of individuals to the permanent exclusion of all others. Other words referring to the earth as "soil" to be used and cultivated by man, mark a change in the manner of living and the growth of the idea of a secular relation to the earth. Instead of depending on the spontaneous products of the land the Indian began to sow seeds and to care for the plants. In order to do this he had to remain on the soil he cultivated. Thus occupancy gradually established a claim or right to possess the tract from which a tribe or an individual derived food. This occupancy was the only land tenure recognized by the Indian; he never of himself reached the conception of land as merchantable, this view having been forced on his acceptance through his relations with the white race. Tecumseh claimed that the Northwest Territory, occupied by allied tribes, belonged to the tribes in common, hence a sale of land to the whites by one tribe did not convey title unless confirmed by other tribes. Furthermore, among most of the Algonquian tribes, at least, accord-

ing to Dr William Jones, if land were ceded to the whites, the cession could not be regarded as absolute, i. e., the whites could hold only to a certain depth in the earth such as was needful for sustenance. Each tribe had its village sites and contiguous hunting or fishing grounds; as long as the people lived on these sites and regularly went to their hunting grounds, they could claim them against all intruders. This claim often had to be maintained by battling with tribes less favorably situated. The struggle over the right to hunting grounds was the cause of most Indian wars. In some tribes garden spots were claimed by clans, each family working on its own particular patch. In other tribes the favorable localities were preempted by individuals regardless of clan relations. As long as a person planted a certain tract the claim was not disputed, but if its cultivation were neglected anyone who chose might take it. Among the Zuni, according to Cushing, if a man, either before or after marriage, takes up a field of unappropriated land, it belongs strictly to him, but is spoken of as the property of his clan, or on his death it may be cultivated by any member of that clan, though preferably by near relatives, but not by his wife or children, who must be of another clan. Moreover, a man cultivating land at one Zuni farming settlement of the tribe can not give even of his own fields to a tribesman belonging to another farming village unless that person should be a member of his clan; nor can a man living at one village take up land at another without the consent of the body politic of the latter settlement; and no one, whatever his rank, can grant land to any member of another tribe without consent of the Council and certain other clans.

During the early settlement of the country absolute title was vested in the Crown by virtue of discovery or conquest, yet the English acknowledged the Indian's right of occupancy, as is shown by the purchase of these rights both by Lord Baltimore in 1635 and by William Penn in 1682, although colonizing under royal grants. The Puritans, however, coming without royal authority, were necessitated to bargain with the Indians. Absolute right to the Indian lands was fully stated in a proclamation by George III in 1763. In 1783 the Colonial Congress forbade private purchase or acceptance of lands from Indians. On the adoption of the Constitution the right of eminent domain became vested in the United States, and Congress alone had the power to extinguish the Indian's right of occupancy. The ordinance of 1787, relative to all territory n. w. of the Ohio, made the consent of the Indians requisite to the cession of

their lands. Until the passage of the act of Mar. 3, 1871, all cession was by treaty, the United States negotiating with the tribes as with foreign nations; since then agreements have been less formal, and a recent decision of the U. S. Supreme Court makes even the agreement or consent of the Indians unnecessary. The tribes living in Arizona, California, Nevada, New Mexico, and Utah came under the provisions of the treaty of Guadalupe Hidalgo, most of the Pueblos holding their lands under Spanish grants. All Indian reservations have been established either by treaty or by order of the President, but in both cases the Indian's tenure is that of occupancy only. "They may not cut growing timber, open mines, quarry stone, etc., to obtain lumber, coal, building material, etc., solely for the purpose of sale or speculation. In short, what a tenant for life may do upon the lands of a remainder-man the Indians may do upon their reservations, but no more." In a few cases reservations have been patented to tribes, as those of the Five Civilized Tribes, and a limited number of tribes have had their lands apportioned and received patents for individual holdings, yet no general change in the Indian land tenure took place until the passage of the severalty act in 1887. This act provided for the allotment to each man, woman, and child of a certain portion of the tribal land and the issuance of a patent by which the United States holds the allotment in trust, free of taxation and encumbrance, for 25 years, when the allottee is entitled to a patent in fee simple. On the approval of their allotments by the Secretary of the Interior the Indians become citizens of the United States and subject to its laws. Seventy-three tribes already hold their lands under this tenure. See *Governmental policy, Legal status, Reservations, Treaties, Social organization*.

(A. C. F.)

Languages. The American languages show considerable variety in phonetics and structure. While some are vocalic and appear melodious to our ear, others contain many consonant sounds to which we are unaccustomed and which seem to give them a harsh character. Particularly frequent are sounds produced by contact between the base of the tongue and the

soft palate, similar to the Scotch *ch* in *loch*, and a number of explosive *p*'s, which are produced by pressing the tongue against the palate and suddenly expelling the air between the teeth. Harshness produced by clustering consonants is peculiar to the N. W. coast of America. Sonorous vocalic languages are found in a large part of the Mississippi basin and in California. Peculiar to many American languages is a slurring of terminal syllables, which makes the recording of grammatical forms difficult.

Contrary to the prevalent notion, the vocabularies are rich and their grammatical structure is systematic and intricate. Owing to the wealth of derivatives it is difficult to estimate the number of words in any American language; but it is certain that in every one there are a couple of thousand of stem words and many thousand words, as that term is defined in English dictionaries.

A considerable variety of grammatical structure exists, but there are a few common traits that seem to be characteristic of most American languages. The complexity of grammar is often great because many ideas expressed by separate words in the languages of other continents are expressed by grammatical processes in the languages of the Indians. The classification of words differs somewhat from the familiar grouping in Indo-European languages. The demarcation between noun and verb is often indistinct, many expressions being both denominative and predicative. Often the intransitive verb and the noun are identical in form, while the transitive verb only is truly verbal in character. In other languages the transitive verb is nominal, while the intransitive only is truly verbal. These phenomena are generally accompanied by the use of possessive pronouns with the nominal and of personal pronouns with the verbal class of words. In other cases the verbal forms are differentiated from the noun, but the close relationship between the two classes is indicated by the similarity of the pronominal forms. The intransitive verb generally includes the ideas which Indo-European languages express by means of adjectives. Independent pronouns are often compounds, and the pronoun appears in most cases subordinated to the verb.

In the singular are distinguished self (or speaker), person addressed, and person spoken of; in the plural, corresponding to our first person, are often distinguished the combination of speaker and persons addressed, and speaker and persons spoken of, the so-called inclusive and exclusive forms.

The demonstrative pronouns are analogous to the personal pronoun in that they

are generally developed in three forms, indicating respectively the thing near me, near thee, near him. Their development is sometimes even more exuberant, visibility and invisibility, present and past, or location to the right, left, front and back of, and above and below the speaker, being distinguished.

The subordination of the pronoun to the verb is often carried to extremes. In many languages the pronominal subject, the object, and the indirect object are incorporated in the verb, for which reason American languages have often been called "incorporating languages." There are, however, numerous languages in which this pronominal subordination does not occur. In some the process of incorporation does not cease with the pronoun; but the noun, particularly the nominal object, is treated in the same manner. Where such incorporation is found the development of nominal cases is slight, since the incorporation renders this unnecessary.

The occurrence of other classes of words depends largely on the development of another feature of American languages, which is probably common to them all, namely, the expression of a great number of special ideas by means of either affixes or stem modification. On account of the exuberance of such elements American languages have been called "polysynthetic." The character of the subordinated elements shows great variations. In some languages most of the ideas that are subordinated are instrumental (with the hand, the foot, or the like; with the point or the edge of something, etc.); in others they include all kinds of qualifying ideas, such as are generally expressed by auxiliary verbs, verbal compounds, and adverbs. The Eskimo, for instance, by composition of other elements with the stem "to see," may express "he only orders him to go and see"; a Chinmesyan composition with the verb to go is, "he went with him upward in the dark and came against an obstacle." The existence of numerous subordinate elements of this kind has a strong effect in determining the series of stem words in a language. Whenever this method of composition is highly developed many special ideas are expressed by stems of very general significance, combined with qualifying elements. Their occurrence is also the cause of the obviousness of Indian etymologies. These elements also occur sometimes independently, so that the process is rather one of coordinate composition than of subordination. The forms of words that enter composition of this kind sometimes undergo considerable phonetic modification by losing affixes or by other processes. In such cases composition apparently is brought about by

apocope, or decapitation of words; but most of these seem to be reducible to regular processes. In many languages polysynthesis is so highly developed that it almost entirely suppresses adverbs, prepositions, and conjunctions.

The categories of Indo-European languages do not correspond strictly to those of Indian languages. This is true particularly of the ideas of gender and plurality. Grammatical gender based on sex distinction is very rare in America. It is based on other qualities, as animate and inanimate, or noble and ignoble, and often relates only to shape, as round, long, or flat. Complete absence of such classification is frequent. Plurality is seldom clearly developed; it is often absent even in the pronoun; its place is taken by the ideas of collectivity and distribution, which are expressed more often than plurality. Tense is also weakly developed in many languages, although others have a complex system of tenses. Like other adverbial ideas tense is often expressed by affixes. Moods and voice of the verb are also sometimes undeveloped and are expressed by adverbial elements.

In the use of grammatical processes there is great diversity. Suffixes occur almost everywhere; prefixes are not quite so frequent. Infixes seem to be confined to the Siouan languages, although infixation by metathesis occurs in other languages also. Reduplication is frequent, sometimes extending to triplication; but in some groups of languages it does not occur at all. Other forms of modification of stem also occur.

Indian languages tend to express ideas with much graphic detail in regard to localization and form, although other determining elements which Indo-European languages require may be absent. Those languages are, therefore, not so well adapted to generalized statements as to lively description. The power to form abstract ideas is nevertheless not lacking, and the development of abstract thought would find in every one of the languages a ready means of expression. Yet, since the Indian is not given to purely abstract speculation, his abstract terms always appear in close connection with concrete thought; for instance, qualities are often expressed by nominal terms, but are never used without possessive pronouns.

According to the types of culture served by the languages we find holophrastic terms, expressing complex groups of ideas. These, however, are not due to a lack of power to classify, but are rather expressions of form of culture, single terms being intended for those ideas that are of prime importance to the people.

The differentiation of stocks into dialects shows great variation, some stocks comprising only one dialect, while others

embrace many that are mutually unintelligible. While the Eskimo have retained their language in all its minor features for centuries, that of the Salish, who are confined to a small area in the N. Pacific region, is split up into innumerable dialects. The fate of each stock is probably due as much to the morphological traits of the language itself as to the effects of its contact with other languages. Wherever abundant reduplication, phonetic changes in the stem, and strong phonetic modifications in composition occur, changes seem to be more rapid than where grammatical processes are based on simple laws of composition. Contact with other languages has had a far-reaching effect through assimilation of syntactic structure and, to a certain extent, of phonetic type. There is, however, no historical proof of the change of any Indian language since the time of the discovery comparable with that of the language of England between the 10th and 13th centuries.

A few peculiarities of language are worth mentioning. As various parts of the population speaking modern English differ somewhat in their forms of expression, so similar variations are found in American languages. One of the frequent types of difference is that between the language of men and that of women. This difference may be one of pronunciation, as among some Eskimo tribes, or may consist in the use of different sets of imperative and declarative particles, as among the Sioux, or in other differences of vocabulary; or it may be more fundamental, due to the foreign origin of the women of the tribe. In incantations and in the formal speeches of priests and shamans a peculiar vocabulary is sometimes used, containing many archaic and symbolic terms. See *Chinook jargon*, *Linguistic families*, *Sign language*. (F. B.)

Languntennenk. A village of Moravian Delawares founded in 1770 on Beaver r., probably near the present Darlington, in Beaver co., Pa., by Indians who removed from Lawunkhannek. In 1773 they abandoned the village and joined the other Moravians on the Muskingum, in Ohio. The missionaries called it Friedenstadt, q. v. (J. M.)

Langundowi-Oteey.—Loskiel (1794) cited by Rupp, West. Pa., 47, 1846. **Languntennenk.**—Crantz cited, *ibid.*, 47. **Languntouenunk.**—Zeisberger (1791), *Diary*, II, 234, 1885. **Langoutoutenenk.**—Crantz, *Hist. of the Brethren*, 594, 1780.

Lansing Man. The name given to a partially dismembered human skeleton found in 1902 under 20 ft of undisturbed silt, 70 ft from the face of the Missouri r. bluff, near Lansing, Kans. The remains lay partly under a large limestone slab imbedded in a mass of talus at the foot of a shale and limestone cliff, against which the silt was deposited. The position of

the bones denoted an intentional burial, and not the accidental lodgment of a body at this point. In the walls of the excavations made in the formation there was no indication of slipping, sliding, caving, or prolonged surface wash from a higher level; no indication of direct wind or wave action, except a narrow thin layer of dark clay at one part; no distinct lamination, stratification, or assortment of material; no indication that vegetation had ever taken hold; in short, no evidence that the mass of silt was due to any other process than a slow, steady accumulation, mainly or wholly in quiet water. There were small patches of gravel at irregular intervals, many snail shells, angular fragments of limestone up to 3 or 4 in. thick, small scraps of shale, a few pebbles of glacial drift origin, and a number of pieces of charcoal, some with fractures and angles not in the least worn.

LANSING SKULL, FRONTAL VIEW

These facts point to an upbuilding partly by wash, partly by winds, partly by creep from the adjacent hills, and partly by sediment from the Missouri. It appears that this deposit could have accumulated within a comparatively short period. Even allowing the utmost limit of time that can be reasonably claimed, namely, that the river has cut its way from the top of the silt deposit to its present grade, the time necessary for accomplishing this will fall very far within the period that must have elapsed since the existing to-

SECTION OF BLUFF SHOWING LOCATION OF SKELETON
(a, ENTRANCE TO TUNNEL; b, POSITION OF REMAINS)

pography was created, in part at least by streams that could not begin their work until after glacial floods had ceased to act. The bones themselves do not favor the theory of great antiquity for the remains. According to Hrdlicka (*Am. Anthropol.*, v, 323, 1903) the skull and bones are not perceptibly fossilized, and are practically identical in their physical characters with the crania and bones of some of the historic Indians of the general region. The cranium has been placed for safe-keeping in the U. S. National

Museum by its owner, Mr M. C. Long, of Kansas City, Mo.

As the geologists who examined the site when the deep trenches cut by the Bureau of American Ethnology were open hold widely divergent opinions with respect to the age of the formation inclosing the remains, some of them considering it true loess, further investigation is necessary ere the question of antiquity can be finally settled.

Of the geologists referred to, those favoring great antiquity are Upham (Am. Antiq., xxiv, 413, 1902, and Am. Geologist, Sept. 1902, 135); Winchell (Am. Geologist, Sept. 1902); Williston (Science, Aug. 1, 1902), and Erasmus Haworth, Professor of Geology, University of Kansas. Those favoring a comparatively recent date are Chamberlin (Jour. of Geology, x, 745, 1903); Holmes (Smithson. Rep., 455, 1902); R. D. Salisbury, Professor of Geology, University of Chicago; Samuel Calvin, State Geologist of Iowa, and Gerard Fowke, who conducted the excavations on the site for the Bureau of American Ethnology. See *Antiquity, Archeology*.

(G. F.)

Lapapu. A former Miwok village on Tuolumne r., Tuolumne co., Cal.

La-pap-poo.—Johnson in Schoolcraft, Ind. Tribes, iv, 407, 1854. **Lapappu.**—Latham in Trans. Philol. Soc. Lond., 81, 1856.

La Piche. A small rancheria, probably Luiseno, on Potrero res., 75 m. from Mission Tule River agency, s. Cal. With La Joya the population was officially given as 225 in 1903. Cf. *Apeche*.

La Posta (Span.; probably here meaning 'post station'). A reservation of 238.88 acres of unpatented desert land occupied by 19 so-called Mission Indians, situated 170 m. from Mission Tule River agency, s. Cal.

Lappawinze ('getting provisions'). A Delaware chief—one of those who were induced to sign at Philadelphia the treaty of 1737, known as the "walking purchase," confirming the treaty of 1686, which granted to the whites land extending from Neshaming cr. as far as a man could walk in a day and a half. When the survey was made under this stipulation the governor of Pennsylvania had a road built inland and employed a trained runner, a proceeding that the Delawares denounced as a fraud. See Pa. Archives, 1st ser., i, 541, 1852; Thompson, Inquiry into Alienation of Delaware and Shawnee Inds., 69, 1759.

La Prairie. The first mission village of the Catholic Iroquois, established in 1668 on the s. bank of the St Lawrence, at La Prairie, La Prairie co., Quebec. The first occupants were chiefly Oneida with other Iroquois, but it soon contained members of all the neighboring Iroquoian and Algonquian tribes. The Mohawk, from

Caughnawaga, N. Y., finally gained the leading position and their language came into vogue in the settlement. In 1676 the Indians removed to Portage r., a few miles distant, and built the present Caughnawaga, q. v.

Laprairie.—Shea, Cath. Miss., 262, 1855. **La Prairie de la Madelaine.**—Frontenac (1674) in N. Y. Doc. Col. Hist., ix, 116, 1855. **Laprairie de la Madelaine.**—Letter of 1756, *ibid.*, x, 480, 1858. **La Prairie de la Madelaine.**—La Barre (1683), *ibid.*, ix, 202, 1855. **Saint-François-Xavier-des-Prés.**—Jes. Rel., III, index, 1858. **St. Francis Xavier des Prés.**—Shea, Cath. Miss., 268, 1855 (mission name). **St. François Xavier à Laprairie de la Magdeleine.**—Jes. Rel. (1675) quoted by Shea, Cath. Miss., 304, 1855. **S. Xavier des Praiz.**—Jes. Rel. 1671, 12, 1858. **S. Xavier des Prez.**—*Ibid.*, 1672, 16, 1858.

Laptambif. Probably a band of the Calapooya proper. In 1877 the name was borne by "Old Ben," at Grande Ronde res., Oreg., who came from Mohawk r., Lane co.

LAPPAWINZE. (MCKENNEY AND HALL)

Laptambif.—Gatschet, Atfalati MS., B. A. E., 368, 1877. **Long-tongue-buff.**—Ross, Adventures, 236, 1849.

La Punta (Span.: 'the point'). A former Diegueño rancheria near San Diego, s. Cal.—Ortega (1775) quoted by Bancroft, Hist. Cal., i, 253, 1884.

Lapwai. A Nez Percé band formerly living near the mouth of Lapwai cr., Idaho, now under the Lapwai school superintendent.

Las Flores (Span.: 'the flowers'). A former Luiseno village in n. San Diego co., Cal. (Hayes, 1850, quoted by Bancroft, Nat. Races, i, 460, 1882). Arguello (H. R. Ex. Doc. 76, 34th Cong., 3d sess., 117, 1857) mentions a Las Flores as a Diegueño pueblo in San Diego co., established after the secularization act of 1834, which may be the same.

Las Mulas (Span.: 'the mules'). A rancheria near the presidio of La Bahía and the mission of Espíritu Santo de Zúñiga on the lower Rio San Antonio, Tex., in 1785, at which date it had only 5 inhabitants (Bancroft, No. Mex. States, I, 659, 1886), who were probably of Karankawan affinity.

Lassik (*Las'-sik*, the name of their last chief). A people of the Athapascan family formerly occupying a portion of main Eel r., Cal., and its e. tributaries, Van Duzen, Larrabee, and Dobbin crs., together with the headwaters of Mad r. They had for neighbors toward the s. the Athapascan inhabitants of the valley of Mad r. and Redwood cr.; toward the e. the Wintun of Southfork of Trinity r.; toward the s. the Wailaki, from whom they were separated by Kekawaka cr.; toward the w. the Sinkine on Southfork of Eel r. They occupied their regular village sites along the streams only in winter. Their houses were conical in form, made of the bark of Douglas spruce. They had neither sweat lodges nor dance houses. The basketry was twined, but differed considerably from that of the Hupa in its decoration. Beside the methods employed elsewhere for securing deer and elk, the Lassik used to follow a fresh track until the animal, unable to feed or rest, was overtaken. They intermarried with the Wintun, to whom they were assimilated in mourning customs, etc. Powers (Cont. N. A. Ethnol., III, 121, 1877) gives the impression that the Lassik belong with the Wintun in language, but this is a mistake. Their dialect resembles the Hupa in its morphology and the Wailaki in its phonology. The majority of them perished during the first few years of the occupancy of their country by white people, a bounty being placed on their heads and the traffic in children for slaves being profitable and unrestrained. A few families of them are still living in the neighborhood of their former homes. (P. E. G.)

Latcha Hoa. Noted on the West Florida map (ca. 1775) as a Chickasaw settlement on Latcha Hoa run, an affluent of Ahoola Ihalchubba, a w. tributary of Tombigbee r., N. E. Miss.

Late-Comedu. An unidentified Dakota division, mentioned by Gale, Upper Miss., 252, 1867.

Lathakrezla. A Nataotin village on the n. side of Babine lake, Brit. Col.

Lathakrezla.—Morice in Trans. Roy. Soc. Can. 1892, 109, 1893. **Na-tal-kuz**.—Dawson in Geol. Surv. Can., 268, 1881. **Ni-to-atz**.—*Ibid.*, 278.

Laulewasikaw. See *Tenskwatawa*.

Law. See *Government*.

Lawilvan. A Kawia village in Cahuilla valley, s. Cal.; perhaps identical with Alamo Bonito, q. v.

Alamo.—Barrows, Ethno.—Bot. Coahuilla Ind., 34, 1900. **La-wil-van**.—*Ibid.* **Si-vel**.—*Ibid.*

Lawokla. A Chöctaw clan of the Kushapokla phratry.—Morgan, Anc. Soc., 162, 1877.

Lawunkhannek. A village of Moravian Delawares established in 1769 on Allegheny r., above Franklin, Venango co., Pa. In 1770 the inhabitants removed to Languntennenk. It seems probable that the village contained also some Seneca. (J. M.)

Lauanakanuck.—Day, Penn., 172, 1843. **Lawanakanuck**.—Loskiel (1794) quoted by Day, Penn., 644, 1843. **Lawenakanuck**.—*Ibid.*, 102-3. **Lawunahannek**.—Loskiel (1794) quoted by Rupp West. Pa., app., 353, 1846. **Lawunakhannek**.—Crantz, Hist. of the Brethren, 594, 1780. **Lawunkhannek**.—Loskiel (1794) quoted by Rupp, op. cit., 46.

Laycayamu. A former Chumashan village near Santa Barbara, Cal.—Taylor in Cal. Farmer, Apr. 24, 1863.

League. See *Confederation, Government*.

Lean Bear. An unidentified Dakota band formerly living below L. Traverse, Minn. (Ind. Aff. Rep. 1859, 102, 1860); apparently named after the chief.

Leatherlips (native name *Shä'teiaron'-hiä'*, 'Two clouds of equal size.'—Hewitt). A Huron (Wyandot) chief of the Sandusky tribe of Ohio who, in Aug., 1795, signed the treaty of Greenville in behalf of his people. His honorable character and friendship for the whites inflamed the jealousy of Tecumseh, who ruthlessly ordered him to be killed on the plea that he was a wizard, Tecumseh's fanaticism being so overmastering that he assigned the execution of Shateiaronhia to another Huron chief named Roundhead. He was apprised of his condemnation by his brother, who was sent to him with a piece of bark on which a tomahawk was drawn as a token of his death. The execution took place near his camp on the Scioto, about 14 m. n. of Columbus, in the summer of 1810, there being present a number of white men, including a justice of the peace, who made an effort to save the life of the accused, but without success. He was tomahawked by a fellow tribesman while kneeling beside his grave, after having chanted a death song. The Wyandot Club of Columbus, Ohio, in 1888, erected a granite monument to Shateiaronhia in a park surrounded by a stone wall, including the spot where he died. See Curry in Ohio Archaeol. and Hist. Quar., XII, no. 1, 1906; Drake, Life of Tecumseh, 1852; Heckewelder, Hist. Ind. Nat., 1876; Howe, Hist. Coll. Ohio, I, 611, 1898.

Leatherwood (Leatherwood's Town). A former Cherokee settlement at or near the present Leatherwood village in the n. part of Franklin co., N. E. Ga. The name was probably that of a prominent chief or mixed-blood. (J. M.)

Ledyanoprolivskoe. Perhaps a town of the Tlingit, locality not given, numbering 200 in 1835.

Laydanoprovdevskie.—Elliott, Cond. Aff. Alaska, 227, 1875 (transliterated from Veniaminoff). *Ledyanoprolivskoe*.—Veniaminoff, Zapiski, II, pt. III, 29, 1840.

Leekwinai (*Lee-kwin-ä-v'*, 'snapping turtle'). A subclan of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Leelahs. Supposed to be a division of the Kalapooian family; not identified.—Slocum in H. R. Rep. 101, 25th Cong., 3d sess., 42, 1839.

Leeshtelosh (*Leesh-te-losh*). Probably a Kalapooian band, said to have lived near the headwaters of Willamette r., Oreg.—Hunter, Captivity, 73, 1823.

Legal status. The act of July 22, 1790, contains the earliest provision relating to intercourse with Indians. By it any offense against the person or property of a peaceable and friendly Indian was made punishable in the same manner as if the act were committed against a white inhabitant (U. S. Stat., I, 138). The act of May 19, 1796, empowered the President to arrest within the limits of any state or district an Indian guilty of theft, outrage, or murder (*ibid.*, 472). During the next 20 years the idea that the Indian tribes were distinct nations, having their own form of government and power to conduct their social polity, took form and was distinctly stated in treaties. The Indians' right to punish intruding white settlers was stipulated in treaties made with the Cherokee, Chickasaw, Chipewewa, Choctaw, Creeks, Delawares, Ottawa, Potawatomi, Shawnee, Hurons, and other tribes. The act of Mar. 3, 1817, provided that the power given to the President under the act of May 19, 1796, "should not be so construed as to affect any treaty in force between the United States and any Indian nation or to extend to any offense committed by one Indian against another within any Indian boundary." The courts decided that for the United States to assume "to exercise a general jurisdiction over Indian countries within a state is unconstitutional and of no effect." The crime of murder charged against a white man for killing another white man in the Cherokee country, within the state of Tennessee, it was decided, could not be punished in the courts of the United States (U. S. v. Bailey, McLean's C. Cls. Rep., I, 234). In the case of the Cherokee Nation v. the State of Georgia (5 Peters, 1) the court states: "It may well be doubted whether those tribes which reside within the acknowledged boundaries of the United States can with strict accuracy be denominated foreign nations. They may more correctly, perhaps, be denominated domestic dependent nations. They occupy a territory to which we assert title independent of their will, which must take effect in point of possession when

their right of possession ceases; meanwhile they are in a state of pupillage. Their relation to the United States resembles that of a ward to his guardian." This confused relation—neither dependence nor independence—led to many difficulties. From time to time appeals were made by the Indian Commissioner for the extension of the laws of the land over Indian reservations. On Mar. 3, 1885, an act was passed extending the law over Indians to a limited extent (U. S. Stat. L., XXIII, 385): "The right of the Indians to the reservation ordinarily occupied by them is that of occupancy alone. They have the right to apply to their own use and benefit the entire products of the reservation, whether the result of their own labor or of natural growth, so they do not commit waste. If the lands in a state of nature are not in a condition for profitable use they may be made so; if desired for the purpose of agriculture, they may be cleared of their timber to such an extent as may be reasonable under the circumstances, and the surplus timber taken off by the Indians . . . may be sold by them. The Indians may also cut dead and fallen timber and sell the surplus not needed for their own use; they may cut growing timber for fuel and for use upon the reservation; they may open mines and quarry stone for the purpose of obtaining fuel and building material; they may cut hay for the use of the live stock, and may sell any surplus . . . They may not, however, cut growing timber, open mines, quarry stone, etc., to obtain lumber, coal, building material, etc., solely for the purpose of sale or speculation. In short, what a tenant for life may do upon lands of a remainder-man the Indians may do on their reservations (Instructions, sec. 262, 1880; U. S. v. Cook, 19 Wallace, 591; acts of Mar. 22 and 31, 1882; Rep. Sec. Interior, May 19, 1882, 9636; Reg. Ind. Dept., sec. 525, 526, 527).

By their treaty of July 31, 1855, the Chippewa of Michigan were permitted to receive the title to lands taken up under the act of Aug. 4, 1854 (U. S. Stat., x, 574) without "actual occupancy or residence," in order to dispose of them (*ibid.*, xi, 627). An act promulgated in Mar., 1875, permitted Indians to homestead land (*ibid.*, xviii, 240). Those Indians who had availed themselves of this act were by the act of July 4, 1884, to receive from the Government a trust patent, to the effect that the United States would hold the land for 25 years, and at the expiration of that period convey it in fee to the Indian who had made entry or to his heirs "free of all charge or incumbrance whatever" (*ibid.*, xxiii, 961). "Indians can not preempt public lands and can not re-

move disability by declaring their intention to become citizens . . . Citizenship is not requisite for the ordinary purchase of public lands. . . . It may be done by a foreign alien and a fortiori by a mere denizen or domestic alien, such as the Indians" (Opinions Atty. Gen., vii, 753).

The severalty act of Feb. 8, 1887, made the allotted Indian subject to all the laws, civil and criminal, of the state in which he resides, and also conferred upon him citizenship. The courts have decided that those who come under the provision of this act are no longer wards or subject to the restrictive control of the Commissioner of Indian Affairs or his agents.

Members of the following tribes can become citizens by treaty stipulation: Delaware, Kaskaskia, Kickapoo, Miami, Munsee, Ottawa, Peoria, Piankashaw, Sioux, Stockbridge, Wea, Winnebago living in Minnesota, and the Pueblo Indians and othersedentary tribes that come under the treaty of Guadalupe Hidalgo and the Gadsden Purchase. The status of mixed bloods, the court has decided, is determined by that of the father (Ex parte Reynold: 5 Dillon, 394).

The courts of Kansas and Washington have held that "an Indian sustaining tribal relations is as capable of entering into binding contracts as any other alien," except that said contract shall not touch his lands, annuities, or statute benefits. "The right to contract necessarily draws after it the liability to be sued; therefore upon contracts of the aforesaid character Indians can sue and be sued" (Washington Rep., i, 325). The state court has jurisdiction of the person and property of Indians, except while such Indians or property are actually situated on a reserve excluded from the jurisdiction of the state (Kansas Rep., xii, 28). See *Agency system, Civilization, Education, Governmental policy, Land tenure, Office of Indian Affairs, Reservations, Treaties*. (A. C. F.)

Legends. See *Mythology*.

Leggings. See *Clothing*.

Le Have (named from Cap de la Hève, France). A Micmac village in 1760 near the mouth of Mersey r., about Lunenburg, in Lunenburg co., Nova Scotia. **Chachippé.**—Jes. Rel. (1610-13), i, 153, 1896. **La Have.**—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 115-116, 1809. **La Heve.**—Doc. of 1746 in N. Y. Doc. Col. Hist., x, 70, 1858. **Le Have.**—Present name of adjacent island. **Port de la Hève.**—Lescarbot (1609) quoted by Thwaites, Jes. Rel., i, 153, note, 1896.

Lehigh. A variety of coal. From Lehigh, the name of a tributary of the Delaware and a county in Pennsylvania, which represents *lechaw* in the Lenape (Delaware) dialect, signifying 'fork of a river.' (A. F. C.)

Lehu. The Seed-grass clan of the Ala (Horn) phratry of the Hopi.

Le'-hü wūn-wū.—Fewkes in Am. Anthropol., vii, 401, 1894 (*wūn-wū*='clan').

Leimin. A Yuit Eskimo village on the Siberian coast between East cape and St Lawrence bay.—Krause in Deutsche Geog. Blätt., v, 80, map, 1882.

Leitli ('the junction'). The village of the Tanotenne situated at the confluence of Stuart and Fraser rs., Brit. Col.

Fort George.—Morice, Notes on W. Dénés, 25, 1893. **teitli.**—*Ibid.* **teit'li.**—Morice in Trans. Roy. Soc. Can. 1892, 109, 1893.

Lejagatcah. An unidentified band of the Miniconjou Teton Sioux.

Leja-ga-dat-cah.—Culbertson in Smithsonian Rep. 1850, 142, 1851.

Lekwiltok. A large Kwakiutl tribe living between Knight and Butle inlets, Brit. Col. They were divided into five septs: Wiwekæ, Hahamatsets or Walitsum, Kueha, Tlaaluis, and Komenok. The last is now extinct. The towns are Husam, Tsakwalooin, Tsaiyeuk, and Tatapowis. Total pop. 218 in 1904.

Acolta.—Poole, Queen Charlotte Ids., 289, 1872. **Enclataws.**—Can. Ind. Aff., 142, 1879. **Euclataw.**—*Ibid.*, 92, 1876. **Euclitus.**—Downie in Mayne, Brit. Col., 448, 1861. **Laek-que-libla.**—Kane, Wand. in N. A., app., 1859. **Laich-kwil-tacks.**—Can. Ind. Aff., 142, 1879. **Leequeeltoch.**—Scouler in Jour. Ethnol. Soc. Lond., i, 233, 1848. **Lékwiłta.**—Boas in Mem. Am. Mus. Nat. Hist., v, pt. 2, 318, 1902. **Lé'kwiltok.**—Boas in 6th Rep. N. W. Tribes Can., 55, 1890 (Salish name). **Lé'kwiltok.**—Boas in Petermanns Mitt., pt. 5, 131, 1887. **Liengk-wiltak.**—Can. Ind. Aff. for 1901, pt. 2, 166. **Liew-kwiltah.**—Can. Ind. Aff. 1895, 362, 1896. **Li-kwiltah.**—Tolmie and Dawson, Vocabs, Brit. Col., 118B, 1884. **Likwiltok.**—*Ibid.* **Neauquitough.**—Brit. Col. map, 1872. **Ne-cul-ta.**—Kane, Wand. in N. A., app., 1859. **Saich-koioe-tachs.**—Can. Ind. Aff. 1883, 190, 1884. **Saich-kwil-tach.**—Sproat, *Ibid.*, 145, 1879. **Tah-cultus.**—Lord, Natur. in Brit. Col., i, 155, 1866. **Toungletats.**—Smet, Oregon Miss., 56, 1847. **Ucaltas.**—Anderson quoted by Gibbs in Hist. Mag., 74, 1863. **Uchulta.**—Taylor in Cal. Farmer, July 19, 1862. **Ucle-ta.**—Mayne, Brit. Col., 74, 1862. **Ucle-tah.**—*Ibid.*, 243. **Ucetates.**—Keane in Stanford, Compend., 541, 1875. **Ucetates.**—St John, Sea of Mts., ii, 16, 1877. **Uculta.**—Dawson in Trans. Roy. Soc. Can. for 1887, sec. ii, 74. **Ucultas.**—Lennard and Barrett, Brit. Col., 36, 1862. **Yookilta.**—Tolmie and Dawson, Vocabs, Brit. Col., 118B, 1884. **Yukletas.**—Grant in Jour. Roy. Geog. Soc., 293, 1857. **Yukwiltas.**—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Lelaka (*Lé'lacha*). An ancestor of a Nakomgilisala gens who also gave his name to the gens.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Lelek (*Lele'k*). A Songish band residing at Codboro bay, s. end of Vancouver id.—Boas in 6th Rep. N. W. Tribes Can., 17, 1890.

Lelengtu. The Flute clan of the Lengya (Flute) phratry of the Hopi.

Lelenü winwü.—Fewkes in 19th Rep. B. A. E., 583, 1901 (*winwü*='clan'). **Lenbaki.**—Stephen in 8th Rep. B. A. E., 18, 1891.

Lelawagiyala (*Lé'lawagila* 'the heaven makers': mythical name of the raven). A gens of the Tsawatenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Lelawayou (*Le-le-wa'-you*, 'birds' cry'). A subclan of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Lelikian. A former Nishinam village in the valley of Bear r., N. Cal.

Láylekeean.—Powers in Overland Mo., XII, 22, 1874.
Lé-li-ki-an.—Powers in Cont. N. A. Ethnol., III, 316, 1877.

Leliotu. The Tiny Ant (*sp. incog.*) clan of the Ala (Horn) phratry of the Hopi.
Le-li-o-tú wūn-wū.—Fewkes in Am. Anthropol., VII, 401, 1894 (*wūn-wū* = 'clan').

Lema. One of the more important of the old villages of the Pomo; situated in Knight's valley, about 4 m. N. W. of Hopland, Mendocino co., Cal. (S. A. B.)
Lá-ma.—Powers in Cont. N. A. Ethnol., III, 172, 1877. **Lema.**—S. A. Barrett, inf'n, 1906.

Lemaltcha (*Le-mal-tcha*). A former Lummi village on Waldron id., Wash. (Gibbs, Clallam and Lummi, 39, 1863). The name is the same as Lilmalche, q. v.

Lemitas. Mentioned by Villa-Señor (Theatro Am., pt. 2, 412, 1748) as a wild tribe hostile to the people of New Mexico. Possibly the local name of an Apache band or of its chief.

Lenahuon. One of the tribes formerly occupying "the country from Buena Vista and Carises lakes and Kern r. to the Sierra Nevada and Coast range," Cal. (Barbour (1852) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 256, 1853). By treaty of June 10, 1851, these tribes reserved a tract between Tejon pass and Kern r., and ceded the remainder of their lands to the United States. Kroeber suggests that the name is perhaps intended for Sanahuon, Spanish orthography of Sanakhwin, a Yokuts and perhaps other Indian corruption of *San Joaquin* or a similar Spanish geographical term.

Lenahuon.—Barbour, op. cit. **Senahuow.**—Royce in 18th Rep. B. A. E., 782, 1899.

Lenape stone. A perforated tablet of shale, of the form usually classed as gorgets, found by Bernard Hansell while plowing on his father's farm half a mile E. of Doylestown, Bucks co., Pa. A large fragment of the stone was found on the surface of the ground in the spring of 1872; and a second, the smaller piece, was picked up in 1881. The length is nearly 4½ in., and the width varies from 1½ to 1¾ in. The surface on both sides has been smoothed, and on one side are carved in outline the figure of an elephant or mammoth, two rude human forms, the sun, and a number of unidentified objects. On the other are outline figures of a turtle, fishes, a bird, a pipe, etc. There are two round perforations in the tablet, about a third of its length from the ends. The specimen may possibly be genuine Indian workmanship, but the carving is apparently modern and executed after the stone had been broken. For further notice consult Mercer, The Lenape Stone, or the Indian and the Mammoth, 1885. See *Gorgets, Perforated Tablets*. (C. T.)

Lengya. The Flute phratry of the Hopi, consisting of the Flute (*Lelengtu*), Blue-flute (*Shakwalengya*), Drab-flute (*Masi-*

lengya), and Mountain-sheep (*Pangwa*) clans, and probably others. They claim to have come from a region in S. Arizona called Palatkwabi and from Little Colorado r., and after their arrival in Tusayan joined the Ala (Horn) phratry, forming the Ala-Lengya group.—Fewkes in 19th Rep. B. A. E., 583, 587, 1901.

Leña.—Fewkes, *ibid.*

Lengyanobi ('high place of the Flute clans'). The legendary home of the Lengya (Flute) clans of the Hopi, now a large ruin on a mesa about 30 m. N. E. of Walpi, N. E. Ariz. The village is said to have been abandoned just before the arrival of the Spaniards (1540), its inhabitants becoming amalgamated with the Hopi. The people of Lengyanobi at that time belonged to two consolidated phratries, the Ala (Horn) and the Lengya (Flute), of which the latter built the village. (J. W. F.)

Lentes. Said to have been a former pueblo of the Tigua, but more likely a village established for the benefit of Genizaros (q. v.), on the W. bank of the Rio Grande near Los Lunas, N. Mex. By 1850 the natives had become completely "Mexicanized."

Lentes.—Simpson in Rep. Sec. War, 143, 1850.

Lentis.—Calhoun in Schoolcraft, Ind. Tribes, III, 633, 1853. **Leunis.**—Schoolcraft, *ibid.*, I, 519, 1851.

Leutis.—*Ibid.* **Los Lentis.**—Lane (1854), *ibid.*, V, 689, 1855.

Lesamaiti. A former village of the Awani about one-fifth of a mile from Notomidula, in Yosemite valley, Mariposa co., Cal.

Laysamite.—Powers in Overland Mo., x, 333, 1874.

Le-sam'-ai-ti.—Powers in Cont. N. A. Ethnol., III, 365, 1877.

Leschi. A Nisqualli chief, prominent in the war which involved all the tribes of Washington and adjacent regions in 1855-58, and commonly known as the Yakima war. While Kamaikakan (q. v.) headed the Yakima and their confederates E. of the mountains, Leschi took command W. of the Cascades, particularly about Puget sd. His most notable exploit was an attack on the new town of Seattle, Jan. 29, 1856, at the head of about 1,000 warriors of several tribes. The assailants were driven off by means of a naval battery upon a vessel in the harbor. On the collapse of the outbreak Leschi fled to the Yakima, who, having already submitted, refused him shelter except as a slave. A reward was offered for his capture, and being thus outlawed, he was at last treacherously seized by two of his own men in Nov., 1856, and delivered to the civil authorities, by whom, after a long legal contest, he was condemned and hanged, Feb. 19, 1857. See Bancroft, Hist. Wash., 1890. (J. M.)

Les Noire Indians. Mentioned by Say (Long, Exped. Rocky Mts., II, lxxxiv, 1823) as a people known to the Hidatsa,

who applied to them the name At-te-shu-pe-sha-loh-pan-ga, which Matthews states is probably an attempt to give the Hidatsa word for Black-lodge people.

Letaiyo. The Gray-fox clan of the Kokop (Firewood) phratry of the Hopi.

Letaiyo wiñwü.—Fewkes in 19th Rep. B. A. E., 584, 1900 (*wiñwü* = 'clan'). **Le-tai-yo wuñ-wü.**—Fewkes in Am. Anthropol., VII, 403, 1894.

Leush (*Le'-ush*). A former Modoc settlement on the N. side of Tule (Rhett) lake, s. w. Oreg.—Gatschet in Cont. N. A. Ethnol., II, pt. I, xxxii, 1890.

Lewistown. A village of Shawnee and Seneca, taking its name from the Shawnee chief Captain Lewis, formerly near the site of the present Lewistown, Logan co., Ohio, on lands granted to them by treaty of Sept. 29, 1817, but sold under the provisions of the Lewistown treaty of July 20, 1831. See Howe, Hist. Coll. Oh'io, II, 102, 1896; Royce in 18th Rep. B. A. E., 686, 732, 1899. (J. M.)

Leyva. Located on various early maps apparently as a settlement of New Mexico, but in reality designed to indicate a point supposed to have been reached by Francisco Leyva Bonilla on an unauthorized expedition, about 1594-96, to the Quivira region, by whose inhabitants he and his party were killed. See Bancroft, Ariz. and N. Mex., 108, 1889; D'Anville, map Am. Sept., 1746; Squier in Am. Review, II, 520, 1848.

Leyza.—Gülsfeldt, Charte America, 1797 (misprint).

Lgalai-uhl-lanas (*L'gala'-igut lā'nas*). A former subdivision of the Gitins of Skidegate, Queen Charlotte ids., Brit. Col., a family of the Eagle clan of the Haida. It has long been extinct. The name may mean 'people of the town of Lgalai.'—Swanton, Cont. Haida, 274, 1905.

Liam. A former Chumashan village in Ventura co., Cal.—Taylor in Cal. Farmer, July 24, 1863.

Liyawas. An unidentified tribe which participated in the Yakima treaty of 1855, and was placed on Yakima res., Wash. It may have been a division of the Yakima. (L. F.)

Li-ay-was.—U. S. Ind. Treat. (1855), II, 524, 1903.

Siyawas.—Ind. Aff. Rep., 110, 1874.

Libantone. A former village, presumably Costanoan, connected with Dolores mission, San Francisco, Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Lichtenau (Ger.: 'pastures of light'). A village of Moravian Delawares on the E. side of the Muskingum, 3 m. below Coshocton, Coshocton co., Ohio, established in 1776. Some time afterward it was abandoned by the Moravians on account of the hostilities of the Hurons and other warlike tribes, and reoccupied, under the name of Indaochaie, by hostile Indians, until destroyed by the Americans in 1781. See *Missions*. (J. M.)

Indaochaie.—Butterfield, Washington-Irvine Corr., 52, 1882. **Lichtenau.**—Loskiel, Hist. Miss. United Breth., pt. 3, 110, 1794; Heckewelder in Trans. Am. Philos. Soc., n. s., IV, 390, 1834.

Lichtenfels (Ger.: 'rocks of light'). A Moravian mission station in w. Greenland.—Crantz, Hist. Greenland, I, map, 1767.

Lick Town. A Shawnee (?) village, in 1776-82, on upper Scioto r., Ohio, probably near Circleville. The true name was probably Piqua or Chillicothe. (J. M.)

Lick Town.—Hutchins, map in Smith, Bouquet's Exped., 1766. **Salt Lick Town.**—Smith, *ibid.*, 67 (not Salt Lick Town on Mahoning cr.).

Lidlipa. A former Nishinam village in the valley of Bear r., N. Cal.

Lidlepa.—Powers in Overland Mo., XII, 22, 1874. **Lid'-li-pa.**—Powers in Cont. N. A. Ethnol., III, 316, 1877.

Liebigstag. An Ahtena village on the left bank of Copper r., Alaska, lat. 61° 57', lon. 145° 45'; named from its chief.

Liebigstag's village.—Allen, Rep. on Alaska, 120, 1887.

Liesnoi (Russian: 'woody'). A Kaniagmiut village on Wood id., near Kodiak, Alaska; pop. 157 in 1880, 120 in 1890.

Lesnoi.—Eleventh Census, Alaska, 75, 1893.

Lesnova.—Petroff in 10th Census, Alaska, map, 1884. **Tanignagnjut.**—Holmberg, Ethnog. Skizz., map, 1855.

Liggigé. A village connected with Concho, or Loreto, 2 leagues N. of that mission, which was situated opposite the island of Carmen, lat. 26°, Lower California (Picolo in Stöcklein, Neue Welt-Bott, no. 72, 35, 1726). Not to be confounded with Ligu, about 14 leagues farther S.

Lightning stick. See *Bull-roarer*.

Lignite. See *Jet*.

Likatuit. A division of the Olamentke, occupying a part of Marin co., Cal. Their last great chief was Marin (q. v.), according to Powers, and they were among the Indians under San Rafael mission.

Lecatuit.—Bancroft, Nat. Races, I, 453, 1874. **Likat'-u-it.**—Powers in Cont. N. A. Ethnol., III, 195, 1877.

Lilibেকে. A Chumashan village on one of the Santa Barbara ids., Cal., probably Santa Rosa, in 1542.

Lilibique.—Cabrillo, Narr. (1542), in Smith, Colee. Doc. Fla., 186, 1857. **Lilibique.**—Taylor in Cal. Farmer, Apr. 17, 1863.

Lillooet ('wild onion'). One of the 4 principal Salish tribes in the interior of British Columbia, situated on Fraser r. around the mouths of Cayoosh cr. and Bridge r., on Seton and Anderson lakes, and southward from them to Harrison lake. Pop. 978 in 1904. Bands: Anderson Lake, Bridge River, Cayoosh Creek (2), Douglas, Enias, Fountain, Kanlax, Lillooet (2), Mission, Niciat, Pemberton Meadows, and Schloss. It is sometimes divided into the Lower Lillooet, including the Douglas and Pemberton Meadows bands, and the Upper Lillooet, including all the rest. Consult Teit, Lillooet Indians, in Mem. Am. Mus. Nat. Hist., III, pt. 5, 1906. (J. R. S.)

Chin Nation.—Schoolcraft, Ind. Tribes, v. 173, 1855.
Lillooet.—Can. Ind. Aff. Rep. 1889, 115, 1890.
Lilowat.—Gibbs in Cont. N. A. Ethnol., I, 263, 1877.
Loquilt Indians.—Mayne, Brit. Col., 299, 1862.
Sciavthamuk.—Brit. Col. map, Ind. Aff., Victoria,

LILLOOET MAN. (AM. MUS. NAT. HIST.)

1872. **Stā'tlum-oo.**—Dawson in Trans. Roy. Soc. Can., sec. II, 5, 1891. **Stetlum.**—Survey map, Hydr. Office, U. S. N., 1882. **Stiat-limuh.**—Mackay quoted by Dawson in Trans. Roy. Soc. Can. for 1891, sec.

LILLOOET WOMAN. (AM. MUS. NAT. HIST.)

II, 5. **Stla'tliumh.**—Boas in 5th Rep. N. W. Tribes Can., 10, 1889 (own name). **Stla'tliumq.**—Boas in 6th Rep. N. W. Tribes Can., 80, 1890. **Stla'tliumq.**—Boas as quoted by Dawson in Trans. Roy. Soc. Can. for 1891, sec. II, 5.

Lillooet. A band and town of Upper Lillooet on Fraser r., where it is joined by Cayoosh cr. The Canadian Reports on Indian Affairs give two divisions of the Lillooet band, of which one numbered 57 and the other 6 in 1904.

Lillooet.—Can. Ind. Aff. Rep., pt. II, 72, 1902. **SETL.**—Teit in Mem. Am. Mus. Nat. Hist., II, 172, 1900 (native name of the village of Lillooet).

Lilmalche (*Lemā'ttca*). One of the two Cowichan tribes on Thetis id., off the s. e. coast of Vancouver id.; pop. 19 in 1904. Given as a band of the Penelakut (q. v.) by the Canadian Indian Office.

Lemā'ttca.—Boas, MS., B. A. E., 1887. **Lilmalche.**—Can. Ind. Aff. for 1901, pt. II, 164. **Ll-mache.**—*Ibid.*, 1897, 362, 1898. **Ll-mal-che.**—*Ibid.*, 1898, 417. **Lilmalches.**—*Ibid.*, 1883, 190.

Lilshiknom. A branch of the Yuki who lived on the w. bank of Eel r., a short distance below the junction of Middle fork and South Eel r., N. Cal. (A. L. K.)

Lincoln Island. An island in Penobscot r., Me., near Lincoln, 37 m. above Oldtown, occupied by about 30 Penobscot Indians.

Lincoln.—So called by the whites. **Madnāguk.**—Gatschet, Penobscot MS., B. A. E., 1887 (Penobscot name).

Linguistic families. The linguistic diversity of the Indians is perhaps the most remarkable feature of American ethnology. While certain general features, such, for example, as incorporation, use of verb and pronoun, employment of generic particles, use of nongrammatical genders, etc., usually occur, most of the languages of the New World exhibit analogies justifying their classification, on psychic grounds at least, as a single family of speech; nevertheless, the comparison of their vocabularies leads to the recognition of the existence of a large number of linguistic families or stocks having lexically no resemblance to or connection with each other. Boas (Science, XXIII, 644, 1906) is of the opinion, however, that, considering the enormous differences in the psychological bases of morphology in American Indian languages, such psychic unity in one family of speech can hardly be predicated with confidence. Also, it may be that the Paleo-Asiatic languages of Siberia may perhaps belong with the American tongues. This linguistic diversity was perceived and commented on by some of the early Spanish historians and other writers on American subjects, such as Hervas, Barton, and Adelung; but the "founder of systematic philology relating to the North American Indians" (in the words of Powell) was Albert Gallatin, whose Synopsis of the Indian Tribes within the United States East of the Rocky Mountains and in the British and Russian Possessions in North America was published in 1836 in the Transactions and Collections of the American Antiquarian Society (Archæologia Americana, II), of Worcester, Mass. The progress of research and of linguistic cartography since Gallatin's

time is sketched in Powell's epoch-marking article, "Indian linguistic families" (7th Rep. B. A. E., 1-142, 1891), with accompanying map, embodying the author's own researches and those of the experts of the Bureau. Taking vocabulary and dictionary as the factors of discrimination, Powell recognized, *n.* of the Mexican boundary, the following 58 "distinct linguistic families" or stocks: Adaizan (since determined to be a part of the Caddoan), Algonquian, Athapascan, Attacapan, Beothukan, Caddoan, Chimakuan, Chimarikan, Chimmesyan, Chinookan, Chitimachan, Chumashan, Coahuiltecan, Copehan, Costanoan, Eskimauan, Esselenian, Iroquoian, Kalapooian, Karankawan, Keresan, Kiowan, Kitunahan, Koluschan, Kulanapan, Kusan, Lutumian, Mariposan, Moquelumnan, Muskogean, Natchesan, Palaihnihan (since consolidated with Shastan), Piman, Pujunan, Quoratean, Salinan, Salishan, Sasteian (Shastan), Shahaptian, Shoshonean, Siouan, Skittagetan, Takilman, Tanoan, Timuquanan, Tonikan, Tonkawan, Uchean, Wailatpuan, Wakashan, Washoan, Weitspekan, Wishoskan, Yakonan, Yanan, Yukian, Yuman, Zuñian. This is the working list for students of American languages, and, with minor variations, will remain the authoritative document on the classification of American linguistic stocks. (See Kroeber in *Am. Anthropol.*, vii, 570-93, 1905, where modifications are proposed.) A revised edition of the map, containing the results of the latest investigations, appears in this Handbook.

A marked feature of the distribution of Indian linguistic families *n.* of Mexico is the presence or former existence in what are now the states of California and Oregon of more than one-third of the total number, while some other stocks (Algonquian, Athapascan, Siouan, Shoshonean, Eskimauan) have a very wide distribution. The Pacific coast contrasts with the Atlantic by reason of the multiplicity of its linguistic families as compared with the few on the eastern littoral. The distribution of the Eskimauan family along the whole Arctic coast from Newfoundland to Bering sea, and beyond it in a portion of Asia, is remarkable. The Uchean and the extinct Beothuk of Newfoundland are really the only small families of the Atlantic slope. The Catawba and related tribes in the Carolinas prove the earlier possession of that country by the primitive Siouan, whose migrations were generally westward. The Tuscarora and related tribes of Virginia and southward show the wanderings of the Iroquois, as do the Navaho and Apache those of the Athapascans.

In 1896 McGee (*The Smithsonian Inst.*, 1846-96, 377, 1897) estimated the number of tribes belonging to the various linguistic families as follows: Algonquian 36, Athapascan 53, Attacapan 2, Beothukan 1, Caddoan 9, Chimakuan 2, Chimarikan 2, Chimmesyan (Tsimshian) 8, Chinookan 11, Chitimachan 1, Chumashan 6, Coahuiltecan 22, Copehan 22, Costanoan 5, Eskimauan 70, Esselenian 1, Iroquoian 13, Kalapooian 8, Karankawan 1, Keresan 17, Kiowan 1, Kitunahan 4, Koluschan 12, Kulanapan 30, Kusan 4, Lutumian 4, Mariposan 24, Moquelumnan 35, Muskogean 9, Nahuatlán ?, Natchesan 2, Palaihnihan 8, Piman 7, Pujunan 26, Quoratean 3, Salinan 2, Salishan 64, Sasteian 1, Serian 3, Shahaptian 7, Shoshonean 12, Siouan 68, Skittagetan (Haida) 17, Takilman 1, Tanoan 14, Timuquanan 60, Tonikan 3, Tonkawan 1, Uchean 1, Wailatpuan 2, Wakashan (Kwakiutl-Nootka) 37, Washoan 1, Weitspekan 6, Wishoskan 3, Yakonan 4, Yanan 1, Yukian 5, Yuman 9, Zuñian 1. Of this large number of tribes, some are of little importance, while others may be local divisions and not tribes in the proper sense of the term. This is true, for example, of two at least of the divisions of the Kitunahan family, and of not a few of the Algonquian "tribes." Some families, it will be seen, consist of but a single tribe: Beothukan, Chitimachan, Esselenian, Karankawan, Kiowan, Takilman, Tonkawan, Uchean, Washoan, Yanan, Zuñian; but of these a few (such as Zuñian and Kiowan) are very important. The amount of linguistic variation serving as an index of tribal division varies considerably, and in many cases, especially with the older writers, the delimitations are very imperfect. Researches now in progress will doubtless elucidate some of these points.

Besides the classification noted above, based on vocabulary, certain others are possible which take into consideration grammatical peculiarities, etc., common to several linguistic families. Thus, groups may be distinguished within the 56 families of speech, embracing two or more of them which seem to be grammatically or syntactically related, or in both these respects, while in nowise resembling each other in lexical content. From considerations of this sort Boas finds resemblances between several of the *n. w.* Pacific coast families. Grammatically, the Koluschan (Tlingit) and Skittagetan (Haida) and the Athapascan seem to be distantly related, and some lexical coincidences have been noted. The occurrence of pronominal gender in the Salishan and Chimakuan stocks is thought by Boas to be of great importance as suggesting relationship between these two families. The

Wakashan (Kwakiutl-Nootka), Salishan, and Chimakuan stocks all possess suffix-nouns and inflected adverbs, similarities pointing, perhaps, to a common source (Mem. Internat. Cong. Anthropol., 339-346, 1894). The languages of California have recently been carefully studied by Dixon and Kroeber (Am. Anthropol., v, 1-26, 1903; vii, 213-17, 1905; viii, no. 4, 1906), and the former has determined, as Gatschet had suspected, that the Sastean and Palaihnihan (Achomawi) constitute one stock, to which the Bureau of American Ethnology applies the name Shastan. A similar coalescence of the Costanoan and Moquelumnan stocks is also suggested. Taking other than lexical elements into consideration, the languages of California (exclusive of the Yuman and Yanan) may be arranged in three groups: Southwestern, or Chumash type; northwestern, or Yurok type; central, or Maidu type—the last being by far the most numerous. This systematization for California rests on pronominal incorporation, syntactical cases, etc.

Morphological peculiarities, possessed in common, according to some authorities, indicate a relationship between Piman, Nahuatlan (Mexican), and Shoshonean. The Kitunahan of N. Idaho and S. E. British Columbia has some structural characteristics resembling those of the Shoshonean, particularly the method of object-noun incorporation. Gatschet, in 1891 (Karank. Inds., 1891), suggested the probability of some relationship between the Karankawan, Pakawa (Coahuiltecan), and Tonkawan. It is nearly certain also, as supposed by Brinton, that Natchez is a Muskogean dialect. The now extinct Beothukan of Newfoundland has been suspected of having been a mixed and much distorted dialect of one or other of the great linguistic families of the region adjacent. Brinton (Amer. Race, 68, 1891) was of opinion that "the general morphology seems somewhat more akin to Eskimo than to Algonkin examples."

The amount of material extant in the languages of the various stocks, as well as the literature about them, is in nowise uniform. Some, like the Beothukan, Esselenian, and Karankawan, are utterly extinct, and but small vocabularies of them have been preserved. Of others, who still survive in limited or decreasing numbers, like the Chimakuan, Chimarikan, Chitimachan, Chumashan, Coahuiltecan, Costanoan, Kalapooian, Mariposan, Moquelumnan, Natchesan, Pujunan, Salinan, Shastan, Takilman, Washoan, Weitspekan, Yakonan, and Yukian, the vocabularies and texts collected are not very extensive or conclusive. The Algonquian, Athapaskan, Eskimauan, Iroquoian, Muskogean, Salishan, Skittagetan, Koluschan, and Siouan

families are represented by many grammars, dictionaries, and native texts, both published and in manuscript. The extent and value of these materials may be seen from the bibliographies of the late J. C. Pilling, of the Algonquian, Athapaskan, Chinookan, Eskimauan, Iroquoian, Muskogean, Salishan, Siouan, and Wakashan stocks, published as bulletins by the Bureau of American Ethnology. (A. F. C.)

Linoklusa (*Lin-ok-lü'-sha*, 'crayfish'). A clan of the Kushapokla phratry of the Choctaw.—Morgan, Anc. Soc., 162, 1877.

Lintanre ('flat sides of dogs'). A clan or division of the Thlingchadinne living N. and E. of the N. arm of Great Slave lake, in Mackenzie Ter., Canada. **Klin-tchanpe**.—Petitot, Autour du lac des Esclaves, 363, 1891. **Klin-tchanpèh**.—Ibid., 303. **Lin-tchanrè**.—Petitot in Bul. Soc. de Géog. Paris, chart, 1875. **Lin-tchanpè**.—Petitot, MS. vocab., B. A. E., 1865. **Lin-tchanpè**.—Petitot, Dict. Dènè-Dindjé, xx, 1876. **Plats-côtés-de-chien du fort Rae**.—Ibid.

Lintja. A former Chumashan village near Santa Barbara, Cal.

Lintja.—Taylor in Cal. Farmer, Apr. 24, 1863. **Luijta**.—Bancroft, Nat. Races, i, 459, 1874 (misquoted from Taylor).

Lions Creek. The local name for a former band of Salish under Fraser superintendency, Brit. Col.

Leon's Creek.—Can. Ind. Aff. for 1878, 78. **Lion's Creek**.—Ibid., 1879, 138.

Lipajenne. A subdivision of the Lipan. **Lipajen-nè**.—Orozco y Berra, Geog., 59, 1864. **Lip-anjen-nè**.—Escudero, Not. Estad. de Chihuahua, 212, 1834.

Lipan (adapted from *Ipa-n'de*, apparently a personal name; *n'de* = 'people'). An Apache tribe, designating themselves Náizhan ('ours,' 'our kind'), which at various periods of the 18th and 19th centuries roamed from the lower Rio Grande in New Mexico and Mexico eastward through Texas to the Gulf coast, gaining a livelihood by depredations against other tribes and especially against the white settlements of Texas and Mexico. The name has probably been employed to include other Apache groups of the southern plains, such as the Mescaleros and the Kiowa Apache. The Franciscan mission of San Sabá (q. v.) was established among the Lipan in Texas in 1757, but it was soon destroyed by their enemies, the Comanche and Wichita. In 1761-62 the missions of San Lorenzo and Candelaria were also founded, but these met like fate in 1767. In 1805 the Lipan were reported to be divided into 3 bands, numbering 300, 350, and 100 men, respectively; this apparently gave rise to their subdivision by Orozco y Berra in 1864 into the Lipajenne, Lipanes de Arriba, and Lipanes de Abajo. In 1839, under chief Castro, they sided with the Texans against the Comanche (Schoolcraft, Thirty Years, 642, 1851); they were always friends with their congeners, the Mescaleros, and with

the Tonkawa after 1855, but were enemies of the Jicarillas and the Ute. Between 1845 and 1856 they suffered severely in the Texan wars, the design of which was the extermination of the Indians within the Texas border. Most of them were driven into Coahuila, Mexico, where they resided in the Santa Rosa mts. with Kickapoo and other refugee Indians from the United States, until the 19 survivors were taken to N. W. Chihuahua, in Oct., 1903, whence they were brought to the United States about the beginning of 1905 and placed on the Mescalero res., N. Mex., where they now (1905) number about 25 and are making more rapid progress toward civilization than their Indian neighbors. In addition there are one or two Lipan numbered with the 54 Tonkawa under the Ponca, Pawnee, and Oto agency, Oakland res., Okla., and a few with the Kiowa Apache in the same territory, making the total population about 35. The Lipan resemble the other Apache in all important characteristics. They were often known under the designation Caney, Chanze, etc., the French form of the Caddo collective name (*K'ā'ntsi*) for the eastern Apache tribes. (F. W. H.)

Apaches Lipanes.—MS., 1791-92, in Tex. State archives. **A-tagú.**—Mooney, field notes, B. A. E., 1897 ('timber Apache': Kiowa name, used also for Mescaleros). **Cancers.**—Escudero, Not. Lond., 102, 1856. **Sypanes.**—Robin Voy. Louisiane, III, 15, 1807. **Tu-tsan-nde.**—Mooney, field notes, B. A. E., 1897 ('great water people': Mescalero name). **Ūxul.**—Gatschet, Tonkawa MS., B. A. E. (Tonkawa name for a spiral shell: applied to the Lipan on account of their coiled hair). **Yabipais Lipan.**—Garcés (1776), Diary, 404, 1900. **Yabipai-Lipanes.**—Garcés (1776) cited by Bandelier in Arch. Inst. Papers, III, 114, 1890.

Lipanes de Abajo (Span.: 'lower Lipans'). A former branch of the Lipan. **Lipanes de Abajo.**—Orozco y Berra, Geog., 59, 1864. **Lipanes del Sur.**—Doc. of 1828 in Bol. Soc. Geog. Mex., 504, 1869.

Lipanes de Arriba (Span.: 'upper Lipans'). A former branch of the Lipan. **Lipanes de Arriba.**—Orozco y Berra, Geog., 59, 1864. **Lipanes del Norte.**—Doc. of 1828 in Bol. Soc. Geog. Mex., 504, 1869.

Lipillanes. Mentioned as a division of the Llaneros. See *Gohlkahin*, *Guhlkaände*, *Kwahari*.

Lipallanes.—Escudero, Not. de Chihuahua, 226, 1834. **Lipillanes.**—Orozco y Berra, Geog., 59, 1864. **Lipiyanes.**—Escudero, Not. de Sonora y Sinaloa, 68, 1849.

Lipook. A former Chumashan village near Purísima mission, Santa Barbara co., Cal.—Taylor in Cal. Farmer, May 4, 1860.

Lisahuato. A former Chumashan village near Purísima mission, Santa Barbara co., Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Lisichi. A former Chumashan village in Ventura co., Cal.—Taylor in Cal. Farmer, July 24, 1863.

Lisuchu. A former Chumashan village near Santa Barbara Cal. (Taylor in Cal. Farmer, Apr. 24, 1863). Perhaps identical with the preceding.

Lithenca. A former village, presumably Costanoan, connected with San Juan Bautista mission, Cal.—Taylor in Cal. Farmer, Nov. 25, 1860.

Littefutchi. A former Upper Creek town at the head of Canoe cr., in St Clair co., Ala. It was burned by Col. Dyer, Oct. 29, 1813.

Littafatchee.—Royce in 18th Rep. B. A. E., Ala. map, 1899. **Littafatchee.**—Flint, Ind. Wars, 175, 1833. **Littefutchee.**—Pickett, Hist. Ala., II, 294, 1851. **Olitifar.**—Juan de la Vandra (1579) in Smith, Coloc. Doc. Fla., I, 18, 1857.

Little Abraham. See *Abraham*.

Little Carpenter. See *Attakullacalla*.

Little Crow (*Chetañ wakan mañi*, 'the sacred pigeon-hawk which comes walking'). A chief of the Kaposia division of the Mdewakanton Sioux, which, under his father Little Crow, as under his grand-

father Little Thunder, had its headquarters at Kaposia (Kapoza), a village on the w. bank of the Mississippi, 10 or 12 m. below the mouth of Minnesota r. In 1846, while intoxicated, he was shot and wounded by his brother; this caused him to try to discourage drinking among his followers, and probably induced him the same year to ask of the Indian agent at Ft Snelling a missionary to reside at his village, as a result of which Rev. Thomas S. Williamson was sent. Although Little Crow was a signer (under the name of Ta-o-ya-te-duta, 'His people are red') of the treaty of Mendota, Minn., Aug. 5, 1851, by which the Dakota ceded most of their Minnesota lands to the United States, he used the treaty as a means of creating dissatisfaction and ultimately in bringing on the disastrous outbreak of 1862. In this outbreak, during which more than a thousand settlers were killed, Little Crow was the recognized leader. Subsequent to the cession of 1851 several bands, including the Kaposia, were removed to a large reservation on the upper Minnesota, where they dwelt peacefully, professing genuine friendship for the white settlers, until they rose suddenly on Aug. 18, 1862, and spreading themselves along the frontier for more than 200 m., killed white men, women, and children without mercy. Little Crow led the fierce though unsuccessful attack on Ft Ridgely, Minn., Aug. 20-22, 1862, in

ther w. He was killed by a settler named Lampson, July 3, 1863, at a place n. of Hutchinson, McLeod co., Minn. He was probably nearly 60 years of age at the time of his death. Little Crow had had

LITTLE CROW THE YOUNGER

6 wives and 22 children. Consult Minn. Hist. Soc. Coll., iii, 1880; iv, 1876; Bryant and Murch, History of the Great Massacre by the Sioux Indians in 1862; Indian Affairs Report for 1863; Neill, Hist. Minn., 1858. (c. t.)

Little Forks. A Chippewa res. formerly on Tittibawassee r., in lower Michigan, sold in 1837.

Little Munsee Town. A former Munsee village a few miles e. of Anderson, Madison co., Ind., on land sold in 1818 (Royce in 1st Rep. B. A. E., map, 1881). It may be identical with Kiktheswemud.

Little Osage Village. A former Osage village on Osage res., Okla., on the w. bank of Neosho r.—McCoy (1837) in Sen. Doc. 120, 25th Cong., 2d sess., map, 952, 1838.

Little Raven (*Hósa*, 'Young Crow'). An Arapaho chief. He was first signer, for the Southern Arapaho, of the treaty of Fort Wise, Colo., Feb. 18, 1861. At a later period he took part with the allied Arapaho and Cheyenne in the war along the Kansas border, but joined in the treaty of Medicine Lodge, Kans., in 1867, by which these tribes agreed to go on a reservation, after which treaty all his effort was consistently directed toward keeping his people at peace with the Government and leading them to civili-

LITTLE CROW THE ELDER. (McKENNEY AND HALL)

which he was slightly wounded. After the defeat of the hostiles at Wood lake, Sept. 23, 1862, by Gen. Sibley, Little Crow with 200 or 300 followers fled to the protection of his kindred on the plains far-

zation. Through his influence the body of the Arapaho remained at peace with the whites when their allies, the Cheyenne and Kiowa, went on the warpath in 1874-75. Little Raven died at Cantonment, Okla., in the winter of 1889, after having maintained for 20 years a reputation as the leader of the progressive element. He was succeeded by Nawat, 'Left-hand'. (J. M.)

Little Rock Band. Mentioned by Parker (Minn. Handbk., 141, 1857) as a Sisseton division. Not identified.

Little Rock Village. A Potawatomi village in N. E. Illinois in 1832 (Camp Tippecanoe treaty (1832) in U. S. Ind. Treat., 698, 1873); situated on the N. bank of Kankakee r., about the boundary of Kankakee and Will cos.

Little Thunder. A Brulé Sioux chief during the middle of the 19th century. He was present at the Grattan massacre near Ft Laramie in 1854, and assumed command when chief Singing Bear was killed; he also took part in the battle of Ash Hollow, Nebr., with Gen. Harney, in 1855, and continued chief until his death some years later. Physically Little Thunder was a giant, fully six feet six inches tall and large in proportion, and is spoken of as of superior intelligence.

Little Turtle (*Michikinikwa*). A chief of the Miami tribe, born at his village on Eel r., Ind., in 1752. His father was a Miami chief and his mother a Mahican; hence, according to the Indian rule, he was a Mahican and received no advantage from his father's rank—that is, he was not chief by descent. However, his talents having attracted the notice of his countrymen, he was made chief of the Miami while a comparatively young man. Little Turtle was the principal leader of the Indian forces that defeated Gen. Harmar on Miami r. in Oct. 1790, and Gen. St Clair, at St. Marys, Nov. 4, 1791, and he and Bluejacket were among the foremost leaders of the Indians in their conflict with Gen. Wayne's army in 1795, although he had urged the Indians to make peace with this "chief who never sleeps." After their defeat by the whites he joined in the treaty at Greenville, Ohio, Aug. 3, 1795, remarking, as he signed it, "I am the last to sign it, and I will be the last to break it." Faithful to this promise he remained passive and counseled peace on the part of his people until his death at Ft Wayne, July 14, 1812. Early in 1797, accompanied by Capt. Wells, his brother-in-law, he visited President Washington at Philadelphia, where he met Count Volney and Gen. Kosciuszko, the latter presenting him with his own pair of elegantly mounted pistols. Although Tecumseh endeavored to draw him away from his peaceful relations with the whites, his

efforts were in vain. Little Turtle's Indian name as signed to different treaties varies as follows: Greenville, Aug. 3, 1795, Meshekunnoghquoh; Ft Wayne, June 7, 1803, Mesekunnoghquoh; Vincennes, Aug. 21, 1805, Mashekakahquoh; Ft Wayne, Sept. 30, 1809, Meshekenoghqua. Consult Drake, Inds. N. Am., 1880; Brice, Hist. Fort Wayne, 1868; Appleton's Cyclop. Am. Biog., III, 1894. (C. T.)

Little Turtle's Village. A former Miami village on Eel r., Ind., about 20 m. N. W. of Ft Wayne; named after the celebrated chief, Little Turtle, who was born there in 1752 and made it his home. It was in existence as late as 1812, the year of Little Turtle's death.

LITTLE TURTLE. (FROM A PAINTING BY STUART IN 1797, SINCE DESTROYED)

Lituya. A name given by Niblack to a Tlingit division living about Lituya bay, S. E. Alaska. They are properly a part of the Huna, q. v.

Lituya.—Niblack, Coast Ind. of Alaska, chart I, 1889. **Ltuiskoe.**—Veniaminoff, Zapiski, II, pt. III, 29, 1840 (a town with 200 pop.). **Shltuja.**—Holmberg, Ethnogr. Skizz., map, 1855.

Livangebra. A former rancheria, presumably Costanoan, connected with Dolores mission, San Francisco, Cal.

Livangebra.—Taylor in Cal. Farmer, Oct. 18, 1861. **Livangelva.**—Ibid. (mentioned as distinct, though seemingly identical). **Luianeglua.**—Ibid. (also mentioned as distinct).

Liwaito (Wintun: = *liwai*, 'waving?'). A former village of the Patwin subfamily of the Wintun, on the site of the present town of Winters, Yolo co., Cal. The Wintun applied the name also to Putah cr. (S. A. B.)

Lewytos.—Powers in Overland Mo., XIII, 542, 1874. **Liguaytoy.**—Bancroft, Hist. Cal., IV, 71, 1886.

Li-wai'-to.—Powers in *Cont. N. A. Ethnol.*, III, 218, 1877.

Liyam (*Li'-yām*). A former Chumashan village on Santa Cruz id., Cal.—Henshaw, *Buenaventura MS. vocab.*, B. A. E., 1884.

Llagas (Span.: 'wounds'). A former group of Cocopa rancherías on the w. side of the Rio Colorado, just below tidewater, about lat. 32°, in N. E. Lower California. Visited and so named by Fray Francisco Garcés, Sept. 17, 1771, which is given as the day of the wounds or sores of St. Francis Assisi.—Garcés (1775), *Diary*, 188, 1900.

Llaneros (Span.: 'plainsmen'). A term indefinitely applied to the former wild tribes of the Staked plains of w. Texas and E. New Mexico, including the Kwahari Comanche (q. v.) and parts of the Jicarillas and the Mescaleros. See *Gohlkahin*, *Guhlkainde*.

Llano. A Papago village in s. Arizona; pop. 70 in 1858.

Del Llano.—Bailey in *Ind. Aff. Rep.*, 208, 1858.

Lochchiocha. A former Seminole town 60 m. E. of Apalachicola, and near Oklokee, Fla.; Okoskaamathla was chief in 1823.—H. R. Ex. Doc. 74 (1823), 19th Cong., 1st sess., 26, 1826.

Locobo. A Costanoan village situated in 1819 within 10 m. of Santa Cruz mission, Cal.—Taylor in *Cal. Farmer*, Apr. 5, 1860.

Locust Necktown. A village in Maryland, occupied in 1792 by that band of the Nanticoke known as Wiwash, q. v.

Locust Neck.—Mt Johnson conf. (1755) in *N. Y. Doc. Col. Hist.*, VI, 983, 1855. **Locust Necktown.**—Gallatin in *Trans. Am. Antiq. Soc.*, II, 53, 1836.

Lodges. See *Earth lodge*, *Grass lodge*, *Habitations*.

Lodges without horses. A former Crow band.—Culbertson in *Smithson. Rep.* 1850, 144, 1851.

Lofka. A former Kaiyukhotana settlement on the w. bank of Yukon r., Alaska. The place probably consisted of only a single hut occupied by an Indian named Lofka, at which the earliest American travelers on the Yukon used to spend the night.

Lofka's barrabara.—Dall, *Alaska*, 211, 1870.

Logan. A synonym of *pokeloken*, in use in Maine, and probably a corruption of that word. (A. F. C.)

Logan, John (?) (native name *Tah-gah-jute*, lit. 'his eyelashes stick out or above,' as if looking through or over something, and so could well mean 'spying.'—Hewitt). A noted Indian chief, born at Shamokin, Pa., about 1725. His father, called by the English Shikellamy and by the Moravians Shikellemus, according to Crantz (*Hist. of the Brethren*, 269, 1780), was a white man, taken prisoner in Canada and reared among the Indians, and was later made chief of all or a part of the Indians residing at Shamokin. He is

usually spoken of as a Cayuga chief, while others call him a Mingo, the common term in the colonial period for those Iroquois living beyond their proper boundaries. Bartram says that he was a Frenchman born in Montreal, but as a prisoner was adopted by the Oneida. The same authority further states that his son (presumably Tah-gah-jute) took the name Logan from his friend James Logan, who was secretary and for a time acting governor of Pennsylvania. He lived a number of years near Reedsville, Pa., supporting himself and family by hunting and the sale of dressed skins. Later, about 1770, he removed to the Ohio and was living at the mouth of Beaver cr. when visited by Heckewelder in 1772; and in 1774, about the time of the Dunmore war, he resided at Old Chillicothe, now Westfall, on the w. bank of Sciota r., Pickaway co., Ohio. In 1774 a number of Indians, including some of Logan's relatives, were brutally massacred at the mouth of Yellow cr. by settlers on the Ohio, in retaliation, it was claimed, for the murder of white emigrants, and for a time Michael Cresap was supposed to be the leader in this massacre. There has been much controversy as to the facts in this case. A careful study of the evidence given by Jefferson in the appendix to his *Notes on Virginia*, by J. J. Jacob in his *Biographical Sketch of the Life of Michael Cresap*, and by Brantz Mayer in his *Tah-gah-jute*, leads to the conclusion that the massacre of the Indians was by Greathouse and a party of white settlers, and that Cresap was not present; that Logan's sister, and possibly some other relative, were killed; that his wife was not murdered, and that he had no children. It seems evident, however, that Logan was brought in some way to believe that Cresap led the attack. For several months Logan made war on the border settlements, perpetrating fearful barbarities upon men, women, and children. In the celebrated speech attributed to him he boasts of these murders. This supposed speech was probably only a memorandum written down from his statement and afterward read before the treaty meeting at Chillicothe, at which Logan was not present. His intemperate habits, begun about the time of his removal to the Ohio, grew upon him, and after the return of peace compelled him to forbear the use of the tomahawk he became an abandoned sot. On his return from a trip to Detroit in 1780 he was killed by his nephew, apparently in a quarrel. His wife, who was a Shawnee woman, survived him, but no children resulted from their union. A monument to Logan stands in Fair Hill cemetery, near Auburn, N. Y. (c. t.)

Consult Doddridge, Settlement and Indian Wars, 1821; Howe, Hist. Coll. Ohio, II, 402, 1896; Jacob, Sketch of Cresap, 1866; Jefferson, Notes on Va., 1802, 1804; Kercheval, Hist. of the Valley of Va., 1833; Loudon, Narratives, II, 1811; Mayer, Tah-gah-jute or Logan, 1867; Stevenson in W. Va. Hist. Mag., III, 144, 1903.

Logstown. An important village formerly on the right bank of Ohio r., about 14 m. below Pittsburg, in Allegheny co., Pa. It was originally settled by Shawnee and Delawares prior to 1748, and in the following year was reported by Céloron to contain 40 cabins occupied by Iroquois, Shawnee, "Loups" (Delaware, Munsee, and Mahican), as well as Iroquois from Sault St Louis and Lake of Two Mountains, with some Nipissing, Abnaki, and Ottawa. Father Bonsecamps, of the same expedition, estimated the number of cabins at 80, and says "we called it Chiningué, from its vicinity to a river of that name" (Mag. Am. Hist., II, 142, 1878); but it should not be confounded with the Shenango some distance n., on Beaver cr. Croghan in 1765 (Thwaites, Early West. Trav., I, 127, 1904) speaks of Logstown as an old settlement of the Shawnee. It was abandoned about 1750 and reoccupied by a mixed population of Mingo (chiefly Seneca), Mahican, Ottawa, and others in the English interest. About this time a new village was built with the aid of the French on a hill overlooking the old site. Logstown was an important trading rendezvous, one of Croghan's trading houses being established there; it was also the home of Half-King (Scrunityatha or Monakatua-tha) in 1753-54 (although it is stated that his dwelling was situated a few miles away), and was a customary stopping place of colonial officers and emissaries, as Weiser, Gist, Croghan, Céloron, and Washington, the latter remaining here five days while on his way to Venango and Le Boeuf in 1753, and again making it a resting place while on his way to Kanawha r. in 1770. Logstown was also the scene of the treaty between the Virginia commissioners and the Indians of this section in 1752. According to the author of Western Navigation (76, 1814), and Cuming (Western Tour, 80, 1810), there was also a settlement known as Logstown on the opposite side of the Ohio. It was abandoned by the Indians in 1758, immediately after the capture of Ft Du Quesne. In addition to the authorities cited, see Darlington, Christopher Gist's Journals, 1893; Pa. Col. Rec., v, 348 et seq., 1851.

(C. T.)

Chiningué.—Céloron (1749) in Mag. Am. Hist., II, 143, 1878. **Chinnigné.**—Thwaites, Early West. Trav., I, 24, note, 1904. **Lockstown.**—Narr. of Marie Le Roy and Barbara Leininger (1759) transl. in Pa. Mag. Hist. and Biog., XXIX, no. 116, 412, 1905. **Loggs Town.**—Dinwiddie Papers (1751), I, 6, 1883.

Logg's Town.—Hamilton (1749) in N. Y. Doc. Col. Hist., VI, 531, 1855. **Loggs-town.**—Bouquet (1764), Exped., 45, 1868. **Loggs Town.**—Croghan (1748) in N. Y. Doc. Col. Hist., VII, 267, 1856. **Log's Town.**—French officer (1749), *ibid.*, IV, 533, 1855. **Shenango.**—Thwaites, *op. cit.*

Lohastahni (*Lo-hás-táh'-ni*). A former Chumashan village in Ventura co., Cal.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Lohim. A small Shoshonean band living on Willow cr., a s. affluent of the Columbia, in s. Oregon, and probably belonging to the Mono-Paviotso group. They have never made a treaty with the Government and are generally spoken of as renegades belonging to the Umatilla res. (Mooney). In 1870 their number was reported as 114, but the name has not appeared in recent official reports. Ross mistook them for Nez Percés.

Lo-him.—Mooney in 14th Rep. B. A. E., 743, 1896. **Low-him.**—Ross, Fur Hunters, I, 186, 1855. **Willow Creek Indians.**—Mooney, *op. cit.*

Lojos. A former Chumashan village in Ventura co., Cal.—Taylor in Cal. Farmer, July 24, 1863.

Loka ('reeds' [*phragmites*]). A Navaho clan.

Loka.—Matthews in Jour. Am. Folk-lore, III, 104, 1890. **Lókaine.**—*Ibid.* (*dine* = 'people'). **Lóka-dine.**—Matthews, Navaho Legends, 31, 1897 (*dine* = 'people').

Loko. A tribe, probably Paviotso, formerly living on or near Carson r., w. Nev.—Holeman in Ind. Aff. Rep., 152, 1852.

Loksachumpa. A former Seminole town at the head of St Johns r., Fla. **Lokpoka Takoosa Hajo** was chief in 1823.—H. R. Ex. Doc. 74 (1823), 19th Cong., 1st sess., 27, 1826.

Lolanko (the Sinkine name of Bull cr.). A part of the Sinkine dwelling on Bull and Salmon crs., tributaries of the s. fork of Eel r., Humboldt co., Cal.

Flonk'-o.—Powers in Cont. N. A. Ethnol., III, 113, 1877 (so called by whites). **Loloncooks.**—Bancroft, Nat. Races, I, 447, 1874. **Lo-lon'-kuik.**—Powers, *op. cit.* **Loolanko.**—A. L. Kroeber, *inf'n*, 1903 (Bull. cr.).

Lolsel (*lol* 'tobacco', *sel* 'people'). The name applied to the Wintun living in and about Long valley, e. of Clear lake, Lake co., Cal. Their territory extended w. to the summit of the mountain range just e. of Clear lake and was there contiguous to Pomo territory.

(S. A. B.)

Lold'-la.—Powers in Cont. N. A. Ethnol., III, 219, 1877. **Loldas.**—Powers in Overland Mo., XIII, 542, 1874. **Lol'-sel.**—Powers in Cont. N. A. Ethnol., III, 219, 1877.

Lomavik. A Kuskwogmiut Eskimo village on the left bank of Kuskokwim r., Alaska; pop. 81 in 1880, 53 in 1900.

Lomavigamute.—Nelson (1879) quoted by Baker, Geog. Dict. Alaska, 269, 1902. **Lomavik.**—Baker, *ibid.* **Lomawigamute.**—Petroff, Rep. on Alaska, 53, 1881.

Lompoc. A former Chumashan village near Purísima mission, Santa Barbara co., Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Lone Wolf (*Gáipä'go*). A Kiowa chief, one of the 9 signers of the treaty of Medicine Lodge, Kans., in 1867, by which the

Kiowa first agreed to be placed on a reservation. In 1872 he headed a delegation to Washington. The killing of his son by the Texans in 1873 embittered him against the whites, and in the outbreak of the following year he was the recognized leader of the hostile part of the tribe. On the surrender in the spring of 1875 he, with a number of others, was sent to military confinement at Ft Marion, Fla., where they remained 3 years. He died in 1879, shortly after his return, and was succeeded by his adopted son, of the same name, who still retains authority in the tribe.

(J. M.)

LONE WOLF

Longe. An abbreviation in common use among English-speaking people of the region of the great lakes, particularly the n. shore of L. Ontario, for *maskalonge*, a variant of *maskinonge* (q. v.). The form *lunge* represents another variant, *muskelunge*. The name is applied also to the Great Lake trout (*Salvelinus namaycush*). See *Mackinaw*. (A. F. C.)

Long Island (*Amäye'li-günähi'ta*, from *ämäye'li* 'island', *günähi'ta* 'long'). A former Cherokee town at the Long id. in Tennessee r., on the Tennessee-Georgia line. It was settled in 1782 by Cherokee who espoused the British cause in the Revolutionary war, and was known as one of the Chickamauga towns. It was destroyed in the fall of 1794. See Royce in 5th Rep. B. A. E., map, 1887; Mooney in 19th Rep. B. A. E., 508, 526, 1900.

(J. M.)

Long Lake. A former Chippewa village on Long lake, in Bayfield co., n. Wis.—Warren (1852) in Minn. Hist. Soc. Coll., v, 191, 1885.

Long Lake. A Chippewa band on Long lake, n. of L. Superior, between Nipegon lake and Pic r., Ontario; pop. 311 in 1884, 341 in 1904.

Long Sioux. The chief of one of the Dakota bands not brought into Ft Peck agency, Mont., in 1872 (H. R. Ex. Doc. 96, 42d Cong., 3d sess., 5, 1873). It had 28 tipis. Not identified.

Long Tail. In 1854 a Shawnee chief of this name ruled a band at "Long Tail's settlement" in Johnson co., Kans.—Washington treaty (1854) in U. S. Ind. Treat., 795, 1873.

Longushharkarto (*Long-ush-har-kar'-to*, 'brush log'). A sub-branch of the Delawares (q. v.).—Morgan, *Anc. Soc.*, 172, 1877.

Lookout Mountain Town (adapted from the Cherokee *Á'táli da'ndaka'nihä*, 'mountains looking at each other'). A former Cherokee town at or near the present Trenton, Dade co., n. w. Ga. It was settled in 1782 by Cherokee who espoused the British cause in the Revolutionary war, and was known as one of the Chickamauga towns. It was destroyed in the fall of 1794.

(J. M.)

Á'táli da'ndaka'nihä.—Mooney, inf'n, 1906 (full Cherokee name). *Danda'gänü'*.—Mooney in 19th Rep. B. A. E., 514, 1900 ('Two looking at each other': Cherokee name). **Lookout Mountain**.—Doc. of 1799 quoted by Royce in 5th Rep. B. A. E., 144, 1887. **Lookout Mt. Town**.—Royce in 5th Rep. B. A. E., map, 1887. **Ottilletaraconah**.—Ballew (1789) in Am. State Papers, Ind. Aff., I, 56, 1832.

Loolego (*Lo-o-le-go*). A Yurok village on lower Klamath r., Cal., 2 m. above the fork with the Trinity. A fish dam was regularly built here.—A. L. Kroeber, inf'n, 1904.

Lopotatimni. A division of the Miwok formerly living in Eldorado or Sacramento co., Cal.

Lopototot.—Bancroft, *Nat. Races*, I, 450, 1874. **Lopotatimnes**.—Gallatin in *Trans. Am. Ethnol. Soc.*, II, 123, 1848. **Lopotatimnes**.—Hale in U. S. Expl. Exped., VI, 630, 1846. **Lopotatimnes**.—Bancroft, op. cit. (misquoted from Hale). **Sapototot**.—Ibid.

Loquasqucit. A former Wampanoag "plantation" near Pawtucket r., Providence co. (?), R. I. It was sold in 1646. **Loquasqucit**.—Deed of 1646 in R. I. Col. Rec., I, 33, 1856. **Loquasqucit**.—Ibid., 32. **Loquasqucit**.—Ibid.

Lorenzo. A former Diegueño village n. e. of San Diego, Cal.—Hayes (1850) quoted by Bancroft, *Nat. Races*, I, 458, 1882.

Loreto. A village, probably of the Tubare, on the n. bank of the s. fork of Rio del Fuerte, lat. 26° 45', lon. 107° 30', s. w. Chihuahua, Mexico.

Loreto. A Varohio village and the seat of a Spanish mission, situated n. of Chinipas valley, lat. 27° 48', lon. 108° 30', n. Sinaloa, Mexico.

Nuestra Señora de Loreto de Voragios.—Orozco y Berra, *Geog.*, 324, 1861. **Sinoyeca**.—Ibid. (native name).

Lorette. A Huron village situated 8 m. n. w. of Quebec, Canada. The present village, properly distinguished as Jeune

Lorette, is some miles distant from Ancienne Lorette, the old village, w. of and nearer to Quebec, which was abandoned for the present location after 1721. The inhabitants are a remnant of the Hurons (q. v.) who fled from their country on account of the Iroquois about 1650. After stopping on Orleans id. they removed in 1693 to Ancienne Lorette. In 1884 they numbered 289; in 1904, 455. See *Huron, Missions*.

Lorette.—German Flats conf. (1770) in N. Y. Doc. Col. Hist., VIII, 229, 1857. **Loretta.**—Jefferys, Fr. Dom., pt. 1, map, 1761. **Lorette.**—Clinton (1745) in N. Y. Doc. Col. Hist., VI, 276, 1855. **Loretto.**—Doc. of 1693, *ibid.*, IX, 557, 1855. **Pematnawiak.**—Gatschet, Penobscot MS., B. A. E., 1887 (Penobscot name).

Los Angeles. A former rancheria, inhabited apparently by both Pima Alta and Seri, on the w. bank of Rio Horcasitas, central Sonora, Mexico. It dates from early Spanish times, but is probably not now known by this name.

Angeles.—Kino, map (1702) in Stöcklein, Neue Welt-Bott, 74, 1726. **Los Angeles.**—Doc. of 1730 quoted by Bancroft, No. Mex. States, I, 513, 1884.

Los Luceros (Span.: 'the morning stars'). A small settlement situated at the site of the ancient pueblo of Pioge, on the e. bank of the Rio Grande, near Plaza del Alcalde, Rio Arriba co., N. Mex. Mentioned by Gatschet in 1879 as a pueblo of the Tewa Indians, whereas it is a Mexican village, although it may have contained at that time a few Tewa from San Juan pueblo, about 3 m. s.

Los Leuceuros.—Yarrow in Ann. Rep. Wheeler Surv., app. LL, 143, 1875. **Los Luceros.**—Gatschet in Wheeler Surv. Rep., Archaeol., VII, 417, 1879.

Lost Ten Tribes of Israel. The belief, for which no positive authority seems to exist, has long been current that in 721 B. C., Sargon, king of Assyria, the successor of Shalmaneser, carried off into captivity ten of the twelve tribes of Israel. Other deportations are attributed to Tiglath-Pileser and Shalmaneser. Not all the people were deported; nor were those who were, actually lost. Still, the assumption that they were lost has given rise to absurd theories, according to which these missing tribes have been discovered in every quarter of the globe. The most popular theories are one which identifies them with the Anglo-Saxons and another which sees their descendants in the American Indians. Father Duran in 1585 was one of the first to state explicitly that "these natives are of the ten tribes of Israel that Shalmaneser, king of the Assyrians, made prisoners and carried to Assyria." The latest variants of the theory may be met with in the present-day newspapers. Antonio de Montezinos, a Marano (secret Jew), while journeying in South America in 1641 claimed that he met savages who followed Jewish practices. This story he repeated in Holland, in 1644, to Manasseh ben Israel, who printed it in his work, *Hope of Israel*.

From it Thomas Thorowgood, in 1652, published *Digitus Dei*, in which he sought to prove that the Indians were the Jews "lost in the world for the space of near 2,000 years." From this work many subsequent writers obtained their chief arguments. This theory, however, found opponents even in the 17th century. Among these were William Wood, author of the curious *New England's Prospect* (1634); L'Estrange in *Americans no Jews* (1652); Hubbard in *History of New England* (ca. 1680). The identification of the American aborigines with the "lost ten tribes" was based on alleged identities in religions, practices, customs and habits, traditions, and languages. Adair's *History of the American Indians*, published in 1775, was based on this theory. An enthusiastic successor of Adair was Dr Elias Boudinot, whose work, *A Star in the West*; or, a Humble Attempt to Discover the Long Lost Ten Tribes of Israel, Preparatory to Their Return to Their Beloved City, Jerusalem, was published at Trenton, N. J., in 1816. Lord Kingsborough's magnificent *Antiquities of Mexico* (9 vols., 1830-48) represents a fortune spent in efforts to sustain this theory. To-day the idea crops out occasionally in pseudo-scientific works, missionary literature, etc., while the friendly interest which the Mormon church has always taken in the Indians is said to be due to this belief. Certain identities and resemblances in customs, ideas, institutions, etc., of the American Indians and the ancient Jews are pointed out by Mallery in his *Israelite and Indian: A Parallel in Planes of Culture* (Proc. A. A. A. S., XXXVIII, 287-331, 1889), though the address contains many misconceptions. It may be remarked that the Jews and the Indians have no physical characteristics in common, the two races belonging to entirely distinct types. See *Popular fallacies*.

In addition to the above works consult Neubauer in *Jewish Quarterly Review*, I, 1889; Jacobs in *Jewish Encyclopedia*, XII, 249-53, 1906. (A. F. C.)

Lotlemaga (*Łō'temaga*, 'ghost-face woman.'—Boas). The ancestor of a gens of the Nakongilisala, also applied to the gens itself.

Łō'tlemag.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Loucheux (Fr.: 'squinters'). The Kutchin speaking the dialect of the Tukuth-kutchin. This language, which resembles more nearly the Chipewyan than the intervening Etachogottine and Kawchogottine dialects, is spoken by the Tatlit-kutchin, Vuntakutchin, Kutchakutchin, Natsitkutchin, and Trotsikkutchin (Hardisty in Smithsonian. Rep. 1866, 311, 1872). The term was extended by the Hudson's Bay Co. men to include all the

Kutchin, though the Tukkuthkutchin, or they and the Tatlitkutchin together, constituted the Loucheux proper.

The Loucheux of Alaska are reported by Hardisty to have been divided into three castes, Chitsah, Tangeesatsah, and Natsingh, names which seem to signify 'fair,' 'partly swarthy,' and 'swarthy,' respectively. Those of the first caste lived principally on fish, and those of the last mentioned by hunting. They occupied different districts, and marriage between two individuals of the same caste was almost prohibited. Petitot gives the names of these bands as Etchian-Kpét, 'men of the left,' Nattseín-Kpét, 'men of the right,' and Tsendjidhaetset-Kpét, 'men of the middle.' As the children belonged to the mother's clan, but lived usually with that of the father, these people are said to have exchanged countries slowly in successive generations. The three clans or castes are now represented by the Chitsa, Tangesatsa, and Natesa. According to Strachan Jones (Smithson. Rep., op. cit., 326), this system of castes of successive rank prevailed generally among the Kutchin. For the synonymy, see *Kutchin*.

Love songs. See *Music and Musical instruments*.

Lowako ('northern (?) people'). A people mentioned in the Walum Olum record of the Delawares (Brinton, *Lenape Leg.*, 206, 1885). Rafinesque says the name refers to the Eskimo, but Brinton says it may mean any northern people.

Lowako.—Walum Olum (1833) in Brinton, *Lenape Leg.*, 206, 1885. **Lowaniwi.**—*Ibid.*, 182. **Lowanuksi.**—*Ibid.*, 198. **Lowushkis.**—Rafinesque (1833) quoted by Brinton, *ibid.*, 232.

Lower Chehalis. A collective term for the Salish tribes on lower Chehalis r. and affluents, as well as those about Grays harbor and the n. end of Shoalwater bay, Wash. It included the Satsop, Wenatchi, Whiskah, Humpulip, and other small tribes. According to Ford (*Ind. Aff. Rep.* 1857, 341, 1858) the term is properly restricted to the Grays Harbor Indians, and Gibbs confines it to those about the n. end of Shoalwater bay. See *Atsmitt*.

Artsmilsh.—Swan quoted by Mooney in 14th Rep. B. A. E., pl. lxxxviii, 1896. **Salt-water band.**—Simmons in *Ind. Aff. Rep.*, 233, 1858.

Lower Chinook. Chinookan tribes of the lower Columbia r., strictly the Chinook proper and the Clatsop, who speak one language, while all the other tribes (Upper Chinook) present marked dialectic differences. Most writers include all the tribes from the mouth of the Columbia to Willamette r. under the term.

Abei'pudin.—Gatschet, Kalapuya MS., B. A. E. (Atfalati name). **Bas-Tchinouks.**—Dufort de Mofras, *Explor. de l'Oregon*, II, 335, 1844. **Lower Chinook.**—Hale in U. S. Expl. Exped., VI, 215, 1846. **Txai-x-wá'txsh.**—Gatschet, MS., B. A. E. (Clackama name).

Lower Creeks. The name formerly applied to that part of the Creek confederacy centering on the lower Chattahoochee and its tributaries, in South Carolina and Alabama, as distinguished from the Upper Creeks on the Coosa and Tallapoosa. They included Muscogee, Hitchiti, and Yuchi. In the 18th century the terms Coweta (Kawita) and Apalachicola (Apalachicola) were often used to designate the Lower Creeks. Bartram and other authors use the term Seminole as an equivalent, but the Seminole were an offshoot of the Lower Creeks and owed no allegiance to the confederacy. According to Rivers the Lower Creeks had 10 villages with 2,406 people in 1715, but by 1733 they had lost 2 of their 10 towns, according to the statement of a Kawita chief to Oglethorpe at the Savannah council. The chief did not give the names of the 2 lost towns, but the 8 remaining ones were Apalachicola, Chiaha, Hitchiti, Kasihta, Kawita, Oconee, Osochi, and Enfaula. In 1764 (Smith, *Bouquet's Exped.*, 1766) the Lower Creeks numbered 1,180 men, representing a total population of about 4,100. In 1813, according to Hawkins (*Am. St. Papers*, Ind. Aff., I, 842, 1832), they had 14 towns on Flint and Chattahoochee rs., but in the same year (*ibid.*, 851) these had increased to 16. The Lower Creeks were frequently called Ucheesee, or Ocheesee (Ochisi), from the town of that name. According to Barton they called the Upper Creeks "uncles," and by them were called "cousins." For a list of their towns, see *Creeks*.

(A. S. G.)
Basses Rivières.—Gatschet, *inf'n* (French name for Lower Creeks). **Lower Creeks.**—Smith, *Bouquet's Exped.* 71, 1766. **Maskó'ki Hacháta.**—Gatschet, *Creek Migr. Leg.*, I, 237, 1884 (Creek name). **Ocheesee.**—Rivers, *Hist. S. C.*, 94, 1874. **Ucheesee.**—Gussefeld, *Charte der 13 Ver. Staaten*, 1784.

Lower Delaware Town. A former Delaware village on the extreme headwaters of Mohican r., 5 or 6 m. directly n. of the site of the city of Ashland, in Ashland co., Ohio.—Royce in 18th Rep. B. A. E., Ohio map, 1899.

Lower Kutenai. A division of the Kutenai living on Kootenai lake and r., and in the neighboring plains of Idaho and British Columbia. From the time of their earliest contact with the whites they have been called Flatbows, for what reason is not known, but they are now generally called Lower Kootenay. They numbered 172 in British Columbia in 1904, and 79 from Idaho were connected with the Flathead agency, Montana.

Akoklako.—Tolmie and Dawson, *Comp. Vocab.*, 124n, 1884 (corruption of *Aqkóqtla'tlqó*). **Akucháklactas.**—Wilson in *Trans. Ethnol. Soc. Lond.*, 304, 1866 (corruption of *Aqkóqtla'tlqó*). **Aqkóqtla'tlqó.**—Chamberlain in 8th Rep. N. W. Tribes Can., 6, 1892. **Aquqenu'kqó.**—Boas in 5th Rep. N. W. Tribes Can., 10, 1889. **Aquqtlá'tlqó.**—Boas, *ibid.*

Arc Plattes.—Mayne, Brit. Col., 298, 1862. **Arcs-plats.**—De Smet, Oreg. Miss., 112, 1847. **Arcs-plats.**—DuRoi de Mofras, Expl., II, 335, 1844. **Arcs-plattes.**—Anderson quoted by Gibbs in Hist. Mag., 80, 1863. **Flachbogen.**—Berghaus, Physik. Atlas, map 17, 1852. **Flat Bow.**—Can. Ind. Aff. for 1902, pt. 2, 74. **Flat-bows.**—Hale in U.S. Expl. Exped., VI, 204, 1846 (said to be a translation of *Aqkōqlāt*, the Kutenai name of Kootenai r., but this is doubtful). **Indians of the Lower Kootenay.**—Chamberlain, op. cit., 6. **Kertani.**—Kingsley, Stand. Nat. Hist., VI, 140, 1883. **Lake Indians.**—Henry (1811) quoted by Maclean, Canad. Sav. Folk, 138, 1896. **Lower Kootanais.**—Mayne, Brit. Col., 298, 1862. **Lower Kootanie.**—Tolmie and Dawson, Comp. Vocab., 124B, 1884. **Lower Kootenay.**—Boas, op. cit., 10. **Lower Kootenays.**—Chamberlain, op. cit., 6.

Lower Quarter Indians. A tribe or division in 1700, living 10 m. from Neuse r. and 40 m. from Adshusheer town, probably about the site of Raleigh, N. C.—Lawson (1714), Hist. Car., 98, 1860.

Lower Sauratown. A Cheraw village in 1760, situated on the s. bank of Dan r., N. Car., near the Virginia border.—Mooney, Siouan Tribes of the East, Bul. B. A. E., 59, 1894.

Lower Thompson Indians. The popular name for the Ntlakyapamuk living on Fraser r., between Siska and Yale, Brit. Col.

Cañon Indians.—Teit in Mem. Am. Mus. Nat. Hist., I, 168, 1900. **Lower Thompson Indians.**—Ibid. **Lower Thompsons.**—Ibid. *Uta'mqt.*—Boas, inf'n, 1906 (own name). *Uta'mqtamux.*—Teit, op. cit. ('people below'; own name).

Lowertown. A name applied at different periods to two distinct Shawnee villages in Ohio. The one commonly so called was originally on the Ohio, just below the mouth of the Scioto, until it was carried off by a flood, when it was rebuilt on the opposite side of the Scioto, about the site of Portsmouth, Scioto co. It was here in 1750-54, but before 1766 the inhabitants removed upstream to Chillicothe, in Ross co., which was frequently known as Lowertown, or Lower Shawnee Town, to distinguish it from Lick Town, 25 m. above. See *Chillicothe, Scioto*. (J. M.)

Lower Shawnee Town.—Common names used by early writers. **Lowertown.**—Common name used by early writers. **Shawnoah Basse Ville.**—Esnauts and Rapilly, map, 1777.

Lowrey, George. A cousin of Sequoya and second chief of the Eastern Cherokee under John Ross, commonly known as Major Lowrey. His native name was Agi'li ('He is rising'), possibly a contraction of an old personal name, Agin'-agi'li ('Rising-fawn'). He joined Ross in steadily opposing all attempts to force his people to move from their eastern lands, and later, after this had been accomplished, he was chief of council of the Eastern Cherokee at the meeting held in 1839 to fuse the eastern and western divisions into the present Cherokee Nation. See Mooney in 19th Rep. B. A. E., 115, 135, 1900.

Lowrey, John. A Cherokee chief, commonly known as Colonel Lowrey. He

commanded the friendly Cherokee who helped Gen. Andrew Jackson in the war against the Creeks in 1813-14, and with Col. Gideon Morgan and 400 Cherokee surrounded and captured the town of Hillabi, Ala., Nov. 18, 1813. The two were conspicuous also in the battle of Horseshoe Bend, Mar. 27, 1814, for which they were commended. Lowrey was one of the signers of the treaties made at Washington, June 7, 1806, and Mar. 22, 1816. See Mooney in 19th Rep. B. A. E., 90, 1900.

Lowwalta. A former Seminole village, probably E. of Appalachee bay, Fla., as the map of Bartram (Travels, I, 1799) notes a Noowalta r. emptying into the bay. It was settled by Creeks from Coosa r., who followed their prophets McQueen and Francis after the war of 1813-14.—Bell in Morse, Rep. to Sec. War, 306, 1822.

Loyola. See *Etsowish Semmegee-itshin*.

Lu ('mud,' 'clay'). A former Attacapa village on L. Prien (Cyprien), in Calcasieu parish, La.

Lo.—Gatschet, Attacapa MS., B. A. E., 45, 1885.

Lu.—Ibid.

Luchasmi. A Costanoan village situated in 1819 within 10 m. of Santa Cruz mission, Cal.—Taylor in Cal. Farmer, Apr. 5, 1860.

Luckton. A tribe, comprising 200 people, residing in 1806 on the Oregon coast s. of the Tillamook.

Luck-tons.—Orig. Jour. Lewis and Clark, VI, 117, 1905. **Lukton.**—Amer. Pioneer, 189, 1843.

Lugups. A former Chumashan village near Santa Barbara, Cal. (Taylor in Cal. Farmer, Apr. 24, 1863); perhaps the same as Luupch, q. v.

Luidneg. A former village, presumably Costanoan, connected with Dolores mission, San Francisco, Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Luiसेño. The southernmost Shoshonean division in California, which received its name from San Luis Rey, the most important Spanish mission in the territory of these people. They form one linguistic group with the Aguas Calientes, Juaneños, and Kawia. They extended along the coast from between San Onofre and Las Animas crs., iarenoughs. to include Aguas Hedionda, San Marcos, Escondido, and Valley Center. Inland they extended N. beyond San Jacinto r., and into Temescal cr.; but they were cut off from the San Jacinto divide by the Dieguenos, Aguas Calientes, Kawia, and Serranos. The former inhabitants of San Clemente id. also are said to have been Luiसेños, and the same was possibly the case with those of San Nicolas id. Their population was given in 1856 (Ind. Aff. Rep., 243) as between 2,500 and 2,800; in 1870, as 1,299; in 1885, as 1,142. Most of them were subsequently placed on small reservations

included under the Mission Tule River agency, and no separate tribal count has been made. Their villages, past and present, are Ahuanga, Apeche, Bruno's Village, La Joya, Las Flores, Pala, Pauma, Pedro's Village, (?) Potrero, Rincon, Saboba, San Luis Rey (mission), Santa Margarita (?), Temecula, and Wahoma. Taylor (Cal. Farmer, May 11, 1860) gives the following list of villages in the neighborhood of San Luis Rey mission, some of which may be identical with those here recorded: Cenyowpreskel, Ehutewa, Enekelkawa, Hamechuwa, Hatawa, Hepow-woo, Itaywiy, Itukemuk, Milkwanen, Mokaskel, and Mootaeyuhew.

Ghecham.—A. L. Kroeber, inf'n, 1905 (from Ghech, native name of San Luis Rey mission, and sometimes appears to be applied to themselves). **Kechi.**—Gatschet in Wheeler Surv. Rep., vii, 413, 1879. **Kechis.**—Shea, Cath. Miss., 108, 1855. **Khecham.**—Kroeber, inf'n, 1905 (alternative for Ghecham). **San Luis Indians.**—Winder in H. R. Ex. Doc. 76, 34th Cong., 3d sess., 124, 1857. **San Luisenians.**—Couts quoted by Henley in Ind. Aff. Rep. 1856, 240, 1857. **San Luisenos.**—Baneroff, Nat. Races, i, 460, 1882. **San Luisenos.**—Ibid. **San Luis Rey [tribe].**—Ind. Aff. Rep. 1871, 682, 1872.

Lukaiasta. A former village of the Kalindaruk division of the Costanoan family, connected with San Carlos mission, Cal.

Lucayasta.—Taylor in Cal. Farmer, Apr. 20, 1860.

Lukfa ('clay,' 'loam'). A former village of the Opatukla or 'Eastern party' of the Choctaw, on the headwaters of a branch of Sukinatcha cr., in Kemper co., Miss.

Lookfa.—W. Florida map ca. 1775. **Lukfa.**—Halbert in Pub. Miss. Hist. Soc., vi, 424, 1902.

Lulakiksa. A Choctaw clan of the Kushapokla phratry.

Lulak.—Morgan, Anc. Soc., 162, 1877. **Lu-lak Ik'-sä.**—Ibid.

Lulanna. A Haida town referred to by Work in 1836-41. It is perhaps intended for Yaku, opposite Graham id., Queen Charlotte ids., Alaska, or it may have been that town and Kiusta considered as one. Its population was estimated by Work at 296 in 20 houses.

Lu lan na.—Work in Schoolcraft, Ind. Tribes, v, 489, 1855. **Su-lan-na.**—Kane, Wand. N. A., app., 1859 (misprint from Work).

Lululungturkwi (Hopi: 'plumed-serpent mound.'—Fewkes). A ruined pueblo, of medium size, situated across the Jeditoh valley from Kokopki, in the Hopi country, N. E. Arizona. It was possibly one of a group of pueblos built and occupied by the Kawaika people. See Hough in Rep. Nat. Mus. 1901, 336, pl. 82, 1903. **Lululungtuqui.**—Hough, ibid., pl. 82. **Lululungturqui.**—Ibid., 336.

Lummi. A Salish tribe on and inland from Bellingham bay, n. w. Wash. They are said to have lived formerly on part of a group of islands E. of Vancouver id., to which they still occasionally resorted in 1863. According to Gibbs their language is almost unintelligible to the Nooksak, their northern neighbors. Boas

classes it with the Songish dialect. The Lummi are now under the jurisdiction of the Tulalip school superintendent, Washington, and numbered 412 in 1905. Their former villages were Hutatchl, Lemaltcha, Statshum, and Tomwhiksen. The Klalakamish, of Orcas id., were a former band.

Há-lum-mi.—Gibbs, Clallam and Lummi, vi, 1863 (name given them by some other (Salish?) tribes). **Hooklummic.**—Schoolcraft, Ind. Tribes, i, 521, 1851. **Lummas.**—Fitzhugh (1856) in H. R. Ex. Doc. 37, 34th Cong., 3d sess., 75, 1857. **Lummi.**—Gibbs in Pac. R. R. Rep., i, 433, 1855. **Lummie.**—Stevens (1856) in H. R. Ex. Doc. 37, 34th Cong., 3d sess., 46, 1857. **Lummi-neuk-sack.**—Shaw in Ind. Aff. Rep. 1859, 398, 1860 (two tribal names connected through error). **Nooh-lum-mi.**—Tolmie (1841) in Pac. R. R. Rep., i, 434, 1855. **Nooklulumic.**—Lane (1849) in Sen. Ex. Doc. 52, 31st Cong., 1st sess., 173, 1850. **Nooklulumu.**—Lane in Ind. Aff. Rep., 162, 1850. **Nooklummic.**—Bauer in Am. Quar. Reg., iii, 389, 1849. **Nooklulamic.**—Thornton (1849) in Schoolcraft, Ind. Tribes, vi, 701, 1857. **Noot-hum.**—Starling in Ind. Aff. Rep., 170, 1852. **Noot-hum-mic.**—Ibid., 171. **Nugh-lemmy.**—Mallet in Ind. Aff. Rep., 198, 1877. **Nuh-lum-mi.**—Gibbs in Cont. N. A. Ethnol., i, 180, 1877 (proposed as a collective name for Samish, Lummi, and Nuksak). **Nukhlësh.**—Gibbs, Clallam and Lummi, vi, 1863 (so called by Skagit). **Nukh'-lum-mi.**—Ibid (own name). **otlumi.**—Boas in 5th Rep. N. W. Tribes Can., 10, 1889.

Lunge. See *Longe*, *Maskinonge*.

Lunikashinga ('thunder-being people'). A Kansa gens.

Leda' unika'ci'ga.—Dorsey in 15th Rep. B. A. E., 232, 1897 ('gray hawk people'). **Lo-ne'-ka-she-ga.**—Morgan, Anc. Soc., 156, 1877. **Loo nika-shing-ga.**—Stubbs, Kaw Mus. vocab., B. A. E., 25, 1877. **Lu.**—Dorsey in Am. Natur., 671, 1885 ('thunder'). **Lu nika'ci'ga.**—Dorsey in 15th Rep. B. A. E., 232, 1897. **Thunder.**—Morgan, Anc. Soc., 156, 1877.

Lupies. Mentioned in connection with some mythical as well as existent tribes of the plains in the 17th century (Vetan-curt, 1693, Teatro Am., iii, 303, repr. 1871). Possibly the Pawnee Loups.

Lushapa. A former Choctaw town, evidently in Neshoba co., Miss., and possibly on Lussalaka cr., a small tributary of Kentucky cr.—Halbert in Pub. Miss. Hist. Soc., vi, 430, 1902.

Lushapa.—Romans, Florida, map, 1775. **Lusthapa.**—West Florida map, ca. 1775.

Lutchapoga (Creek: *lú'tcha* 'terrapi'n', *póka* 'gathering place': 'terrapi'n pen'). A former Upper Creek town, of which Atchinalgi was a branch or colony, probably on or near Tallapoosa r., Ala.

Lockoportay.—Ex. Doc. 425, 24th Cong., 1st sess., 279, 1836. **Loo-chau po-gau.**—Hawkins (1799), Sketch, 47, 1818. **Lutchapoga.**—Tanner, map, 1827. **Lu chi paga.**—Parsons in Schoolcraft, Ind. Tribes, iv, 578, 1851. **Lutchipoga.**—Campbell (1836) in H. R. Doc. 274, 25th Cong., 2d sess., 20, 1838. **Lutchipogatown.**—Garrett (1837) in H. R. Doc. 452, 25th Cong., 2d sess., 58, 1838. **Lutchapóga.**—Gatschet, Creek Migr. Leg., i, 138, 1884.

Lutchapoga. A township in the Creek Nation, on middle Arkansas r., Okla.

Lutuamian Family. A linguistic family consisting of two branches, the Klamath and the Modoc (q. v.), residing in s. w. Oregon E. of the Cascade range and along the California border. Their former boundary extended from the Cascades to the headwaters of Pit and McCloud rs.,

thence E. to Goose lake, thence N. to lat. 44°, and thence W. to the Cascades. The more permanent settlements of the family were on the shores of Klamath lakes, Tule lake, and Lost r., the remainder of the territory which they claimed being hunting ground. In 1864 both divisions of the family entered into a treaty with the United States whereby they ceded the greater part of their lands to the Government and were placed on Klamath res. in Oregon. It was an attempt on the part of the Modoc to return to their former seat on the California frontier that brought about the Modoc war of 1872-73 (see *Kintpuash*). The climate and productions of their country were most favorable, edible roots and berries were plentiful, and the region abounded in game and fish. As a consequence the tribes were fairly sedentary and seem to have made no extensive migrations. They were not particularly warlike, though the Modoc had frequent struggles with the tribes to the S., and after the coming of the whites resisted the aggressions of the latter with persistence and fierceness.

Slavery seems to have been an institution of long standing, and the Modoc, assisted by the Klamath, made annual raids on the Indians of Pit r. for the capture of slaves, whom they either retained for themselves or bartered with the Chinook of Columbia r. The habitations were formerly of logs, covered with mud and circular in shape, a type of building which is still occasionally seen on the reservation. The women were noted as expert basket weavers. No trace of a clan or gentile system has been discovered among them. The family organization is a loose one and inheritance is in the male line. The language spoken by the two divisions of the Lutuamian family is ordinarily called Klamath, and while there are dialectic differences between the speech of the Klamath proper and the Modoc, they are so slight that they may be disregarded. The Lutuamian language is apparently entirely independent, though further study may disclose relationship with the Shahaptian. (L. F.)

Clamets.—Hale in U. S. Expl. Exped., VI, 218, 569, 1846 (alternative of Lutuami). **Klamath**.—Gatschet in Mag. Am. Hist., 164, 1877 (used for family). **Lutuami**.—Irving, Astoria, map, 1849. **Lutuami**.—Hale, op. cit., 199, 204. **Lutuamis**.—Domecnech, Deserts of N. A., I, 442, 1860. **Lutumani**.—Latham, Opuscula, 341, 1860 (misprint). **Luturim**.—Gallatin in Schoolcraft, Ind. Tribes, III, 402, 1853 (misprint). **Málakls**.—Gatschet in Cont. N. A. Ethnol., II, pt. I, xxxiii, 1890 (collective name for Klamath and Modoc). **Sutuami**.—Medill in H. R. Ex. Doc. 76, 30th Cong., 1st sess., 7, 1848 (misquoted from Hale). **Tlamatl**.—Hale, op. cit., 218, 569 (alternative of Lutuami).

Luupch. A former Chumashan village in Ventura co., Cal.—Taylor in Cal. Farmer, July 24, 1863. Cf. *Lugups*.

Luúpte.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Lynx. See *Peshkewah*.

Lytton band. One of 4 subdivisions of the Upper Thompson Indians, in the interior of British Columbia. In 1904 they numbered 463, under the Kamloops-Okanagan agency.

lkamteí'nemux.—Teit in Mem. Am. Mus. Nat. Hist., II, 170, 1900 ('people of lkamteí'n [Lytton]'). **Lytton band**.—Ibid. **Nlak'a'pamux**.—Ibid. (generally used for all the Ntlak'yapamuk). **Nlak'apamux'ó'e**.—Ibid. (the Nlak'a'pamux proper).

Maak ('loon'). A gens of the Potawatomi (q. v.).—Morgan, Anc. Soc., 167, 1877. Cf. *Mong*.

Maakoath (*Maa'kōath*). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Maam (*Ma'am*). Apparently a gentile organization among the Pima, belonging to the Suwuki-ohimal, or Red Ants, phratral group.—Russell, Pima MS., B. A. E., 313, 1903.

Maamtagyila. A gens of the Kwakiutl, found in two septs, the Guetela and the Matilpe.

Maa'mtagyila.—Boas in Rep. Nat. Mus. 1895, 330, 1897. **Mataki'la**.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Maangreet (*Mā-an'-greet*, 'big feet'). A subclan of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Maate (*Mā-ātē*). A summer village of the Koskimo on the S. side of Quatsino sd., Vancouver id.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 69.

Maawi. The extinct Antelope clan of the Zuni of New Mexico.

Māawi-kwe.—Cushing in 13th Rep. B. A. E., 368, 1896 (*kwe*='people').

Macamo. A former Chumashan village on San Lucas id., Cal.; so named by Cabrillo in 1542.—Cabrillo (1542) in Smith, Colec. Doc. Fla., 181, 1857.

Macaque. See *Mocuck*.

Macariz. A former Yamasi (?) town a mile N. of St Augustine, Fla., existing in 1680 and with others destroyed by Col. Palmer in 1727.

Macarisqui.—Fairbanks, Hist. Fla., 189, 1858. **Mascarasi**.—Barcia, Ensayo, 240, 1723.

Maccarib. The old and original form from a cognate of which has been derived the Algonquian word *caribou*. Josselyn (N. Eng. Rar., 1672, 55, repr. 1865) wrote of "the Maccarib, Caribo, or Pohano, a kind of Deer, as big as a Stag." *Maccarib* corresponds to the Passamaquoddy *megatip*. See *Caribou*. (A. F. C.)

Maccoa. The name of a chief and of a small tribe living on the S. coast of South Carolina, in the vicinity of St Helena id., where they were visited by Ribault in 1562. They possibly belonged to the Cusabo group, long since extinct.

Maccoa.—Laudonnière (1562) in French, Hist. Coll. La., n. s., 205, 1869. **Maccou**.—Ibid., 209.

McGillivray, Alexander. A mixed-blood Creek chief who acquired considerable note during the latter half of the 18th cen-

tury by his ability and the affection in which he was held by his mother's people. Capt. Marchand, in command of the French Ft Toulouse, Ala., in 1722, married a Creek woman of the strong Hutali or Wind clan, from which it was customary to select the chief. One of the children of this marriage was Sehoy, celebrated for her beauty. In 1735 Lachlan McGillivray, a Scotch youth of wealthy family, landed in Carolina, made his way to the Creek country, married Sehoy, and established his residence at Little Talasi, on the e. bank of Coosa r., above Wetumpka, Elmore co., Ala. After acquiring a fortune and rearing a family he abandoned the latter, and in 1782 returned to his native country. One of his children was Alexander, born about 1739; he was educated at Charleston under care of Farquhar McGillivray, a relative. At the age of 17 he was placed in a counting house in Savannah, but after a short time returned to his home, where his superior talents began to manifest themselves, and he was soon at the head of the Creek tribe. Later his authority extended also over the Seminole and the Chickamunga groups, enabling him, it is said, to muster 10,000 warriors. McGillivray is first heard of in his new rôle as "presiding at a grand national council at the town of Coweta, upon the Chatahoochie, where the adventurous Leclerc Milfort was introduced to him" (Pickett, *Hist. Ala.*, 345, 1896). Through the advances made by the British authorities, the influence of Col. Tait, who was stationed on the Coosa, and the conferring on him of the title and pay of colonel, McGillivray heartily and actively espoused the British cause during the Revolution. His father had left him property on the Savannah and in other parts of Georgia, which, in retaliation for his abandonment of the cause of the colonists, was confiscated by the Georgia authorities. This action greatly embittered him against the Americans and led to a long war against the western settlers, his attacks being directed for a time against the people of e. Tennessee and Cumberland valley, whence he was successively beaten back by Gen. James Robertson. The treaty of peace in 1783 left McGillivray without cause or party. Proposals from the Spanish authorities of Florida through his business partner, Wm. Pantan, another Scotch adventurer and trader, induced him to visit Pensacola in 1784, where, as their "emperor," he entered into an agreement with Spain in the name of the Creeks and the Seminoles. The United States made repeated overtures to McGillivray for peace, but he persistently refused to listen to them until invited to New York in 1790 for a personal

conference with Washington. His journey from Little Talasi, through Guilford, Richmond, Fredericksburg, and Philadelphia, was like a triumphal march, and the prospective occasion for such display was a strong inducement for the shrewd chief to accept the invitation. According to Pickett (p. 406) there was, in addition to the public treaty, a secret treaty between McGillivray and Washington which provided "that after two years from date the commerce of the Creek nation should be carried on through the ports of the United States, and, in the meantime, through the present channels; that the chiefs of the Okfuskees, Tookabatchas Tallases, Cowetas, Cussetas, and the Seminole nation should be paid annually by the United States \$100 each, and be furnished with handsome medals; that Alexander McGillivray should be constituted agent of the United States with the rank of brigadier-general and the pay of \$1,200 per annum; that the United States should feed, clothe, and educate Creek youth at the North, not exceeding four at one time." The public treaty was signed Aug. 7, 1790, and a week later McGillivray took the oath of allegiance to the United States. Nevertheless he was not diverted from his intrigue with Spain, for shortly after taking the oath he was appointed by that power superintendent-general of the Creek nation with a salary of \$2,000 a year, which was increased in 1792 to \$3,500.

The versatile character of McGillivray was perhaps due in part to the fact that there flowed in his veins the blood of four different nationalities. It has been said that he possessed "the polished urbanity of the Frenchman, the duplicity of the Spaniard, the cool sagacity of the Scotchman, and the subtlety and inveterate hate of the Indian." Gen. James Robertson, who knew him well and despised the Spaniards, designated the latter "devils" and pronounced McGillivray as the biggest devil among them—"half Spaniard, half Frenchman, half Scotchman, and altogether Creek scoundrel." That Alexander McGillivray was a man of remarkable ability is evident from the consummate skill with which he maintained his control and influence over the Creeks, and from his success in keeping both the United States and Spain paying for his influence at the same time. In 1792 he was at once the superintendent-general of the Creek nation on behalf of Spain, the agent of the United States, the mercantile partner of Pantan, and "emperor" of the Creek and Seminole nations. As opulence was estimated in his day and territory, he was a wealthy man, having received \$100,000 for the property confiscated by the Georgia authorities, while

the annual importations by him and Panton were estimated in value at £40,000 (Am. St. Papers, Ind. Aff., 1, 458, 1832). Besides two or three plantations, he owned, at the time of his death, 60 negroes, 300 head of cattle, and a large stock of horses. In personal appearance McGillivray is described as having been six feet in height, sparely built, and remarkably erect; his forehead was bold and lofty; his fingers long and tapering, and he wielded a pen with the greatest rapidity; his face was handsome and indicative of thought and sagacity; unless interested in conversation he was inclined to be taciturn, but was polite and respectful. While a British colonel he dressed in the uniform of his rank; when in the Spanish service he wore the military garb of that country; and after Washington appointed him brigadier-general he sometimes donned the uniform of the American army, but never when Spaniards were present. His usual costume was a mixture of Indian and American garments. McGillivray always traveled with two servants, one a half-blood, the other a negro. Although ambitious, fond of display and power, crafty, unscrupulous in accomplishing his purpose, and treacherous in affairs of state, the charge that he was bloodthirsty and fiendish in disposition is not sustained. He had at least two wives, one of whom was a daughter of Joseph Cunnell. Another wife, the mother of his son Alexander and two daughters, died shortly before or soon after her husband's death, Feb. 17, 1793, at Pensacola, Fla. He was buried with Masonic honors in the garden of William Panton, his partner.

(C. T.)

Machapunga ('bad dust'; from *matchi* 'bad', *pungo* 'dust' (Heckewelder), or perhaps 'much dust,' from *massa* 'great', in allusion to the sandy soil of the district). An Algonquian tribe formerly living in Hyde co., N. E. N. C. In 1701 they numbered only about 30 warriors, or perhaps 100 souls, and lived in a single village called Mattamuskeet. They took part in the Tuscarora war of 1711-12 and at its conclusion the remnant, together with the Coree, were settled on a tract on Mattamuskeet lake, where the two tribes occupied one village. (J. M.)

Machapunga.—Lawson (1714), Hist. Car., 383, repr. 1860. **Machapangos**.—Martin, N. C., 1, 263, 1829. **Machapongos**.—Ibid., 260. **Machapunges**.—Ibid., 244. **Matchepungo**.—Letter of 1713 in N. C. Col. Rec., II, 29, 1886.

Machapunga. A village of the Powhatan confederacy in Northampton co., Va. It was nearly extinct in 1722.

Matchapunko.—Hermann, map (1670), in Rep. on Line between Va. and Md., 1873.

Machapunga. A village on Potomac r. about 1612.

Matchopongo.—Strachey (ca. 1612), Va., 98, 1849.

Macharienkonck. A Minisink village formerly in the bend of Delaware r., in Pike co., Pa., opposite Port Jervis.—Van der Donck (1656) quoted by Ruttenber, Tribes Hudson R., 96, 1872.

Machawa. A former Timucua town in N. W. Florida, 24 m. E. of Ayavalla fort, now Iola, on a river called Wicassa.

Machaba.—Jefferys, French Dom. Am., map, 1761. **Machaha**.—Ibid., map, 135. **Machalla**.—Roberts, Fla., 15, 1763. **Machua**.—French, Hist. Coll. La., 2d s., 255, note, 1875.

Machemni. A division of the Miwok who lived between Cosumnes and Mokelumne rs., in Eldorado and Amador cos., Cal.

Matchemnes.—Hale, Ethnol. and Philol., 630, 1846. **Omatachmanne**.—Bancroft, Nat. Races, I, 450, 1874. **Omochumnes**.—Taylor in Cal. Farmer, June 8, 1860. **Omutchamne**.—Bancroft, Nat. Races, I, 450, 1874. **Omutchumnes**.—Hale, op. cit.

Machemoodus (properly *Matche-mâ-dosc*, 'there is a bad noise.'—Trumbull). A tract on the E. bank of Connecticut r., now included in East Haddam tp., Middlesex co., Conn., formerly the residence of a "numerous tribe," who were independent and famous for conjuring. The Indians sold the tract in 1662. For an account of the "Moodus noises" see Trumbull, Hist. Conn., II, 91, 92, 1818; Barber, Hist. Coll., 525, 1839. (J. M.) **Machamadöset**.—Doc. of 1674 cited by Trumbull, Ind. Names Conn., 18, 1881. **Machamoodus**.—Doc. of 1691, ibid. **Mache Moodus**.—Kendall, Travels, I, 100, 1809. **Machmadouset**.—Doc. of 1671 cited by Trumbull, op. cit. **Matche Moodus**.—Kendall, op. cit. **Matchi Moodus**.—Ibid. **Matchit Moodus**.—Doc. cited by Trumbull, op. cit.

Macheno. An ancient village, probably Timuquanan, in W. central Florida, lat. 29° 30'.—Bartram, Voy., I, map, 1799.

Macheto. A former village of the Awani at the foot of Indian canyon, Yosemite valley, Mariposa co., Cal.

Macháyo.—Powers in Overland Mo., x, 333, 1874. **Ma-che'-to**.—Powers in Cont. N. A. Ethnol., III, 365, 1877.

Machias ('bad little place,' referring to the current in Machias r.; from *matche* 'bad', *sis* the diminutive). A village of the Passamaquoddy on Machias r., Me.

Mechias.—Treaty rep. (1726) in Me. Hist. Soc. Coll., III, 390, 1853.

Machonee. An Ottawa village, commonly called "Machonee's village," from the name of the resident chief, formerly near the mouth of Au Vaseau r., which flows into L. St. Clair, in lower Michigan, on land ceded to the United States by treaty of May 9, 1836. The chief, whose name is also spelled Machonce, Maconce, and Makonee, was drowned, while intoxicated, about the year 1825 (Mich. Pion. Coll., v, 464, 1884). (J. M.)

Machonee's village.—Detroit treaty (1807) in U. S. Ind. Treat., 194, 1873 (misprint?). **Machonee's village**.—Detroit treaty (1807) in Am. State Papers, Ind. Aff., I, 747, 1832.

MacIntosh, Chilly. A Creek chief. After his brother William was slain by Menewa for having betrayed the Creeks by "selling the graves of their ancestors," he became

the head of the minority party that acquiesced in the proposed emigration to Indian Ter. As such he frequently visited Washington to treat with officials regarding the transfer of lands and acquitted himself as a capable man of business.—Stanley, *Portraits Am. Inds.*, 13, 1852.

MacIntosh, William. A mixed-blood Creek, son of a Scotch trader and an Indian woman. The United States, in consideration of the relinquishment by Georgia of the Mississippi territories, engaged in 1802 to extinguish the Indian titles to lands within the borders of the state as early as could be peaceably done on reasonable terms. A cession was procured in 1805 by which millions of acres of Creek lands were transferred to Georgia. The people of the state constantly clam-

WILLIAM MACINTOSH. (MCKENNEY AND HALL)

ored for the fulfilment by the Government of its compact, and the Creeks, alarmed at the prospective wholesale alienation of their ancient domain, on the motion of MacIntosh made a law in general council in 1811 forbidding the sale of any of the remaining land under penalty of death. MacIntosh, who by his talents and address had risen to be chief of the Lower Creeks, led the Creek allies of the Americans in the war of 1812 with the rank of major and took the chief part in the massacre of 200 of the hostile Creeks, who were surprised at Atasi on Nov. 29, 1813. He was prominent also in the final battle with the hostiles, Mar. 27, 1814, when, at Horseshoe Bend, Ala., nearly a thousand warriors were exterminated. A large part of the territory of

the conquered tribe was confiscated and opened to white settlement. In 1818 more lands were acquired by treaty, and in 1821 the fifth treaty was negotiated by Georgian citizens acting on behalf of the United States, with MacIntosh, who was in the pay of the whites, and a dozen other chiefs controlled by him, while 36 chiefs present refused to sign and made clear to the commissioners the irregularity of a cession arranged with a party representing only a tenth of the nation, which to be legal must have the consent of the entire nation assembled in council. After an attempt made by MacIntosh to convey more land in 1823 the law punishing with death any Creek who offered to cede more land was reenacted in 1824, when 15,000,000 acres had already been transferred and 10,000,000 acres remained in possession of the Creeks, who had so advanced in education and agriculture that they valued their lands far more highly than before. In the beginning of 1825 Georgian commissioners, working upon the avarice of MacIntosh, induced him and his followers to set their names to a treaty ceding what remained of the Creek domain. Although Secretary John C. Calhoun had declared that he would not recognize a treaty in which the chiefs of the Creek nation did not acquiesce, President Monroe laid it before the Senate, and after the accession of President Adams it was approved. The Creeks did not rise in rebellion, as was expected, but, in accordance with the tribal law already mentioned, formal sentence of death was passed on MacIntosh, and was executed on May 1, 1825, by a party of warriors sent for that purpose, who surrounded his house and shot him and a companion as they tried to escape. MacIntosh was a signer of the treaties of Washington, Nov. 4, 1805; Ft Jackson, Ala., Aug. 9, 1814; Creek Agency, Ga., Jan. 22, 1818; Indian Springs, Ga., Jan. 8, 1821, and Feb. 12, 1825. (J. M.)

Mackinaw. (1) A sort of bateau or large flatboat formerly much used by traders and others; also called Mackinaw boat. (2) A heavy blanket, also known as Mackinaw blanket, formerly an important item of western trade. (3) A coarse straw hat. (4) A species of lake trout (*Salvelinus namaycush*), also termed Mackinac trout. The word which has assumed all these meanings is the place name Mackinac, applied to the famous trading post between L. Huron and L. Michigan. Mackinaw, representing the Canadian French Mackinac, is identical with *makinak*, the word for 'turtle' in Chippewa and closely related dialects of Algonquian; said also to be a reduction of Michilimackinac (q. v.), a corruption of an earlier *mitchi makinak*, signifying

'big turtle' in Chippewa. According to Dr William Jones the Chippewa of Minnesota claim the word to be a shortened form of *mishinimā kinunk*, 'place of the big wounded or big lame person.' This, however, may be an instance of folk etymology. (A. F. C.)

Macocanico ('great house'). A village on the w. bank of Patuxent r., in St Marys co., Md., in 1608.

Macocanaco.—Bozman, Maryland, I, 141, 1837. **Macoco comaco**.—Tooker, Algonqu. Series, VIII, 49, 1901 (misquoting Smith). **Macocanico**.—Smith (1629), Virginia, I, map, repr. 1819.

Maccock gourd. See *Maycock*.

Maccocks (perhaps from *mahcawq*, 'pumpkin.'—Brinton. See *Maycock*). A village located on Smith's map of 1608 (Smith, Va., I, repr. 1819) some distance N. of Chikohoki, which, according to Brinton, was near the present Wilmington, Del. This would make Maccocks a Delaware village in s. e. Pennsylvania, and Brinton thinks it may have been the village of the Okahoki (q. v.), a band of the Delawares, formerly in Delaware co., Pa. (J. M.)

Macocqwer. See *Maycock*.

Macombo. A Papago village, probably in Pima co., Ariz., with 57 people in 1865.—Ind. Aff. Rep., 135, 1865.

Macousin. A Potawatomi village, named after the resident chief, on the w. bank of St Joseph r., Berrien co., s. w. Mich., in 1828.

Macousin's Village.—Royce in 18th Rep. B. A. E., Mich. map, 1899. **Macousin Village**.—U. S. Ind. Treat. (1828), 676, 1873.

Macoyahui. A settlement in Sonora, Mexico, formerly one of the principal villages of the Mayo. In 1900 it contained 182 Mayo in a total population of 972.

McQueen's Village. A former Seminole village on the E. side of Tampa bay, w. Fla.—Bell in Morse, Rep. to Sec. War, 306, 1822.

Mascinum. A former village, presumably Costanoan, connected with Dolores mission, San Francisco, Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Mactati. A former Diegueño rancheria near San Diego, s. Cal.

Mactati.—Ortega (1775) quoted by Bancroft, Hist. Cal., I, 254, 1884. **Magtate**.—Ibid. **San Miguel**.—Ibid.

Madawehsoos (*Mā-dū'-weh-soos*, 'porcupine'). A gens of the Abnaki (q. v.).—Morgan, Anc. Soc., 174, 1877.

Madokawando. A Penobscot chief, born in Maine about 1630, and adopted as a son by Assamiasqua, a Kennebec chief. His tribe was at peace with the English colonists until made their enemy by depredations upon his lands, when hostilities began, and, uniting with the French, war was waged against the English settlements. In 1691 he attacked York, Me., killed 77 of the inhabitants, and laid the place in ashes. This was but one of his

many raids, in which he was generally aided by the French. His death occurred in 1698. It is stated that, although a determined foe, Madokawando's treatment of prisoners was humane. The wife, or perhaps more correctly the principal wife, of the notorious Baron Castine, was a daughter of Madokawando. (c. r.)

Magaehnak. An "Indian cornfield" or settlement in 1678, 6 m. from Sudbury, Middlesex co., Mass., probably belonging to the Praying Indians of the Massachusetts confederacy. Mentioned by Salisbury (1678) in N. Y. Doc. Col. Hist., XIII, 520, 1881.

Magayuteshni ('eats no geese'). A band of the Mdewakanton Sioux.

Grey-Iron.—Neill, Hist. Minn., 144, note, 1858 (trans. of Mazarota, the chief's name). **Magayuteshni**. Neill in Minn. Hist. Coll., I, 263, 1872. **Magayuteshni**.—Dorsey in 15th Rep. B. A. E., 215, 1897. **Maxa-yute-cni**.—Ibid. **Ma-za-ro-ta**.—Neill, Hist. Minn., 144, note, 1858.

Magdalena. A former Spanish mission among the Indians of Lower California; consolidated with the mission of San Ignacio Kadakaman and abandoned prior to 1740. Distinct from Santa María Magdalena in the N.—Alcedo, Dic. Geog., III, 19, 1783; Taylor in Browne's Res. Pac. Slope, app., 50, 1869.

Magemiut ('mink people'). An Eskimo tribe inhabiting the lake country of Alaska from C. Romanof almost to the Yukon. They differ from the Kuskwogmiut chiefly in dialect. They are vigorous and strong, finding in the waters of the tundra plenty of blackfish to nourish them at all seasons. In winter they kill many hair seal on the floes, on which they venture with their sleds, carrying canoes on which the sleds are transported in turn when it is necessary to take to the water. They build good houses of driftwood and the bones of whales killed by the whaling fleet, and the carcasses floating ashore have long supplied them with food. The tribe numbered 2,147 in 1890. The following are Magemiut villages: Anovok, Chalit, Chifukluk, Gilak, Igiak, Kashunuk, Kipniak, Kweakpak, Nauwogalakgak, Nunochok, Tefaknak, and Tiengak. **Ikvagmutes**.—Raymond in Sen. Ex. Doc. 12, 42d Cong., 1st sess., 28, 1871. **Inkaliten**.—Wrangell quoted by Dall in Cont. N. A. Ethnol., I, 18, 1877. **Lower Kvichpaks**.—Raymond in Sen. Ex. Doc. 12, 42d Cong., 1st sess., 28, 1871. **Magagmjuten**.—Holmberg, Ethnog. Skizz., 5, 1885. **Magamutes**.—Colyer in Ind. Aff. Rep. 1869, 593, 1870. **Magamutes**.—Dall in Proc. A. A. S., 267, 1869. **Magimut**.—Wrangell quoted by Dall in Cont. N. A. Ethnol., I, 18, 1877. **Magimuten**.—Wrangell, Ethnog. Nachr., 122, 1839. **Magimut**.—Worman quoted by Dall in Cont. N. A. Ethnol., I, 18, 1877. **Magmjuten**.—Holmberg, Ethnog. Skizz., 5, 1885. **Magmutes**.—Elliott, Cond. Aff. Alaska, 291, 1874. **Magmutis**.—Latham in Jour. Ethnol. Soc. Lond., 183, 1848. **Mayimeuten**.—Richardson, Arct. Exped., 370, 1851 (from Wrangell). **Nunivak people**.—Worman quoted by Dall in Cont. N. A. Ethnol., I, 18, 1877.

Magic. There are authentic accounts from various observers in many parts of

the New World, from the earliest historical period to the present time, that the Indians practised so-called magic arts, or sorcery. The earlier writers marveled at these arts, and evidently wished their readers to marvel. They often attributed the power of the Indians to Satan. Father Acosta, in the 16th century, spoke in awe of the Mexican magicians flying through the air, assuming any form they pleased and having telepathic knowledge of events occurring at distant places, and the same may be said in a general way of the Eskimo. The Rev. Peter Jones wrote in the first decade of the 19th century: "I have sometimes been inclined

prophecy and telepathy as the results of collusion. Their tricks are deceptions, very ingenious when it is considered how rude their tools and appliances are, but not to be compared with the acts of civilized conjurers who make claim to no superhuman aid.

Distinct from such tricks of illusion and deceit, there is evidence that the Indians were and still are versed in hypnotism, or, better, "suggestion." Carver (1776-78) speaks of it among the Sioux, and J. E. Fletcher observed it among the Menominee about the middle of the last century. Mooney describes and pictures the condition among modern Indians (see *Ghost dance*).

Sleight-of-hand was not only much employed in the treatment of disease, but was used on many other occasions. A very common trick among Indian charlatans was to pretend to suck foreign bodies, such as stones, out of the persons of their patients. Records of this are found among many tribes, from the lowest in culture to the highest, even among the Aztecs. Of course such trickery was not without some therapeutic efficacy, for it, like many other proceedings of the shamans, was designed to cure disease by influence on the imagination. A Hidatsa residing in Dakota in 1865 was known by the name Cherry-in-the-mouth because he had a trick of producing from his mouth, at any season, what seemed to be fresh wild cherries. He had found some way of preserving cherries, perhaps in whisky, and it was easy for him to hide them in his mouth before intending to play the trick; but many of the Indians considered it wonderful magic.

The most astonishing tricks of the Indians were displayed in their fire ceremonies and in handling hot substances, accounts of which performances pertain to various tribes. It is said that Chippewa sorcerers could handle with impunity red-hot stones and burning brands, and could bathe the hands in boiling water or syrup; such magicians were called "fire-dealers" and "fire-handlers." There are authentic accounts from various parts of the world of fire-dancers and fire-walks among barbarous races, and extraordinary fire acts are performed also among widely separated Indian tribes. Among the Arikara of what is now North Dakota, in the autumn of 1865, when a large fire in the center of the medicine lodge had died down until it became a bed of glowing embers, and the light in the lodge was dim, the performers ran with apparently bare feet among the hot coals and threw these around in the lodge with their bare hands, causing the spectators to flee. Among the Navaho performers, naked except for breechcloth and moccasins, and having

NAVAHO ARROW-SWALLOWER. (MATTHEWS)

to think that, if witchcraft still exists in the world, it is to be found among the aborigines of America." His personal experience was among the Chippewa. The Nipissing were called Jongleurs by the French on account of the expertness in magic of their medicine men. Some writers of the present day marvel as much as did their predecessors; but instead of attributing the phenomena to Satan, seek the cause in spirits or something equally occult. The feats of Indian magicians, as a rule, may be easily explained as sleight-of-hand tricks, and their

their bodies daubed with a white infusorial clay, run at high speed around a fire, holding in their hands great fagots of flaming cedar bark which they apply to the bare backs of those in front of them and to their own persons. Their wild race around the fire is continued until the fagots are nearly all consumed, but they are never injured by the flame. This immunity may be accounted for by supposing that the cedar bark does not make a very hot fire, and that the clay coating protects the body. Menominee shamans are said to handle fire, as also are the female sorcerers of Honduras.

Indians know well how to handle venomous serpents with impunity. If they can not avoid being bitten, as they usually can, they seem to be able to avert the fatal consequences of the bite. The wonderful acts performed in the Snake dance (q. v.) of the Hopi have often been described.

A trick of Navaho dancers, in the ceremony of the Mountain chant, is to pretend to thrust an arrow far down the throat. In this feat an arrow with a telescopic shaft is used; the point is held between the teeth; the hollow part of the handle, covered with plumes, is forced down toward the lips, and thus the arrow appears to be swallowed. There is an account of an arrow of similar construction used early in the 18th century by Indians of Canada who pretended a man was wounded by it and healed instantly. The Navaho also pretend to swallow sticks, which their neighbors of the pueblo of Zuni actually do in sacred rites, occasionally rupturing the esophagus in the ordeal of forcing a stick into the stomach. Special societies which practise magic, having for their chief object rainmaking and the cure of disease, exist among the southwestern tribes. Swallowing sticks, arrows, etc., eating and walking on fire, and trampling on cactus are performed by members of the same fraternity.

Magicians are usually men; but among the aborigines of the Mosquito coast in Central America they are often women, who are called *sukias*, and are said to exercise great power. According to Hewitt Iroquois women are reported traditionally to have been magicians.

A trick of the juggler among many tribes of the N. was to cause himself to be bound hand and foot and then, without visible assistance or effort on his part, to release himself from the bonds. Civilized conjurers who perform a similar trick are hidden in a cabinet and claim supernatural aid; but some Indian jugglers performed this feat under observation. It was common for Indian magicians to pretend they could bring rain, but the trick consisted simply of keeping

up ceremonies until rain fell, the last ceremony being the one credited with success. Catlin describes this among the Mandan in 1832, and the practice is still common among the Pueblo tribes of the arid region. The rain maker was a special functionary among the Menominee.

To cause a large plant to grow to maturity in a few moments and out of season is another Indian trick. The Navaho plant the root stalk of a yucca in the ground in the middle of winter and apparently cause it to grow, blossom, and bear fruit in a few moments. This is done by the use of artificial flowers and fruit carried under the blankets of the performers; the dimness of the firelight and the motion of the surrounding dancers hide from the spectators the operations of the shaman when he exchanges one artificial object for another. In this way the Hopi grow beans, and the Zuni corn, the latter using a large cooking pot to cover the growing plant. See *Dramatic representation, Medicine and Medicine-men, Orenda*.

Consult the works of H. H. Bancroft, Carver, Catlin, Fewkes, Fletcher, Hoffman, Peter Jones, Lummis, Matthews, Mooney, M. C. Stevenson, and others, in the Bibliography. (W. M.)

Magnus. A woman chief of the Naraganset, sister of Ninigret, one of the six sachems of their country in 1675 (Drake, *Abor. Races*, 248, 1880). She was killed by the English after her capture in a swamp fight near Warwick, R. I., in 1676. She was also known as Matantuck, of which Magnus is probably a corruption, and as Quaiaipen. Her husband was a son of Canonicien. (A. F. C.)

Magtok. A former Aleut village on Agattu id., Alaska, one of the Near id. group of the Aleutians, now uninhabited.

Maguaga. A Huron village on Maguaga cr., Mich., 14 m. s. w. of Detroit, on a tract reserved for the use of the Indians by act of Feb. 28, 1809, and ceded to the United States by treaty of St Marys, O., Sept. 20, 1818.

Magaugo.—Drake, *Bk. Inds.*, v, 125, 1848. **Maguaga.**—Brown, *W. Gaz.*, 161, 1817. **Maguago.**—Drake, *Ind. Chron.*, 196, 1856. **Maguagua.**—Koyce in 18th Rep. B. A. E., Mich. map, 1899. **Maguawgo.**—Doc. of 1809 in Am. St. Pap., Ind. Aff., 1, 796, 1832. **Magaugan.**—Miami Rapids treaty (1819) in U. S. Ind. Treaties, 201, 1873. **Menquagon.**—Wyandot petition (1812) in Am. State Papers, op. cit., 795. **Monguagon.**—Howe, *Hist. Coll.*, 262, 1851.

Maguhleloo ('caribou'). A gens of the Abnaki, q. v.

Magalib.—J. D. Prince, inf'n, 1905 (modern St Francis Abnaki form). **Ma-guñ-le-loo'**.—Morgan, *Anc. Soc.*, 174, 1877.

Magniaqui. A division of the Variohió, in s. Sonora, Mexico, on the w. bank of Rio Mayo, n. of Alamos, lat. 27° 25', lon. 109° 20'. They occupied a village of the same name, and some of them lived with the Chinipas at San Andrés Chinipas.—Orozco y Berra, *Geog.*, 58, 324, 1864.

Maguina. A pueblo in w. Chihuahua, Mexico, probably between lat. 28° and 29°. As it is on the border land of the Nevome and Tarahumare and not far from the main habitat of the Tepehuane, it doubtless contains or contained a mixed population. The village has therefore been assigned by various writers to one or another of those tribes. Orozco y Berra's map includes the village in Nevome country.

San Juan B[autista]. Maguina.—Orozco y Berra, Geog., 324, 1864.

Magunkaquog (originally *Magwonkkomuk*, 'place of the gift,' or 'granted place' (Eliot), possibly afterward changed by the Indians to the present form, meaning 'place of great trees.'—Trumbull). A village of Christian Indians in Nipmuc territory, at Hopkinton, Middlesex co., Mass., in 1674. On the name, see Trumbull and Tooker, cited below. Cf. *Mangunckakuck*. **Magoncoog**.—Livingston (1678) in N. Y. Doc. Col. Hist., XIII, 528, 1881. **Magoonkkomuk**.—Eliot (1669) quoted by Tooker, Algonq. Ser., x, 26, 1901. **Maguncoog**.—Rawson (1678) in N. Y. Doc. Col. Hist., XIII, 521, 1881. **Magunkahquog**.—Trumbull, Ind. Names Conn., 18, 1881. **Magunkakook**.—Tooker, Algonq. Ser., x, 27, 1901. **Magunkaquog**.—Gookin (1674) in Mass. Hist. Soc. Coll., 1st s., i, 188, 1806. **Magunkoog**.—Gookin (1677) in Trans. Am. Antiq. Soc., ii, 443, 1836. **Magunkog**.—Ibid., 470. **Majunkaquog**.—Eliot quoted by Tooker, Algonq. Ser., x, 25, 1901. **Makunkokog**.—Gookin (1677) in Trans. Am. Antiq. Soc., ii, 435, 1836. **Mogkunkakauke**.—Tooker, op. cit., 27. **Moogunkawg**.—Stone (1767) in Mass. Hist. Soc. Coll., 1st s., x, 82, 1809.

Magwa (*Ma-gwä*, 'loon'). A gens of the Shawnee (q. v.).—Morgan, Anc. Soc., 168, 1877.

Maha ('caterpillar'). Given by Bourke (Jour. Am. Folk-lore, ii, 181, 1889) as a clan of the Mohave, q. v.

Mahackemo. The principal chief of a small band on Norwalk r., s. w. Conn., which sold lands in 1640 and 1641. See *Norwalk*.

Mahackemo.—De Forest, Inds. of Conn., 177, 1851. **Mahackeno.**—De Forest as quoted by Ruttenber, Tribes Hudson R., 82, 1872.

Mahahal. A former Chumashan village on San Cayetano ranch, Ventura co., Cal.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Mahala mats. A California name of *Ceanothus prostratus*, also known as squaw's carpet. *Mahala*, more often *mohale*, is often used as synonymous with "squaw" in California by the whites. If not from Spanish *mujer*, 'woman,' it is from Yokuts *muk'ela*, having the same meaning. (A. F. C. A. L. K.)

Maharolukti (*Mä-har-o-luk'-ti*, 'brave'). A subclan of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Mahaskahod. A hunting village of the Manahoac in 1608, on Rappahannock r., Va., at the limit of the Powhatan confederacy, probably near Fredericksburg. **Mahaskahod**.—Smith (1629), Va., i, map, repr. 1819. **Mohaskahod**.—Simons in Smith, *ibid.*, 186.

Mahcoah. The principal village of the

Toquart (q. v.) on Village passage, Barclay sd., w. coast of Vancouver id.—Can. Ind. Aff., 263, 1902.

Maheuala. A village formerly on the lower Mississippi, destroyed about the close of 1681 or early in 1682; perhaps a settlement of the Tangibao, q. v.

Maheoulaima.—La Salle (1682) in Margry, Déc., ii, 198, 1877. **Maheouala**.—*Ibid.*, 190. **Maheoula**.—La Métairie (1682) quoted by French, Hist. Coll. La., ii, 23, 1875.

Mahican ('wolf'). An Algonquian tribe that occupied both banks of upper Hudson r., in New York, extending n. almost to L. Champlain. To the Dutch they were known as River Indians, while the French grouped them and the closely connected Munsee and Delawares under the name of Loups ('wolves'). The same tribes were called *Akochakaneñ* ('stammerers') by the Iroquois. On the w. bank they joined the Munsee at Catskill cr., and on the e. bank they joined the Wappinger near Poughkeepsie. They extended e. into Massachusetts and held the upper part of Housatonic valley. Their council fire was at Schodac, on an island near Albany, and it is probable that they had 40 villages within their territory. The name, in a variety of forms, has been applied to all the Indians from Hudson r. to Narragansett bay, but in practical use has been limited to two bodies, one on lower Connecticut r., Conn., known dialectically as *Mohegan* (q. v.), the other, on Hudson r., known as *Mahican*. They were engaged in a war with the Mohawk, their nearest neighbors on the w., when the Dutch appeared on the scene, which lasted until 1673. In 1664 the inroads of the Mohawk compelled them to remove their council fire from Schodac to Westenhuck, the modern Stockbridge, Mass. As the settlements crowded upon them the Mahican sold their territory piecemeal, and about 1730 a large body of them emigrated to Susquehanna r. and settled near Wyoming, Pa., in the vicinity of the Delawares and Munsee, with whom they afterward removed to the Ohio region, finally losing their identity. A previous emigration had formed the main body of the mixed tribe of the *Scaticook*. As early as 1721 a band of Mahican found their way to Indiana, where they had a village on Kankakee r. In 1736 those living in Housatonic valley were gathered into a mission at Stockbridge, Mass., where they maintained a separate existence under the name of Stockbridge Indians. These are the only Mahican who have preserved their identity. In 1756 a large body of Mahican and Wappinger removed from the Hudson to the e. branch of the Susquehanna, settling, with the Nanticoke and others, under Iroquois protection at Chenango, Chugant, and Owego, in Broome and Ti-

oga cos., N.Y. They probably later found their way to their kindred in the W. A few Mahican remained about their ancient homes on the Hudson for some years after the Revolution; but finally disappeared unnoticed. If any remain they are included among the Stockbridge.

According to Rutenber the Mahican confederacy comprised at least 5 divisions or subtribes—the Mahican proper, Wiekagjoc, Mechkentowoon, Wawyachtoc, and Westenhuck (Stockbridges). It is impossible to estimate their population, as the different bands were always confounded or included with neighboring tribes, of whom they afterward became an integral part.

According to Rutenber's account the government of the Mahican was a democracy, but his statement that the office of chief sachem was hereditary by the lineage of the wife of the sachem, which appears to be correct, does not indicate a real democracy. His statement in regard to the duties of the sachem and other officers is as follows: "The sachem was assisted by counselors, and also by one hero, one owl, and one runner; the rest of the nation were called young men or warriors. The sachem, or more properly king, remained at all times with his tribe and consulted their welfare; he had charge of the *mnoti*, or bag of peace, which contained the belts and strings used to establish peace and friendship with different nations, and concluded all treaties on behalf of his people. The counselors were elected, and were called chiefs. Their business was to consult with their sachem in promoting the peace and happiness of their people. The title of hero was gotten only by courage and prudence in war. When a war-alliance was asked, or cause for war existed with another tribe, the sachem and the counselors consulted, and if they concluded to take up the hatchet, the matter was put in the hands of the heroes for execution. When peace was proposed, the heroes put the negotiations in the hands of the sachem and counselors. The office of owl was also one of merit. He must have a strong memory, and must be a good speaker. His business was to sit beside his sachem, and proclaim his orders to the people with a loud voice; and also to get up every morning as soon as daylight and arouse the people, and order them to their daily duties. The business of runner was to carry messages, and to convene councils."

The Mahican were generally well built. As fighting men they were perfidious, accomplishing their designs by treachery, using stratagem to deceive their enemies, and making their most hazardous attacks under cover of darkness. The women

ornamented themselves more than the men. "All wear around the waist a girdle made of the fin of the whale or of sewant." The men originally wore a breechcloth made of skins, but after the Dutch came those who could obtain it wore "between their legs a lap of duffels cloth half an ell broad and nine quarters long," which they girded around their waists and drew up in a fold "with a flap of each end hanging down in front and rear." In addition to this they had mantles of feathers, and at a later period decked themselves with "plaid duffels cloth" in the form of a sash, which was worn over the right shoulder, drawn in a knot around the body, with the ends extending down below the knees. When the young men wished to look especially attractive they wore "a band about their heads, manufactured and braided, of scarlet deer hair, interwoven with soft shining red hair." According to Van der Donck, the women wore a cloth around their bodies fastened by a girdle which extended below the knees, but next to the body, under this coat, they used a dressed deerskin coat, girt around the waist. The lower body of this skirt they ornamented with strips tastefully decorated with wampum which was frequently worth from 100 to 300 guilders (\$40 to \$120). They bound their hair behind in a club, about a hand long, in the form of a beaver's tail, over which they drew a square wampum-ornamented cap; and when they desired to be fine they drew around the forehead a band also ornamented with wampum, which was fastened behind in a knot. Around their necks they hung various ornaments; they also wore bracelets, curiously wrought and interwoven with wampum. Polygamy was practised to some extent, though mostly by chiefs. Maidens were allowed to signify their desire to enter matrimonial life, upon which a marriage would be formally arranged; widows and widowers were left to their own inclinations. In addition to the usual manifestations of grief at the death of a relative or friend, they cut off their hair and burned it on the grave. Their dead, according to Rutenber, were usually interred in a sitting posture. It was usual to place by the side of the body a pot, kettle, platter, spoon, and provisions; wood was then placed around the body, and the whole was covered with earth and stones, outside of which pickets were erected, so that the tomb resembled a little house. Their houses were of the communal sort and differed usually only in length; they were formed by long, slender, hickory saplings set in the ground in a straight line in two rows. The poles were then bent toward each other in the form of an arch

and secured together, giving the appearance of a garden arbor; the sides and roof were then lathed with split poles, and over this bark was lapped and fastened by withes to the lathing. A smoke-hole was left in the roof, and a single doorway was provided. These houses rarely exceeded 20 ft in width, but they were sometimes 180 ft long. Their so-called castles were strong, firm structures, and were situated usually on a steep, high, flat-topped hill, near a stream. The top of the hill was inclosed with a strong stockade, having large logs for a foundation, on both sides of which oak posts, forming a palisade, were set in the ground, the upper ends being crossed and joined together. Inside the walls of such inclosures they not infrequently had 20 or 30 houses. Besides their strongholds they had villages and towns which were inclosed or stockaded and which usually had woodland on one side and corn land on the other. Their religious beliefs were substantially the same as those of the New England Indians.

Barton gives the Mahican 3 clans: Muchquauh (bear), Mechchaooh (wolf), Toonpaoh (turtle). According to Morgan they had originally the same clans as the Delawares and Munsee—the Wolf, Turtle, and Turkey; but these ultimately developed into phratries, subdivided into clans as follows: The Tooksetuk (wolf) phratry into the Nehjao (wolf), Makwa (bear), Ndeyao (dog), and Wapakwe (opossum) clans; the Tonebao (turtle) phratry into the Gakpomute (little turtle), — (mud turtle), Tonebao (great turtle), and Wesawmaun (yellow eel) clans; —, the Turkey phratry into the Naahmao (turkey), Gahko (crane), and — (chicken) clans.

The villages of the Mahican, so far as their names have been recorded, were Aepjin, Kaunaumek (Stockbridge), Maringoman's Castle, Monemius, Potie, Seaticook (3 villages in Dutchess and Rensselaer cos., N. Y., and Litchfield co., Conn.), Schodac, Wiatiae, Wiltmeet, Winooskeek, and Wyantenuc.

Mahktosis. The principal village of the Ahousaht (q. v.), on Matilda cr., Clayoquot sd., w. coast of Vancouver id.—Can. Ind. Aff., 264, 1902.

Mahoa. Probably the same as Maxua, the chief of the Maamtagyia, a Kwakiutl gens, but applied by Galiano (Relacion, 103, 1802), in the Spanish form Majoa, to his village or to the gens itself.

Mahohivas (*Máhohiás*, 'red shield'). A warrior society of the Cheyenne (q. v.); also sometimes known as Hotóá-nútqiu, 'Buffalo-bull warriors.' (J. M.)

Red Shield.—Dorsey in Field Columb. Mus. Pub., no. 99, 15, 1905.

Mahoning ('at the lick.'—Heckewelder). A Delaware village in 1764 on the w. bank of Mahoning r., perhaps between Warren and Youngstown, Trumbull co., Ohio. (J. M.)

Mahoning.—Hutchins' map (1764) in Smith, Bouquet's Exped., 1766. **Mahonink**.—Heckewelder in Trans. Am. Philos. Soc., n. s., iv, 365, 1834 (correct form). **Mahony Town**.—*Ibid.*, 390.

Mahow. A Chumashan village placed by Taylor at José Carrillo's rancho, Ventura co., Cal. Perhaps the site was the Las

Posas rancho, as stated by Ventura Indians in 1884.

Ma-hau.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884 (name from Indian in 1884). **Ma-how**.—Taylor in Cal. Farmer, May 4, 1860 (name from 1856).

Mahoyum (*Má-ho-gum*, 'red tipi'). The name of a special heraldic tipi belonging to the Cheyenne, erroneously given by Clark (Cheyenne MS.) as the name of a band. (J. M.)

Miayuma.—Clark quoted by Mooney in 14th Rep. B. A. E., 1026, 1896.

Mahsolamo. Given as the name of a body of Salish on the s. side of Chemanish lake, near the e. coast of Vancouver id.—Brit. Col. map, Ind. Aff.; Victoria, 1872.

Mahtoiawa ('the bear that whirls, 'Whirling Bear'). A Brulé Teton Sioux chief. While the Brulés, Oglala, and Miniconjou Sioux were camped near Ft Laramie, Wyo., in 1854, having come to receive the annual presents from the Government, an ox belonging to some Mormon emigrants was killed by the Indians. According to the most reliable information, obtained by Grinnell from Wm. Rowland, who was at Ft Laramie during the trouble, the commandant demanded the surrender of the offender, and Mahtoiawa, in response, pointed out the tip of the guilty Indian, informing Lieut. Grattan that he might arrest him; but Grattan insisted that Mahtoiawa should bring the man out and deliver him. When the chief declined to do so, Grattan ordered his men to fire a howitzer at the lodge in the middle of the village. A shell killed an Indian, and 17 of the 18 soldiers were at once shot down with arrows, the single survivor escaping by the aid of an Indian friend. The Sioux besieged Ft Laramie until it was relieved. Mahtoiawa was killed in an action before the fort, and the war, which was the beginning of Sioux hostilities, was carried on by Little Thunder.

Mahusquechikoken. A former village, under Iroquois rule, situated on Allegheny r., Pa., about 20 m. above Venango, and inhabited chiefly by Seneca and Munsee Delawares; it was destroyed by Broadhead in 1779. This village, together with Buckaloon and Cowawago, formed a settlement 8 m. in length along Allegheny r., the 3 villages together containing about 35 large houses (Broadhead (1779) in Jour. Mil. Exped. of Maj. Gen. Sullivan, 308, 1887). (J. N. B. H.)

Matcoba. A settlement of the Nevome and the seat of a mission established in 1676; situated on or near the upper Rio Yaqui, in e. Sonora, Mexico. In 1678 the population numbered 153. The town now consists of a mixed population of whites, Pima, Yaqui, and a few Mayo, numbering in all 199 in 1900.

Maicoba.—Orozco y Berra, Geog., 351, 1864. **S. Francisco Borja Maicoba.**—Zapata (1678) in Doc. Hist. Mex., 4th s., III, 345, 1857.

Maidu ('man', 'Indian'). A tribe formerly dwelling in Sacramento valley and the adjacent Sierra Nevada in California. This single tribe constitutes the entire Pujunan linguistic family of Powell, all the divisions of which called themselves Maidu, and distinguished themselves one from another by their local names only. The Maidu proper, comprising the divisions N. of Bear r. valley, were formerly considered a different stock from the Nishinam, who are now recognized as the southern branch of the family. The names of the Maidu villages and of the inhabitants were usually local place names. It

OLD MAIDU MAN. (UNIVERSITY OF CALIFORNIA)

may be doubted if, in the following list of the divisional and village names, the former have a greater value than the latter or were in fact anything more than the larger villages with perhaps outlying settlements of a more or less temporary character. Divisions: Cohes, Cushna, Hoida, Honkut, Kiski, Konkau, Kulomum, Molma, Nimsewi, Pakamali, Tsaktomo, Tsanak, Tsulumsewi, Tummeli, Ustoma, Willi, Yumagatok, and Yunu. Villages: Bamom, Bauka, Bayu, Benkomkomi, Botoko, Eskini, Hembem, Hoako, Hoholto, Hokomo, Hopnomkoyo, Indak, Kalkalya, Kotasi, Kulaipto, Kulkumish, Michopdo, Mimal, Molma, Nakankoyo, Oidoingkoyo, Okpam, Ola, Ololopa, Onchoma, Opok, Otaki, Paki,

Panpakan, Pitsokut, Pulakatu, Sekumne, Sisu, Silongkoyo, Siwim Pakan, Sunusi, Tadoiko, Taikus, Taisida, Tasikoyo, Tchikimisi, Tishum, Tomcha, Totoma, Tsam Bahenom, Tsekankan, Tsuka, Wokodot, Yalisumni, Yamako, Yauko, Yikulme, Yodok, Yotammoto, Yumam, and Yupu. Consult Dixon in Bul. Am. Mus. Nat. Hist., XVII, pt. 3, 1905. See *Pujunan Family*.

Mai'-deh.—Powers in Cont. N. A. Ethnol., III, 282, 1877. **Mai'-du.**—Ibid. **Meidoos.**—Powers in Overland Mo., XII, 21, 1874. **Midu.**—Merriam in Science, n. s., XIX, 914, June 15, 1904 (pron. Mi-doo). **Wawáh.**—Powers, Inds. West Nevada, 14, 1876 ('strangers': Paiute name for all Sacramento r. tribes).

Mailam-ateuna ('those of the lowermost'). A Zuñi phratry consisting of the Takya (Toad) and Chitola (Rattlesnake) clans. (F. H. C.)

Maitheshkizh ('Coyote pass,' referring to the pueblo of Jemez). A Navaho clan, descended from a captive Jemez girl and now affiliated with the Tsedzhinkini. **Mai'geekij.**—Matthews in Jour. Am. Folk-lore, III, 104, 1890. **Mai'geekijni.**—Ibid. **Mai'deski'z.**—Matthews, Navaho Legends, 30, 1897. **Mai'deski'zni.**—Ibid.

Maitho ('Coyote spring'). A Navaho clan.

Maiçò.—Matthews in Jour. Am. Folk-lore, III, 103, 1890. **Maiçò'dine.**—Ibid. **Mai'tó.**—Matthews, Navaho Legends, 30, 1897. **Mai'tó'dine.**—Ibid.

Maize (from the Arawak *marise*, changed to *maysi* and *mahiz* in the Antilles). This giant cereal, known in the United States and Canada as 'Indian corn,' or simply 'corn,' and to botanists as *Zea mays* Linn., was the great food plant of those American Indians who sought the aid of cultivation in obtaining food. It is now generally supposed to have been derived from native grasses—the *Euchlœna mexicana* of s. Mexico and *E. luxurians* of Guatemala, the latter approximating most nearly the cultivated corn. These are the only known species of North American endogens from which the numerous varieties now in use could have been developed. Harshberger says linguistic evidence shows that maize was introduced into the United States from the tribes of Mexico and from the Carib of the West Indies, but the time of this introduction can only be conjectured. That it was long before the appearance of Europeans, however, is evident, not only from its early and widespread cultivation by tribes of the area now embraced in the United States, but from the fact that indications of its cultivation are found in mounds and in the ancient pueblo ruins and cliff dwellings, while corroborative evidence is found in the fact that several varieties of maize had already been developed at the time of discovery, four being mentioned as in use among the Indians of Virginia (Beverley, Hist. Virginia, 125–128, 1722). Jacques Cartier, the first European to enter the St

Lawrence, observed large fields of growing maize at Hochelaga (now Montreal) in 1534, and Champlain in 1604 found it in cultivation at almost every point visited from Nova Scotia to upper Ottawa r. The supplies of maize obtained from the Indians by the New England and Virginia colonists are well known. Hennepin, Marquette, Joliet, La Salle, and other early French explorers of the Mississippi valley found all the tribes they visited, from the Minnesota r. to the Gulf, and even into Texas, cultivating maize; and the same was true of the tribes between n. w. Mexico and the plains of Kansas when visited by Coronado in 1540-42. Even the Mandan and Arikara on the upper Missouri had their maize patches when first seen by the whites. How far northward on the Pacific slope the cultivation of maize had extended at the time of the discovery is not known. Evidence that it or anything else was cultivated in California w. of the Rio Colorado valley is still lacking. Brinton (Am. Race, 50, 1891) expresses the opinion that maize "was cultivated both north and south to the geographical extent of its productive culture." Such at least appears to have been true in regard to its extent northward on the Atlantic slope, except in the region of the upper Mississippi and the Red r. of the North.

The ease with which maize can be cultivated and conserved, and its bountiful yield, caused its rapid extension among the Indians after it first came into use. With the exception of better tillage the method of cultivation is much the same to-day among civilized men as among the natives. Thomas Hariot, who visited Virginia in 1586, says the Indians put four grains in a hill "with care that they touch not one another." The extent to which the cereal was cultivated in prehistoric times by the Indians may be inferred from these facts and from the observations of early explorers. It seems evident from the history of the expeditions of De Soto and Coronado (1540-42) that the Indians of the Gulf states and of the Pueblo region relied chiefly on maize for food. It is also probable that a moiety of the food supply of the Indians of Virginia and the Carolinas, and of the Iroquois and Huron tribes, was from the cultivation of corn. Du Pratz says the Indians "from the sea [Gulf] as far as the Illinois" make maize their principal subsistence. The amount of corn of the Iroquois destroyed by Denonville in 1687 has been estimated at more than a million bushels (Charlevoix, Hist. Nouv. France, II, 355, 1744), but this estimate is probably excessive. According to Tonti (French, Hist. Coll. La., I, 70, 1846), who took part in the expedition, the army was engaged

seven days in cutting up the corn of four villages. Thaumer de la Source (Shea, Early Voy. Miss., 81, 1861) says, "the Tounicas [Tonika] live entirely on Indian corn." Gen. Wayne, writing in 1794 of the Indian settlements, asserts that "the margins of these beautiful rivers, the Miamis of the Lake and the Au Glaize, appear like one continued village for a number of miles, both above and below this place, Grand Glaize, nor have I ever before beheld such immense fields of corn in any part of America from Canada to Florida" (Manypenny, Ind. Wards, 84, 1880). From the Indians are derived ash-cake, hoe-cake, succotash, samp, hominy, the hominy mortar, etc., and even the cribs elevated on posts are patterned after those of the Indians of the Southern states. Corn was used in various ways by the natives in their ceremonies, and among some tribes the time of planting, ripening, and harvesting was made the occasion for festivities. See *Agriculture, Food*.

Consult Carr, Mounds of the Mississippi Historically Considered, 1883; Cushing, Zuni Breadstuffs; Harshberger, Maize: a Botanical and Economic Study, 1893; Payne, Hist. New World, I, 1892; Stickney in Parkman Club Pub., no. 13, 1897; Thomas in 12th Rep. B. A. E., 614-622, 1894. (c. t.)

Majalayghua. A former Chunashan village near Los Prietos, adjacent to Santa Barbara, Cal.

Inajalayghua.—Bancroft, Nat. Races, I, 459, 1874 (misquoted from Taylor). **Majalayghua.**—Taylor in Cal. Farmer, Apr. 24, 1863.

Makache ('owl'). An Oto gens. **Ma-ka'-toe.**—Dorsey in 15th Rep. B. A. E., 240, 1897. **Ma'-kotch.**—Morgan, Anc. Soc., 156, 1877.

Makah ('cape people'). The southernmost tribe of the Wakashan stock, the only one within the United States. They belong to the Nootka branch. According to Swan the Makah claimed the territory between Flattery rocks, 15 m. s., and Hoko r., 15 m. e. of C. Flattery, Wash., also Tatoosh id., near the cape. Their winter towns were Baada, Neah, Ozette, Tzues, and Waatch; their summer villages, Ahchawat, Kiddekubbut, and Tatoosche. Gibbs (MS., B. A. E.) mentions another, called Kehsidatsoos. They now have two reservations, Makah and Ozette, Wash., on which, in 1905, there were respectively 399 and 36, a total of 435 for the tribe. In 1806 they were estimated by Lewis and Clark to number 2,000. By treaty of Neah bay, Wash., Jan. 31, 1855, the Makah ceded all their lands at the mouth of the Strait of Juan de Fuca except the immediate area including C. Flattery. This reservation was enlarged by Executive order of Oct. 26, 1872, superseded by Executive order of Jan. 2, 1873, and in turn revoked

by Executive order of Oct. 12 of the same year, by which the Makah res. was definitely defined. The Ozette res. was established by order of Apr. 12, 1893.

Ba-qa-ô.—McCaw, Puyallup MS. vocab., B. A. E., 1885 (Puyallup name). **Cape Flattery.**—Lane in Ind. Aff. Rep., 162, 1850. **Classet.**—Farnham, Trav., II, 310, 1843 (Nootka name: 'outsiders'). **Clatset.**—Dunn, Hist. Oregon, 231, 1844. **Clossets.**—Starling in Ind. Aff. Rep., 171, 1852. **Flattery.**—Ibid., 170. **Klaizarts.**—Armstrong, Oregon, 136, 1857. **Kla-iz-zarts.**—Jewitt, Narr., 75, 1849. **Klasset.**—Swan in Smithsonian Cont., XVI, 1, 1870. **Kwē-nēt-che-chat.**—Ibid. (own name: 'cape people'). **Kwē-nēt-sath.**—Ibid. (Salish name). **Macau.**—Lane in Ind. Aff. Rep., 162, 1850. **Ma-caw.**—Starling in Ind. Aff. Rep., 170, 1852. **Maccaws.**—Hanna in Ind. Aff. Rep., 1857, 337, 1858. **Mackahs.**—Taylor in Cal. Farmer, Aug. 1, 1862. **Makahs.**—Gibbs, Clallam and Lummi, v, 1863. **Makans.**—Stevens in Ind. Aff. Rep., 448, 1854. **Makas.**—Simmons in Ind. Aff. Rep., 335, 1857. **Makaw.**—Lane in Sen. Ex. Doc. 52, 31st Cong., 1st sess., 173, 1850. **Makha.**—U. S. Ind. Treat. (1855), 461, 1873. **Mak-ka.**—Swan in Smithsonian Cont., XVI, 1, 1870. **Ma-kaws.**—Jones (1853) in H. R. Ex. Doc. 76, 34th Cong., 3d sess., 7, 1857. **Quenait chechat.**—Swan, inf'n, Feb. 1886. **Que-nait-sath.**—Swan, N. W. Coast, 211, 1857. **Quinechart.**—Orig. Jour. Lewis and Clark (1806), VI, 70, 1905. **Quin-na-chart.**—Ibid., IV, 169, 1905. **Quinnechant.**—Lewis and Clark, Exped., II, 420, 1814. **Quinnechart.**—Ibid., 474. **Tatouche.**—Nicolet, Oregon, 143, 1846. **Tia'sath.**—Boas in 6th Rep. N. W. Tribes Can., 31, 1890 ('outside people': Nootka name). **Yacaws.**—Schoolcraft, Ind. Tribes, VI, 689, 1857.

Makak. An Ikogmiut Eskimo village on the right bank of the Yukon below Anvik, Alaska; pop. 121 in 1880, 50 in 1890.

Akka.—Baker, Geog. Dict. Alaska, 226, 1902. **Makagamute.**—Raymond in Sen. Ex. Doc. 12, 42d Cong., 1st sess., 25, 1871. **Makag'mut.**—Dall in Cont. N. A. Ethnol., I, 17, 1877. **Makeymut.**—Nelson in 18th Rep. B. A. E., map, 1899. **Makey-mute.**—Petroff, Rep. on Alaska, 57, 1881. **Makki.**—Zagoskin in Nouv. Ann. Voy., 5th s., XXI, map, 1850. **Manki.**—Raymond, op. cit., 31 (so called by whites).

Makak. See *Mocuck*.

Makan ('medicine'). A Ponca gens, in two subgenres: Real Ponka and Gray Ponka.

Maxap.—Dorsey in 15th Rep. B. A. E., 228, 1897. **Noh'-ga.**—Morgan, Anc. Soc., 155, 1877. **Je-sinde-it'aji.**—Dorsey, op. cit. ('does not touch buffalo tails').

Makataimeshekiakia. See *Black Hawk*.

Makatananamaki. See *Black Thunder*.

Makatapi ('black men.'—Hewitt). A name given in the Walam Olum of the Delawares as that of a tribe encountered by them during their migrations.—Brinton, Lenape Leg., 190, 1885.

Makawichia (*Ma-ka-wi-chia'*, 'place of many doves'). A Tarahumare rancheria near Palanquo, Chihuahua, Mexico.—Lumholtz, inf'n, 1894.

Makay. An unidentified village formerly on Pamlico r., N. C., marked on the map of the Homann heirs, 1756.

Makhelchel. A name applied by Powers to the people of the vicinity of Lower lake, one of the southern arms of Clear lake, Lake co., Cal. The name was used particularly to designate the people of Lower Lake id., who were supposed by Powers (Cont. N. A. Ethnol., III, 214,

1877) to belong to the Copehan (Wintun) linguistic stock, but who have been found to belong to the Kulanapan (Pomo) stock. The people inhabiting this island called the island and the village itself **Koi**. (S. A. B.)

Hesley.—Powers in Cont. N. A. Ethnol., III, 214, 1877 (from *hösch'-la*, 'island', in the Makhelchel dialect; applied by the whites both to the island and its original inhabitants). **Hessler.**—Ibid. **Kelsey.**—Ibid. **Kessler.**—Ibid. **Makh'-el-chel.**—Ibid.

Makhenikashika (*Maqe-nikaci'ya*, 'upper world people'). A Quapaw gens; probably identical with the Wakantaenikashika.—Dorsey in 15th Rep. B. A. E., 230, 1897.

Makhipya-lúta. See *Red Cloud*.

Makhipyamaza ('iron cloud'). A band of the Matantonwan division of the Mdewakanton Sioux, named from its chief. It numbered 153 in 1836 and 123 in 1859, at which latter date they resided on the w. bank of the Mississippi, above the mouth of St Croix, at the site of the present Hastings, Minn.

Iron-Cloud.—Neill, Hist. Minn., 144, note, 1858. **Iron Cloud's Village.**—Royce in 18th Rep. B. A. E., Minn. map, 1899. **Marcepeah Mahzah.**—Schoolcraft, Ind. Tribes, III, 612, 1853. **Ma-rpi-ya-ma-za.**—Neill, op. cit.

Makhipyawichashta ('cloud man'). A village of the Mdewakanton Sioux in Minnesota in 1836, numbering 157; named from the chief.

Cloud Man's band.—Ind. Aff. Rep., 1859, 100, 1860. **Marc pee wee Chastah.**—Schoolcraft, Ind. Tribes, III, 612, 1853. **Sky-Man.**—Neill, Hist. Minn., 144, note, 1858.

Maklykaut. An Eskimo missionary station on Disko bay, w. Greenland.

Maklykout.—Crantz, Hist. Greenland, I, map, 1767.

Makokos. See *Maycock*.

Makoma. A name used, evidently owing to some confusion on the part of early writers, for the Indians who formerly lived in the vicinity of Clear lake and the mountains of Napa and Mendocino cos., Cal., but they are said by Wrangell (Ethnogr. Nachr., 80, 1839) to have dwelt northward of Ft Ross in Russian r. valley. The term undoubtedly comes from Maiyákma, the name of a prominent Yukian Wappo village near Calistoga, Napa co. (S. A. B.)

Maiyákma.—S. A. Barrett, inf'n, 1906 (correct name). **Mayacmas.**—Bancroft, Nat. Races, I, 451, 1874. **Mayacomas.**—Ibid., 363. **Mipacmas.**—Ibid., 362. **Myacmas.**—Taylor in Cal. Farmer, June 22, 1860. **Myacomaps.**—Ibid., June 7, 1861.

Makomitek. An Algonquian tribe or band mentioned in 1671 as residing in the vicinity of Green bay, Wis. Tailhan identifies them with the Makoukuwe, which is doubtful.

Makamitek.—Sieur de St Lussan (1671) in N. Y. Doc. Col. Hist., IX, 803, 1855. **Makomitiks.**—Prise de Possession (1671) in Tailhan, Perrot Mém., 293, 1864.

Makoua ('bear'). A tribe or band living near the village of St Michel, in central Wisconsin, in 1673; probably a division or gens of the Foxes.

Makou.—Lapham, Inds. of Wis., 4, 1870. **Makoua.**—Jes. Rel. (1672), LVIII, 40, 1899.

Makoukuwe. A band or gens, probably of the Foxes, found living near Green bay, Wis., in 1673.

Makoucoué.—Jes. Rel. (1673), LVIII, 40, 1899. **Makoucoué.**—Jes. Rel. quoted by Shea in Wis. Hist. Soc. Coll., III, 131, 1857. **Makoukoué.**—MS. Jes. Rel. of 1673 quoted by Tailhan, Perrot Mém., 293, 1864. **Makoukoueks.**—Ibid.

Maktlaiath (*Mā'kt' aiath*). A sept of the Seshart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Makushin. An Aleut village on Makushin bay, Unalaska id., Alaska. Pop. 35 in 1834, according to Veniaminoff; 49 in 1874, according to Shiesnekov; 62 in 1880; 51 in 1890.

Makooshenskoi.—Elliott, Cond. Aff. Alaska, 225, 1875. **Makooshin.**—Elliott, Our Arct. Prov., map, 1856. **Makuschinskoe.**—Holmberg, Ethnogr. Skizz., map, 142, 1855. **Makushin.**—Petroff in 10th Census, Alaska, 23, 1884. **Makushinsk.**—Coxe, Russ. Discov., 163, 1787. **Makushinskoe.**—Veniaminoff, Zapiski, II, 202, 1840. **Makuski.**—Coxe, Russ. Discov., 158, 1787.

Makwa ('bear'). According to Morgan, one of the 11 clans of the Mahican. According to Barton it is one of the 3 divisions of the Mahican, corresponding to Morgan's phratrys. Morgan gives the wolf, turtle, and turkey; Barton gives the wolf, turtle, and bear, and puts the bear first. (J. M.)

Mā'kwā.—Morgan, Anc. Soc., 174, 1877. **Muchquanh.**—Keane in Stanford, Compend., 523, 1878 (misprint). **Much-quauh.**—Barton, New Views, xxxix, 1798. **Muk-wah.**—Warren in Minn. Hist. Soc. Coll., v, 44, 1885.

Makwa ('bear'). A gens of the Chipewewa, q. v.

Mā'kwā.—Morgan, Anc. Soc., 166, 1877. **Muk-kwaw.**—Tanner, Narrative, 314, 1830. **Muk-wah.**—Ramsey in Ind. Aff. Rep., 91, 1850.

Makwisuchigi ('they who go by the name of the bear'). The "royal" (ruling) gens of the Foxes. (W. J.)

Mā-kwis-so-jik.—Morgan, Anc. Soc., 170, 1877. **Mā'kwisutciq.**—Wm. Jones, inf'n, 1906.

Malahue. A former Chumashan village in Ventura co., Cal., at the Rancho de Maligo.

Hu-ma-li-wu.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884. **Malahu.**—Taylor in Cal. Farmer, July 24, 1863.

Malaka. A tribe of the Patwin division of the Copehan family that formerly lived in Lagoon valley, Solano co., Cal.

Malaccas.—Powers in Overland Mo., XIII, 542, 1874. **Mā-lak'-ka.**—Powers in Cont. N. A. Ethnol., III, 218, 1877.

Malakut (*Mā'lexal*). A Salish tribe on Saanich inlet, s. e. end of Vancouver id., speaking the Cowichan dialect; pop. 14 in 1901, 10 in 1904.

Mal-a-hut.—Can. Ind. Aff. 1889, 270, 1890. **Mala-kut.**—Ibid., 1901, pt. II, 164. **Mā'leqatl.**—Boas, MS., B. A. E., 1887.

Malashaganay. A name of the sheepshead or fresh-water drum (*Haplodinotus grunniens*). Through Canadian French *malashigané* or *malashigane*, from *manashigan* in the Chippewa-Nipissing dialects of the Algonquian stock, signifying 'ugly ashigan.' The *ashigan* is the black bass of American English. (A. F. C.)

Male (*Mā'lē*). A village of the Musqueam, a Cowichan tribe, situated n. of Sea id., in the delta of Fraser r., Brit. Col. According to Hill-Tout it was claimed by the Squawmish.

Mā'lē.—Hill-Tout in Rep. Brit. A. A. S., 54, 1894. **Mā'-li.**—Ibid., 473, 1900.

Malecite. Various explanations of this name have been given. According to Chamberlain it is from their Micmac name *Malisit*, 'broken talkers'; Tanner gives the form as *Mahneshets*, meaning 'slow tongues'; Baraga derives it through the Cree from *mayisit* or *malisit*, 'the disfigured or ugly foot'; Lacombe (Dict. Cris, 707) agrees with Baraga and gives the etymology as *mayi* or *mal*, 'deformed,' and *sit*, 'foot.' Maurault's explanation is radically different from all, as he says it is from *Maroudit* or *Maloudit*, 'those who are of Saint Malo.' Vetromile says it "comes from *malike*, which in old Abnaki and also in Delaware means witchcraft," but adds, "hence the French name Micmac is a substitute for *Mareschite*," as he writes the name. According to Chamberlain the name they apply to themselves is *Wulastuk-wiuk*, 'dwellers on the beautiful river,' or, as given by Maurault, *Ouarastegowiaks*, 'those of the river whose bed contains sparkling objects.'

The Malecite belong to the Abnaki group of the Algonquian stock. Maurault makes a distinction between the Malecite and the Etchimin, but adds that "the remnants of this tribe and the Etchimis are called at the present day Malecites." Their closest linguistic affinity is with the Passamaquoddy, the language of the two being almost identical, and is closely allied to the New England dialects, but more distant from that of the Micmac.

Although the New Brunswick coast was visited by or soon after the middle of the 16th century, and St John r. located on maps as early as 1558, making it quite probable that the people of this tribe had come in contact with the whites at that early date, the earliest recorded notice of them is in Champlain's narrative of his voyage of 1604. He found the country along the banks of the St John in the possession of Indians named "Les Etchemons," by whom his party was received with hospitality and rejoicing, and says they were the "first Christians" who had been seen by these savages, which may have been true of the particular party he met, but doubtful in the broader sense. That these were Malecite there is no reasonable doubt. "When we were seated," says Champlain, "they began to smoke, as was their custom, before making any discourse. They made us presents of game and venison. All that day and the night following they continued to sing,

dance, and feast until day reappeared. They were clothed in beaver skins."

Early in the 17th century Ft La Tour was built on St John r., which became the rallying point of the tribe, who there learned the use of firearms, and first obtained cooking vessels of metal and the tools and instruments of civilized life. The few French settlers on this river intermarried with the Indians, thus forming a close alliance, which caused them to become enemies of the New England settlers, between whom and the French there was almost constant warfare. After the English came into possession of the country there were repeated disputes between them and the Malecite in regard to lands until 1776. Afterward lands were assigned them. In 1856, according to Schoolcraft, "the Tobique river, and the small tract at Madawaska, Meductie Point, and Kingsclear, with their small rocky islands near St John, containing 15 acres," constituted all the lands held or claimed by them in the country which was formerly their own. In 1884 they numbered 767, of whom 584 were in New Brunswick and the others in Quebec province. According to the report of Canadian Indian Affairs for 1904 their number was 805, of whom 103 were in Quebec province and 702 in New Brunswick.

(J. M. C. T.)

Amalecites.—Chauvignerie (1736) in N. Y. Doc. Col. Hist., ix, 1052, 1855. **Amalecites**.—Clinton (1749), *ibid.*, vi, 540, 1855. **Amalingans**.—Shea, Cath. Miss., 144, 1855. **Amalistes**.—Am. H. Hist. Soc. Coll., i, 123, 1824. **St. John's river (Indians)**.—Gyles (1726) in Me. Hist. Soc. Coll., iii, 357, 1853. **Ulastekwi**.—Gatschet, Penobscot MS., B. A. E., 1887 (Penobscot name; pl. Ulastekwiak). **Wu'lastuk'-wiuk**.—Chamberlain, Malesit MS., B. A. E., 1882 ('= dwellers on the beautiful river'; name used by themselves. Boyd (Ind. Local Names, 1885) gives the Indian name of the river as Looshtook, 'long river').

Malemiut. An Eskimo tribe occupying the coast of Norton sd., n. of Shaktolik and the neck of Kaviak penin., Alaska. They have established permanent or summer settlements at points on Kotzebue sd., where they have become mixed with tribes of Kaviak penin. and the islands that visit their villages for barter and social enjoyment. Those of pure blood present the squat type of the Arctic Eskimo, with scant hair, broad flat noses, and high cheek bones with a thick covering of flesh. The tribe numbered 630 in 1900. Once more numerous and powerful, its villages now lie scattered among those of the Unaligmiut and Kavigmiut. Subdivisions are the Attenmiut, Inglatigmiut, Koyugmiut, Kugaramiut, Kungugmiut, Shaktoligmiut, and Tapkachmiut. Their villages are Akchadak, Atten, Chamisso, Kongik, Koyuktolik, Kugaluk, Kviguk, Kvinkak, Kwik(2), Nubviakchugaluk, Nuklit, Shaktolik, Taapuk, Ululuk, and Ungalik.

Mahlemoot.—Elliott, Our Arctic Prov., 444, 1886. **Mahlemutes**.—Dall in Proc. Am. A. S., 266, 1869 (between Kotzebue sd. and Norton bay). **Mahlemuts**.—Dall in Proc. Cal. Acad. Sci., iv, 35, 1873. **Malegmjuti**.—Erman quoted by Dall in Cont. N. A. Ethnol., 17, 1877. **Maleigmjuti**.—Holmberg, Ethnog. Skizz., 6, 1855. **Maleimoute**.—Zagoskin in Nouv. Ann. Voy., 5th s., xxi, map, 1850. **Malemukes**.—Whymper in Jour. Roy. Geog. Soc., 220, 1868. **Malemut**.—Nelson in 18th Rep. B. A. E., passim, 1899. **Malemutes**.—Whymper, Trav. in Alaska, 143, 318, 1868. **Malegmüt**.—Holmberg quoted by Dall in Cont. N. A. Ethnol., i, 16, 1877. **Malimiut**.—Wrangell quoted by Dall, *ibid.* **Malimuten**.—Wrangell, Ethnog. Nachr., 122, 1839. **Malimiyut**.—Turner in 11th Rep. B. A. E., 178, 1894. **Malmiut**.—Tikhmenief quoted by Dall in Cont. N. A. Ethnol., i, 16, 1877. **Mamelute**.—Whymper in Trans. Ethnol. Soc. Lond., vii, 167, 1869. **Tschugmuti**.—Erman quoted by Dall in Cont. N. A. Ethnol., i, 16, 1877.

Malhokshe (*Mal-hok-se*). A former Chumashan village in the interior of Ventura co., Cal., at a place called Cuesta de la Mojoneira.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Maliacones. An unidentified tribe mentioned by Cabeza de Vaca as living near the Avavares, in Texas, in 1528-34, and speaking a different tongue. Possibly they are identical with the Meracouman of Joutel and the Manico of Manzanet.

Maliacones.—Cabeza de Vaca, Rel., Smith trans., 125, 137, 1871. **Malicans.**—Harris, Voy. and Trav., II, 276, 1705. **Maliconas.**—Herrera, Hist. Gen., V, 95, 1726. **Malicones.**—Cabeza de Vaca (1542) quoted by Barcia, Ensayo, 13, 1723. **Maticones.**—Harris, Voy. and Trav., 803, 1705.

Malica. A village n. of the mouth of St Johns r., Fla., in 1564. De Bry's map locates it inland, s. of the mouth.

Malica.—Laudonnière in French, Hist. Coll. La., N. S., 331, 1869. **Mallica.**—Martin, N. C., I, 87, 1829.

Malico. A former Chumashan village near Somo hills, Ventura co., Cal.—Taylor in Cal. Farmer, July 24, 1863.

Malika (*Ma-li-ka*). Given by Bourke (Jour. Am. Folk-lore, II, 181, 1889) as a clan of the Mohave, q. v.

Malito (*Ma-li-tō*). A former Chumashan village in Ventura co., Cal., in a locality called Punta del Pozito.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Malki. A Kawia village on the Potrero res., in Cahuilla valley, e. of Banning, s. Cal.

Mal-ki.—Barrows, Ethno.-Bot. Coahuilla Ind., 33, 1900. **Potrero.**—Ibid.

Mallin. A Costanoan village situated in 1819 within 10 m. of Santa Cruz mission, Cal.—Taylor in Cal. Farmer, Apr. 5, 1860.

Mallopeme. One of the tribes of w. Texas, some at least of whose people were neophytes of the mission of San José y San Miguel de Aguayo.—MS. in Texas State archives, Nov., 1790.

Malockese. Mentioned by Blue Jacket as a tribe or band at a conference held at Greenville, Ohio, in 1807. Possibly the Mequachake division of the Shawnee, although apparently distinct.—Drake, Tecumseh, 94, 1852. (J. M.)

Malssum ('wolf'). A gens of the Abnaki, q. v.

Mals'-süm.—Morgan, Anc. Soc., 174, 1877. **Mölsem.**—J. D. Prince, inf'n, 1905 (modern St Francis Abnaki form).

Maltshokamut (*Mal-tsho'-qa-müt*, 'valley people': Chugachigmiut name). An unidentified division of the Knaiakhotana of Cook inlet, Alaska.—Hoffman., MS., B. A. E., 1882.

Maluksilak (*Maluksilag*). A settlement of the Aivilirmiut Eskimo on Lyons inlet, Hudson bay, Canada.—Boas in 6th Rep. B. A. E., 476, 1886.

Malulowoni (*Mal-u-lō-wō'-ni*). A former Chumashan village in the interior of Ventura co., Cal., at a place called Cuesta Santa Rosa.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Malvaitac. A former village, presumably Costanoan, connected with Dolores

mission, San Francisco, Cal.—Taylor in Cal. Farmer, Oct. 18, 1861.

Mamakume (*Mā'-makume*). A village of the Matsqui tribe of Cowichan on the s. side of Fraser r., Brit. Col., opposite Matsqui reserve.—Boas in 6th Rep. Brit. A. A. S., 454, 1894.

Mamalelekala. A Kwakiutl tribe on Village id., Brit. Col. According to Boas they were divided into four gentes: Temtlemtlels, Wewamaskem, Walas, and Mamalelekam. Their only town is Memkumlis, which they occupy jointly with the Koeksotenok. The population was estimated at about 2,000 in 1836-41; in 1904 it numbered 111.

Mah-ma-lil-le-kulla.—Sproat in Can. Ind. Aff., 145, 1879. **Mah-ma-lil-le-kullah.**—Can. Ind. Aff. 1884, 189, 1885. **Mahmatilleculaats.**—Brit. Col. map, 1872. **Mamaleilakitish.**—Tolmie and Dawson, Vocab. Brit. Col., 1188, 1884. **Mamaleilakulla.**—Ibid. **Mā'malelek'ala.**—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. **Mā'malelegala.**—Boas in Petermanns Mitt., pt. 5, 130, 1887. **Mama-lil-a-cula.**—Mayne, Brit. Col., 249, 1862. **Ma-ma-lil-li-kulla.**—Can. Ind. Aff. 1894, 279, 1895. **Mā'-me-li-li-a-ka.**—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 65. **Mam-il-i-li-a-ka.**—Tolmie and Dawson, Vocab. Brit. Col., 1188, 1884. **Mar-ma-li-la-cal-la.**—Kane, Wand. in N. Am., app., 1859.

Mamalelekam. A gens of the Mamalelekala.

Mā'lelegala.—Boas in Petermanns Mitt., pt. 5, 130, 1887. **Mā'malelek'am.**—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. **Mā'malelegala.**—Boas in Rep. Nat. Mus. for 1895, 330, 1897.

Mamalty. Mentioned in the narrative of Marie Le Roy and Barbara Leininger (Pa. Mag. Hist. and Biog., XXIX, 412, 1905) as a (Delaware?) village in w. Pennsylvania or e. Ohio in 1759.

Mamanahunt. A village of the Powhatan confederacy in 1608, on Chickahominy r., Charles City co., Va.—Smith (1629), Virginia, I, map, repr. 1819.

Mamanassy. A village of the Powhatan confederacy in 1608, at the junction of Pamunkey and Mattapony rs., in King and Queen co., Va.—Smith (1629), Virginia, I, map, repr. 1819.

Mamekoting. A chieftaincy of the Munsee, formerly living in Mamakating valley, w. of the Shawangunk mts. in Ulster co. (?), N. Y. It was one of the 5 Esopus tribes.—Ruttenber, Tribes Hudson R., 95, 1872.

Mameoya ('fish-eaters'). A (former?) division of the Kainah tribe of the Siksika, q. v.

Fish Eaters.—Culbertson in Smithsonian Rep. for 1850, 144, 1851. **Mā-me-o'-ya.**—Morgan, Anc. Soc., 171, 1877. **Mum-i'-o-yiks.**—Hayden, Ethnog. and Philol. Mo. Val., 264, 1862.

Mamikiniwug ('lowland people'). A subdivision of the Paskwawiniwug, or Plains Cree.

Mamikiwiniwag.—Wm. Jones, inf'n, 1906. **Mamikiwiniwok**—Lacombe, Dic. Langue Cris, x, 1874.

Mamorachic. A Tarahumare settlement in Chihuahua, Mexico; definite locality unknown.—Orozco y Berra, Geog., 322, 1864.

Mamtum. Given as the name of a body of Indians on Cowitchin lake, s. end of Vancouver id. (Brit. Col. map, Ind. Aff., Victoria, 1872). Perhaps the Quamichan or the Comiak of Cowitchin valley.

Mamun-gitunai (*Mā'mAn git'Anā'-i*, 'Gituns of Mamun r.'). The most important division of the Gituns, a family of the Eagle clan of the Haida, living at Masset, Queen Charlotte ids., Brit. Col. They derived their name from that of a small stream which falls into Masset inlet near its head, where they used to camp. A subdivision in the town of Yaku was called Ao-gitunai.—Swanton, *Cont. Haida*, 275, 1905.

Manabush, Manaboza. See *Nanaboza*.

Manahoac (Algonquian: 'they are very merry.'—Tooker). A confederacy or group of small tribes or bands, possibly Siouan, in N. Virginia, in 1608, occupying the country from the falls of the rivers to the mountains and from the Potomac to North Anna r. They were at war with the Powhatan and Iroquois, and in alliance with the Monacan, but spoke a language different from any of their neighbors. Among their tribes Smith mentions the Manahoac, Tanxnitania, Shackaconia, Ontponea, Tegninateo, Whonkenti, Stegaraki, and Hassinunga, and says there were others. Jefferson confounded them with the Tuscarora. Mahaskahod is the only one of their villages of which the name has been preserved. Others may have borne the names of the tribes of the confederacy. The Mahocks mentioned by Lederer in 1669 seem to be identical with them. See Mooney, *Siouan Tribes of the East*, 18, 1894.

Manahoac. A tribe or band of the Manahoac group. According to Jefferson they lived on Rappahannock r. in Stafford and Spotsylvania cos., Va.

Mahoc.—Lederer, *Discov.*, 2, 1672 (possibly identical, although given as distinct). **Mahocks.**—Lederer (1669) as quoted by Hawks, *N. C.*, II, 44, 1858. **Managoc.**—Lederer, *Discov.*, 2, 1672 (misprint). **Manahoaks.**—Loudon, *Selec. Int. Nar.*, II, 235, 1808. **Manahoacs.**—Jefferson, *Notes on Va.*, 134, 1794. **Manahoaks.**—Am. Pioneer, II, 189, 1843. **Manahocks.**—Simons in Smith, *Va.*, I, 188, 1819. **Manahokes.**—Smith, *Va.*, I, 74, 1819. **Mannahanocks.**—Kingsley, *Stand. Nat. Hist.*, pt. 6, 151, 1883. **Mannahoacs.**—Strachey, *Va.*, 37, 1849. **Mannahogs.**—Domenech, *Deserts N. Am.*, I, 442, 1860. **Mannahoaks.**—Strachey, *Va.*, 101, 1849. **Mannahocks.**—*Ibid.*, 41. **Mannahokes.**—Smith, *Va.*, I, 120, 1819. **Monahoacs.**—Jefferson quoted by Bozman, *Id.*, I, 113, 1837.

Manam. A tribe that formerly lived on the road from Coahuila to the Texas country; possibly the people elsewhere referred to as Mazames, and probably belonging to the Coahuiltecan linguistic stock.—Manzanet, *MS.* (1690), cited by H. E. Bolton, *inf'n*, 1906.

Manamoyik. A former Nauset village near Chatham, Barnstable co., Mass.

In 1685 it contained 115 Indians over 12 years of age. In 1762 the population had become reduced to fewer than 30 under the chief Quasson and were known as the Quasson tribe.

(J. M.)

Mandan. A Siouan tribe of the northwest. The name, according to Maximilian, originally given by the Sioux is believed by Matthews to be a corruption of the Dakota *Mawatani*. Previous to 1830 they called themselves simply Numakiki, 'people' (Matthews). Maximilian says "if they wish to particularize their descent they add the name of the village whence they came originally." Hayden gives Miah'tanēs, 'people on the bank,' as the name they apply to themselves, and draws from this the inference that "they must have resided on the banks of the Missouri at a very remote period." According to Morgan (*Syst. Consang. and Affin.*, 285), the native name of the tribe is Metootahik, 'South villagers.' Their relations, so far as known historically and traditionally, have been most intimate with the Hidatsa; yet, judged by the linguistic test, their position must be nearer the Winnebago. Matthews appears to consider the Hidatsa and Mandan descendants from the same immediate stem. Their traditions regarding their early history are scant and almost

entirely mythological. All that can be gathered from them is the indication that at some time they lived in a more easterly locality in the vicinity of a lake. This tradition, often repeated by subsequent authors, is given by Lewis and Clark, as follows: "The whole nation resided in one large village underground near a subterraneous lake; a grapevine extended its roots down to their habitation and gave them a view of the light; some of the most adventurous climbed up the vine and were delighted with the sight of the earth, which they found covered with buffalo and rich

MERAPARAPA ("LANCE")—MANDAN

with every kind of fruits; returning with the grapes they had gathered, their countrymen were so pleased with the taste of them that the whole nation resolved to leave their dull residence for the charms of the upper region; men, women, and children ascended by means of the vine; but when about half the nation had reached the surface of the earth, a corpulent woman who was clambering up the vine broke it with her weight, and closed upon herself and the rest of the nation the light of the sun. Those who were left on earth made a village below,

where we saw the nine villages; and when the Mandan die they expect to return to the original seats of their forefathers, the good reaching the ancient village by means of the lake, which the burden of the sins of the wicked will not enable them to cross." Maximilian says: "They affirm that they descended originally from the more eastern nations, near the seacoast." Their linguistic relation to the Winnebago and the fact that their movements in their historic era have been westward up the Missouri correspond with their tradition of a more easterly origin, and would seemingly locate them in the vicinity of the upper lakes. It is possible that the tradition which has long prevailed in the region of N. W. Wisconsin regarding the so-called "ground-house Indians" who once lived in that section and dwelt in circular earth lodges, partly underground, applies to the people of this tribe, although other tribes of this general region formerly lived in houses of this character. Assuming that the Mandan formerly resided in the vicinity of the upper Mississippi, it is probable that they moved down this stream for some distance before passing to the Missouri. The fact that when first encountered by the whites they relied to some extent on agriculture as a means of subsistence would seem to justify the conclusion that they were at some time in the past in a section where agriculture was practised. It is possible, as Morgan contends, that they learned agriculture from the Hidatsa, but the reverse has more often been maintained. Catlin's theory that they formerly lived in Ohio and built mounds, and moved thence to the N. W. is without any basis. The traditions regarding their migrations, as given by Maximilian, commence with their arrival at the Missouri. The point where this stream was first reached was at the mouth of White r., S. Dak. From this point they moved up the Missouri to Moreau r., where they came in contact with the Cheyenne, and where also the formation of "bands or unions" began. Thence they continued up the Missouri to Heart r., N. Dak., where they were residing at the time of the first known visit of the whites, but it is probable that trappers and traders visited them earlier.

The first recorded visit to the Mandan was that by the *Sieur de la Verendrye* in 1738. About 1750 they were settled near the mouth of Heart r. in 9 villages, 2 on the E. and 7 on the W. side. Remains of these villages were found by Lewis and Clark in 1804. Having suffered severely from smallpox and the attacks of the Assiniboin and Dakota, the inhabitants of the two eastern villages consolidated and moved up the Missouri to a point opposite the

Arikara. The same causes soon reduced the other villages to 5, whose inhabitants subsequently joined those in the Arikara country, forming 2 villages, which in 1776 were likewise merged. Thus the whole tribe was reduced to 2 villages, Metutahanke and Ruptari, situated about 4 m. below the mouth of Knife r., on opposite sides of the Missouri. These two villages were visited by Lewis and Clark in 1804. In 1837 they were almost destroyed by smallpox, only 31 souls out of 1,600, according to one account, being left, although other and probably more reliable accounts make the number of survivors from 125 to 145. After that time they occupied a single village. In 1845, when the Hidatsa removed from Knife r., some of the Mandan went with them, and others followed at intervals. According to Matthews, some moved up to the village at Ft Berthold as late as 1858. By treaty at the Mandan village, July 30, 1825, they entered into peaceable relations with the United States. They participated in the Ft Laramie (Wyo.) treaty of Sept. 17, 1851, by which the boundaries of the tribes of the N.W. were defined, and in the unratified treaty of Ft Berthold, Dak., July 27, 1866. By Executive order of Apr. 12, 1870, a large reservation was set apart for the Mandan, Hidatsa, and Arikara Indians in North Dakota and Montana, along Missouri and Little Missouri rs., which included the Mandan village, then situated on the left bank of the Missouri in lat. $47^{\circ} 34'$, lon. $101^{\circ} 48'$. By agreement at Ft Berthold agency, Dec. 14, 1866, the Mandan, Arikara, and Hidatsa ceded that portion of their reservation N. of lat. 48° , and E. of a N. and S. line 6 m. W. of the most westerly point of the big bend of Missouri r., S. of lat. 48° . Provision was also made for allotment in severalty of the remaining portion.

According to Maximilian the Mandan were vigorous, well made, rather above medium stature, many of them being robust, broad-shouldered, and muscular. Their noses, not so long and arched as those of the Sioux, were sometimes aquiline or slightly curved, sometimes quite straight, never broad; nor had they such high cheek bones as the Sioux. Some of the women were robust and rather tall, though usually they were short and broad-shouldered. The men paid the greatest attention to their headdress. They sometimes wore at the back of the head a long, stiff ornament made of small sticks entwined with wire, fastened to the hair and reaching down to the shoulders, which was covered with porcupine quills dyed of various colors in neat patterns. At the upper end of this ornament an eagle feather was fastened horizontally, the quill end of which was covered with red cloth and

the tip ornamented with a bunch of horse-hair dyed yellow. These ornaments varied and were symbolic. Tattooing was practised to a limited extent, mostly on the left breast and arm, with black parallel stripes and a few other figures.

The Mandan villages were assemblages of circular clay-covered log huts placed close together without regard to order. Anciently these were surrounded with palisades of strong posts. The huts were slightly vaulted and were provided with a sort of portico. In the center of the roof was a square opening for the exit of the smoke, over which was a circular screen made of twigs. The interior was spacious. Four strong pillars near the middle, with several crossbeams, supported the roof. The dwelling was covered outside with matting made of osiers, over which was laid hay or grass, and then a covering of earth. "The beds stand against the wall of the hut; they consist of a large square case made of parchment or skins, with a square entrance, and are large enough to hold several persons, who lie very conveniently and warm on skins and blankets." They cultivated maize, beans, gourds, and the sunflower, and manufactured earthenware, the clay being tempered with flint or granite reduced to powder by the action of fire. Polygamy was common among them. Their beliefs and ceremonies were similar to those of the Plains tribes generally. The Mandan have always been friendly to the United States, and since 1866 a number of the men have been enlisted as scouts.

In Lewis and Clark's time the Mandan were estimated to number 1,250, and in 1837 1,600 souls, but about the latter date they were reduced by smallpox to between 125 and 150. In 1850 the number given was 150; in 1852 it had apparently increased to 385; in 1871, to 450; in 1877 the number given was 420; it was 410 in 1885, and 249 in 1905.

There were, according to Morgan (Anc. Soc., 158, 1877), the following divisions, which seem to have corresponded with their villages before consolidation: (1) Horatamumake (Kharatanumanke), (2) Matonumake (Matonumanke), (3) Seepooshka (Sipushkanumanke), (4) Tanatsuka (Tanetsukanumanke), (5) Kitane-make (Khitanumanke), (6) Estapa (Histapenumanke), and (7) Meteahke.

Manexit (perhaps from *manunne*, 'meekness,' 'gentleness': *Manunne-es-it*, 'place of meekness.'—Tooker. Cf. Trumbull, below). A village of Christian Indians in 1674, in Nipmuc territory, near the present Thompson, Windham co.,

Conn. It was about 6 m. N. of Quantisset. (J. M.)

Maanexit.—Gookin (1674) in Mass. Hist. Soc. Coll., 1st s., I, 190, 1806. **Mananexit.**—Trumbull, Ind. Names Conn., 28, 1881. **Manexit.**—Mass. Hist. Soc. Coll., 1st s., VI, 205, 1800. **Mayanexit.**—Trumbull, op. cit. **Mayanexit.**—Ibid. **Myanexit.**—Ibid. **Wanexit.**—Drake, Bk. Inds., bk. 3, 88, 1848.

Mangachqua (*Mang-ach-qua*). A Potawatomi village on Peble (?) r., in s. Michigan, on a tract sold in 1827.—Potawatomi treaty (1827) in U. S. Ind. Treat., 675, 1873.

Mangas Coloradas (Span: 'redsleeves'). A Mimbreno Apache chief. He pledged friendship to the Americans when Gen. S. W. Kearny took possession of New Mexico in 1846. The chief stronghold of the Mimbrenos at that time was at the Santa Rita copper mines, s. w. N. Mex., where they had killed the miners in 1837 to avenge a massacre committed by white trappers who invited a number of Mimbrenos to a feast and murdered them to obtain the bounty of \$100 offered by the state of Chihuahua for every Apache scalp. When the boundary commission made its headquarters at Santa Rita trouble arose over the taking from the Mimbreno Apache of some Mexican captives and over the murder of an Indian by a Mexican whom the Americans refused to hang on the spot. The Mimbrenos retaliated by stealing some horses and mules belonging to the commission, and when the commissioners went on to survey another section of the boundary the Indians conceived that they had driven them away. In consequence of indignities received at the hands of miners at the Pinos Altos gold mines, by whom he was bound and whipped, Mangas Coloradas collected a large band of Apache and became the scourge of the white settlements for years. He formed an alliance with Cochise to resist the Californian volunteers who reoccupied the country when it was abandoned by troops at the beginning of the Civil war, and was wounded in an engagement at Apache pass, s. E. Ariz., that grew out of a misunderstanding regarding a theft of cattle. His men took him to Janos, in Chihuahua, and left him in the care of a surgeon with a warning that the town would be destroyed in case he were not cured. According to one account, soon after his recovery he was taken prisoner in Jan., 1863, by the Californians and was killed while attempting to escape, goaded, it is said, with a red-hot bayonet (Dunn, Massacres of Mts., 365, 374, 382, 1886), while Bell (New Tracks, II, 24, 1869) states that in 1862 he was induced to enter Ft. McLane, N. Mex., on the plea of making a treaty and receiving presents. The soldiers imprisoned him in a hut, and at night a sentry shot him under the pretext that he feared the Indian would escape. Consult also Ban-

croft, Ariz. and N. Mex., 1889; Bartlett, Pers. Narr., 1-11, 1854.

Mange. A Pima rancheria on the Rio Gila, s. Ariz., visited and named by Kino (after Juan Mateo Mange) about 1697.—Bernal quoted by Bancroft, Ariz. and N. Mex., 356, 1889.

Mangoraca. A village of the Powhatan confederacy in 1608, on the n. bank of the Rappahannock, in Richmond co., Va.—Smith (1629), Va., 1, map, repr. 1819.

Mangunckakuck ('place of great trees.'—Trumbull). A village in 1638, occupied by conquered Pequot subject to the Mohegan. It seems to have been on Thames r. below Mohegan, New London co., Conn.—Williams (1638) in Mass. Hist. Soc. Coll., 4th s., vi, 251, 1863. Cf. *Magunkaguog*.

Manhasset ('an island sheltered by other islands' (Jones, Ind. Bull., 14, 1867), referring to Shelter id.). A small tribe or band, belonging to the Montauk group, formerly living on Shelter id., at the e. end of Long Island, N. Y. Their chief, according to some authorities, lived at Sachem's Neck on Shelter id., but according to Tooker either at Cockles Harbor or Menantic cr. For the application of the name to Shelter id., see Tooker, *Algonq. Ser.*, vii, 1901. (J. M.)

Manhasset.—Wood in Macauley, N. Y., ii, 252, 1829. **Manhasset.**—N. Y. Doc. Col. Hist., ii, 145, 1888. **Manhassett.**—Deed (1648) in Thompson, Long Id., 181, 1839. **Mohansick.**—Writer ca. 1650 in Drake, Bk. Inds., bk. 2, 74, 1848 (probably the Manhasset, or perhaps the Montauk). **Monhau-set.**—Trumbull, Conn., 1, 146, 1818.

Manhattan ('the hill island,' or 'the island of hills,' from *manah* 'island', -*atin* 'hill.'—Tooker). A tribe of the Wappinger confederacy that occupied Manhattan id. and the e. bank of Hudson r. and shore of Long Island sd., in Westchester co., N. Y. Early Dutch writers applied the name also to people of neighboring Wappinger tribes. The Manhattan had their principal village, Nappeckamack, where Yonkers now stands, and their territory stretched to Bronx r. From their fort, Nipinichsen, on the n. bank of Spuyten Duyvil cr., they sallied out in two canoes to attack Hendrik Hudson when he returned down the river in 1609. Manhattan id. contained several villages which they used only for hunting and fishing. One was Sapohanikan. The island was bought from them by Peter Minuit on May 6, 1626, for 60 guilders' worth of trinkets (Martha J. Lamb, Hist. City of N. Y., 1, 53, 1877). Their other lands were disposed of by later sales. See Ruttenber, Ind. Tribes Hudson R., 77, 1872. (J. M.)

Manhazintanman (*Man'hazi'tan'man*, 'village on a yellow cliff'). A former Kansa village on Kansas r., near Lawrence, Kans.—Dorsey, Kansas MS. vocab., B. A. E., 1882.

Manhazulin (*Man'hazulin*, 'village at the yellow bank'). A former Kansa village on Kansas r., one of those occupied before the removal to Council Grove, Kans., in 1846.—Dorsey, Kansas MS. vocab., B. A. E., 1882.

Manhazulintanman ('village where they dwelt at a yellow cliff'). One of the last villages of the Kansa, on Kansas r., Kans. *Man'hazulin: ta'man*.—Dorsey, Kansas MS. vocab., B. A. E., 1882. *Mis'gudje-i' ts'e.*—Ibid. (= 'where Minkhudejin died').

Manhukdhintanwan (*Man'ukshin'-tan'wan*, 'dwelling place at a cliff village'). An ancient Osage village on a branch of Neosho r., Kans.—Dorsey, Osage MS. vocab., B. A. E., 1883.

Manico. A tribe mentioned by Manzanet (MS., 1690, cited by H. E. Bolton, inf'n, 1906) as living on the road from Coahuila to the Texas country. Perhaps identical with the Maliacones of Cabeza de Vaca and the Meracouman of Joutel.

Maninose. A name used in Maryland for the soft-shell clam (*Mya arenaria*), called *mananosay* in more northerly parts of the Atlantic coast. Dr L. M. Yale, of New York (inf'n, 1903), states that the local name at Lewes, Del., is *mullinose*. The word appears also as *manynose*. The word is derived from one of the southern Algonquian dialects, Virginian or Delaware; probably the latter. The derivation seems to be from the radical *man-*, 'to gather.' (A. F. C.)

Manistee. Mentioned as if an Ottawa village in Michigan in 1836, of which Keway Goosheum (Kewigushkum) was then chief (U. S. Ind. Treaties, 656, 1837). Kewigushkum is earlier mentioned as an Ottawa chief of L'Arbre Croche (Waganakisi), in which vicinity, on Little Traverse bay, Manistee may have been.

Maniti (*Mani-ti*, 'those who camp away from the village'). A Sisseton band; an offshoot of the Kakhmiationwan.—Dorsey in 15th Rep. B. A. E., 217, 1897.

Manito. The mysterious and unknown potencies and powers of life and of the universe. As taken over from Algon-

quian into the vocabulary of the white man, it has signified spirit, good, bad, or indifferent; Indian god or devil, demon, guardian spirit, genius loci, fetish, etc. The spelling *manitou* indicates French influence, the earlier writers in English using *manitto*, *manetto*, *manitoa*, etc. Cuoq says that the Nipissing *manito* was formerly pronounced *manitou*. Some writers use *manito*, or good *manito*, for Good or Great Spirit, and evil *manito* for the devil. It is declared by some that the signification of such terms as *Kitchi manito*, Great Spirit, has been modified by missionary influence. The form *manito* of English literature comes from one of the E. Algonquian dialects, the Massachuset *manitto*, he is a god, the Narraganset (Williams, 1643) *manit*, god, or the Delaware *manitto*. The form *manitou* comes with French intermediation from the central dialects, the Chipewya, and Nipissing or Cree *manito* (Trumbull in Old and New, 1, 337, 1870). The term has given rise to many place names in Canada and the United States. For a discussion of *manito* from the Indian point of view, consult Jones in Jour. Am. Folk-lore, XVIII, 183-190, 1905. See *Mythology, Orinda, Religion*. (A. F. C.)

Manitsuk. An Eskimo village on the s. e. coast of Greenland, about lat. 62° 30'; pop. 8 in 1829.

Maneetsuk.—Graah, Exped. Greenland, map, 1837.

Mankato (properly *Ma-ka'-to*, 'blue earth'). A former band and village of the Mdewakanton Sioux, probably at or near the site of the present Mankato, at the mouth of Blue Earth r., Faribault co., Minn., named from a chief known as Old Mankato. A later Mdewakanton chief who bore the name Mankato, the son of Good Road, was a member of the delegation who signed the Washington treaty of June 18, 1858, in which his name appears as "Makawto (Blue Earth)," and he is referred to also in the Indian Affairs Report for 1860, in connection with his band, as under the Lower Sioux Agency, Minn. He took an active part in the Sioux outbreak of 1862, and was one of the leaders in the second attack, in Aug. 1862, on Ft. Ridgely, Minn., in which, it is said, about 800 Sioux and Winnebago were engaged. He participated also in the fight at Birch Coolie, Minn., on Sept. 3 of the same year, and was killed by a cannon ball at the battle of Wood (or Battle) lake, Sept. 23. (C. T.)

Blue Earth band.—Gale, Upper Miss., 261, 1867.

Makato's band.—Ind. Aff. Rep., 68, 1860.

Mankoke ('owl'). An Iowa gens, now extinct.

Ma'-kotch.—Morgan, An. Soc., 156, 1877. **Mañ'-ko-ke.**—Dorsey in 15th Rep. B. A. E., 239, 1897.

Mannynose. See *Maninose*.

Manomet. A village of Christian Indians in 1674 near the present Monument, Sandwich township, Barnstable co., Mass. It

may have belonged to the Nauset or to the Wampanoag. In 1685 it contained 110 Indians over 12 years of age.

Manamet.—Doc. in Smith (1622), Va., II, 235, repr. 1819. **Manamete.**—Bradford (ca. 1650) in Mass. Hist. Soc. Coll., 4th s., II, 234, 1856. **Mananiet.**—Bourne (1674), *ibid.*, 1st s., I, 198, 1806. **Mannamett.**—Hinckley (1685), *ibid.*, 4th s., v, 133, 1861. **Mannamit.**—Bourne (1674), *ibid.*, 1st s., I, 198, 1806. **Manomet.**—Winslow (1623), *ibid.*, VIII, 252, 1802. **Manumet.**—Freeman (1792), *ibid.*, I, 231, 1806. **Monomete.**—Doc. in Smith (1622), Va., II, 233, repr. 1819. **Monument.**—Freeman (1792) in Mass. Hist. Soc. Coll., 1st s., I, 231, 1806. **Monumet.**—Davis, *ibid.*, VIII, 122, 1802.

Manosaht ('houses-on-spit people'). A Nootka tribe formerly dwelling at Hesquiat pt., between Nootka and Clayoquot sds., w. coast of Vancouver id. In 1883, the last time their name appears, they numbered 18.

Manná-wousüt.—Mayne, Brit. Col., 251, 1862. **Manoh-ah-sahts.**—Can. Ind. Aff., 52, 1875. **Ma'noosath.**—Boas in 6th Rep. N. W. Tribes Can., 31, 1890. **Manosaht.**—Sproat, Sav. Life, 308, 1868. **Manosit.**—Swan, MS., B. A. E. **Mau-os-aht.**—Can. Ind. Aff. 1883, 188, 1884.

Manos de Perro (Span.: 'dog-feet,' lit. 'dog hands'). One of the tribes formerly living near the lower Rio Grande in Texas; mentioned by Garcia (Manual, title, 1760) among those speaking the Coahuiltecan language, for which his Manual was prepared.

Manos Prietas (Span.: 'dark hands'). A former tribe of N. E. Mexico or s. Texas, probably Coahuiltecan, although farther inland than the best determined Coahuiltecan tribes. They were found in the neighborhood of the Rio Grande and in 1677 were gathered into the mission of Santa Rosa de Nadores.

Manos Prietas.—Fernando del Bosque (1675) in Nat. Geog. Mag., XIV, 340, 1903. **Manosprietas.**—Orozco y Berra, Geog., 302, 1861.

Manshkaenikashika ('crawfish people').

A Quapaw gens.

Hañ'qa tañya.—Dorsey in 15th Rep. B. A. E., 230, 1897 ('large Hañ'ka'). **Ma'c'ka' e'nikaci'qa.**—*ibid.*

Manso (Span.: 'mild'). A former semi-sedentary tribe on the Mexican frontier, near El Paso, Tex., who, before the coming of the Spaniards, had changed their former solid mode of building for habitations constructed of reeds and wood. Their mode of government and system of kinship were found to be the same as those of the Pueblos proper—the Tigua, Piros, and Tewa—from whom their rites and traditions clearly prove them to have come. They are divided into at least four clans—Blue, White, Yellow, and Red corn—and there are also traces of two water clans. This system of clan-ship, however, is doubtful, since it bears close resemblance to that of the Tigua, with whom the Mansos have extensively intermarried.

According to Bandelier it is certain that the Mansos formerly lived on the lower Rio Grande in New Mexico, about Mesilla valley, in the vicinity of the present Las Cruces, and were settled at El Paso in 1659

by Fray García de San Francisco, who founded among them the mission of Nuestra Señora de Guadalupe de los Mansos, the church edifice being dedicated in 1668. At this date the mission is reported by Vetancurt (Teatro Mex., iii, 309, 1871) to have contained upward of 1,000 parishioners. About their idiom nothing is known. They have the same officers as the Pueblos, and, although reduced to a dozen families, maintain their organization and some of their rites and dances, which are very similar to those of the northern Pueblo peoples, whom the Mansos recognize as their relatives. They are now associated with the Tigua and Piro in the same town.

The term "manso" has also been applied by the Spaniards in a general sense to designate any subjugated Indians. (See Bandelier in Arch. Inst. Rep., v, 50, 1884; Arch. Inst. Papers, iii, 86, 165-68, 248, 1890; iv, 348-49, 1892.)

Corretas.—Zarate-Salmeron (ca. 1629) in Land of Sunshine, 183, Feb. 1900 (Span.: 'little caps'); Benavides, Memorial, 9, 1630. **Gorrites.**—Linschoten, Descr. de l'Amérique, map 1, 1638. **Lanos.**—Perea (1629) quoted by Vetancurt, Teatro Mex., iii, 300, 308, 1871 (or Mansos). **Maíses.**—Linschoten, Descr. de l'Amérique, map 1, 1638. **Mansa.**—Benavides, Memorial, 9, 1630. **Manses.**—Sanson, L'Amérique, 27, map, 1657. **Mansos.**—Benavides, Memorial, 9, 1630. **Manxo.**—Oñate (1598) in Doc. Inéd., xvi, 243, 1871 ("sus primeras palabras fueron manxo, manxo, micos, micos, por decir mansos y amigos"). **Xpitanos Mansos.**—Doc. of 1684 quoted by Bandelier in Arch. Inst. Papers, iii, 89, 1890 (i. e., 'Christian Mansos').

Manta (Brinton believed this to be a corruption of Monthee, the dialectic form of Munsee among the Mahican and Indians of E. New Jersey). Formerly an important division of the New Jersey Delawares, living on the E. bank of Delaware r. about Salem cr. According to Brinton they extended up the river to the vicinity of Burlington, as well as some distance inland, but early writers locate other bands in that region. Under the name of Manteses they were estimated in 1648 at 100 warriors. About the beginning of the 18th century they incorporated themselves with the Unami and Unalachtigo Delawares. They have frequently been confounded with the latter division, and Chikohoki (q. v.) has also been used as synonymous with Manta, but Brinton thinks they were a southern branch of the Munsee.

(J. M.)

Frog Indians.—Proud, Pa., ii, 294, 1798. **Mandes.**—Ibid., 295. **Mantaas.**—Herrman, map (1670) in Maps to Accompany the Rep. of the Comrs. on the Bdry. Line bet. Va. and Md., 1873 (refers to the river). **Mantaes.**—Hudde (1662) in N. Y. Doc. Col. Hist., xii, 370, 1877 ("Mantashes hoeck"). **Mantaesy.**—De Lact (1633) in N. Y. Hist. Soc. Coll., 2ds., i, 315, 1841. **Mantas.**—Doc. of 1656 in N. Y. Doc. Col. Hist., i, 598, 1856. **Mantaws.**—Macaulay, N. Y., ii, 293, 1829. **Mantes.**—Boudinot, Star in the West, 127, 1816. **Mantess.**—Evelin (ca. 1648) in Proud, Pa., i, 113, 1797. **Mantos.**—Brinton, Lenape Leg., 44, 1889. **Martises.**—Sanford, U. S., cxlvi, 1819 (misprint). **Salem Indians.**—Proud, Pa., ii, 295, 1798.

Mantouek. A tribe, possibly the Mde-wakanton Sioux or its Matantonwan division, known to the French missionaries; placed by the Jesuit Relation of 1640 N. of a small lake W. of Sault Ste Marie, and by the Relation of 1658 with the Nadouechiouek (Nadowessieux, Dakota), the two having 40 towns 10 days' travel N. W. of the mission St Michael of the Potawatomi.

Mantoughquemec. A village of the Powhatan confederacy, in 1608, on Nansemond r., Nansemond co., Va.—Smith (1629), Virginia, i, map, repr. 1819.

Mantuenikashika ('those who made or adopted the grizzly bear as their mark or means of identification as a people.'—La Flesche). A Quapaw gens.

Grizzly-bear (?) gens.—Dorsey in 15th Rep. B. A. E., 229, 1897. **Ma'tu' e'nikaci'ya.**—Ibid.

Manuelito. A Navaho chief. When Gov. Merriwether conferred with the Navaho in 1855 about putting an end to

MANUELITO

murders and robberies committed by members of this tribe, the head chief avowed that he could not command the obedience of his people, and resigned. The chiefs present at the council thereupon elected Manuelito to fill the place. The lawless element did not cease their depredations, and the obligation to surrender evil doers was no greater than it had been because the Senate neglected to confirm the treaty signed at the con-

ference. When Col. D. G. Miles started out to punish the Navaho in 1859 he destroyed the houses and shot the horses and cattle belonging to Manuelito's band. When the Navaho finally applied themselves thoroughly to peaceful and productive pursuits, their old war chief was chosen to take command of the native police force that was organized in 1872. He died in 1893. See Dunn, *Massacres of Mts.*, 1886; Matthews, *Navaho Leg.*, 11, 1897.

Manufactures. See *Arts and Industries; Implements, Tools, and Utensils; Invention*, and the articles thereunder cited.

Manumaig (*Myānamāk*, 'catfish'). A gens of the Chippewa, q. v.

Cat Fish.—Morgan, *Anc. Soc.*, 166, 1877. **Man-umaig.**—Warren in *Minn. Hist. Soc. Coll.*, v, 44, 1885. **Myānamāk.**—Wm. Jones, *inf'n*, 1906.

Many Horses. A Piegan Siksika chief, sometimes mentioned as 'Dog' and also as 'Sits in the Middle'; born about the close of the 18th century. He was noted not only for his warlike character but for the large number of horses he acquired; hence his name. According to the account given by the Indians to Grinnell (*Story of the Indian*, 236, 1895), he commenced to gather and to breed horses immediately after the Piegan first came into possession of them from the Kutenai (1804-06), and also made war on the Shoshoni for the purpose of taking horses from them. His herd became so extensive that they numbered more than all the others belonging to the tribe and required a large number of herders to take care of them. Many Horses was a signer of the first treaty of his tribe with the whites, on the upper Missouri, Oct. 17, 1855, which he signed as "Little Dog." He was killed in 1867 at the battle of Cypress Hill between the Piegan and the allied Crows and Atsina, at which time he was an old man. (C. T.)

Manyikakhthi (*Ma-nyi'-ka-qci'*, 'coyote'). A subgens of the Michirache or Wolf gens of the Iowa.—Dorsey in 15th Rep. B. A. E., 238, 1897.

Manyinka ('earth lodge'). A Kansa gens, the 1st on the Ishtunga side of the tribal circle. Its subgenets are Manyinkatanga and Manyinkazhinga.

Earth.—Morgan, *Anc. Soc.*, 156, 1877. **Manyinka.**—Dorsey in 15th Rep. B. A. E., 230, 1897. **Manyinka-gaxe.**—Dorsey in *Am. Natur.*, 671, 1885 ('earth-lodgemakers'). **Mo'-e'-ka-ne-ka'-she-ga.**—Morgan, *Anc. Soc.*, 156, 1877. **Moi-ka nika-shing-ka.**—Stubbs, *Kansa MS. vocab.*, 25, 1877. **Ujänge wakixe.**—Dorsey, *Kansa MS.*, B. A. E., 1882 ('road makers').

Manyinkainihkashina (*Manyiñ'ka i'niñ-k'äcwi'a*, 'earth people'). A social division of the Osage.—Dorsey in 15th Rep. B. A. E., 235, 1897.

Manyinkatanga (*Manyinka tañga*, 'large earth'). A subgens of the Manyinka gens of the Kansa.—Dorsey in 15th Rep. B. A. E., 230, 1897.

Manyinkatuhudje (*Manyiñ'ka tu'hu üdje'*, 'lower part of the blue earth'). A former Kansa village at the mouth of Big Blue r., Kans.—Dorsey, *Kansa MS. vocab.*, B. A. E., 1882.

Manyinkazhinga (*Manyiñ'ka jinga*, 'small earth'). A subgens of the Manyinka gens of the Kansa.—Dorsey in 15th Rep. B. A. E., 230, 1897.

Manzanita (Span.: 'little apple', but referring here to *Arctostaphylos manzanita*). A reservation of 640 acres of unpatented desert land occupied by 59 so-called Mission Indians, situated 170 m. from Mission Tule River agency, s. Cal.—Ind. Aff. Rep., 175, 1902; Kelsey, Rep., 25, 1906.

Manzano (Span.: 'apple tree'). A small New Mexican village 6 m. n. w. of the ruins of Quarai and about 25 m. e. of the Rio Grande, at which is an old apple orchard that probably dates from the mission period prior to 1676. Whether the orchard pertained to the neighboring mission of Quarai, or whether the former Tigua settlement adjacent to Manzano had an independent mission, is not known. A remnant of the Tigua now living near El Paso claim to have come from this and neighboring pueblos of the Salinas country. The aboriginal name of the pueblo near Manzano is unknown. The present white village dates from 1829. Consult Bandelier in *Arch. Inst. Papers*, iv, 259 et seq., 1892. See *Pueblos, Tanoan, Tigua*. **Mansano.**—Abert quoted in *Trans. Am. Ethnol. Soc.*, II, xciv, 1848. **Manzana.**—Pac. R. R. Rep., III, pt. 4, 98, 1856. **Manzanas.**—Parke, map N. Mex., 1851. **Manzano.**—Edwards, Campaign, map, 1847.

Maon. An unidentified tribe on upper Cumberland r., at the beginning of the 18th century; perhaps the Cherokee, or possibly the Shawnee.—Tonti (*ca.* 1700) in French, *Hist. Coll. La.*, i, 82, 1846.

Maple sugar. In some of the Eastern states and parts of Canada the production of maple sugar and sirup is one of the thriving industries of the country. The census statistics of 1900 show that during the year 1899 there were made in the United States 11,928,770 pounds of maple sugar and 2,056,611 gallons of sirup. The total values of the sugar and sirup for 1899 were respectively \$1,074,260 and \$1,562,451. The production of maple sirup seems to have increased somewhat, while that of maple sugar appears to have declined. This industry is undoubtedly of American Indian origin. The earliest extended notice of maple sugar is "An Account of a sort of Sugar made of the Juice of the Maple in Canada," published in the *Philosophical Transactions of the Royal Society* for 1684-85, where it is stated that "the savages have practiced this art longer than any now living among them can remember." In the *Philosophical Transactions* for 1720-21 is printed an ac-

count of sugar-making in New England by a Mr Dudley. The Indian origin of maple sugar is indicated also by notices in Joutel; Lafiteau, who states directly that "the French make it better than the Indian women, from whom they have learned how to make it"; Bossu, who gives similar details about French sugar-making in the Illinois country; and other early writers. In various parts of the country the term "Indian sugar" (Canad. Settlers' Guide, 66, 1860) has been in use, affording further proof of the origin of the art of making maple sugar among the aborigines. Some of the Indian names of the trees from which the sap is obtained afford additional evidence, while maple sap and sugar appear in the myths and legends of the Menominee, Chippewa, and other tribes. The technique of maple-sugar making also reveals its Indian origin, not merely in the utensils employed, but also in such devices as straining through hemlock boughs, cooling on the snow, etc. For maple sugar cooled on the snow the Canadian-French dialect has a special term, *tire*, besides a large number of special words, like *sucrerie*, 'maple-sugar bush'; *toque*, 'sugar snowball'; *tremette*, 'maple-sugar sop', etc. The English vocabulary of maple-sugar terms is not so numerous. *Humbo* (q. v.), a New Hampshire term for 'maple sirup,' is said to be of Indian origin. The details of the evidence of the Indian origin of this valuable food product will be found in H. W. Henshaw, "Indian Origin of Maple Sugar," Am. Anthropol., III, 341-351, 1890, and Chamberlain, "The Maple amongst the Algonkian Tribes," *ibid.*, IV, 39-43, 1891, and "Maple Sugar and the Indians," *ibid.*, 381-383. See also Loskiel, Hist. Miss. United Breth., 179, 1794. (A. F. C.)

Maquanani (*Ma'qkuana'ni*, 'red-tail hawk'). A subphratry or gens of the Menominee.—Hoffman in 14th Rep. B. A. E., pt. I, 42, 1896.

Maquanago. A former village, probably of the Potawatomi, near Waukesha, s. e. Wis., on lands ceded to the United States in 1833.—Royce in 18th Rep. B. A. E., Wis. map, 1899.

Maquantequat. A tribe or band at war with Maryland in 1639 (Bozman, Md., II, 164, 1837). The commission to Nicholas Hervey, from which Bozman obtained his information, does not give the locality of these Indians, but indicates that they resided in the territory of the colony. In the Archives (Proc. Council, 1636-67, 363, 1885), "Indians of Maquamticough" are mentioned; these are undoubtedly the same, but the locality has not been identified further than that it was on the Eastern shore. It is possible they were not Algonquian.

Mancantequats.—Md. Archives, Proc. Council 1636-67, 87, 1885. **Maquamticough**.—*Ibid.*, 36. **Maquantequat**.—Bozman, Md., II, 164, 1837.

Maquinanoa. A Chumashan village between Goleta and Pt Conception, Cal., in 1542.

Maquinanoa.—Cabrillo (1542) in Smith, Colec. Doc. Fla., 183, 1857. **Maquin, Nanao**.—Taylor in Cal. Farmer, Apr. 17, 1863 (mistaken for two villages).

Maquinna. A chief of the Mooachaht, a Nootka tribe, who attained notoriety as the chief who captured the brig *Boston*, in Mar., 1803, and massacred all of her crew except the blacksmith, John Jewitt, and a sailmaker named Thompson. After being held in captivity until July, 1805, they were liberated by Capt. Hill of the brig *Lydia*, also of Boston. The story of the captivity of these two men was afterward extracted from Jewitt by Roland Alsop of Middletown, Conn., and published in America and Europe. A point near the entrance of Nootka sd. is now called Maquinna pt. See Narrative of the Adventures and Sufferings of John R. Jewitt, in various editions from 1815 to 1869. (J. R. S.)

Maracock. See *Maypop*.

Marameg (from *Man-um-aig*, Chippewa for 'catfish.'—Verwyst). Evidently a band or division of the Chippewa, which seems to have been, at the dawn of the history of the upper lake region, in the process of disintegration. The first notice of them is that given by Dablon in the Jesuit Relation of 1670, at which time they resided on L. Superior, apparently along the e. half of the n. shore. They were then in close union with the Sauteurs, or Chippewa of Sault Ste Marie. Dablon, speaking of the Chippewa of the Sault, says: "These are united with three other nations, who are more than 550 persons, to whom they granted like rights of their native country. . . . These are the Noquets who are spread along the s. side of L. Superior, where they are the originals; and the Outchibous with the Marameg of the n. side of the same lake, which they regard as their proper country." Here the Chippewa of the n. side of the lake are distinguished from those of Sault Ste Marie to the same extent as are the Marameg and Noquet. The Chippewa settlement at the Sault, where the fishing was excellent, seems to have drawn thither the other divisions, as this gave them strength and control of the food supply. The early notices of the Marameg and Noquet appear to indicate that these two tribes became absorbed by the Chippewa and their tribal or subtribal distinction lost, but there are reasons (see *Noquet* and *Menominee*) for believing that these two peoples were identical. Tailhan, in his notes on Perrot's Mémoire, assumes without question that the two tribes were incorporated with the Chip-

pewa of the Sault, who were distinguished by the name Pahoutigouchirini. The Marames are mentioned under the name Malamechs in the Proces-verbal of the Prise de Possession in 1671 as present at the conference on that occasion. According to Shea they are mentioned in the MS. Jesuit Relation of 1672-73 as being near the Mascoutin, who were then on Fox r., Wis. If, as supposed, the people of this tribe are those referred to by La Chesnaye (Margry, vi, 6) under the name "Malanas ou gens de la Barbue," they must have resided in 1697, in part at least, at Shangawaunikong (the present Bayfield, Wis.), on the s. shore of L. Superior. The attempt to identify them with the "Miamis of Maramek" mentioned in a document of 1695 (N. Y. Doc. Col. Hist., ix, 619) as residing on Maramec (Kalamazoo) r., in Michigan, is certainly erroneous.

(J. M. C. T.)
Gens de la Barbue.—La Chesnaye (1697) in Margry, Déc., vi, 6, 1886. **Malamechs.**—Prise de Possession (1671), *ibid.*, i, 97, 1875. **Malanas.**—La Chesnaye, *op. cit.* **Maramec.**—Jes. Rel. 1669-70, Thwaites ed., LIV, 133, 1899.

Maramoydos. A former Diegueño rancharia near San Diego, s. Cal.—Ortega (1775) quoted by Bancroft, Hist. Cal., i, 254, 1884.

Maraton. A Chowanoc village in 1585 on the e. bank of Chowan r., in Chowan co., N. C.

Maraton.—Smith (1629), Va., i, map, repr. 1819. **Mavaton.**—Martin, N. C., i, 13, 1829. **Waratan.**—Dutch map (1621) in N. Y. Doc. Col. Hist., i, 1856.

Marble. The various forms of the carbonates of lime and magnesia, classed as marbles, were used to some extent by the Indian tribes for carvings, utensils, and ornaments. They include many varieties of ordinary marbles such as are used for building, as well as the cave forms known as stalactite, deposited as pendent masses by dripping water, and stalagmite, which is deposited by the same agency upon the floor. Travertine formed by rivers and springs is of nearly identical character. These deposits frequently present handsome translucent and banded effects. The purer, less highly colored varieties are sometimes called alabaster (see *Gypsum*), and the compact, beautifully marked forms are known as onyx. See *Mines and Quarries*.

(W. H. H.)

Maria. A Micmac settlement in Maria township, Bonaventure co., Quebec, containing 80 Indians in 1884, 93 in 1904.

Mariames. A tribe mentioned by Cabeza de Vaca as living, in 1528-34, "behind" the Quevenes, probably in the vicinity of Matagorda bay, Texas. The people subsisted mainly on roots and seem never to have enjoyed plenty except in the season of the prickly pears. They ground the bones of fish, mixed the dust with water, and used the paste

as food. They are said to have killed their female infants to prevent their falling into the hands of their enemies, and also, because of their continued warfare, to avoid the temptation of marrying within their tribe. The region where the Mariames lived was within the later domain of the Karankawan tribes, which are now extinct (see Gatschet, Karankawa Inds., 46, 1891). Manzanet (1670) mentions a tribe called the Muruam, probably identical with this, and Orozco y Berra (Geog., 303, 1864) mentions the Mahuames as a former tribe of N. E. Mexico or s. Texas, which was gathered into the mission of San Juan Bautista, Coahuila, in 1699. These also may be identical.

(A. C. F.)

Mahuames.—Orozco y Berra, *op. cit.* (identical?). **Mariames.**—Cabeza de Vaca (1542), Bandelier trans., 82, 1905. **Marianes.**—Cabeza de Vaca, Narr., Smith trans., 58, 1851. **Marians.**—Harris, Voy. and Trav., i, 802, 1705. **Mariarves.**—Cabeza de Vaca, Narr., Smith trans., 93, 1871. **Muruam.**—Manzanet (1690), MS., cited by H. E. Bolton, *inf'n*, 1906 (identical?).

Marian. The Christian Hurons, so called by their pagan brethren on account of their frequent repetition of the name of Mary.—Shea, Cath. Miss., 183, 1855.

Maricopa. An important Yuman tribe which since early in the 19th century has lived with and below the Pima and from about lat. 35° to the mouth of Rio

MARICOPA MAN. (AM. MUS. NAT. HIST.)

Gila, s. Ariz. In 1775, according to Garcés, their rancherías extended about 40 m. along the Gila from about the mouth of the Hassayampa to the Aguas Calientes, although Garcés adds that "some of them are found farther down river." They call themselves *Pipatsje*, 'people,'

Maricopa being their Pima name. Emory states that they have moved gradually from the Gulf of California to their present location in juxtaposition with the Pima, Carson having found them, as late as 1826, at the mouth of the Gila. They joined the Pima, whose language they do not understand, for mutual protection

MARICOPA WOMAN. (AM. MUS. NAT. HIST.)

against their kindred, but enemies, the Yuma, and the two have ever since lived peaceably together. In 1775 the Maricopa and the Yuma were at war, and as late as 1857 the latter, with some Mohave and Yavapai, attacked the Maricopa near Maricopa Wells, s. Ariz., but with the aid of the Pima the Maricopa routed the Yuma and their allies, 90 of the 93 Yuma warriors being killed. After this disaster the Yuma never ventured so far up the Gila. Heintzelman states, probably correctly, that the Maricopa are a branch of the Cuchan (Yuma proper), from whom they separated on the occasion of an election of chiefs (H. R. Ex. Doc. 76, 34th Cong., 1857). Like the Pima, the Maricopa are agriculturists, and in habits and customs are generally similar to them. Venegas (Hist. Cal., II, 182, 185, 192, 1759) states that about 6,000 Pima and Cocomarcopa lived on Gila r. in 1742, and that they extended also to the Salado and the Verde; they are also said to have had some rancherias on the w. side of Colorado r., in a valley 36 leagues long. Garcés estimated the population at 3,000 in 1775. There were only 350 under the Pima school superintendent, Arizona, in 1905.

By act of Feb. 28, 1859, a reservation was set apart for the Maricopa and the

Pima on Gila r., Ariz.; this was enlarged by Executive order of Aug. 31, 1876; revoked and other lands set apart by Executive order of June 14, 1879; enlarged by Executive orders of May 5, 1882, and Nov. 15, 1883. No treaty was ever made with them.

The following rancherias and other settlements at different periods are judged, from their situation, to have belonged to the Maricopa tribe: Aicatun, Amoque, Aopomue, Aqui, Aquimundurech, Aritutoc, Atiahigui, Aycate, Baguiburisac, Caborh, Caborica, Cant, Choutikwuchik, Coat, Cogoigui, Cobate, Comarchdut, Cuaburidureh, Cudurimuitac, Dueztumac, Gohate, Guías, Hinama, Hiyayulge,

(Havasupai name). **Widshi itikapá.**—Ibid., 371, 1886 (Tonto name; also applied to Pima and Papago).

Marin. A chief of the Licatini, apparently a band or village of the Gallinero, about the present San Rafael, Marin co., Cal., in the early part of the 19th century. The Spanish accounts relating to him are conflicting. According to the most definite authority he was defeated and captured in battle with Spanish troops in 1815 or 1816 and carried to San Francisco, but escaped and resumed hostilities from his refuge place on the Marin ids. He was retaken in 1824, and accepting his fate, retired to San Rafael mission, where he died in 1834, or, according to other accounts, as late as 1848. The county takes its name from him. See Bancroft, Hist. Cal., II, VII, 1886-1890.

Maringoman's Castle. A palisaded village, so named after a Waoranec chief who occupied it in 1635, formerly on Murderer's cr., at Bloominggrove, Ulster co., N. Y.—Ruttenber, Tribes Hudson R., 94, 1872.

Mariposan Family (adapted from Span. *mariposa*, 'butterfly,' the name of a county in California). The name applied by Powell to a linguistic stock of Indians, generally known as Yokuts, in San Joaquin valley, Cal. Their territory extended from the lower Sierra Nevada to the Coast range, and from mounts Pinos and Tehachapi to Fresno and Chowchilla rs. A separate body dwelt in the N., in

a narrow strip of territory along the San Joaquin, between Tuolumne and Calaveras rs., about the site of Stockton. These were the Chovolone. The Cocomoon, said to have been Mariposan, occupied an area within the limits of Moquelumnan territory.

Physically the southern members of this family, from Kaweah and Tule rs. and from Tejon, are very similar to the Yuman tribes of s. California. They are fairly tall (169 cm.) and rather short-headed (cephalic index 82 to 83). Their superficial appearance is rather similar to that of the tribes of central California. They are not infrequently fat (Boas in Proc. A. A. A. S., XLIV, 261-9, 1896).

Their houses, especially those in the plains, were generally made of tules, and were often erected in rows, a village of the tribes about Tulare lake consisting of a row of such houses united into one. These long communal houses had an entrance and a fireplace for each family. Earth-covered sweat-houses were also built. Their implements and utensils were generally rude; the working of wood seems to have been confined to a few objects, such as bows and pipes, true wood carving not being practised. Their bows were of two types, one used for war and one for the hunt. Some of the tribes made a very crude and undecorated pottery similar to that of their Shoshonean neighbors of the mountains, which is the only occurrence of pottery in central California, and the art is probably a recent acquisition. The women were proficient basket makers, their product being predominantly of the coiled type. Shapes with a flat top and restricted opening are characteristic of this region and of the Shoshoneans immediately to the e.

The social organization of the tribes was very simple, with no trace of totemism or of any gentile system. Prohibition of marriage extended only to actually known blood relationships, entirely irrespective of groups. Chieftainship tended to be hereditary in the male line. The groups, or tribes, had more solidarity than elsewhere in California, as is shown by the occurrence of well-recognized names for the tribes. Hostilities were occasionally carried on between groups or with Shoshonean tribes, but in general the tribes were peaceful and friendly, even with their neighbors speaking alien languages. An initiation ceremony for young men consisted of a period of preparation followed by an intoxication produced by a decoction of jimson weed. A puberty ceremony for girls was not practised. The tabus and restrictions applied chiefly to childbirth and death. Death was followed by singing, dancing, and wailing. The body was buried or burned,

the practice varying with the different tribes; the property of the deceased was destroyed, his house burned, and his name tabued. There was an elaborate annual mourning ceremony for the dead of the year, which took place about a large fire in which much property was consumed. This ceremony, which has been described as the Dance of the Dead, was followed by dancing of a festive character.

The Mariposan Indians were encountered by the Spaniards soon after their settlement in California, and with the other tribes of San Joaquin valley were generally known as Tulareños, etc., from the name of the lakes and of San Joaquin r., which during the Mission period bore the name Río de los Tulares. No very considerable portion of the group seems to have come under the control of the Franciscan missionaries, but there was some intercourse and trade between the converted Indians of the coast regions and the Mariposan tribes of the interior. The Cholvone, Chukchansi, Tachi, Telamni, and other tribes were, however, at least in part, settled at San Antonio, San Juan Bautista, and other missions.

On the sudden overrunning of their country by the whites after the discovery of gold in California, the Indians of this family were either friendly or unable to make an effectual resistance. The Kaweah river tribes seem to have been the most hostile to the Americans, but no general Indian war took place in their territory, and treaties were made with all the tribes in 1851, by which they ceded the greater part of their territory (Royce in 18th Rep. B. A. E., 782, 1900). Many of the northern tribes were soon gathered on the Fresno River res., near Madera, and the southern tribes at Tejon; but the former was abandoned in 1859 and the latter in 1864. The Indians at Tejon were removed to Tule r., where, after another removal, the present Tule River res. was set apart for them in 1873 and occupied in 1876. The Indians of this reservation, mostly from Tejon and from Tule and Kaweah rs., numbered 154 in 1905. North of Tule r. the remaining Indians of this stock now live in and near their old homes; their numbers have greatly decreased and are not accurately known, while the Cholvone seem to be extinct.

About 40 tribes, each of about the numerical size of a village community, but possessing a distinct dialect, constituted the Yokuts or Mariposan family. About half of these are now extinct. These tribes, according to information furnished by Dr A. L. Kroeber, were the Cholvone, or, more correctly, Chulamni, about Stockton; the Chaushila, Chukchansi, Talinchi

(properly Dalinchi), Heuchi, Toltichi, Pitkachi, Iioyima, Tumna (Dumna), and Kechayi, on San Joaquin r. and N. to Chowchilla r.; the Kassovo (Gashowu), on Dry cr.; the Choinimni, Michahai, Chukaimina, Iticha (Aiticha), Toikhichi, Wechikhit, Nutunutu, Wimilchi, Apiachi, and perhaps the Kochiyali, on Kings r.; the Tachi, Chunut, and Wowol, on Tulare lake, and the Tulamni and a tribe remembered only as Khomtinin ('southerners') on the smaller lakes to the s.; the Kawia (Gawia), Yokol or Yokod, Wikhamni, Wowolasi, Telamni, and Choinok, on Kaweah r.; and the Yaudanchi, Bokniniuwad, Kumachisi, Koyeti, Paleuyami, Truhohayi, and Yauelmani, on the streams from Tule r. to Kern r.

Names given as if of Yokuts tribes, but which may be place names or may refer to Shoshonean or other groups, are Carise, Caruana, Chebontes, Cheticnewash, Holeclame, Holmiuk, Lenahuon, Montotos, Nonous, Sohonut, and Tatagua; also, entirely unidentifiable, Amonce, Kowsis, Nelcelchumnee, Noketotra or Nutrecho or Pohonatri, Nopthrinthres, Oponoche, and Ptolme.

Mariposa.—Latham in Trans. Philol. Soc. Lond., 84, 1856. **Mariposan.**—Powell in 7th Rep. B. A. E., 90, 1891. **Noaches.**—Cortez (1799) in Pac. R. R. Rep., III, pt. 3, 120, 1856. **Noche.**—Garcés (1776), Diary, 279 et seq., 1900. **Nochi.**—Font (1777), map, in Garcés, *ibid.* **Yocut.**—Bancroft, Native Races, I, 457, 1874. **Yo'kuts.**—Powers in Cont. N. A. Ethnol., III, 369, 1877.

Marmasece. Reported by some old Lummi as an extinct tribe on Puget sd., Wash., in about the habitat of their own people, by whom they may have been exterminated. They are also said to have killed three white men before the occupancy of the country by the Hudson's Bay Co. or the arrival of the first ships.

Mar-ma-sece.—Fitzhugh in Ind. Aff. Rep. 1857, 327, 1858.

Marracou. A town and tribe, probably Timuqanan, situated, in 1564, 40 leagues s. of the mouth of the St Johns r., Fla.—Laudonnière (1564) in French, Hist. Coll. La., n. s., 279, 1869.

Marriage. Except that marital unions depend everywhere on economic considerations, there is such diversity in the marriage customs of the natives of North America that no general description will apply beyond a single great cultural group.

The Eskimo, except those tribes of Alaska that have been led to imitate the institutions of neighboring tribes of alien stocks, have no clan organization. Accordingly the choice of a mate is barred only by specified degrees of kinship. Interest and convenience govern the selection. The youth looks for a competent housewife, the girl for a skilled hunter. There is no wedding ceremony. The man obtains the parents' consent, presents his

wife with garments, and the marriage is consummated. Frequently there are child betrothals, but these are not considered binding. Monogamy is prevalent, as the support of several wives is possible only for the expert hunter. Divorce is as informal as marriage; either party may leave the other on the slightest pretext, and may remarry. The husband may discard a shrewish or miserly wife, and the wife may abandon her husband if he maltreats her or fails to provide enough food. In such cases the children generally remain with the mother.

On the N. W. coast marriage between members of the same clan is strictly forbidden. The negotiations are usually carried on by the parents. The Kwakiutl purchases with his wife the rank and privileges of her family, to be surrendered later by her father to the children with interest, depending on the number of offspring. When the debt is paid the father has redeemed his daughter, and the marriage is annulled unless the husband renews his payment. Among the other tribes of the group an actual sale of the girl is rare. The Tlingit, Tsimshian, coast Salish, and Bellaçoola send gifts to the girl's parents; but presents of nearly equal or even superior value are returned. Monogamy predominates. In case of separation Salish parents divide their children according to special agreement. Among the Tlingit, Haida, Tsimshian, and Heiltsuk the children always belong to the mother. If a husband expels his wife from caprice he must return her dowry; if she has been unfaithful he keeps the dowry and may demand his wedding gifts.

On the lower Pacific coast the clan system disappears. The regulations of the Indians of California vary considerably. Some tribes have real purchase of women; others ratify the marriage merely by an exchange of gifts. Polygamy is rare. Divorce is easily accomplished at the husband's wish, and where wives are bought the purchase money is refunded. Among the Hupa the husband can claim only half of his payment if he keeps the children. Wintun men seldom expel their wives, but slink away from home, leaving their families behind.

The Pueblos, representing a much higher stage of culture, show very different marriage conditions. The clan organization is developed, there is no purchase, and the marriage is arranged by the parents or independently by the young couple. The Zuñi lover, after bringing acceptable gifts, is adopted as a son by the father of his betrothed, and married life begins in her home. She is thus mistress of the situation; the children are hers, and she can order the husband from the house should occasion arise.

Of the Plains Indians some had the gentile system, while others lacked it completely. They seem to have practised polygamy more commonly, the younger sisters of a first wife being potential wives of the husband. Among the Pawnee and the Siksika the essential feature of the marriage ceremony was the presentation of gifts to the girl's parents. In case of elopement the subsequent presentation of gifts legitimized the marriage and removed the disgrace which would otherwise attach to the girl and her family (Grinnell). The men had absolute power over their wives, and separation and divorce were common. The Hidatsa, Kiowa, and Omaha had no purchase. The women had a higher social position, and the wishes of the girls were consulted. Wives could leave cruel husbands. Each consort could remarry and the children were left in the custody of their mother or their paternal grandmother. Separation was never accompanied by any ceremony.

East of the Mississippi the clan and gentile systems were most highly developed. The rules against marriage within the clan organs were strictly enforced. Descent of name and property was in the female line among the Iroquoian, Muskogean, and s. e. Algonquian tribes, but in the male line among the Algonquians of the n. and w. Among some tribes, such as the Creeks, female descent did not prevent the subjection of women. As a rule, however, women had clearly defined rights. Gifts took the place of purchase. Courtship was practically alike in all the Atlantic tribes of the Algonquian stock; though the young men sometimes managed the matter themselves, the parents generally arranged the match. A Delaware mother would bring some game killed by her son to the girl's relatives and receive an appropriate gift in return. If the marriage was agreed upon, presents of this kind were continued for a long time. A Delaware husband could put away his wife at pleasure, especially if she had no children, and a woman could leave her husband. The Hurons and the Iroquois had a perfect matriarchate, which limited freedom of choice. Proposals made to the girl's mother were submitted by her to the women's council, whose decision was final among the Hurons. Iroquois unions were arranged by the mothers without the consent or knowledge of the couple. Polygamy was permissible for a Huron, but forbidden to the Iroquois. Divorce was discreditable, but could easily be effected. The children went with the mother.

Monogamy is thus found to be the prevalent form of marriage throughout the continent. The economic factor is everywhere potent, but an actual pur-

chase is not common. The marriage bond is loose, and may, with few exceptions, be dissolved by the wife as well as by the husband. The children generally stay with their mother, and always do in tribes having maternal clans. See *Adoption, Captives, Child life, Clan and Gens, Government, Kinship, Women*.

Marriskintom. A village marked on Esnauts and Rapilly's map of 1777 on the E. side of lower Scioto r. in Ohio. It may have belonged to the Shawnee or to the Delawares, and is distinct from Muskingum. (J. M.)

Martha's Vineyard Indians. Martha's Vineyard id., off the S. coast of Massachusetts, was called by the Indians Nope, or Capawac. These may have been the names of tribes on the island and the smaller islands adjacent. The Indians thereon were subject to the Wampanoag and were very numerous at the period of the first settlement, but their dialect differed from those on the mainland. They seem not to have suffered by the great pestilence of 1617. In 1642 they were estimated at 1,500. The Mayhews carried on active missionary work among them and succeeded in bringing nearly all of them under church regulations and secured their friendship in King Philip's war. In 1698 they were reduced to about 1,000, in 7 villages: Nashanekamuck, Ohkonkemme, Seconchqut, Gay Head, Sanchecantacket or Edgartown, Nunnepoag, and Chaubaqueduck. In 1764 there were only 313 remaining, and about this time they began to intermarry with negroes, and the mixed race increased so that in 1807 there were about 360, of whom only about 40 were of pure blood. At that time they lived in 5 vil-

lages on or near the main island, the majority being at Gay Head. Soon thereafter they ceased to have any separate enumeration as Indians. (J. M.)

Vineyard Indians.—Alden (1797) in *Mass. Hist. Soc. Coll.*, 1st s., v, 56, 1816.

Martinez. A small village on Torres res., under the Mission agency, s. Cal.—*Ind. Aff. Rep.*, 170, 1904.

Martoughquaunk. A village of the Powhatan confederacy, in 1608, on Mattaponi r., in Caroline co., Va.—Smith (1629), *Virginia*, i, map, repr. 1819.

Marychkenwikingh (from *Men'achkha-wik-ink*, 'at his fenced or fortified house,' referring, no doubt, to its being the residence of the sachems.—Tooker). A village formerly on the site of Red Hook, in what is now the twelfth ward of Brooklyn, Long Island, N. Y., in Canarsee territory.

Marechhaweick.—Treaty of 1645 in *N. Y. Doc. Col. Hist.*, xiii, 1881. **Marechkawick.**—Doc. of 1643 quoted by Tooker, *Algonqu. Ser.*, ii, 10, 1901. **Marechkawick.**—Doc. of 1644 in *N. Y. Doc. Col. Hist.*, xiv, 56, 1883. **Marychkenwikingh.**—Deed of 1637, *ibid.*, 5. **Merechkawick.**—Doc. of 1645 cited by Tooker, op. cit. **Merrakwick.**—Doc. of 1648 cited by Tooker, *ibid.*

Marysiehe. A small Opata settlement in Sonora, Mexico.—Hrdlicka in *Am. Anthropol.*, vi, 72, 1904.

Masacauvi. A small Opata settlement in Sonora, Mexico.—Hrdlicka in *Am. Anthropol.*, vi, 72, 1904.

Masac's Village. A former Potawatomi village on the W. bank of Tippecanoe r., in the N. E. part of Fulton co., Ind., on a reservation sold in 1836. The name is also written Mosack. (J. M.)

Masamacush. A name of Hood's salmon (*Salmo hoodii*), found in the fresh-water lakes of the Atlantic slope of Canada (*Rep. U. S. Com. Fish.*, 1872-73, p. 159): from *masamegos* or *masamekus*, a name of the salmon-trout in the Chipewewa and Cree dialects of Algonquian. The word signifies, 'like a trout,' from *namekus*, 'trout,' and the prefix *mas-*, which has somewhat the force of the English suffix *-ish*. (A. F. C.)

Mascalonge. See *Maskinonge*.

Maschal. A Chumashan village given in Cabrillo's Narrative as on San Lucas id., Cal., in 1542; located on Santa Cruz id. by Taylor in 1863 and by San Buenaventura Indians in 1884.

Maschal.—Taylor in *Cal. Farmer*, Apr. 24, 1863. **Mas-teál.**—Henshaw, *Buenaventura MS. vocab.*, B. A. E., 1881. **Mazul.**—Cabrillo, *Narr.* (1542), in Smith, *Colec. Doc. Fla.*, 181, 1857.

Mascoming. A Weapomeoc village, in 1585, on the north shore of Albemarle sd., in Chowan co., N. C., adjoining the territory of the Chowanoc. (J. M.)

Mascoming.—Smith (1629), *Virginia*, i, map, repr. 1819. **Muscumunge.**—Lane (1886), *ibid.*, i, 87.

Mascoutens ('little prairie people,' from *muskuta* (Fox) or *maskcodé* (Chippewa), 'prairie'; *ens*, diminutive ending. By the Hurons they were called Assistaeronon,

'Fire people,' and by the French 'Nation du Feu.' These last names seem to have arisen from a mistranslation of the Algonquian term. In the Chippewa dialect 'fire' is *ishkote*, and might easily be substituted for *mashkodé*, 'prairie'. A term used by some early writers in a collective and indefinite sense to designate the Algonquian tribes living on the prairies of Wisconsin and Illinois; LaSalle even includes some bands of Sioux under the name. The name (*Mashkôtens*) is at present applied by the Potawatomi to that part of the tribe officially known as the "Prairie band" and formerly residing on the prairies of N. Illinois. The modern Foxes use the term *Muskutáwa* to designate themselves, the Wea, Piankashaw, Peoria, and Kaskaskia, on account of their former residence on the prairies of Illinois and Indiana. Gallatin was not inclined to consider them a distinct tribe, and Schoolcraft was of the opinion that they, together with the Kickapoo, were parts of one tribe. It is asserted by the Jesuit Allouez that the Kickapoo and Kitchigami spoke the same Algonquian dialect as the Mascoutens. Gallatin says the Sauk, Foxes, and Kickapoo "speak precisely the same language." Their close association with the Kickapoo would indicate an ethnic relation. According to an Ottawa tradition recorded by Schoolcraft there was at an early day a tribe known as *Assegun* (q. v.), or Bone Indians, residing in the vicinity of Michilimackinac. These, after a severe contest, were driven by the Ottawa into the southern peninsula of Michigan as far as Grand r. During this war on the eastern shore of L. Michigan the Ottawa and Chippewa, who had confederated with them, became involved in a quarrel with a people known as *Mushkodainsug* (or Mascoutens). From this period, according to the tradition, the *Assegun* and Mascoutens were confederates, and were driven still farther southward in the peninsula, after which they are lost to the tradition, except that it attributes to them the well known "garden beds" of southwestern Michigan. Although this tradition stands to a large extent alone, it is possibly not wholly unsupported. The chief items which seem to accord with it are the close relations between the Mascoutens and the Sauk, who are known to have resided at an early period in the lower Michigan peninsula, whence they passed into Wisconsin, where the two tribes were found closely associated; and the statement by Denonville (N. Y. Doc. Col. Hist., ix, 378) that Champlain, in 1612, found (heard of) the people of this tribe residing at Sakinan, or Saginaw bay. To the same locality have the Sauk been traced. Although the evidence is not entirely satisfactory, it is

probable that this tribe entered Wisconsin from southern Michigan, passing around the southern end of L. Michigan.

The first mention of the Mascoutens is by Champlain, in 1616, under the name *Assistagueronion* (*Œuvres*, iv, 58, 1870); on his map (v, 1284) he locates them, under the name *Assistagueronons*, beyond and s. of L. Huron, L. Michigan being unknown to him. He says the Ottawa were then at war with them. Sagard (1636) places them nine or ten days journey w. of the s. end of Georgian bay (Hist. du Canada, 194, 1866). According to the Jesuit Relation for 1640 they were then at war with the Neuters, who were allies of the Ottawa. The first actual contact of the French with the Mascoutens of which there is any record was the visit of Perrot to their village near Fox r., Wis., previous to 1669. Winsor (Cartier to Frontenac, 152) says Nicolet visited their village in 1634. That he passed up Fox r., probably to the portage, is doubtless true, but that he visited the Mascoutens is not positively known, as it is stated in the Jesuit Relation for 1646 that up to that time they had seen no European, and that the name of God had not reached them. They were visited in 1670 by Allouez and in 1673 by Marquette, both finding them in their village near the portage between Fox and Wisconsin rs., living in close relation with the Miami and the Kickapoo. After the visit by Marquette they are mentioned by Hennepin, who places them in 1680 on L. Winnebago; though Membré at the same date locates at least a part of the tribe and some of the Foxes on Milwaukee r. Marest, writing in 1712, says that a short time previous thereto they had formed a settlement on the Ohio at the mouth of the Wabash, or more likely at Old Fort Massac, whose occupants had suffered greatly from contagious disorders. In the same year the upper Mascoutens and the Kickapoo joined the Foxes against the French. In the same year the Potawatomi and other northern tribes made a combined attack on the Mascoutens and Foxes at the siege of Detroit, killing and taking prisoners together nearly a thousand of both sexes. In 1718 the Mascoutens and Kickapoo were living together in a single village on Rock r., Ill., and were estimated together at 200 men. In 1736 the Mascoutens are mentioned as numbering 60 warriors, living with the Kickapoo on Fox r., Wis., and having the wolf and deer totems. These are among the existing gentes of the Sauk and Foxes. They are last mentioned as living in Wisconsin in the list of tribes furnished to James Buchanan (Sketches N. A. Inds., i, 139) by Heckewelder, which relates to the period between 1770 and 1780. The

last definite notice of them is in Dodge's list of 1779, which refers to those on the Wabash in connection with the Piankashaw and Vermilions (Kickapoo). After this the Mascoutens disappear from history, the northern group having probably been absorbed by the Sauk and Fox confederacy, and the southern group by the Kickapoo.

Notwithstanding some commendatory expressions by one or two of the early missionaries, the Mascoutens, like the Kickapoo, bore a reputation for treachery and deceit, but, like the Foxes, appear to have been warlike and restless. According to the missionaries, they worshiped the sun and thunder, but were not much given to religious rites and ceremonies, and did not honor as large a variety of minor deities as many other tribes; but such early statements regarding any tribe must be taken with allowance. Their petitions to their deities were usually accompanied by a gift of powdered tobacco.

The missions established among the Mascoutens were St Francis Xavier and St James.

(J. M. C. T.)

Masewuk. A former Chumashan village near Santa Barbara, Cal.—Taylor in Cal. Farmer, May 4, 1860.

Mashawauk (*Mëshāwagī*, 'elks', for *Mëshāwitschīgī*, 'they who go by the name of the elk.'—W. J.). A gens of the Sauk and Foxes. See *Sauk*.

Má-shā-wā-uk'.—Morgan, Anc. Soc., 170, 1877. **Meshawisuticig'**.—Wm. Jones, inf'n, 1906.

Mashakahquob. See *Little Turtle*.

Mashematak (*Mā-she'-mā-tāk*, 'big tree'). A gens of the Sauk and Foxes.—Morgan, Anc. Soc., 170, 1877. See *Sauk*.

Masherosqueck. A village on or near the coast of Maine in 1616, probably belonging to the Abnaki.—Smith (1616) in Mass. Hist. Soc. Coll., 3ds., vi, 107, 1837.

Mashik. An Aleut village at Port Moller, Alaska penin., Alaska; pop. 40 in 1880, 76 in 1890.

Mashik.—Petroff, Rep. on Alaska, 45, 1881. **Meshik**.—11th Census, Alaska, 164, 1893.

Mashpee (from *massa-pee* or *missi-pi*, 'great pool.'—Kendall). A former settlement on a reservation on the coast of Marshpee tp., Barnstable co., Mass. The reservation was established in 1660 for the Christian Indians of the vicinity, known as South Sea Indians, but it was afterward recruited from all s. e. Massachusetts, and even from Long Island. In 1698 they numbered about 285, and their population generally varied from 300 to 400 up to the 19th century. They intermarried with negroes and afterward with

Hessians; in 1792 the mixed-bloods formed two-thirds of the whole body, and the negro element was then increasing, while the Indians were decreasing. In 1832 the mixed race numbered 315. (J. M.)

Marshpaug.—Cotton (1674) in Mass. Hist. Soc. Coll., 1st s., i, 204, 1806. **Marshpee.**—Coffin (1761) in Maine Hist. Soc. Coll., iv, 271, 1856. **Mashpah.**—Rawson and Danforth (1698) in Mass. Hist. Soc. Coll., 1st s., x, 133, 1809. **Mashpee.**—Bourne (1674), *ibid.*, i, 197, 1806. **Mashpee.**—Eliot (1673), *ibid.*, x, 124, 1809. **Mashpey.**—Hineckley (1685), *ibid.*, 4th s., v, 133, 1861. **Masphis.**—Alcedo, Dic. Geog., iii, 458, 1788. **Massapee.**—Hawley (1762) in Mass. Hist. Soc. Coll., 1st s., x, 113-14, 1809. **Old Colony Indians.**—Eliot quoted by Davis (1819), *ibid.*, 2d s., ix, xxv, 1822. **Southern Indians.**—*Ibid.* **South Sea Indians.**—Freeman (1802), *ibid.*, 1st s., viii, 127, 1802.

Masi. The Masauu (Death-god) clan of the Hopi of Arizona.

Masauuwu.—Voth, Hopi Proper Names, 93, 1905 (trans. 'skeleton'). **Masi winwü.**—Fewkes in 19th Rep. B. A. E., 584, 1900 (*winwü* = 'clan'). **Masi winwü.**—Fewkes in Am. Anthropol., vii, 404, 1894. **Massauwu.**—Dorsey and Voth, Oraibi Soyal, 13, 1901 (trans. 'skeleton').

Masiaca. A settlement of the Mayo, apparently on the Rio Mayo, under the municipality of Promontorios, in the district of Alamos, s. w. Sonora, Mexico. The total population was 364 in 1900. See Orozco y Berra, Geog., 608, 1864; Censo del Estado de Sonora, 1901.

Masikota (*Masi' kotü*, sing. *Masi' kot*, apparently from a root denoting 'shriveled,' 'drawn up'). A principal division of the Cheyenne, q. v. (J. M.)

Grasshoppers.—Dorsey in Field Columb. Mus. Pub. no. 103, 62, 1905. **Mah sihk' kü ta.**—Grinnell, Social Org. Cheyennes, 143, 1905. **Mä siñ kuh ta.**—*Ibid.*, 136. **Matsi'shkota.**—Clark quoted by Mooney in 14th Rep. B. A. E., 1026, 1896.

Masilengya. The Drab Flute clan of the Hopi of Arizona.

Macilenya winwü.—Fewkes in 19th Rep. B. A. E., 583, 1901 (*winwü* = 'clan'). **Ma-si'-len-ya winwü.**—Fewkes in Am. Anthropol., vii, 401, 1894.

Masipa ('coyote'). Given by Bourke (Jour. Am. Folk-lore, ii, 181, 1889) as a gens of the Mohave who are said to have been originally a band of the Maricopa.

Maskasinik. A division of the Ottawa, mentioned in the Jesuit Relation for 1657-58 with the Nikikouek, the Michesaking (Missisauga), and others, as nations long known to the French in Canada. There is no other known reference to them. They may possibly be the same as the Achiligouan. (J. N. B. H.)

Maskeg. See *Muskeg*.

Maskegon (*Mäskigök*, 'they of the marshes or swamps.'—W. J.). An Algonquian tribe so closely related to the Cree that they have appropriately been called a subtribe. According to Warren the Maskegon, with the Cree and the Monsoni, form the northern division of the Chippewa group, from which they separated about eight generations before 1850. The traders knew them as Swampy Crees. From the time the Maskegon became known as a distinct tribe until they were

placed on reserves by the Canadian government they were scattered over the swampy region stretching from L. Winnipeg and L. of the Woods to Hudson bay, including the basins of Nelson, Hays, and Severn rs., and extending s. to the watershed of L. Superior. They do not appear to be mentioned in the Jesuit Relations or to have been known to the early missionaries as a distinct people, though the name "Masquikoukiaks" in the Procès-verbal of the Prise de Possession of 1671 (Perrot, Mém., 293, 1864) may refer to the Maskegon. Tailhan, in his notes to Perrot, gives as doubtful equivalents "Mikikoneks ou Nikikoneks," the Otter Nation (see *Amikwa*), a conclusion with which Verwyst (Missionary Labors) agrees. Nevertheless their association with the "Christinos" (Cree), "Assinipouals" (Assiniboin), and "all of those inhabiting the countries of the north and near the sea" (Hudson bay), would seem to justify identifying them with the Maskegon. If so, this is their first appearance in history.

Their gentes probably differ but little from those of the Chippewa. Tanner says that the Pezhew (Besheu) or Wildcat gens is common among them. No reliable estimate can be formed of their numbers, as they have generally had no distinct official recognition. In 1889 there were 1,254 Maskegon living with Chippewa on reservations in Manitoba at Birch, Black, Fisher, Berens, and Poplar rs., Norway House, and Cross lake. The Cumberland, Shoal lake, Moose lake, Chemewawin, and Grand Rapids bands of Saskatchewan, numbering 605 in 1903, consisted of Maskegon, and they formed the majority of the Pas band, numbering 118, and part of the John Smith, James Smith, and Cumberland bands of Duck Lake agency, numbering 356. There were also some under the Manitowpahn agency and many among the 1,075 Indians of St. Peter's res. in Manitoba. (J. M.)

Big-Heads.—Donnelly in Can. Ind. Aff. for 1883, pt. 1, 10, 1884 (but see *Têtes de Boule*). **Coast Crees.**—Buck, Arct. Hist. Soc. Coll., v, 86, 1885 ('rabbit'; Chippewa name, referring to their peaceful character; applied also to the Tugwaundugahwininewig).

Maskinonge. A species of pike (*Esox ester*) found in the great lakes and the waters of the adjacent regions. The word is variously spelled maskinong, mascalonge, muskelunge, muskellunge, etc., and abbreviated into lunge or longe. As one of the earlier forms of this word, masquinongy, and the Canadian French masquinongé and maskinongé, indicate, the terminal *e* was once sounded. The origin of the word is seen in mashkinonge or maskinonge, which in the Chippewa and Nipissing dialects of Algonquian is applied to this fish; although, as the etymology suggests, it might also be used of other species. According to Cuq (Lex. Algonq., 194, 1886), mashkinonje is derived from *mash*, 'big,' and *kinonje*, 'fish.' This is perhaps better than the etymology of Lacombe and Baraga, which makes the first component to be *nashk* or *nask*, 'ugly.' The folk-etymological *masque allongé* of Canadian French has been absurdly perpetuated in the pseudo-Latin *mascalongus* of ichthyologists. (A. F. C.)

Masks. Throughout North America masks were worn in ceremonies, usually religious or quasi-religious, but sometimes purely social in character. Sometimes the priests alone were masked, sometimes only those who took part, and again the entire company. In all cases the mask served to intensify the idea of the actual presence of the mythic animal or supernatural person. The simplest form of mask was one prepared from the head of an animal, as the buffalo, deer, or elk. These realistic masks did not stand for the actual buffalo, deer, or elk,

but for the generic type, and the man within it was for the time endowed with or possessed of its essence or distinctive quality where the belief obtained that the mask enabled the wearer to identify himself for the time being with the supernatural being represented. A ceremony of purification took place when the mask was removed (Culin). Among the Eskimo the belief prevailed "that in

WESTERN ESKIMO MASK. (MURDOCH)

early days all animated beings had a dual existence, becoming at will either like man or the animal form they now wear; if an animal wished to assume its human form the forearm, wing, or other limb was raised and pushed up the muzzle or beak as if it were a mask, and the creature became manlike in form and features. This idea is still held, and it is believed that many animals now possess this power. The manlike form thus appearing is called the *inua*, and is supposed to represent the thinking part of the creature, and at death becomes its shade." Many of the masks of the N. and the Pacific coast are made with double faces

KWAKIUTL COMPOUND MASK. (BOAS)

to illustrate this belief. "This is done by having the muzzle of the animal fitted over and concealing the face of the *inua* below, the outer mask being held in place by pegs so arranged that it can be removed quickly at a certain time in the ceremony, thus symbolizing the transformation." Sometimes the head of a bird or animal towered above the face mask; for instance, one of the sand-hill crane was 30 inches long, the head and

beak, with teeth projected at right angles, about 24 inches; the head was hollowed out to admit a small lamp which shone through the holes representing the eyes; below the slender neck, on the breast, was a human face. The shaman who fashioned this mask stated that once when he was alone on the tundra he saw a sand-hill crane standing and looking at him. As he approached, the feathers on the breast of the bird parted, revealing the face of the bird's *inua*. In certain ceremonies women wore masks upon the finger of one hand. "The mask festival was held as a thanksgiving to the shades and powers of earth, air, and water for giving the hunters success." (Nelson in 18th Rep. B. A. E., 1899.)

In the N., on the Pacific coast, in the S. W., among some of the tribes of the plains, and among probably all the eastern tribes, including the ancient pile dwellers of Florida, masks made of wood, basketry, pottery, or hide were carved, painted, and ornamented with shell, bark fiber, hair, or feathers. They might be either male or female. The colors used and the designs carved or painted were always symbolic, and varied with the mythology of the tribe. Frequently the mask was provided with an interior device by which the eyes or the mouth could be opened or closed, and sometimes the different parts of the mask

were so hinged as to give the wearer power to change its aspect to represent the movement of the myth that was being ceremonially exemplified. With the sacred masks there were prescribed methods for consecration, handling, etc.; for instance, among the Hopi they were put on or off only with the left hand. This tribe, according to Fewkes, also observed rites of bodily purification before painting the masks. Some of the latter were a simple face covering, sometimes concealing only the forehead; to others was attached a helmet, symbolically painted. The Hopi made their masks of leather, cloth, or basketry, and adorned them with appendages of wood, bark, hair, woven fabrics, feathers, herbs, and bits of gourd which were taken off at the close of the ceremony and deposited in some sacred place or shrine. The mask was not always worn; in one instance it was carried on a pole by a hidden man. Altars were formed by masks set in a row, and

sacred meal was sprinkled upon them. The mask of the plumed serpent was spoken of as "quiet"; it could never be used for any purpose other than to represent this mythical creature; nor could it be repainted or adapted to any other purpose, as was sometimes done with other masks. Masks were sometimes spoken of as *kachinas*, as many of them represented these ancestral and mythical beings, and the youth who put on such a mask was temporarily transformed into the *kachina* represented. Paint rubbed from a sacred mask was regarded as efficacious in prayer, and men sometimes invoked their masks, thanking them for services rendered. Some of the Hopi masks are very old; others are made new yearly. Certain masks belong to certain clans and are in their keeping. No child not initiated is allowed to look upon a *kachina* with its mask removed, and certain masks must never be touched by pregnant women. Among the Hopi also a mask was placed over the face of the dead; in some instances it was a mere covering without form, in others it was made more nearly to fit the face. "A thin wad of cotton, in which is punched holes for the eyes, is laid upon the face . . . and is called a rain-cloud, or prayer to the dead to bring the rain." (Fewkes in 15th Rep. B. A. E., 1897.)

Young people sometimes indulged in festivities and made queer masks with which to disguise themselves; for example, masks of bladder or rawhide representing the head of the Thunderbird were made by the boys of the poorer classes among some of the Siouan tribes when the thunder was first heard in the spring. Covering their heads and faces with the masks, the boys proceeded to their uncles' tents and, imitating the sound of thunder, struck the doorflaps with sticks. Then with much merriment at the expense of the boys the uncles invited them in and gave them presents of leggings, moccasins, or blankets. On the N. W. coast masks were occasionally made as toys for the amusement of children. But generally the mask was a serious representation of tribal beliefs, and all over the country the fundamental idea embodied in it seems to have been that herein described.

In addition to the authorities cited, consult Boas in Rep. Nat. Mus. for 1895; Dall in 3d Rep. B. A. E., 1884; Dorsey and Voth in Field Columb. Mus. Pub. nos. 55, 66, 1901, 1902; Matthews in Mem. Am. Mus. Nat. Hist., vi, 1902; Nelson in 18th Rep. B. A. E., 1899. (A. C. F.)

Mason's Ruins. A small ruined house group, so named by Lumholtz (Unknown Mex., i, 48, 1902) from a Mexican member of his expedition; situated on the end

TLINGIT COMPOUND MASK.
(NIBLACK)

of a ridge near Rio Bavispe, N. W. Chihuahua, Mex. The walls, which stand 3 to 5 ft high, consist of felsite blocks averaging 6 by 12 in., laid in gypsiferous clay mortar and coated with white plaster. The structure is ascribed to the Opata.

Maspeth. A small Algonquian tribe or band, a branch of the Rockaway, formerly living in a village about the site of the present Maspeth, between Brooklyn and Flushing, Long Island, N. Y. The name occurs as early as 1638. Ruttenber speaks of Mespeth as a considerable Canarsee village, attacked by the Dutch in 1644. (J. M.)

Maspeth.—Thompson, Long Id., 410, 1839 (tribe). **Mespacht.**—Tienhoven (1650) in N. Y. Doc. Col. Hist., I, 426, 1856. **Mespadt.**—Ruyven (1666), *ibid.*, II, 473, 1858. **Mespaetches.**—Doc. of 1638 quoted by Flint, Early Long Id., 162, 1896 ("Mespaetches Swamp"). **Mespat.**—Council of war (1673) in N. Y. Doc. Col. Hist., II, 591, 1858. **Mespath.**—Ruttenber, Tribes Hudson R., 114, 1872 (village). **Mespath's Kill.**—Council of 1673 in N. Y. Doc. Col. Hist., II, 661, 1858. **Mespat Kil.**—*Ibid.*, 586. **Mespat's kil.**—Stuyvesant (1663), *ibid.*, 448. **Metsepe.**—Flint, *op. cit.*, 162 (given as Indian form).

Masque allongé, Masquinongé, Masquinongy. See *Maskinonge*.

Massachusetts (*Massa-adchu-es-et*, 'at or about the great hill'; from *massa* 'great', *wadchu* 'hill or mountain', *es* 'small', *et* the locative.—Trumbull. In composition *wadchu* becomes *adchu* and adds *ash* for the plural. The name refers to the Blue Hills of Milton. Williams substitutes *euk* for *et* in forming the tribal designation, and uses the other as the local form. Cotton in 1708 translated the word 'a hill in the form of an arrow-head'). An important Algonquian tribe that occupied the country about Massachusetts bay in E. Massachusetts, the territory claimed extending along the coast from Plymouth northward to Salem and possibly to the Merrimac, including the entire basin of Neponset and Charles rs. The group should perhaps be described as a confederacy rather than as a tribe, as it appears to have included several minor bodies. Johnson described the group as formerly having "three kingdoms or sagamoreships having under them seven dukedoms or petty sagamores." They seem to have held an important place among the tribes of S. New England prior to the coming of the whites, their strength being estimated as high as 3,000 warriors, although it is more likely that the total population did not exceed that number. Capt. John Smith (1614) mentions 11 of their villages on the coast and says they had more than 20. In consequence of war with the Tarratine and the pestilence of 1617 in which they suffered more than any other tribe, the English colonists who arrived a few years later found them reduced to a mere remnant and most of the villages mentioned

by Smith depopulated. In 1631 they numbered only about 500, and 2 years later were still further reduced by smallpox, which carried off their chief, Chickatabot. Soon thereafter they were gathered, with other converts, into the villages of the "Praying Indians," chiefly at Natick, Nonantum, and Ponkapog, and ceased to have a separate tribal existence. As they played no important rôle in the struggles between the settlers and natives, the chief interest that attaches to them is the fact that they owned and occupied the site of Boston and its suburbs and the immediately surrounding territory when the whites first settled there. In 1621, when Standish and his crew from Plymouth visited this region, they found the Indians but few, unsettled, and fearful, moving from place to place to avoid the attacks of their enemies the Tarratine.

Although the Algonquian Indians of Massachusetts, Connecticut, and Rhode Island, taken as a whole, formed a somewhat homogeneous group, yet there were linguistic differences which seem to justify De Forest (Indians Conn., 1853) in doubting Gookin's statement that the languages were so much alike that the people of the different tribes could easily understand one another. The Massachusetts were more closely allied to the Narraganset than to any other of the surrounding tribes whose languages are known, the people of the two being able to understand each other without difficulty. For their customs, beliefs, etc., see *Algonquian Family*.

Following are the villages of the Massachusetts Indians so far as known, some of them being more or less conjectural: Conohasset, Cowate, Magaehnak, Massachusetts, Mishawum, Mystic (Middlesex co.), Nahapassumkeek, Nasnocomacack, Natick, Naumkeag (Essex co.), Neponset, Nonantum, Patuxet, Pequimmit, Pocapawmet, Punkapog, Sagoquas, Saugus, Seccasaw, Titicut, Topeent, Totant, Totheet, Wessagusset, Winnisimmet, and Wonasquam. (J. M. C. T.)

Inds., bk. 2, 43, 1848 (mentioned as the village over which Chickatabot was sachem).

Massachuset. One of the villages of the tribe of the same name in 1614, according to Capt. John Smith; probably the chief settlement of the tribe, which then held their territory about Massachusetts bay, Mass. In 1617 that portion of the coast extending northward into Maine was ravaged by a pestilence, so that the tribe was almost extinct before the arrival of the Puritans in 1620.

Massachuset.—Smith (1629), Hist. Va., II, 183, repr. 1819.

Massapequa ('great pond,' from *massa*, 'great,' and *peg* or *pequa*, 'pond.'). It occurs frequently in dialectic forms in New England and on Long Island). An Algonquian tribe formerly on the s. coast of Long Island, N. Y., about Seaford and Babylon, extending from Ft Neck E. to Islip. Their chief village, which was probably of the same name as the tribe, appears to have been at Ft Neck. "Under constant fear of attack from their more warlike neighbors, the Indians at each end of the island had built at Ft Neck and at Ft Pond, or Konkhongauk, a place of refuge capable of holding 500 men" (Flint, Early Long Island, 1896). The stronghold of the Massapequa was destroyed in 1653 by Capt. Underhill in the only great Indian battle fought on Long Island. The women and children took refuge on Squaw id. during the battle. Until lately the remains of a quadrangular structure, its sides 90 feet in length, marked the place where the fort stood. Tackapousha, the Massapequa sachem, was a thorn in the flesh of the settlers in his vicinity, it being impossible to satisfy his demands. The records show that both the English and the Dutch were obliged to pay tribute to him time and again. He was one of the most turbulent characters known to the aboriginal history of Long Island. (J. M. C. T.)

Hist., XIV, 705, 1883. **Mersapeage.**—Doc. of 1657, *ibid.*, 416. **Mersapege.**—Treaty of 1656 in Ruttenber, Tribes Hudson R., 125, 1872.

Massassauga. A western species of rattlesnake (*Sistrurus catenatus*). This reptile is more properly termed Mississauga and derives its appellation from the place and ethnic name Mississauga (Chamberlain, Lang. of Mississagas, 59, 1892), from the Chippewamisi, 'great,' and *ság* or *sauk*, 'river mouth.' (A. F. C.)

Massassoit ('great chief'; proper name, Woosamequit [Wasamegin, Osamekin, etc.], 'Yellow Feather'). A principal chief of the Wampanoag of the region about Bristol, R. I., who was introduced by Samoset to the Puritans at Plymouth in 1621. He was preeminently the friend of the English. Drake (Aborig. Races, 81, 1880) says of him: "He was a chief renowned more in peace than war, and was, as long as he lived, a friend to the English, notwithstanding they committed repeated usurpations upon his lands and liberties." He had met other English voyagers before the advent of the Puritans. While ill in 1623 he was well treated by the English. In 1632 he had a brief dispute with the Narraganset under Canonicus, and in 1649 he sold the site of Duxbury to the English. His death took place in 1662. Of his sons, one, Metacomet, became famous as King Philip (q. v.), the leading spirit in a long struggle against the English. (A. F. C.)

Massawoteck. A village of the Powhatan confederacy, in 1608, on the N. bank of Rappahannock r., King George co., Va. (J. M.)

Massawoteck.—Smith (1629), Virginia, I, map, repr. 1819. **Massawteck.**—Simons, *ibid.*, I, 185.

Masset. A Haida town on the E. side of Masset inlet, near its mouth, Queen Charlotte Ids., Brit. Col. Its name in the Masset dialect is Ataiwas ('at'e'was, 'white slope'), which in the Skidegate dialect appears as Gatgai'xiwas). According to the inhabitants the sea formerly

came in over the ground now occupied by houses, but the latter were then situated on higher ground just back of the present site. At that time, too, there was an independent town around a hill called Edjao ([†]Edjao), which stands at the eastern end. Until lately the band holding possession was the Skidaokao. According to John Work's estimate, made between 1836 and 1841, there were 160 houses and 2,473 people at Masset, but this enumeration must have included all the neighboring towns, and probably numbered the smokehouses. The number of houses, enumerated by old people, in the two towns, Masset proper and Edjao (27 and 6 respectively) would indicate a total population of about 528, 432 in the former and 96 in the latter. Adding to these figures the estimated numbers in the two neighboring towns of Yan and Kayung, the grand total would be 1,056, or less than half of Work's figure. It is probable, however, that the population had decreased between Work's time and that which the old men now recall. According to the Canadian Report of Indian Affairs for 1904 there were 356 people at Masset; these include the remnant of all the families that lived once between Chawagis r. and Hippa id. A few people have moved to the neighboring town of Kayung. A mission of the Anglican Church is maintained at Masset, the oldest on the Queen Charlotte ids., and all the Indians are nominal Christians.

(J. R. S.)

[†]Atē-was.—Swanton, Cont. Haida, 281, 1905 (native name). G'at'aiwa's.—Boas, Twelfth Report N. W. Tribes Canada, 23, 1898. G'at'aiwas.—Ibid. (Skidegate dialect). Massets.—Scouler (1846) in Jour. Ethnol. Soc. Lond., i, 233, 1848. Massets.—Scouler in Jour. Roy. Geog. Soc., xi, 219, 1841. Massets.—Dunn, Hist. Oregon, 281, 1844. Massett.—Can. Ind. Aff. 1904, pt. 2, 69, 1905. Massetta.—Schoolcraft, Ind. Tribes, v, 489, 1855 (after Work, 1836-41). Massettes.—Scouler in Jour. Roy. Geog. Soc., xi, 219, 1841. Mass hāde.—Krause, Tlinkit Indianer, 304, 1885. Mossette.—Kane, Wand. in N. Am., app., 1859 (after Work, 1836-41). Ut-te-was.—Dawson, Q. Charlotte Ids., 183, 1880.

Massi. A former town on the E. bank of Tallapoosa r., Ala. (Bartram, Voy, i, map, 1799). Not identified, but probably Creek.

Massikwayo. The Chicken-hawk clan of the Pakab (Reed) phratry of the Hopi. Mas-si' kwa'-yo.—Stephen in 8th Rep. B. A. E., 39, 1891.

Massinacac. A tribe of the Monacan confederacy, formerly living in Cumberland and Buckingham cos., Va. Strachey speaks of their village as the farthest town of the Monacan.

Massinacack.—Smith (1629), Virginia, i, map, repr. 1819. **Massinacacs.**—Jefferson, Notes, 179, 1801. **Massinacacks.**—Strachey (1612), Va., 102, 1849.

Massomuck. An Indian location in 1700, mentioned as if near the Wabaquasset country, in S. Massachusetts (Doc. of 1700 in N. Y. Doc. Col. Hist., iv, 615, 1854). Probably identical with Ma-

shamoquet (Massamugget, Mashamugget, Mashamugket, Machi-mucket, Moshamoquett), given by Trumbull (Ind. Names Conn., 25, 1881) as the name of a tract and a small tributary of Quinebaug r. at Pomfret, N. E. Conn., and rendered by him 'at the great fishing place.'

Mastohpatakiks (*Ma-stoh'-pa-ta-kiks*, 'raven bearers'). A society of the Ikunuhkahtsi, or All Comrades, in the Piegan tribe of the Siksika.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

Masut. A former northern Pomo village on Forsythe cr., one of the headwaters of Russian r., about 3 m. N. W. of the present Calpella, Mendocino co., Cal. (S. A. B.) **Masu-ta-kaya.**—Gibbs (1851) in Schoolcraft, Ind. Tribes, iii, 112, 1853. **Mas-u-ta-ka.**—Ibid.

Mata. A former rancharia, probably of the Soba, N. of Caborca, which is on the Rio de la Asuncion, between Quitobac and Aribaiba, N. W. Sonora, Mexico. The place was visited by Anza and Font in 1776.

Santa Maita.—Hardy, Travels, 422, 1829 (same?). **S. Juan de Mata.**—Anza and Font (1776) quoted by Bancroft, Ariz. and N. M., 393, 1889.

Matachic. A Tarahumare settlement on the headwaters of the Rio Yaqi, lat. 28° 45', lon. 107° 30', W. Chihuahua, Mexico.—Orozco y Berra, Geog., 323, 1864.

Mataguay. A former Diegueño rancharia on upper San Luis Rey r., San Diego co., Cal.; later on Agua Caliente No. 1 res., occupied by Warner's ranch. By decision of the U. S. Supreme Court the Indians were dispossessed of their lands, and by act of May 27, 1902, an additional tract was purchased at Pala, and the Mataguay people, who numbered 11 in 1903, were removed thereto in that year.

Mataguay.—Jackson and Kinney, Rep. Miss. Ind., 24, 1883. **Matahuay.**—Hayes (1850) cited by Bancroft, Nat. Rac., i, 458, 1882. **Matajuai.**—H. R. Ex. Doc. 76, 34 Cong., 3d sess., 133, 1857. **Mootayuhew.**—Taylor in Cal. Farmer, May 11, 1860.

Mataitaikook (*Ma-tai-tai-ke-ók*, 'many eagles'). A former Cree band, named from their chief, who was known to the French as Le Sonnant. In 1856 they roamed and hunted in the country along the "Montagnes des Bois," and traded with the fur companies on Red r. of the North and on the Missouri near the mouth of the Yellowstone. They numbered about 300 lodges.—Hayden, Ethnog. and Philol. Mo. Val., 237, 1862.

Matamo. A Diegueño rancharia near San Diego, s. Cal.; probably the same as Matmork la Puerta, represented in the treaty of 1852 at Santa Isabel.

Matamó.—Ortega (1775) cited by Bancroft, Hist. Cal. i, 253, 1884. **Matmork la Puerta.**—H. R. Ex. Doc. 76, 34th Cong., 3d sess., 132, 1857.

Matanakons. Mentioned by De Laet about 1633 (N. Y. Hist. Soc. Coll., 2d s., i, 303, 1841) as a Delaware tribe formerly in New Jersey. The name may have some

connection with Manta (q. v.) or with Matiniconk, the Indian name of an island in Delaware r. Cf. *Matineoc*. (J. M.)

Matantonwan (said to mean 'village of the great lake which empties into a small one,' and therefore probably from *mdo-te*, 'the outlet of a lake'). One of the two early primary divisions of the Mdewakanton Sioux (Neill, Hist. Minn., 144, 1858). They seem to have been a distinct tribe when visited by Perrot in 1689. They are mentioned as residing at the mouth of Minnesota r. in 1685. To this division belonged in 1858 the Khemnnichan, Kapozha, Maghayuteshni, Makhpiyamaza, Kheyataotonwe, and Tintaotonwe bands. All these are now on Santee res., Nebr.

Mah-tah-ton.—Lewis and Clark, Discov., 34, 1806.
Mantantans.—Perrot (1689), quoted by Neill, Hist. Minn., 144, 1858. **Mantantons**.—La Harpe quoted by Neill, Hist. Minn., 170, 1858. **Mantanton**.—Le Sueur (1700) quoted by Neill, ibid., 166. **Mantantous**.—Prise de Possession (1689) in Margry, Déc., v, 34, 1888. **Mantautous**.—Perrot, Mém., 304, 1864 (misprint). **Matabantowaher**.—Balbi, Atlas Ethnog., 55, 1826. **Mententons**.—Pénicaud (1700) in Minn. Hist. Soc. Coll., II, pt. 2, 6, 1864. **Mentonton**.—Pénicaud (1700) in Margry, Déc., v, 414, 1888.

Matantuck. See *Magnus*.

Matanza (Span.: 'massacre'). A name frequently appearing on early Spanish maps, and on maps derived therefrom, apparently as settlements, but in reality to mark the locality or supposed locality where a massacre had taken place. A Matanza appears on maps of the Quivira region, in which Francisco Leyva Bonilla and his companions were killed by the natives about 1594-96; and another on the E. coast of Florida, below St Augustine, where the Huguenot colonists were massacred by the Spaniards in 1565.

Matapan (probably from the Nahuatl *matalli*, *atl*, and *pan*, which suggests 'in the blue water.'—Buelna). A subdivision of the Tehueco that inhabited a village of the same name on the lower Rio Fuerte, in N. W. Sinaloa, Mex.—Orozco y Berra, Geog., 58, 1864.

Matape. A Endeve settlement, which evidently contained also some Cogninachi Opata, in lat. 29°, lon. 110°, central Sonora, Mexico. Identified by Bandelier with the Vacapa or Vacupa of Marcos de Niça (1539). The mission of San José de Matape was established there in 1629; it had 482 inhabitants in 1678 and but 35 in 1730. According to Davila (Sonora Histórico, 317, 1894) it was a Cogninachi pueblo. Not to be confounded with Bacapa, a Papago settlement.

Bacapa.—Coles, Garcés Diary, II, 481, 1900. **Matapa**.—Bandelier in Arch. Inst. Papers, v, 123, 1890. **Matape**.—Sonora Materiales (1730) quoted by Bancroft, No. Mex. States, I, 513, 1884. **San José de Matape**.—Zapata (1678) in Doc. Hist. Mex., 4th s., III, 353, 1857. **S. José Matape**.—Bancroft, No. Mex. States, I, 246, 1884. **Vacapa**.—Marcos de Niça (1539) in Ternaux-Compans, Voy., IX, 259, 1838. **Vacupa**.—Niça (1539) in Hakluyt, Voy., III, 439, 1600.

Matapeake. Mentioned as a tribe that once occupied Kent id., Queen Anne co., Md. (Davis, Daystar of American Freedom, 45, 1855). They lived at one time near Indian Spring, and at another on Matapax Neck.

Matarango. A tribe living w. of Darwin, s. E. Cal.; probably an offshoot of the Panamint, as they speak a similar language. (H. W. H.)

Matatoba. A tribe or band of the Dakota, probably the Mantantonwan division of the Mdewakanton.

Matatoba.—Pachot (1722) in Margry, Déc., VI, 518, 1886. **Sioux of the Prairies**.—Ibid. (distinct from the Teton).

Mataghuquamend. A village on the N. bank of the Potomac, in 1608, in Charles co., Md., probably near Mattawoman cr.—Smith (1629), Virginia, I, map, repr. 1819.

Matawachkarini ('people of the shallows.'—Hewitt). A small tribe or band living in 1640 on middle Ottawa r., but found in 1672 in the vicinity of the S. end of Hudson bay, near the Monsoni. They were doubtless one of the bands, known to the French as Algonkin, which were broken and dispersed by the Iroquois invasion about 1660. See *Mattawan*.

Madaouaskairini.—Champlain, Œuvres, III, 302, 1870. **Matouachkariniens**.—Jes. Rel. 1643, 61, 1858. **Matouakirinouek**.—Ibid., 1672, 54, 1858. **Matouachkarini**.—Ibid., III, index, 1858. **Matouachkairinik**.—Ibid., 1658, 22, 1858. **Matouachkairiniouek**.—Ibid., 1646, 34, 1858. **Matouachkairiniwek**.—Ibid., 1646, 145, 1858. **Matouachkarini**.—Ibid., 1640, 34, 1858. **Matawachkarini**.—Ibid., III, index, 1858. **Matawachwarini**.—Ibid. **Matou-ouesscarini**.—Champlain (1613), Œuvres, III, 302, 1870.

Matawoma. A former village, probably of the Delawares, on Juniata r., Mifflin co., Pa., near the present McVeytown.—Royce in 18th Rep. B. A. E., Pa. map, 1899.

Matchasaung. A former Iroquois village on the left bank of the E. branch of Susquehanna r., about 13 m. above Wyoming, Pa.—Doc. Hist. N. Y., II, 715, 1851.

Matchcoat. During the era of trade with the Indians almost throughout the Algonquian seaboard certain garments supplied in traffic were called by the English "matchcoats," a corruption of a name belonging to one of the cloaks or mantles of the natives. The Algonquian word from which it was derived is represented by Chippewa *matshigoté*, Delaware *wachgotey*, 'petticoat.' (A. F. C.)

Matchcouchtin. A Nanticoke village in 1707, probably in Pennsylvania.—Evans (1707) in Day, Penn., 391, 1843.

Matcheattochousie. A Nanticoke village in 1707, probably in Pennsylvania.—Evans (1707) in Day, Penn., 391, 1843.

Matchebenashshewish ('ill-looking bird,' or 'ill-natured bird.'—Hewitt). A Potawatomi village, called after a chief of this name, formerly on Kalamazoo r., probably in Jackson co., Mich. The reservation was sold in 1827. The name is also written Matchebenarhshewish. (J. M.)

Matchedash. A name formerly used to designate those Mississauga living at Matchedash bay, Ontario.

Matchedach.—Chauvignerie (1736) in N. Y. Doc. Col. Hist., ix, 1056, 1855. **Matchedash.**—Henry, Travels, 35, 179, 1809. **Matchitashk.**—Ibid. **Matechitache.**—Mémorial de 1718 in N. Y. Doc. Col. Hist., ix, 889, 1855.

Matchinkoa. A village containing 600 families of Illinois, Miami, and others, situated 30 leagues from Ft Crevecoeur, near Peoria, Ill., in 1682 (La Salle in Margry, Déc., ii, 201, 1877). The word may be connected with Chinko (q. v.).

Matchopick ('bad bay or inlet.'—Hewitt). A village of the Powhatan confederacy, in 1608, on the s. bank of the Rappahannock, in Richmond co., Va. Cf. *Matchotic*.

Machopeake.—Purchas, Pilgrimes, iv, 1716, 1625-26. **Matchopeak.**—Simons in Smith (1629), Virginia, i, 185, repr. 1819. **Matchopick.**—Smith, ibid., map.

Matchotic ('bad inlet.'—Hewitt). A group of tribes of the Powhatan confederacy occupying the country between Potomac and Rappahannock rs. down to about the middle of Richmond co., Va., comprising the Tauxent, Potomac, Cuttatawomen, Pissasec, and Onawmanient. They numbered perhaps 400 warriors in 1608, but 60 years later, according to Jefferson, had become reduced to 60 warriors. See *Appomattox*. (J. M.)

Appamatox.—Jefferson, Notes, table, 138, 1801. **Appamatrix.**—Herrman, map (1670) in Rep. on Line between Va. and Md., 1873. **Matchotickes.**—Archives Md., Proc. Council, 1636-67, 281, 1885. **Matchotics.**—Jefferson, op. cit. **Matox.**—Ibid.

Matchotic. A former village on the s. bank of Potomac r. in Northumberland co., Va., a short distance below Nominny inlet.

Mattschotick.—Herrman, map (1670) in Rep. on Line between Va. and Md.

Matchotic. A former village on Machodoc cr., King George co., Va.

Upper Matchotic.—Jefferson, Notes, 138, 1801. **Upper Mattschotick.**—Herrman, map (1670) in Rep. on Line between Va. and Md.

Matchut. A village of the Powhatan confederacy, in 1608, on Pamunkey r., New Kent co., Va.

Matchot.—Smith (1629), Virginia, ii, 15, repr. 1819. **Matchut.**—Ibid., i, map.

Mategarele (*mategá* 'juniper', *relé* 'below': 'below the junipers'). A Tarahumare rancheria near Palanquo, Chihuahua, Mexico.—Lumholtz, in f'n, 1894.

Mathews, Mary. See *Bosomworth, Mary*.

Mathiaca. A Timuquanan tribe and village on the w. side of upper St Johns r., Fla., in the 16th century.

Mathiaca.—De Bry, Brev. Nar., ii, map, 1521. **Mathiagua.**—Laudonnière (1655) quoted by Shipp, De Soto and Fla., 525, 1881. **Mathiagua.**—Fairbanks, Hist. Fla., 105, 1871.

Mathomauk. A village of the Powhatan confederacy, in 1608, on the w. bank of James r., in Isle of Wight co., Va.—Smith (1629) Virginia, i, map, repr. 1819.

Mathue. A tribe that traded in 1652 with Indians on Patuxent r., Md. There is no means of determining its location

(Bozman, Maryland, ii, 467, 1837). Possibly the Mantua, Monthees, or Munsees, or perhaps the Manta division of the Delawares. (J. M.)

Mathwa (*M'-ath-wa*, 'owl'). A gens of the Shawnee (q. v.).—Morgan, Anc. Soc., 168, 1877.

Matiliha. A large Chumashan village, said by Indians to have been on Buenaventura r., Ventura co., Cal. A village of this name is mentioned in mission archives as having been situated near Santa Inez mission.

Ma'-ti-la-ha.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884. **Matiliha.**—Taylor in Cal. Farmer, Oct. 13, 1861. **Matiliha.**—Ibid., July 24, 1863.

Matilpe ('head of the Maamtagiyla'). A Kwakiutl sept which has recently branched off from the rest of the true Kwakiutl. The gentes are Maamtagiyla, Gyeksem, and Haailakyemae. The principal winter village is Etsekin. Pop. 55 in 1904.

Mah-tee-cetp.—Can. Ind. Aff., 189, 1884. **Mahtilpi.**—Ibid., pt. 2, 166, 1901. **Mahtulth-pe.**—Sproat in Can. Ind. Aff., 145, 1879. **Mar-til-par.**—Kane, Wand. in N. Am., app., 1859. **Matelpe.**—Tolmie and Dawson, Comp. Vocabs. Brit. Col., 1188, 1884. **Matelth-pahs.**—Brit. Col. map, Victoria, 1872. **Ma-tilpi.**—Dawson in Trans. Roy. Soc. Can. for 1887, sec. ii, 65. **Ma-tilpe.**—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. **Ma-tilpis.**—Boas in Petermanns Mitt., pt. 5, 130, 1887. **Mat-ul-pai.**—Tolmie and Dawson, Comp. Vocabs. Brit. Col., 1188, 1884. **Mur til par.**—Schoolcraft, Ind. Tribes, v, 488, 1855.

Matinecoc. An Algonquian tribe which formerly inhabited the n. w. coast of Long Island, N. Y., from Newtown, Queens co., to Smithtown, Suffolk co. They had villages at Flushing, Glen Cove, Cold Spring, Huntington, and Cow Harbor, but even before the intrusion of the whites they had become greatly reduced, probably through wars with the Iroquois, to whom they paid tribute. In 1650 Secretary Van Tienhoven reported but 50 families left of this once important tribe. Rutenber includes them in his Montauk group, which is about equivalent to Metoac (q. v.); but the interrelationship of the tribes in the western part of Long Island has not been definitely determined. (J. M. C. T.)

Mantinacocks.—Macauley, N. Y., ii, 164-65, 1829.

Mantinecocks.—Clark, Onondaga, i, 18, 1849.

Mantinecocks.—Macauley, N. Y., ii, 292, 1829.

Martinne houck.—Van Tienhoven (1650) in N. Y. Doc. Col. Hist., i, 366, 1856. **Matinecoc.**—Wood in Macauley, Long Id., ii, 253, 1829. **Matinecocks.**—Terry (1670) in N. Y. Doc. Col. Hist., xiv, 639, 1883.

Matinecogh.—Doc. of 1656, ibid., 369. **Matinecogh.**—Ibid. **Matinecock.**—Doc. of 1666, ibid., 589.

Matiniconck.—Nicolls (1669), ibid., 621. **Matinnekonck.**—Doc. of 1644, ibid., 56. **Matinnickonck.**—Nicolls (1666), ibid., 587. **Matinnicongh.**—Nicolls (1664), ibid., 557. **Matinnacock.**—Houldsworth (1663), ibid., 530. **Matinnickonck.**—Van Tienhoven (1655), ibid., 314.

Matironn. One of the Diegueño rancherias represented in the treaty of 1852 at Santa Isabel, s. Cal.—H. R. Ex. Doc. 76, 34th Cong., 3d sess., 133, 1857.

Matlaten (*Mat-la-ten*). A summer village of the Wiweakam between Bute and Loughborough inlets, Brit. Col.; pop. 125

in 1885.—Boas in Bull. Am. Geog. Soc., 230, 1887.

Matoaks. See *Pocahontas*.

Matomkin. A village of the Powhatan confederacy, still existing in 1722, about Metomkin inlet in Accomack co., Va. Not long before this time it had much decreased in population owing to an epidemic of smallpox.

Matampken.—Herrman map (1670) in Maps to Accompany the Rep. of the Comr's on the B'ndry Bet. Va. and Md., 1873 (Great and Little Matampken marked). **Matomkin.**—Beverley, Virginia, 199, 1722.

Matonumanke ('bear'). A Mandan band.

Bear.—Morgan, Anc. Soc., 158, 1877. **Mato-Mihte.**—Maximilian, Trav., 335, 1843. **Mā-to-'no-māke.**—Morgan, op. cit. **Mato-Numakake.**—Maximilian, op. cit. **Ma-to' nu-mān'-ke.**—Dorsey in 15th Rep. B. A. E., 241, 1897.

Matora. An unidentified tribe placed by Marquette (Shea, Discov. Miss. Val., 268, 1852), on his map of 1673, w. of the Mississippi, about the w. border of Arkansas.

Matsaki ('salt city,' because the Zuñi Goddess of Salt is said to have made a white lake there). A ruined pueblo of the Zuñi near the n. w. base of Thunder mt., 3 m. e. of Zuñi pueblo, Valencia co., N. Mex. It was the Maçaque of Castañeda's narrative of Coronado's expedition in 1540-42, hence formed one of the Seven Cities of Cibola. It was occupied until the beginning of the Pueblo revolt of Aug., 1680, when it was permanently abandoned, the inhabitants fleeing with the other Zuñi to the summit of the adjacent Thunder mtn., there remaining for several years. During the mission period Matsaki was a visita of Halona. See Mindeleff in 8th Rep. B. A. E., 86, 1891, and the writers cited below. (F. W. H.)

Maçaque.—Castañeda (1596) in 14th Rep. B. A. E., 517, 1886. **Maçauqui.**—Bandelier in Mag. West. Hist., 669, Sept. 1886. **Maçauqui.**—Oñate (1598) in Doc. Inéd., xvi, 133, 1871. **Maçauquia.**—Bandelier in Arch. Inst. Papers, iv, 337, 1892 (misquoting Oñate, op. cit.). **Masagua.**—De l'Isle, Atlas Nouveau, map 60, 1733. **Masagua.**—De l'Isle, Carte Mexique et Floride, 1703. **Masiki.**—Peet in Am. Antiq., xvii, 352, 1895. **Ma-tsa-ki.**—Cushing in Century Mag., 38, 1883 (Zuñi name). **Māt-sa-ki.**—Cushing in Millstone, ix, 55, Apr. 1884 (Zuñi name). **Matsuki.**—ten Kate, Reizen in N. A., 290, 1885 (misquoting early Spanish form). **Matza-ki.**—Bandelier in Mag. West. Hist., 669, Sept. 1886. **Ma-tza Ki.**—Bandelier in Arch. Inst. Papers, iii, 133, 1890. **Mā-tza-qui.**—Bandelier in Revue d'Ethnographie, 201, 1886. **Mātzaqui.**—Ibid., 208. **Mazaquia.**—Vetancourt (1693), Teatro Mex., iii, 320, 1871. **Mazquia.**—Bancroft, Ariz. and N. Mex., 173, 1889 (misquoting Vetancourt). **Mazuqui.**—Bandelier quoted by Cushing in Millstone, ix, 55, Apr. 1884. **Mozaqui.**—Cushing in Compte-rendu Internat. Cong. Am., vii, 156, 1890. **Muzaque.**—Castañeda (1596) in Ternaux-Compans, Voy., ix, 163, 1838. **Muzaqui.**—Cushing in Compte-rendu Internat. Cong. Am., vii, 156, 1890 (misquoting Castañeda). **Salt City.**—Cushing, Zuñi Folk Tales, i, 32, 1901.

Matsnikth (*Māts-nīk'č'*). A former village of the Siuslaw on Siuslaw r., Oreg.—Dorsey in Jour. Am. Folk-lore, iii, 230, 1890.

Matsqui (*Mā'çqui*). A Cowichan tribe on Fraser r. and Sumass lake, Brit. Col. Their villages are Mamakume and Koko-auek. Pop. 44 in 1904.

Mā'çqui.—Boas in 64th Rep. Brit. A. A. S., 454, 1894. **Maisqui.**—Brit. Col. map, Ind. Aff., Victoria, 1872. **Mamskey.**—Custer quoted by Gatschet, notes, B. A. E. **Matsqui.**—Can. Ind. Aff. for 1901, pt. II, 158.

Mattabesec (from *massa-sepuēs-et*, 'at a [relatively] great rivulet or brook.'—Trumbull). An important Algonquian tribe of Connecticut, formerly occupying both banks of Connecticut r. from Wethersfield to Middletown or to the coast and extending westward indefinitely. The Wongunk, Pyquaug, and Montowese Indians were a part of this tribe. According to Ruttenber they were a part of the Wappinger, and perhaps occupied the original territory from which colonies went out to overrun the country as far as Hudson r. The same author says their jurisdiction extended over all s. w. Connecticut, including the Mahackeno, Uncowa, Paugusset, Wepawaug, Quinnipiac, Montowese, Sukiang, and Tunnix. (J. M.)

Matabesec.—Kendall, Trav., i, 92, 1809. **Matabezek.**—Doc. of 1646 cited by Trumbull, Ind. Names Conn., 26, 1881. **Matebesec.**—Writer (ca. 1642) in Mass. Hist. Soc. Coll., 3d s., iii, 161, 1833. **Mato-wepesack.**—Uncas deed (1665) cited by Trumbull, Ind. Names Conn., 26, 1881. **Mattabesett.**—Stiles (1761) in Mass. Hist. Soc. Coll., 1st s., x, 105, 1809. **Mattabesec.**—Record (1646) quoted by Trumbull, Conn., i, 510, 1818. **Mattabesett.**—Ind. deed (1673) cited by Trumbull, Ind. Names Conn., 26, 1881. **Mattabesike.**—Haynes (1643) in Mass. Hist. Soc. Coll., 4th s., vi, 355, 1863. **Mattapeaset.**—Doc. of 1657 cited by Trumbull, Ind. Names Conn., 26, 1881. **Mattabesec.**—Hoyt, Antiq. Res., 54, 1824. **Sequeen.**—Doc. of 1633 in N. Y. Doc. Col. Hist., ii, 140, 1858 (title of chief). **Sequins.**—De Laet (1640) in N. Y. Hist. Soc. Coll., 2d s., i, 295, 1841. **Sequins.**—Dutch map (1616) in N. Y. Doc. Col. Hist., i, 1856.

Mattabesec. The principal village of the Mattabesec, the residence of Sowheag, their head chief. It occupied the site of Middletown, Conn.

Mattabesett.—Field, Middlesex Co., 34, 1819.

Mattacock. A village of the Powhatan confederacy, in 1608, on the n. bank of York r., in Gloucester co., Va.—Smith (1629), Virginia, i, map, repr. 1819.

Mattacunt. A village of the Powhatan confederacy, in 1608, on the s. side of Potomac r., in King George co., Va.—Smith (1629), Virginia, i, map, repr. 1819.

Mattakeset. A village in e. Massachusetts, about the site of Yarmouth, Barnstable co. It is said to have been subject to the Wampanoag, but was in Nauset territory. It is mentioned in 1621, and in 1685 was still in existence, with a population of 70 Indians exceeding 12 years of age. (J. M.)

Matakees.—Gookin (1674) in Mass. Hist. Soc. Coll., 1st s., i, 148, 1806. **Matakeset.**—Arnold and Morton (1683), ibid., 4th s., v, 86, 1861. **Matakesit.**—Barber, Hist. Coll., 517, 1839. **Mattacheese.**—Mass. Hist. Soc. Coll., 1st s., iii, 15, 1794. **Mattacheeset.**—Ibid. **Mattacheest.**—Ibid. **Mattachiest.**—Mount (1622) quoted by Drake, Bk. Inds., bk. 2, 16, 1848. **Mattachist.**—Dee in Smith (1629), Virginia, ii, 233,

repr. 1819. **Mattakeese**.—Hinckley (1685) in Mass. Hist. Soc. Coll., 4th s., v, 133, 1861. **Mattakeeset**.—Humphreys (1815), *ibid.*, 2d s., iv, 92, 1816. **Mattakesit**.—Rawson and Danforth (1698), *ibid.*, 1st s., x, 129-31, 1809.

Mattakeset. A former village situated about the site of Duxbury, Plymouth co., Mass. It was probably subject to the Wampanoag. In 1685 it had 40 inhabitants exceeding 12 years of age. (J. M.)

Namatakeset.—Hinckley (1685) in Mass. Hist. Soc. Coll., 4th s., v, 133, 1861.

Mattamuskeet. A village of the Machapunga, the only one belonging to the tribe in 1700-01, and containing then, according to Lawson, 30 warriors. Probably situated on the lake of the same name in Hyde co., N. C.

Marimiskeet.—Lawson (1714), Hist. Car., 383, repr. 1860. **Masamaskete**.—Col. Rec. N. C. (1713), II, 32, 1886. **Matamaskite**.—*Ibid.*, 29. **Matamuskeet**.—*Ibid.*, 31. **Mattamuskeets**.—*Ibid.*, 45. **Mattecumska**.—Col. Rec. N. C. (1713), II, 2, 1886. **Mattemusket**.—*Ibid.*, 168.

Mattanock. A village of the Powhatan confederacy, in 1608, on the w. side of Nansemond r., near its mouth, in Nansemond co., Va.—Smith (1629), Virginia, I, map, repr. 1819.

Mattapanient (probably of the same meaning as Mattapony, q. v.). An Algonquian tribe or band that formerly lived on Patuxent r., Md., probably in St Marys co. Their principal village, of the same name, may have been at Mattapony cr. A Catholic mission was established there in 1636. In 1651 they, with others, were removed to a tract on Wicomico r. They were possibly but a band or division of the Conoy (q. v.), and are to be distinguished from the Mattapony of Virginia, sometimes written Mattapanient. (J. M.)

Matapaman.—Map, ca. 1640 or 1650, in Maps to Accompany the Rept. of the Comr's on the Bnd'y bet. Va. and Md., 1873. **Matapanient**.—Bozman, Md., I, 141, 1837. **Mattapanient**.—Strachey (ca. 1612), Virginia, 39, 1849. **Mattapanians**.—Bozman, Md., II, 421, 1837. **Mattapanient**.—Smith (1629), Virginia, I, 118, repr. 1819. **Mattapani**.—Herrman, Map (1670), in Maps to Accompany the Rept. of the Comr's on the Bnd'y bet. Va. and Md., 1873. **Mattapanient**.—Smith (1629), Virginia, I, map, repr. 1819. **Metapawnien**.—White (1639), Relatio Itineris, 63, 1874.

Mattapoiset (a form of *Mattabesec*, q. v.). A village, in 1622, near the present Mattapoisset, Plymouth co., Mass.

Mattapoisset.—Deed of 1664 in Drake, Bk. Inds., bk., 3, 14, 1848. **Mattapoisset**.—Watts (1734) in Mass. Hist. Soc. Coll., 2d s., x, 31, 1823. **Mattapuist**.—Harris, Voy. and Trav., I, 856, 1705. **Mattapuyst**.—Mourt (1622) in Mass. Hist. Soc. Coll., 1st s., VIII, 258, 1802.

Mattapony. The proper form of this name, both in Virginia and Maryland, appears to be Mattapanient, although both that and Mattapament occur on Capt. John Smith's map and in his text, the latter being probably a misprint. Heckewelder's attempted interpretation of 'bad bread', or 'no bread at all', based on the theory that it contains the word *pona*, 'pone', 'bread', is evidently without value. The Mattapony is a small tribe

of the Powhatan confederacy (q. v.) living in 1608, according to Smith, on Mattapony r., Va., and having 30 men, or a total of perhaps a little more than 100. On Smith's map the town "Mattapanient" appears to be located in the upper part of the present James City co., near the mouth of Chickahominy r. In 1781, according to Jefferson (Notes on Va., 1825), they still numbered 15 or 20, largely of negro blood, on a small reservation on the river of their name. These figures, however, are probably too low, as the name is still preserved by about 45 persons of mixed blood on a small state reservation on the s. side of Mattapony r., in King William co. These survivors are closely related to the Pamunkey, whose reservation is only 10 m. distant. See *Mattapanient*. (J. M.)

Mattapanient.—Smith, Hist. Va. (1624), Arber ed., 347, 1884. **Mattapanient**.—*Ibid.*, map. **Mattapaments**.—Boudinot, Star in the West, 127, 1816. **Mattapontes**.—Macaulay, N. Y., II, 168, 1829. **Mattaponies**.—Jefferson (1781), Notes, 130, 1825.

Mattawamkeag ('a bar of gravel divides the river in two.'—Vetromile). A principal Penobscot village formerly on Penobscot r., about Mattawamkeag point, Penobscot co., Me.

Madawamke.—Gyles (1736) in Drake, Trag. Wild., 78, 1841. **Mattawamkeag**.—Godfrey in Me. Hist. Soc. Coll., VII, 4, 1876. **Mattawamkeag**.—Vetromile, Abnakis, 52-53, 1866. **Metta8akik**.—Maurault, Abenakis, v, 1866. **Montawanekeag**.—Conf. (1786) in Me. Hist. Soc. Coll., VII, 10, 1876.

Mattawan ('river of shallows.'—Hewitt). A popular name for the Algonquian Indians living on Mattawan r., a branch of upper Ottawa r., Ontario. They are probably a part of the Nipissing or of the Temiscaming, q. v. Cf. *Matawachkarini*. (J. M.)

Mataouiriou.—Jes. Rel. 1672, 46, 1858. **Mataovan**.—La Hontan (1703), New Voy., map, 1735. **Matawáng**.—Wm. Jones, infn., 1905 (correct form). **Matawin**.—McLean, Hudson Bay, I, 87, 1849.

Mattawottis. A former Diegueño rancharia under the mission of San Miguel de la Frontera, n. Lower California.—Taylor in Cal. Farmer, May 18, 1860.

Mattinacook. A band of the Penobscot who, in 1876, occupied Mattinacook id. in Penobscot r., near Lincoln, Penobscot co., Me.

Mattanawcook.—Me. Hist. Soc. Coll., VII, 103, note, 1876.

Mattituck (*Matuh'tugk*, 'place without wood', or 'badly wooded.'—Trumbull). A Corchaug village, about 1640, on the site of the present Mattituck, Suffolk co., Long Island, N. Y. (J. M.)

Mattatock.—Trumbull, Ind. Names Conn., 27, 1881 (early form). **Mattatuck**.—Records (1649) in Thompson, Long Id., I, 378, 1843. **Mattetuck**.—Thompson, *ibid.*, 392.

Mattole (Wishok name). An Athapascan tribe whose principal settlements were along Bear and Mattole rs., Cal. They resisted the white race more vigorously than the natives of this region generally did and suffered practical exter-

mination in return. They were gathered on a reservation near C. Mendocino for a time, and some of them were afterward taken to Hupa Valley res. A few still live in their old territory. They differ somewhat from their Athapaskan neighbors in language and culture; they burn the dead; the men tattoo a distinctive mark on the forehead, but in other respects they are similar to the Hupa. (P. E. G.)

Matole.—Bancroft, Nat. Races, III, 643, 1874. **Mat-tal.**—Powers in Cont. N. A. Ethnol., III, 107, 1877. **Mattole.**—Ind. Aff. Rep. 1864, 119, 1865. **Tul'bush.**—Powers, op. cit., 124 ('foreigners'; Wailaki name).

Mattowacca. A name of the hickory shad (*Clupea mediocris*), found from Newfoundland to Florida; probably from one of the southeastern dialects of the Algonquian stock. (A. F. C.)

Matyata (or *Mák'yana*, contracted from *Mák'yanawin*, 'country of the salt lake.'—Cushing). Described by Fray Marcos de Niza in 1539, under the name Marata, as a province s. e. of Cibola (Hakluyt, Voy., III, 440), although Coronado, in the following year, asserted that "the kingdom of Marata is not to be found, neither have the Indians any knowledge thereof." Bandelier and Cushing identify Marata with Matyata, or Makyata, "the name given by the Zuñi to a cluster of now ruined pueblos which they declare to have been occupied by a branch of their own people. After long dissensions and even warfare with the inhabitants of the Zuñi basin, those of Matyata were compelled to submit, and to join the former in their settlements. The group of ruins called Matyata or Makyata lies s. e. of Zuñi on the trail leading to Acoma; and the condition of the ruins (described by Alvarado in 1540) shows that their abandonment is more recent than that of other ancient pueblos in that region." According to Cushing descendants of the former inhabitants of Matyata are to-day residents of Zuñi. Consult Bandelier in Arch. Inst. Papers, III, 120, 1890; v, 174, 1890; and for Alvarado's description of these supposed ruins see Winship in 14th Rep. B. A. E., 1896. See *Kyamakyakwe*, *Kyatsutuma*, *Pikyaaivan*. **Ar-che-o-tek-o-pa.**—Fewkes in Jour. Am. Eth. and Arch., I, 100, 1891. **Ma'-k'ya-na.**—Cushing, inf'n, 1891 (or *Ma'-k'ya-na-win*: 'country of the salt lake'). **Ma-kyata.**—Cushing quoted by Bandelier in Arch. Inst. Papers, III, 120, 1890 (*Ma-tya-ta*, or). **Marata.**—Marcos de Niza (1539) in Hakluyt, Voy., III, 440, 1600. **Marta.**—Nota-Padilla, Hist. de la Conquista, 169, 1742 (*Marata*, or). **Ma-tya-ta.**—Cushing quoted by Bandelier, op. cit. (or *Makya-ta*). **Ma-tyáta.**—Bandelier in Revue d'Ethnographie, 206, 1886.

Maugna. A former Gabrieleño rancheria in Los Angeles co., Cal., at a locality later called Rancho Felis.—Ried (1852) quoted by Taylor in Cal. Farmer, June 8, 1860.

Maukekose (probably for *Ma'kons*, 'bear cub,' or 'little bear.'—W. J.). A former Potawatomi village, commonly known as Mau-ke-kose's village, from the name of

its chief, near the head of Wolf cr., in Marshall co., Ind., on a reservation sold under the provisions of the treaty of Dec. 10, 1834. The name is also written Muckkose and Muck-Rose. (J. M.)

Mauls. See *Hammers*.

Maumee Towns. A common name for a group of villages formerly at the head of Maumee r., near Ft Wayne, Allen co., Ind. When destroyed by the whites in 1790 there were 7 villages, all within a few miles of each other, on the Maumee or its branches. Two of these were Miami, three Delaware, and two Shawnee. Omeé was the principal one, and together they contained about 225 houses. See *Kekionga*.

Maumee towns.—So called from their situation on Maumee r. **Omeé towns.**—Harmar (1790) in Rupp, West. Pa., app., 225, 1846 (commonly so called; Omeé is the French *Au Mi*, contracted from *Au Miami*; Omeé is given by Harmar as the name of the principal village, on the site of Kekionga, while he puts "Kegalogue" on the opposite bank of St Joseph r.).

Maushantuxet ('at or in the little place of much wood,' or 'smaller wooded tract of land,' in contradistinction to Mashantucket, or Mashantackuck, the name of a tract on the w. side of Thames r., in Montville.—Trumbull). A Pequot settlement in 1762, at the site of the present Ledyard, New London co., Conn.

Mashantucket.—Early records quoted by Trumbull, Ind. Names Conn., 26, 1881 (an occasional form). **Maushantuxet.**—Stiles (1761) in Mass. Hist. Soc. Coll., 1st s., x, 102, 1809. **Mushantucksett.**—Stiles quoted by Trumbull, op. cit.

Maushapogue (probably 'great pond,' from *massa*, 'great,' *pog* or *peag*, 'pond'; or *massa-pe-utk*, 'great-water land'; cf. *Mashpee* and *Massapequa*). A village, probably belonging to the Narraganset, in Providence co., R. I., in 1637.

Mashapauge.—Williams (1661) in R. I. Col. Rec., I, 18, 1856. **Mashapawog.**—Doc. of 1640, *ibid.*, 28. **Maushapogue.**—Deed of 1637, *ibid.*, 18.

Mauthæpi ('dirty river.'—Hewitt). A Montagnais tribe in 1863 on the reservation at Manicouagan, on St Lawrence r., Quebec.—Hind, Lab. Penin., II, 124, 1863.

Mawakhota ('skin smeared with whitish earth'). A band of the Two-kettle Sioux.

Ma-wahota.—Dorsey in 15th Rep. B. A. E., 220, 1897. **Ma-waqota.**—*Ibid.*

Mawsootoh (*Maw-soo-toh'*, 'bringing along'). A subclan of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Mayaca. A Timuquanan district and village, about 1565, on the e. coast of N. Florida. De Bry locates it e. of upper St Johns r.; Bartram, e. of L. George.

Macoia.—Fairbanks, Hist. Fla., 139, 1871. **Macoia.**—Barcia, Ensayo, 129, 1723. **Maquarqua.**—Shipp, De Soto and Fla., 517, 1881. **Masarquam.**—Barcia, Ensayo, 51, 1723. **Mayaca.**—Fontaneda (1576), Memoir, Smith trans., 21, 1854. **Mayaco.**—Bartram, Voy., I, map, 1799. **Mayarca.**—De Bry, Brev. Nar., II, map, 1591. **Mayarqua.**—Laudonnière (1564), L'Hist. Notable, 108, 1853.

Mayajuaca. A former Timuquanan village on the e. coast of Florida, n. of the Ais country.

Mayaguaci.—Fontaneda (1575) in Doc. Inéd., v, 544, 1866. **Mayajuaca.**—Fontaneda in Ternaux-Compans, Voy., xx, 26, 1841. **Nayajuaca.**—Ibid., 35.

Mayara. A Timucuan chief, said to have been "rich in gold and silver," and also the name of his town on lower St Johns r., Fla., in the 16th century.

Maiera.—De Bry, Brev. Nar., II, map, 1591. **Mayara.**—Laudonnière (1564) in French, Hist. Coll. La., 242, 1869. **Mayrra.**—Laudonnière, Hist. Notable, 88, 1853.

Maycock. A sort of squash or pumpkin. According to Schele de Vere (Americanisms, 60, 1871) it is still found in Virginia. Trumbull (Sci. Pap. Asa Gray, I, 336, 1889) cites as early forms *macocks* (Smith, 1606-08), *macock* gourd (Strachey, 1610), *macokos* (Strachey), and *macocquer* (L'Ecluse, 1591-1605). Beverley (Hist. Va., 124, 1705) identifies the *maycock* with the squash of New England. Smith (Arber ed., 359, 1884) describes *macocks* as "a fruit like unto a muske mellow, butt lesse and worse." The word is derived from a form of *mahawk*, 'gourd', in the Virginian dialect of Algonquian, cognate with the Delaware *machgachk*, 'pumpkin.' See *Macocks*. (A. F. C.)

Mayes, Joel Bryan. A prominent mixed-blood of the Cherokee tribe and twice principal chief of the nation. He was born Oct. 2, 1833, in the old Cherokee Nation, near the present Cartersville, Ga. His father, Samuel Mayes, was a white man from Tennessee, while his mother, Nancy Adair, was of mixed blood, the daughter of Walter Adair, a leading tribal officer, and granddaughter of John, one of the Adair brothers, traders among the Cherokee before the Revolution. The boy removed with the rest of his tribe in 1838 to Indian Ter., where he afterward was graduated from the male seminary at Tahlequah, and after a short experience at teaching school, engaged in stockraising until the outbreak of the Civil war in 1861, when he enlisted as a private in the First Confederate Indian Brigade, coming out at the close of the war as quartermaster. He returned to his home on Grand r. and resumed his former occupation, but was soon after made successively clerk of the district court, circuit judge (for two terms of 10 years in all), associate justice, and chief justice of the Cherokee supreme court. In 1887 he was elected principal chief of the Cherokee Nation, succeeding D. W. Bushyhead, and was reelected in 1891, but died in office at Tahlequah, Dec. 14 of that year, being succeeded by Col. C. J. Harris. Chief Mayes was of fine physique, kindly disposition, and engaging personality. He was three times married, his last wife having been Miss Mary Vann, of a family distinguished in Cherokee history. (J. M.)

Mayeye. A former Tonkawan tribe which, in the first half of the 18th century, lived near San Xavier r., Tex., apparently either modern San Gabriel or Little r. Joutel in 1687 (Margry, Déc., III, 288, 1878) heard of the Meghey n. of Colorado r., somewhere near where the Spaniards later actually found the Mayeye. Rivera (Diario, leg. 2062, 1736) in 1727 met them at springs called Puentezitas, 15 leagues w. of the junction of the two arms of the Brazos and 35 leagues from the Colorado. In 1738 they were mentioned with the Deadoses (q. v.) of the same locality (Orobio y Basterra, letter of Apr. 26, Archivo General, MS.). About 1744 Fray Mariano Francisco de los Dolores visited a rancheria of Mayeyes, Yojuanes, Deadoses, Bidais, and others near San Xavier r. (Arricivita, Chronica, pt. 2, 322, 1792). In 1740 it had been planned to take this and the Sana (Zana) tribes to San Antonio (Descripción, 1740, Mem. Nueva España, xxviii, 203, MS.), where a few of the Sanas and Ervipiames had already been gathered. As a result of the efforts of Father Dolores, 4 chiefs of the "Yojuanes, Deadoses, Mai-eyes, and Rancheria Grande" went to San Antonio to ask for a mission (Despatch of the Viceroy, Mar. 26, 1751, Lamar Papers, MS.), and about 1747 the San Xavier group of missions was founded for them. When the site was abandoned, "notwithstanding the tenacity with which the Mayeyes especially had always clung to the district of San Xavier," some of them were moved to the Guadalupe, where an abortive attempt was made to reestablish them (Arricivita, op. cit., 337). Some of the Mayeye who had been baptized at San Xavier entered San Antonio de Valero mission at San Antonio, and were living there as late as 1769 (MS. Burial records). The Mayeye and their relations were bitter enemies of the Apache, and in the middle of the 18th century, when the Comanche forced the Apache southward, the Mayeye and other Tonkawans were apparently pushed to the s. e., where they mingled with the Karankawan tribes. In 1772 Mezières (Informe, July 4, 1772, MS.) said the Mayeye wandered with the Tonkawa and Yojuane between the Trinity and the Brazos; and in the same year Bonilla, quoting Mezières, associated them with the same tribes, all of whom, though in alliance with the Wichita and their congeners, were despised by the latter as vagabonds. Such has been the usual attitude of other tribes toward the Tonkawa ever since. While Bucareli existed on the Trinity, from 1774 to 1779, the Mayeye visited it. In 1778 Mezières (Carta, Mar. 18, MS.) reported 20 families of Coco and Mayeye apostates opposite Culebra id., in the

Karankawa country. In 1779 the Spanish government feared an alliance of Mayeye, Coco, Karankawa, and Arkokisa (Croix to Cabello, Dec. 4, MS.). The Mayeye were included in the census of 1790, and were in the jurisdiction of Nacogdoches. Sibley, in 1805, says the "Mayes" were then living on San Gabriel cr., near the mouth of the Guadalupe, on St. Bernard bay, Tex., and numbered about 200 men; they were hostile to the Spaniards, but professed friendship for the French; they were surrounded by tribes speaking languages different from their own and were adept in the sign language. The last trace of the tribe was found by Gatschet in 1884 (Karankawa Inds., 36, 1891), when he met an old Indian who had known this people in his early days on the Texas coast, and who stated that they spoke a dialect of the Tonkawa.

(A. C. F. H. E. B.)

Maheyas.—Mezières (1772) quoted by Bonilla in Tex. Hist. Ass'n Quar., VIII, 66, 1905. **Maghai.**—Joutel (1687) in French, Hist. Coll. La., I, 137, 1846. **Maheyas.**—Mezières (1772), op. cit. **Maieces.**—Orbio y Basterra (1738), op. cit. **Maieyes.**—Span. Doc., Mar. 6, 1768, in Bexar archives. **Malleyes.**—Rivera, Diario, leg. 2602, 1736. **Mayeces.**—Barrios, Informe, MS., 1771. **Mayees.**—Brackenridge, Views La., 87, 1814. **Mayes.**—Sibley, Hist. Sketches, 72, 1806. **Mayeyes.**—Census of 1790 quoted by Gatschet, Karankawa Inds., 35, 1891. **Meghay.**—Joutel cited by Shea, note in Charlevoix, New France, IV, 78, 1870. **Meghey.**—Joutel (1687) in Margry, Déc., III, 288, 1878. **Meghty.**—Joutel (1687) in French, Hist. Coll. La., I, 152, 1846. **Meihites.**—Barcia, Ensayo, 271, 1723. **Meye.**—Gatschet, op. cit., 36, 1891 (Tonkawa name). **Miyi.**—Ibid. **Muleyes.**—Morfi, Mem. Hist. Tex., ca. 1782.

Mayi. An important Pomo village on upper Clear lake, Cal.—A. L. Kroeber, Univ. Cal. MS., 1903.

Mayndeshkish ('Coyote pass'). An Apache clan or band at San Carlos agency and Ft Apache, Ariz., in 1881 (Bourke in Jour. Am. Folk-lore, III, 112, 1890). The corresponding clan of the Navaho is *Mai-teshkizh*.

Mayne Island. The local name for a body of Sanetch on the s. e. coast of Vancouver id.; pop. 28 in 1904.—Can. Ind. Aff. for 1902 and 1904.

Mayo ('terminus', because the Mayo r. was the dividing line between them and their enemies.—Ribas). One of the principal tribes of the Cahita group of the Piman stock, residing on the Rio

Mayo, Sinaloa, Mexico. Their language differs only dialectically from that of the Yaqui and the Tehueco. The first notice of the tribe is probably that in the "Se-

MAYO MEN. (AM. MUS. NAT. HIST.)

gunda Relacion Anonima" of the journey of Nuño de Guzman, about 1530 (in Icazbalceta, Coleccion de Documentos, II, 300, 1866), where it is stated that

after passing over the Rio de Tamachola (Fuerte) and traveling 30 leagues (northward) they came to a river called Mayo on which lived a people of the same name. Ribas (p. 237) declares that in his day it was the most populous of all the tribes of Sinaloa, estimating their number at 30,000, some 8,000 or 10,000 of whom were warriors. He did not consider them so

MAYO GIRLS. (AM. MUS. NAT. HIST.)

warlike as the surrounding tribes, but in their customs, dwellings, and other respects the Mayo resembled them. Hardy (Travels in Mexico, 424, 1829) states that at the time of his visit there were 10 towns on the Rio Mayo, with an estimated population of 10,000. According to Davila (Sonora, 315, 1894) their industries were reduced to the cultivation of the soil, the raising of sheep and domestic birds, and the manufacture of woolen shawls. He says the Mayo pueblos are larger than those of the Yaqui, but the number of people of the latter is now greater than that of the former. The

Mayo settlements, so far as known, are Baca, Batacosa, Camoa, Conicari, Cuirimpo, Echojoa, Huatabampo, Macoyahui, Masiaca, Navahoa, San Pedro, Santa Cruz de Mayo, Tepahue, Tesia, and Toro. See *Cahita*. (F. W. H.)

Mago.—ten Kate in Bull. Soc. d'Anthrop. de Paris, 375, 1883 (misprint). **Maya**.—Ribas, Hist. Triumphos, 237, 1645. **Mayo**.—Rel. Anonima (1530), op. cit.

Maypop. The fruit of the passion-flower (*Passiflora incarnata*). Capt. John Smith (Va., 123, repr. 1819) and Strachey (Trav. Va., 72) speak of this fruit as *maracock* and state that the Indians cultivated it before the coming of the whites. Trumbull (Sci. Pap. Asa Gray, 342, 1889) considers that *maracock* is the Brazilian Tupi *mburucua*, related to the Carib *merécuya* (Breton, 1665), the fruit of a vine, the name and the thing having both come from South America. *Maypop* would thus ultimately represent, through *maracock*, this Tupi loan-word. (A. F. C.)

Maysonce. A village of the Powhatan confederacy, in 1608, on the n. bank of the Chickahominy, in New Kent co., Va.—Smith (1629), Va., i, map, repr. 1819.

Mazakutemani ('shoots the gun [iron] as he walks'). A chief of the Sisseton Sioux, noted for his friendship for the whites; born in 1826 or 1827. In his early manhood he followed strictly the customs of his tribe; in 1850 he was a member of the Sisseton and Wahpeton delegation to Washington, and a signer of the Traverse des Sioux treaty of July 23, 1851. When about 29 years of age (about 1855) he became a convert to Christianity and thenceforward was an ardent supporter of the missionary work of Rev. Stephen R. Riggs. It was in the spring of 1857, when the massacre at Spirit Lake, Iowa, by Inkpaduta's band occurred, that Mazakutemani particularly manifested his friendship for the whites by following the murderous band and rescuing Miss Gardener, the only surviving white captive. Again, in 1862, on receiving word of the Sioux outbreak, he employed every effort to stay the massacre and to rescue the white captives, going boldly into the hostile camps and using his oratorical powers to accomplish his purpose. The final escape of the captives from death on this occasion was due largely to Mazakutemani's efforts and his cooperation with Gen. Sibley. He was the chief speaker for the Sisseton in their tribal deliberations as well as in their treaty negotiations with the United States commissioners. In addition to the treaty of Traverse des Sioux he signed the treaties of Washington, June 19, 1858; Sisseton agency, Dak., Sept. 20, 1872, and Lac Traverse agency, Dak., May 2, 1873. His death occurred probably before 1880. Consult S. R. Riggs (1) in Minn. Hist.

Soc. Coll., iii, 82, 90, 1880; (2) Mary and I, 141, 1880; Heard, Hist. Sioux War, 156, 1863. (c. t.)

Mazapes. A former tribe of N. E. Mexico or s. Texas, probably Coahuiltecan, drawn from Nuevo Leon and gathered into the mission of San Antonio Galindo Moctezuma, in Coahuila. Cf. *Mahuames*. **Mazames**.—Archivo General, xxxi, fol. 208, quoted by Orozco y Berra, Geog., 306, 1864 (probably identical). **Mazapes**.—Orozco y Berra, *ibid.*, 302.

Mazapeta ('iron fire'). A chief of a village of 627 Yankton and Sisseton Sioux on Big Stone lake, Minn., in 1836. He was probably chief of the Yankton in the village, while The Grail was chief of the Sisseton.

Mahzahpatah.—Schoolcraft, Ind. Tribes, iii, 612, 1853.

Mazpegnaka ('piece of metal in the hair'). A band of the Sans Arcs Sioux.—Dorsey in 15th Rep. B. A. E., 219, 1897.

Mdeiyedan (French: '*Lac qui parle*', 'Speaking lake'). A band of the Wahpeton Sioux whose habitat was around Lac qui Parle, Minn. In 1836 (Schoolcraft, Ind. Tribes, iii, 612, 1853) the band numbered 530 under Little Chief.

Lac qui Parle band.—Ind. Aff. Rep. 1859, 102, 1860. **Lacqui-parle Indians**.—Sibley (1852) in Sen. Ex. Doc. 29, pt. 2, 32d Cong., 2d sess., 9, 1853. **Upper Wahpaton**.—Sibley (1873) in Minn. Hist. Soc. Coll., iii, 250, 1880.

Mdewakanton ('mystery lake village,' from *mde* 'lake', *wakan* 'sacred mystery', *otonwe* 'village'). One of the subtribes composing the Santee division of the Dakota, the other 3 being the Sisseton, Wahpeton, and Wahpekute. A. L. Riggs contends that the Mdewakanton are the only Dakota entitled to the name Isanyati ('Santee'), given them from their old home on Mille Lac, Minn., called by them Isantamde, 'knife lake.' In every respect this tribe appears to be most intimately related to the Wahpeton. Wahpekute, and Sisseton. It is possible that the Mdewakanton formed the original stem from which the other 3 subtribes were developed. It is probable that the Nadowessiois mentioned by early missionaries and explorers were in most cases the people of this tribe and the tribes associated with them then living in the region of Mille Lac and the headwaters of the Mississippi. Dr. Williamson, who spent years among these Indians, fixes the home of this tribe (who by tradition had once lived on Lake of the Woods and n. of the great lakes and had migrated toward the w.) at Mille Lac, the source of Rum r., which is apparently the ancient location of the Issati of Hennepin. This identifies the Issati with the Mdewakanton and sustains the conclusion of Riggs. After the Mdewakanton came to the Mississippi they appear to have scattered themselves along that river in

several villages extending from Sauk Rapids to the mouth of Wisconsin r. and up the Minnesota 35 m. According to Neill (Minn. Hist. Coll., I, 262, 1872) this splitting into bands was due to the influence of French traders. This author asserts that the people of this division were still residing at Mille Lac at the time Le Sueur built his post near the mouth of Blue Earth r. in 1700, and that their change of location to the region of lower Minnesota r. was due to the establishment of trading posts in that section. This would indicate a later removal to that locality than Williamson supposed. Rev. G. H. Pond, as quoted by Neill, says: "When to this we add the fact that traders taught them to plant corn, which actually took the place of wild rice, nothing was wanting to bring the Mdewakantons south to the Minnesota r. Accordingly tradition tells us that this division of the Dakotas no sooner became acquainted with traders, and the advantage of the trade, than they erected their teepees around the log hut of the white man and hunted in the direction of the Minnesota r., returning in the 'rice-gathering moon' (September) to the rice swamps nearest their friends." In Le Sueur's list of the eastern Dakota tribes the name Issati is dropped and that of Mdewakanton, under the form Mendeouacantons, is used, evidently for the first time. The whites came into more intimate relation with this tribe than with any other of the Dakota group, but the history—which is not of general interest except in so far as it relates to the outbreak of 1862, in which some of them took an active part—is chiefly that of the different bands and not of the tribe as a whole. After their defeat by the United States, they and the Winnebago were removed to Crow Creek res., Dakota Ter. Subsequently the Mdewakanton and Wahpekute were transferred to the Santee res. in Nebraska. Ultimately lands were assigned them in severalty, the reservation was abolished, and the Indians became citizens of the United States. In general customs and beliefs they resemble the other divisions of the eastern Sioux. (See *Dakota*.)

The tribe joined in the following treaties with the United States: Prairie du Chien, Wis., July 15, 1830, by which they and other eastern Sioux tribes ceded a strip 20 m. wide from the Mississippi to Des Moines r., Ia. Convention at St. Peters, Minn., Nov. 30, 1836, with the upper Mdewakanton, agreeing on certain stipulations regarding the treaty of July 15, 1830. Treaty of Washington, Sept. 29, 1837, by which they ceded to the United States all their interest in lands E. of the Mississippi. Treaty of Mendota, Minn., Aug. 5, 1851, by which they ceded all

their lands in Iowa and Minnesota, retaining as a reservation a tract 10 m. wide on each side of Minnesota r. Treaty of Washington, June 19, 1858, by which they sold that part of their reservation N. of Minnesota r., retaining the portion S. of the river, which they agreed to take in severalty. By act of Mar. 3, 1863, the President was authorized to set apart for them a reserve beyond the limits of any state and remove them thereto, their reserve in Minnesota to be sold for their benefit. The new reserve was established by Executive order, July 1, 1863, on Crow cr., S. Dak. See *Reservations*.

Lewis and Clark (1804) estimated them at 300 fighting men or 1,200 souls; Long in 1822 (Exped. St. Peter's R., 380, 1824) estimated the various bands as follows:

MDEWAKANTON

Keoxa (Kiyuksa), 400; Eanbosandata (Khemnichan), 100; Kapozha, 300; Oanoska (Ohanhanska), 200; Tetankatane (Tintaotonwe), 150; Taoapa, 300; Weakaote (Khemnichan), 50. According to the Census of 1890 there were 869 Mdewakanton and Wahpekute on Santee reservation, Nebr., and 292 at Flandreau, S. Dak. The report for 1905 mentions as not under an agent 150 at Birch Cooley and 779 elsewhere in Minnesota. The recognized divisions are as follows: (1) Kiyuksa, (2) Ohanhanska, (3) Tacanhpisapa, (4) Anoginajin, (5) Tintaotonwe, and (6) Oyateshicha, belonging to the Wakpaatonwedan division, which seems to have constituted the whole tribe in early times, and (7) Khemnichan, (8) Kapozha, (9) Magayuteshni, (10) Mahpiyamaza, (11) Mahpiyawich-

asta, (12) Khēyataatonwe, and (13) Taoapa, constituting the Matantonwan division, which early French writers spoke of as a powerful tribe associated with but not a part of the Mdewakanton. The following subdivisions have not been identified: Town band Indians, Mankato, Nasiampaa, and Upper Medawakanton.

Meamskinisht ('porcupine-foot grove'). A Tsimshian mission village founded in 1889 and settled by the Kitksan. In 1897 the population was about 50—Dorsey in Am. Antiq., xix, 280, 1897.

Measurements. Among civilized people, previous to the introduction of the metric system, linear measurements were derived mostly, if not exclusively, from the human body, and although in later centuries these measurements became standardized, it is not long since they were all determined directly from the human frame. It is still common, even for white men, in the absence of a graduated rule, to compute the inch by the transverse dimension of the terminal joint of the thumb, and for women to estimate a yard by stretching cloth from the nose to the tips of the fingers—the arm being extended and thrown strongly backward—or to estimate an eighth of a yard by the length of the middle finger. The use of the span as a standard of lineal measure is also still quite common. Within the last 30 years it has been a custom for traders to sell cloth to Indians by the natural yard or by the brace, and although this measure on a trader of small stature might be much less than 3 feet, the Indians preferred it to the yardstick. Below is given a list of what may be called natural measures which are known to have been employed by Indians. Some of the larger measures have been in general use among many tribes, while some of the smaller ones have been used by the Navaho and Pueblo shamans in making sacrificial and other sacred objects and in executing their dry-paintings. Some are also employed by Pueblo women in making and decorating their pottery.

Linear measures.—1. One finger width: the greatest width of the terminal joint of the little finger in the palmar aspect. 2. Two finger widths: the greatest width of the terminal joints of the first and second fingers held closely together, taken in the palmar aspect. 3. Three finger widths: the greatest width of the terminal

joints of the first, second, and third fingers, taken as above. 4. Four finger widths: the width of the terminal joints of all four fingers of one hand, taken under the same conditions. 5. The joint: the length of a single digital phalanx, usually the middle phalanx of the little finger. 6. The palm: the width of the open palm, including the adducted thumb. 7. The finger stretch: from the tip of the first to the tip of the fourth finger, both fingers being extended. 8. The span: the same as our span, i. e., from the tip of the thumb to the tip of the index finger, both stretched as far apart as possible. 9. The great span: from the tip of the thumb to the tip of the little finger, all the digits being extended, while the thumb and little finger are strongly adducted. 10. The cubit: from the point of the elbow to the tip of the extended middle finger, the arm being bent. 11. The short cubit: from the point of the elbow to the tip of the extended little finger. 12. The natural yard: from the middle of the chest to the end of the middle finger, the arm being outstretched laterally at right angles with the body; this on a tall Indian equals 3 feet or more; among some tribes the measure is taken from the mouth to the tip of the middle finger. 13. The natural fathom, or brace: measured laterally on the outstretched arms, across the chest, from the tip of one middle finger to the tip of the other; this is twice the natural yard, or about 6 feet. The stature of white men usually equals or exceeds this measure, while among Indians the contrary is the rule—the arm of the Indian being usually proportionally longer than the arm of the white. This standard was commonly adopted by Indian traders of the N. in former days. They called it “brace,” a word taken from the old French. There seems to be no evidence that the foot was ever employed by the Indians as a standard of linear measure, as it was among the European races; but the pace was employed in determining distances on the surface of the earth.

Circular measures.—1. The grasp: an approximate circle formed by the thumb and index finger of one hand. 2. The finger circle: the fingers of both hands held so as to inclose a nearly circular space, the tips of the index fingers and the tips of the thumbs just touching. 3. The contracted finger circle: like the finger circle but diminished by making the first and second joints of one index finger overlap those of the other. 4. The arm circle: the arms held in front as if embracing the trunk of a tree, the tips of the middle fingers just meeting.

Scales and weights were not known on the western continent previous to the dis-

covery. There is no record of standards of dry or liquid measure, but it is probable that vessels of uniform size may have been used as such. See *Exchange*, and the references thereunder. (W. M.)

Mecadacut. An Indian village on the coast of Maine, between Penobscot and Kennebec rs., in Abnaki territory, in 1616.

Macadacut.—Smith (1629), Virginia, II, 183, repr. 1819. **Mecadacut.**—Smith (1616) in Mass. Hist. Soc. Coll., 3d s., III, 22, 1833. **Mecaddacut.**—Smith (1629), Virginia, II, 192, repr. 1819.

Mecastria. Mentioned by Oñate (Doc. Inéd., xvi, 114, 1871) as a pueblo of the Jemez in New Mexico in 1598. It can not be identified with the present native name of any of the ruined settlements in the vicinity of Jemez. In another list by Oñate (*ibid.*, 102), Quiamera and Fía are mentioned. A comparison of the lists shows the names to be greatly confused, the *mera* (of Quiamera) and *fía* making a contorted form of “Mecastria.”

Mechemeton. A division of the Sisseton Sioux, perhaps the Míakechakesa.

Machemeton.—Carte des Poss. Angl., 1777. **Meechemeton.**—De l'Isle, map (1703) in Neill, Hist. Minn., 164, 1858. **Meechemiton.**—Anville, map of N. Am., 1752.

Mechgachkamic. A former village, perhaps belonging to the Unami Delawares, probably near Hackensack, N. J.

Mechgachkamic.—Doc. of 1649 in N. Y. Doc. Col. Hist., XIII, 25, 1881. **Mochgeyckkonk.**—Doc. of 1655, *ibid.*, 48 (identical?).

Mechkentowoon. A tribe of the Mahican confederacy formerly living, according to Rutenber, on the w. bank of Hudson r. above Catskill cr., N. Y. De Laet and early maps place them lower down the stream. (J. M.)

Machkentiwomi.—De Laet, Nov. Orb., 72, 1633. **Mechkentiwom.**—Map ca. 1614 in N. Y. Doc. Col. Hist., I, 1856. **Mechkentowoon.**—Wassenaer (*ca.* 1630) in Rutenber, Tribes Hudson R., 71, 1872. **Wechkentowoons.**—Rutenber, *ibid.*, 86 (misprint).

Mecopen. An Algonquian village, in 1585, s. of Albemarle sd., near the mouth of Roanoke r., N. C.

Mecopen.—Smith (1629), Virginia, I, map, repr. 1819. **Moquopen.**—Dutch map (1621) in N. Y. Doc. Col. Hist., I, 1856.

Medals. From time immemorial loyalty has been rewarded by the conferring of land and titles of nobility, by the personal thanks of the sovereign, the presentation of medals, and the bestowal of knightly orders the insignia of which were hung on the breast of the recipient. With the Indian chief it was the same. At first he was supplied with copies of his own weapons, and then with the white man's implements of war when he had become accustomed to their use. Brass tomahawks especially were presented to the Indians. Tecumseh carried such a tomahawk in his belt when he was killed at the battle of the Thames, in Canada, and his chief warrior, John Naudee,

removed it and the silver belt buckle from the body. There were also presented to the Indian chiefs silver hat-bands, chased and engraved with the royal arms; silver gorgets to be worn suspended from the neck and having the royal arms and emblems of peace engraved upon them; and silver belt buckles, many of which exceeded 3 in. in diameter. The potency of the medal was soon appreciated as a means of retaining the Indian's allegiance, in which it played a most important part. While gratifying the vanity of the recipient, it appealed to him as an emblem of fealty or of chieftainship, and in time had a place in the legends of the tribe.

The earlier medals issued for presentation to the Indians of North America have become extremely rare from various causes, chief among which was the change of government under which the Indian may have been living, as each government was extremely zealous in searching out all medals conferred by a previous one and substituting medals of its own. Another cause has been that within recent years Indians took their medals to the nearest silversmith to have them converted into gorgets and amulets. After the Revolution the United States replaced the English medals with its own, which led to the establishment of a regular series of Indian peace medals. Many of the medals presented to the North American Indians were not dated, and in many instances were struck for other purposes.

SPANISH MEDALS.—Early Spanish missionaries also presented medals to the Indians; these are often found in graves

other service, by the early Catholic missionaries" (Betts, p. 32). One of these medals is as follows:

1682. Obverse, the Virgin Mary, standing on a crescent and clouds, surrounded by a rayed glory, in field 1682; legend, *Nuestra Señora de Guadalupe Ora Pro Nobis, Mexico*. Reverse, bust of San Francisco de Assisi in dress of a monk, a halo above; legend, *Francisco Ora Pro Nobis*. Brass and silver; size, $1\frac{1}{4}$ by $1\frac{1}{4}$ in.

In 1864 there was found at Prairie du Chien, Wis., in an Indian grave, a silver medal, now in possession of the Wisconsin Historical Society, "supposed to have been given to Huisconsin, a Sauk and Fox chief" (Betts, p. 239). This was one of the regular "service medals" awarded by Spain to members of her army.

Obverse, bust of king to left; legend, *Carolus III Rey de España e de las Indias*. Reverse, within a cactus wreath, *Por Merito*. Silver; size, $2\frac{1}{2}$ in., with loop.

FRENCH CANADIAN MEDALS.—The earliest record of peace medals in connection with the Canadian Indians is found in Canada Correspondence General, vol. iv, in which mention is made of "a Cahnawaga chief, November 27, 1670, who holds preciously a medal presented to him by the king." Leroux (p. 14) includes a medal caused to be struck by Cardinal Richelieu in 1631 for presentation to Canadian Indians. A large medal was issued in France in commemoration of the reigning family; this example proved so acceptable to the Indians that a series of six, varying slightly in design and in size from $1\frac{5}{16}$ to $3\frac{1}{16}$ in., was issued for presentation to them. Very few of the originals are now known to exist, but many restrikes have been made from the dies in the Musée Monétaire at Paris.

1693. Obverse, head of the king to right, laureated; legend, *Ludovicus Magnus Rex Christianissimus*. Reverse, four busts in field; legend, *Felicitas Domus Augustæ*. Seren Dolph, Lud. D. Burg. Phid. D. Card. D. Bitur. M.D.C.C.XIII.

After the death of the Dolphin, in 1712, the reverse type was changed, two figures replacing the four busts of Louis, the Dauphin, and his two sons. Of this medal only restrikes are now known.

171-. Obverse, bust of king to right; legend, *Ludovicus XIII, D. G. FR. NAV. REX*. Reverse, two Roman warriors; legend, *HONOR ET VIRTUS*. Silver; bronze, size, $2\frac{1}{4}$ in.

In the succeeding reign a smaller medal of similar design was issued, bearing on the obverse the head of the king to the right, draped and laureated; legend, *Louis XV Rex Christianissimus*. A copy of the legend erased and *George III* stamped in its place (McLachlan, p. 9). Silver; bronze; size, 2 in.

The General De Levi medal of 1658, and that of the first Intendant-General of Canada, Jean Varin, of 1683, though included by Leroux (p. 15) among the

CATHOLIC MEDAL FROM A MOUND IN ALEXANDER CO., ILL.

in those portions of the United States once occupied by the Spanish. Several of these medals were found at the old Cayuga mission in New York, established in 1657 for the Huron refugees among the Iroquois and discontinued 30 years later. "The medals are of a religious character, and are supposed to have been given, in recognition of religious zeal or

peace medals, are excluded by Betts and other writers. Leroux (p. 17) figures the French Oswego medal of 1758 as belonging to the peace medal series. "As medals were freely distributed about this time, some of them may have been placed in Indian hands" (Beauchamp, p. 64).

1758. Obverse, head of king to left, nude and hair flowing; legend, *Ludovicus XV Orbis Imperator*; in exergue, 1758. Reverse, in field four forts; legend, *Wesel, Oswego, Port Mahon*; in exergue, *Expung. Sti. Davidis Arce et Solo Equata*. Silver; brass; size, 1½ in.

BRITISH MEDALS.—The earliest medals presented to American Indians by the English colonists are those known as the Pamunkey series. By Act 38, Laws of Virginia, in the 14th year of King Charles II, March, 1661 (see Hening's Statutes, II, 185), there were caused to be made, possibly in the colony, "silver and plated plaques to be worn by the Indians when visiting the English settlements." They were plain on the reverse, in order to permit the engraving of the names of the chiefs of the Indian towns.

1670. Obverse, bust of king to right; legend in outer circle, *Charles II, King of England, Scotland, France, Ireland and Virginia*; the center of the shield a slightly convex disk bearing the legend, the royal arms, and in one corner a tobacco plant. Encircled by ribbon of the Garter, below the disk in an oval surface, is the inscription: *The Queen of Pamaunkee*; above the disk a crown. Reverse, plain, with 5 rings attached for suspension. Silver; copper; oval; size, 4 by 6 in.

1670. Obverse, same as last; legend, *Ye King of —*. Reverse, a tobacco plant; legend, *Pimock*. Silver; copper; oval; size, 4 by 6 in.

In a proposal made by Robert Hunter, captain-general, etc., to the chief of the Five Nations, at Albany, Aug. 16, 1710, during the reign of Queen Anne, it is recorded: "Your brothers who have been in England and have seen the great Queen and her court, have no doubt informed you how vain and groundless the French boasting has been all along. Her Majesty has sent you as pledges of her protection a medal for each nation, with her royal effigies on one side and the last gained battle on the other. She has sent you her picture, in silver, twenty to each nation, to be given to the chief warriors, to be worn about their necks, as a token that they should always be in readiness to fight under her banner against the common enemy." This was probably the silver medal struck in 1709 in commemoration of the battle and capture of Tournay by the British.

1710. Obverse, bust of Queen Anne to left, hair bound in pearls, lovelock on the right shoulder; in gown, and mantle on the right shoulder, legend, *ANNA D. G. MAG. BRI. ET HIB. REG.*; below, *J. C. [John Crocker]*. Reverse, Pallas seated, to right, resting her left hand upon a Gorgian shield and holding in her right hand a spear, murally crowned, near her a pile of

arms and flags, a town in the distance; legend, *Turnace Expurgato*; in exergue, *M.D.C.C.IX.* Gold; silver; size, 1½ in.

A series of six medals was issued during the reigns of George I and George II, of similar design, in brass and copper; sizes, 1½ to 1¾ in. "The medals were not dated, and it is known that the later Georges used the same design" (Beauchamp, p. 27).

1714. Obverse, bust of king to right, laureated, with flowing hair, in armor, draped; legend, *George King of Great Britain*. Reverse, an Indian at right drawing his bow on a deer, standing at left on a hill, sun above, to right above tree one star, to left above Indian three stars. Brass; size, 1½ in., with loop for suspension.

1753. Obverse, bust of king to left, laureated; legend, *Georgius II, D. G. MAG. BRI. FRA. ET HIB. REX. F. D.* Reverse, the royal arms, within the Garter, surmounted by a crown and a lion; upon ribbon, below, *DIEU ET MON DROIT*. Silver, cast and chased; size, 1½ in., with loop and ring.

The last was one of 30 medals brought from England in 1753 by Sir Danvers Osborne, governor of New York, for presentation to friendly Indians of the Six Nations. The medals were provided with broad scarlet ribbons (Hist. Mag., Sept. 1865, p. 85; Betts, p. 177).

In July, 1721, the governor of Pennsylvania presented to the Seneca chief, Ghosont, a gold coronation medal of George I, charging him "to deliver this piece into the hands of the first man or greatest chief of the Five Nations, whom you call Kannygoodt, to be laid up and kept as a token of friendship between them" (Hawkins, II, 426).

1721. Obverse, bust of king to right, laureated, hair long, and in scale armor, lion's head on breast and mantle; legend, *Georgius D. G. MAG. BRI. FR. ETHIB. REX.*; on truncation, *E. Hannibal*. Reverse, the king seated, to right, beneath a canopy of state, is being crowned by Britannia, who rests her hand upon a shield; in exergue, *INAUGURAT 25, Oct. MDCCXIII.*

The following medal seems to have been a trader's token or store card, possibly given to the Indians to gain their good will:

1757. Obverse, a trader buying skins from an Indian; legend, *The Red Man Came to Elton Daily*. Reverse, a deer lying beneath a tree; legend, *Skins bought at Eltons*; in exergue, 1757 (Am. Jour. Numismat., VII, 90). Copper, size, 1½ in.

The first Indian peace medal manufactured in America is thought to have been the following. It was presented by The Friendly Association for the Regaining and Preserving Peace With the Indians by Pacific Means, a society composed largely of Quakers. The dies were engraved by Edward Duffield, a watch and clock maker of Philadelphia, and the medals were struck by Joseph Richardson, a member of the society. Many restrikes have been issued.

1757. Obverse, bust of the king to right, hair long and laureated; legend, *Georgius II Dei Gratia.*

Reverse, Indian and white man seated, a council fire between them; white man offers calumet and Indian extends hand for it; above Indian a rayed sun, back of white man a tree; legend, *Let us Look to the Most High who Blessed our Fathers with Peace*; in exergue, 1757. Silver; copper; pewter; size, 1½ in.

INDIAN PEACE MEDAL OF 1757

On the capture of Montreal by Sir Jeffrey Amherst, Sept. 8, 1760, an interesting series of medals, known as the conquest medals, was issued. McLachlan says they "were evidently made in America, and presented to the Iroquois and Onondagas, and other chiefs who assisted in the campaign." To each of the 23 chiefs, though they did but little fighting, was presented a medal by Sir William Johnson, who, in his diary, under date of July 21, 1761, says: "I then delivered the medals sent me by the General for those who went with us to Canada last year, being twenty-three in number." Beauchamp (p. 61) says: "In 1761 Johnson had similar medals for the Oneidas, but none of them have been found."

1760. Obverse, view of a town, with bastions, on a river front, five church spires, island in river; in foreground, to left, a bastion with flag of St. George; in exergue, in an incused oval, *D. C. F.*; this side is cast and chased. Reverse, in field engraved, *Montreal*, remainder plain for insertion of name and tribe of the recipient. Silver; size, 1½ in. Pewter; size, 1½ in.

Beauchamp (p. 66) says: "Two medals, relating to the capture of Montreal and conquest of Canada, seem more likely to have been given by Johnson to the Indians in 1761. As the two medals have Indian symbols, and one Amherst's name, and that of Montreal, they seem to suit every way Johnson's lavish distribution of medals at Otsego, when sent by his leader."

1761. Obverse, a laureated nude figure, typifying the St. Lawrence, to right, reclining, right arm resting on the prow of a galley, paddle in left hand, a beaver climbing up his left leg; in background a standard inscribed *Amherst* within a wreath of laurel, surmounted by a lion. In exergue, a shield with fleur-de-lis; above, a tomahawk, bow, and quiver; legend, *Conquest of Canada*. Reverse, a female figure, to right, seated beneath a pine tree; an eagle with extended wings standing on a rock; before the female a shield of France, with club and tomahawk; legend, *Montreal Taken, MDCCCLX*; in exergue, *Soc. Promoting Arts and Commerce*. Silver; size, 1½ in.

1761. Obverse, head of King George, to right, nude, with flowing hair, laureated; legend, *George II. King*. Reverse, female figure seated beneath a pine tree, to left, weeping, typical of

Canada; behind her a beaver climbing up a bank; legend, *Canada Subdued*; in exergue, *MDCCCLX*; below, *S. P. A. C.* Silver; bronze; size, 1½ in.

To commemorate the marriage of George III and Queen Charlotte a small special medal was struck, in 1761, for general distribution to insure the allegiance of the savages in the newly acquired province (McLachlan, p. 13).

1761. Obverse, bust of king and queen facing each other; above, a curtain with cords and tassels falling midway between the heads. Reverse, the royal arms, with ribbon of the Garter, and motto on ribbon below, *Dieu et Mon Droit*. Silver; size, 1½ in., pierced for suspension.

The following series of medals is supposed to have been struck for presentation to Indian chiefs in Canada at the close of the French and Indian wars. There were five in the series, differing in size and varying slightly in design; they were formed of two shells joined together; one of lead and others of pewter, with tracings of gilding, have been found.

1762. Obverse, youthful bust of king, to right, in armor, wearing ribbon of the Garter, hair in double curl over ear; legend, *Dei Gratia*. Reverse, the royal arms encircled by the ribbon of the Garter, surmounted by a crown, supported by the lion and the unicorn; legend, *Honi Soit qui Mal y Pense*; on a ribbon below the motto, *Dieu et Mon Droit*. Silver; size, 1½ by 3½ in.

In 1763 Pontiac rebelled against British rule, and the Government entered into treaty with the remaining friendly chiefs. A council was held at Niagara in 1764, at which time the series of three medals known as the "Pontiac conspiracy medals" was presented to the chiefs and principal warriors.

1764. Obverse, bust of king, to left, in armor and in very high relief, long hair tied with ribbon, laureated; legend, *Georgius III. D. A. M. BRI. FRA. ET HIB. REX. F. D.* Reverse, an officer and an Indian seated on a rustic bench in foreground; on the banks of a river, to right, three houses on a rocky point; at junction of river with ocean, two ships under full sail. The Indian holds in his left hand a calumet, with his right grasps the hand of the officer; at left of Indian, in the background, a tree, at right a mountain range; legend, *Happy While United*; in exergue, 1764. In field, stamped in two small incused circles, *D. C. F.* and *N York*. Silver; size, 3½ by 3½ in.; loop, a calumet and an eagle's wing.

In 1765 a treaty was made with the British and Pontiac, and his chiefs were presented by Sir William Johnson, at Oswego, with the medals known as "the lion and wolf medals." A large number of these were distributed, and two reverse dies have been found. The design represents the expulsion of France from Canada (see Parkman, *Pontiac Conspiracy*, chap. xxxi; Betts, p. 238; Leroux, p. 156; McLachlan, p. 13).

1765. Obverse, bust of king to right, in armor, wearing the ribbon of the Garter; legend, *Georgius III Dei Gratia*. Reverse, to left, the British lion reposing under a tree; to right, a snarling wolf; behind lion, a church and two houses; behind wolf, trees and bushes. Silver; size, 2½ in.

A large body of Indians assembled in general council at Montreal, Aug. 17, 1778, representing the Sioux, Sauk, Foxes, Menominee, Winnebago, Ottawa, Potawatomi, and Chippewa. It is generally supposed that at this time the presentation of the medals took place, in consideration of the assistance rendered the British in the campaigns of Kentucky and Illinois and during the War of the Revolution. Gen. Haldimand, commander in chief of the British forces in Canada, also gave a certificate with each medal (see Hoffman in 14th Rep. B. A. E., 1896; Betts, p. 284-286).

1778. Obverse, bust of king to right, wearing ribbon of the Garter. Reverse, the royal arms, surrounded by ribbon of the Garter and motto, surmounted by a crown, supported by the lion and the unicorn; at bottom ribbon, with motto, *Dieu et Mon Droit*; shield of pretense crowned. Silver; size, $2\frac{3}{4}$ in., with loop for suspension.

The following medals were presented, until about the time of the war of 1812, to Indian chiefs for meritorious service, and continued in use possibly until replaced by those of 1814 (Leroux, p. 157):

1775. Obverse, bust of the king, to left, with hair curled, wearing ribbon of the Garter; legend, *Georgius III Dei Gratia*. Reverse, the royal arms with supporters; surmounted by crown and ribbon of the Garter; below, ribbon with motto, *Dieu et Mon Droit*. Silver; size, $2\frac{1}{4}$ in., with loop for suspension.

1794. Obverse, bust of king to right, in armor, wearing ribbon of the Garter, hair long, cloak over shoulders; two laurel branches from bottom of medal to height of shoulders of bust; legend, *Georgius III Dei Gratia*; in exergue, 1794. Reverse, on plain field, the royal arms with supporters, surmounted by helmet and crest, encircled by ribbon of the Garter, and below ribbon and motto. Silver; size, $1\frac{1}{2}$ in.

At the close of the war of 1812, the Government, desirous of marking its appreciation of the services rendered by its Indian allies, besides making other presents and grants of land, caused the following medal, in three sizes, to be struck in silver for presentation to the chiefs and principal warriors (Leroux, p. 158):

1814. Obverse, bust with older head of king to right, laureated, draped in an ermine mantle, secured in front with a large bow of ribbon, wearing the collar and jewel of St George; legend, *Georgius III Dei Gratia Britanniarum Rex F. D.*; under bust, *T. Wyon, Jun. S.* Reverse, the royal arms of Great Britain with shield of pretense of Hanover, surmounted by a crown and crested helmet, all encircled by ribbon of the Garter and supporters, below a ribbon with motto, *Dieu et Mon Droit*; above ribbon, a rose, thistle, and shamrock; behind helmet on both sides, a display of acanthus leaves; in exergue, 1814. Silver; size, $2\frac{3}{4}$ to $4\frac{1}{4}$ in.

The following medal, in three sizes, was struck in 1840 for participants in the early treaties of the Queen's reign. It is possible that it may have been presented also to the Indians of Lower Canada who took no part in the abortive uprising of 1837 (McLachlan, p. 36; Leroux, p. 161):

1840. Obverse, bust of Queen, to right, crowned; legend, *Victoria Dei Gratia Britanniarum Regina*

F. D.; under neck *W. Wyon, R. A.* Reverse, arms of Great Britain, surmounted by crown and crested helmet, encircled by ribbon of the Garter, supported by the lion and the unicorn; below, ribbon with motto, *Dieu et Mon Droit*, the rose and thistle; in exergue, 1840. Silver; sizes, $2\frac{3}{4}$ to $4\frac{1}{4}$ in.

The medal known as the Ashburton treaty medal was given through Lord Ashburton, in 1842, to the Micmac and other eastern Indians for services as guards and hunters, and assistance in laying out the boundary between the United States and Canada.

1842. Obverse, bust of queen in an inner dentilated circle, garland of roses around psyche knot; under bust, *E. Wyon*; no legend. Reverse, arms of Great Britain in an inner circle, surmounted by a crowned and crested helmet, encircled by the ribbon of the Garter; legend, *Victoria Dei Gratia Britanniarum Regina Fid. Def.* Ribbon in lower field backed by the rose and thistle (Betts, p. 159). Silver; size, $2\frac{3}{4}$ in.

In 1848 the Peninsular War medal was issued, to be given to any officer, non-commissioned officer, or soldier who had participated in any battle or siege from 1793 to 1814. In general orders, dated Horse Guards, June 1, 1847, were included the battles of Chateaugay, Oct. 26, 1813, and of Chrystlers Farm, Nov. 11, 1813, covering the invasion of Canada by the American army in 1813. "The medal was also conferred upon the Indians, the name of the battles engraved on clasps, and the name of the recipient on the edge of the medal, with title of warrior" (Leroux, p. 177).

1848. Obverse, bust of the queen to right, crowned; legend, *Victoria Regina*; below bust, 1848, and *W. Wyon, R. A.* Reverse, figure of the queen in royal robes, standing on a dais, crowning with a wreath of laurel the Duke of Wellington, who is kneeling before her; by side of dais a crouching lion; in exergue, 1793-1814. Silver; size, $2\frac{1}{2}$ in., with loop for suspension.

The Prince of Wales on his visit to Canada in 1860 was received by Indians in full ceremonial dress. Each chief was presented with a large silver medal, while the warriors received smaller medals. This medal is known as the Prince of Wales medal.

1860. Obverse, head of queen to right, undraped and crowned; legend, *Victoria D. G. Regina F. D.* In lower right-hand field, the three feathers and motto; lower left-hand field, 1860. Reverse, the royal arms surmounted by a helmet, crown, and lion, with ribbon of the Garter, and on the ribbon below, *Dieu et Mon Droit*; at back, roses, shamrock, and thistle; in exergue, 1860. Silver; size, 2 in., with loop for suspension.

In 1860, when the Government had acquired the lands of the Hudson's Bay Company's territory and after the extinction of the Indian land titles, the following medal was presented to the Indians under Treaty No. 1. In the Report of the Commissioners it is stated: "In addition each Indian received a dress, a flag, and a medal as marks of distinction." These medals at first were not struck for this occasion.

1860. Obverse, head of the queen to right, crowned; legend, *Victoria Regina*; under bust, *J. S. and B. Wyon, S. C.* Reverse, two branches of oak, center field plain for the engraving of name and tribe of recipient. Silver; size, $3\frac{3}{8}$ in.

The very large Confederation medal of 1867, with an extra rim soldered on it, was used in 1872 for Treaty No. 2. It was presented to the Indians subsequent to the acquisition of the Hudson's Bay Company's territory, at which time the Indian titles were extinguished. "Twenty-five were prepared, but found so cumbersome no more were used" (Leroux, p. 219).

1872. Obverse, bust of queen to right, within an inner circle having milled edge ground, with veil and necklace; legend, *Dominion of Canada*; below, *Chiefs Medal, 1872*; below bust, *S. Wyon*. Reverse, in inner circle Britannia seated with lion and four female figures, representing the four original provinces of the Canadian confederation; legend, *Juvenatus et Patrius Vigor Canada Instaurata, 1867*; in outer circle, *Indians of the North West Territories*. Silver; bronze; size, $3\frac{1}{4}$ in.

The following medal was struck especially to replace the large and inartistic medal last described, and was intended for presentation at future treaties:

1873. Obverse, head of queen to right, crowned with veil and necklace; legend, *Victoria D. G. Britt. REG. F. D.*; below bust, *J. S. Wyon*. Reverse, a general officer in full uniform, to right, grasping the hand of an Indian chief who wears a feather headdress and leggings; pipe of peace at feet of figures; in background, at back of Indian, several wigwags; back of officer, a half sun above horizon; legend, *Indian Treaty No. —*, on lower edge, 187—. Silver; size, 3 in., with loop for suspension.

A series of three medals was struck by the Hudson's Bay Company for presentation to the Indians of the great Northwest for faithful services. These were engraved by G. H. Kuchler of the Birmingham mint, 1790 to 1805.

1793. Obverse, bust of king to left, long hair and draped; legend, *Georgius III D. G. Britanniarum Rex Fidei. Def.*; under bust, *G. H. K.* Reverse, arms of the Hudson's Bay Company; argent, a cross gules, four beavers proper, to the left, surmounted by a helmet and crest, a fox supported by two stags; motto on ribbon, *Pro Felle Culem* (Leroux, p. 59). Silver; sizes, $1\frac{1}{8}$ by 3 in.

MEDALS OF THE UNITED STATES.—The earliest known Indian medal struck within the United States is that of 1780, as follows:

1780. Obverse, arms of Virginia; legend, *Rebellion to Tyrants is Obedience to God*. Reverse, an officer and an Indian seated under a tree, the In-

dian holding a calumet in his hand; in the background, a sea on which are three ships, in the middle-ground, a rocky point and a house; legend, *Happy While United*. Silver; pewter; size, $2\frac{1}{2}$ in.; loop, a calumet and an eagle's wing.

The pewter medal presented by the Government to the Indians represented at the Ft Harmar treaty in Ohio, in 1789, bears on the obverse the bust of Washington with full face, and on the reverse the clasped hands and crossed calumet and tomahawk, with the date 1789, and legend, *Friendship, the Pipe of Peace*. The tribes present at the treaty were the Ottawa, Delawares, Hurons, Sauk, Potawatomi, and Chippewa.

Of the early United States medals possibly the most interesting is that known as the Red Jacket medal, presented to this celebrated Seneca by Washington at Philadelphia in 1792. This was one of several similar medals, one of which is dated 1793. Of it Loubat says: "The

medals were made at the United States Mint when Dr Rittenhouse was director, 1792-1795." See *Red Jacket*.

1792. Obverse, Washington in uniform, bareheaded, facing to the right, presenting a pipe to an Indian chief, who is smoking it; the Indian is standing, and has a large medal suspended from his neck. On the left is a pine tree, at its foot a tomahawk; in the background, a farmer plowing; in exergue, *George Washington President 1793*—all engraved. Reverse, arms and crest of the United States on the breast of the eagle, in the right talon of which is an olive branch, in the left a sheaf of arrows, in its beak a ribbon with the motto *E Pluribus Unum*; above, a glory breaking through the clouds and surrounded by 13 stars. Size, $6\frac{1}{2}$ by $4\frac{1}{2}$ in.

In the Greenville treaty of 1795, between the United States and representatives of the Hurons, Delawares, Ottawa, Chippewa, Potawatomi, Sauk, and other tribes, a part of the function, as usual, involved the presentation of peace medals. The medal in this case was a facsimile of the oval Red Jacket medal, in silver, engraved and chased, with a change in the date to 1795. Size, 4 by 6 in. As there were many signers, a considerable number of these medals must have been distributed.

During the second administration of Washington, in 1796, there was issued a series of four medals, in silver and bronze, called "the Season medals," which Snow-

THE "RED JACKET" MEDAL, DATED 1793

den (p. 95) states were Indian peace medals. These are as follows:

1796. No. 1. Obverse, a shepherd with staff in left hand, and a cow, two sheep, and a lamb in foreground; in background, a hill, tree, and farmhouse with open door, in which two persons are seen; on base, *C. H. Kuchler, F.*; in exergue, *U. S. A.* Reverse, legend in five parallel lines, *Second Presidency of George Washington MDCCXCVI*, within a wreath of olive branches; in bow, the letter *K*. Size, 1½ in.

No. 2. Obverse, interior of a room; in background, a woman; in foreground, a woman spinning, at left a child guarding a cradle, on right an open fireplace; on base, *C. H. K. F.*; in exergue, *U. S. A.* Reverse, same as No. 1.

No. 3. Obverse, in foreground, farmer sowing; in background, a farmhouse and a man plowing; on base, *Kuchler*; in exergue, *U. S. A.* Reverse, same as No. 1.

No. 4. Obverse, bust of Washington in uniform, to left, in a wreath of laurel; legend, *In War Enemies*. Reverse, bust of Franklin, to left, in wreath of laurel; legend, *In Peace Friends*. Tin; size, ½ in.

"Of the medals taken along and of which use was made by the explorers [Lewis and Clark] there were three sizes, or grades, one, the largest and preferred one, 'a medal with the likeness of the President of the United States'; the second, 'a medal representing some domestic animals'; the third, 'medals with the impression of a farmer sowing grain'. I have found in 'The Northwest Coast,' by James G. Swan, a cut of a medal of the third class, but I have seen no representation of the second class. The third class medal was made of pewter. These medals were given to chiefs only" (Wheeler, *Trial of Lewis and Clark*, 139-140).

The following were struck especially for presentation to Indian chiefs, and had their inception, Apr. 20, 1786, when Representative McKean moved "that the Board of the Treasury ascertain the number and value of the medals received by the Commission appointed to treat with the Indians, from the said Indians, and have an equal number with the arms of the United States, made in silver and returned to the chiefs, from whom they were received." The result was the final adoption of a series of medals, each bearing on the obverse the bust of a President, and on the reverse a symbol of peace. This series began with the administration of President Jefferson. The John Adams medal was made many years after his administration, and though not so considered at first, it is now regarded as included in the series. At the time of the first issue, however, a die was made

for the obverse of the Adams medal. The reverse used was that of the smaller Jefferson medal; a few were struck in soft metal, which are now exceedingly rare.

Obverse, bust of president to right, clothed, hair in curls and cue; legend, *John Adams, Pres. U. S. A.*; on truncation, *Leonard*. Reverse, two hands clasped, on cuff of one three stripes and as many buttons with displayed eagle; the other wrist has a bracelet with spread-eagle; legend, *Peace and Friendship*, and crossed calumet and tomahawk.

The medal of Adams now used is practically the same, except the arrangement of the face, and the legend, *John Adams, President of the United States*; in exergue, *A. D. 1797*; in truncation, *Furst*. Reverse, the same as last. Bronze; size, 2 in.

The Jefferson medal is as follows:

Obverse, bust of president to right; legend, *Th. Jefferson, President of the U. S. A. D. 1801*. Reverse, same as last. Silver and bronze; sizes, 4 in., 2½ in., 2 in.

The medals that followed were the same in design, metal, and size, with the names of the respective Presidents, until the administration of Millard Fillmore, in 1850, when the reverse was entirely changed, as follows:

THE JEFFERSON MEDAL OF 1801

An Indian in war dress and a pioneer in foreground, the latter leaning on a plow; to right a hill, in center background a river and a sailing boat; to left two cows beyond a farmhouse; American flag back of the figures; legend, *Labor, Virtue, Honor*; in exergue, *J. Wilson, F.* Silver and bronze; size, 3 in.

During the next two administrations this type was retained, but in 1862, during the administration of Abraham Lincoln, another change in the reverse was made:

In field, an Indian plowing, children playing at ball, a hill and a log cabin and a church; a river with boats and ships in background; in an outer circle, following curve of medal, an Indian scalping another; below, an Indian woman weeping, a quiver of arrows with bow and calumet. Silver and bronze; size, 2½ in.

The reverse was again changed during the administration of Andrew Johnson, as follows:

Figure of America clasping the hand of an Indian in war dress, before a monument surmounted by a bust of George Washington; at feet of Indian are the attributes of savage life; at feet of America those of civilization. Silver and bronze; size, 2½ in.

The medal issued during the administration of President Grant was entirely different:

Obverse, bust of president within a wreath of laurel; legend, *United States of America, Liberty, Justice and Equality*; below, *Let us have peace*, a calumet and a branch of laurel. Reverse, a globe resting on implements of industry with the Bible above and rays behind it; legend, *On earth peace, good will toward men*.

In 1877, during the administration of President Hayes, change was made to an oval medal:

Obverse, bust of president to right, nude; legend, *Rutherford B. Hayes, President of the United States, 1877*. Reverse, figure of a pioneer with ax in left hand and pointing with right to a cabin in right background, before which a woman is seated with a child in her lap; in middle background, a man plowing, a mountain beyond, figure of an Indian in full war dress facing pioneer, to right a tree, above in rays *Peace*; in exergue, crossed calumet and tomahawk within wreath. Silver; bronze; size, 2½ by 3½ in.

No change was made in size or type until the administration of Benjamin Harrison, when the old round form of medal was resumed:

Obverse, bust of president to right, draped; legend, *Benjamin Harrison, President of the United States, 1889*. Reverse, two hands clasped, crossed calumet and tomahawk; legend, *Peace and Friendship*. Sizes, 3 in., 2½ in., 2 in.

This medal was continued to the administration of President Roosevelt.

The issuance of peace medals was not confined to the governments, as the various fur companies also presented to Indian chiefs medals of various kinds and in various metals, as, for example, the medals of the Hudson's Bay Company from 1790 to 1805, above described. The Chouteau Fur Company, of St Louis, caused to be given by its agents in the N. W. the following:

Obverse, bust of Pierre Chouteau, to left, clothed; legend, *Pierre Chouteau, Jr., & Co., Upper Missouri Outfit*. Reverse, in field, crossed tomahawk and calumet, and clasped hands; legend, *Peace and Friendship, 1843*. Silver; size, 3½ in.

Consult Beauchamp, *Metallic Ornaments of the New York Indians*, 1903; Betts, *American Colonial History Illustrated by Contemporaneous Medals*, 1894; Carr, *Dress and Ornaments of Certain American Indians*, 1897; Carter, *Medals of the British Army*, 1861; Catalogue du Musée Monétaire, 1833; Clark, *Onondaga*, 1849; Fisher, *American Medals of the Revolution*, in *Mass. Hist. Soc. Coll.*, 3d s., vi; Halsey, *Old New York Frontier*, 1901; Hawkins, *Medallic Illustrations of British History*; Hayden, *Silver and Copper Medals*, in *Proc. Wyo. Hist. and Geol. Soc.*, II, pt. 2, 1886; Irwin, *War Medals*, 1890; Leroux, *Medaillier du Canada*, 1888; McLachlan in *Canadian Antiq. and Numismat. S. Mint*, 1861.

(P. E. B.)

Medfield. In 1677 there was a settlement of Christian Indians (perhaps

Nipmuc) at this place, in Norfolk co., Mass.—Gookin (1677) in *Drake, Bk. Inds.*, bk. 2, 115, 1848.

Medicine and Medicine-men. Medicine is an agent or influence employed to prevent, alleviate, or cure some pathological condition or its symptoms. The scope of such agents among the Indians was extensive, ranging, as among other primitive peoples, from magic, prayer, force of suggestion, and a multitude of symbolic and empirical means, to actual and more rationally used remedies. Where the Indians are in contact with whites the old methods of combating physical ills are slowly giving way to the curative agencies of civilization. The white man in turn has adopted from the Indians a number of valuable medicinal plants, such as cinchona, jalapa, hydrastis, etc.

In general the tribes show many similarities in regard to medicine, but the actual agents employed differ with the tribes and localities, as well as with individual healers. Magic, prayers, songs, exhortation, suggestion, ceremonies, fetishes, and certain specifics and mechanical processes are employed only by the medicine-men or medicine-women; other specific remedies or procedures are proprietary, generally among a few old women in the tribe; while many vegetal remedies and simple manipulations are of common knowledge in a given locality.

The employment of magic consists in opposing a supposed malign influence, such as that of a sorcerer, spirits of the dead, mythic animals, etc., by the supernatural power of the healer's fetishes and other means. Prayers are addressed to benevolent deities and spirits, invoking their aid. Healing songs, consisting of prayers or exhortations, are sung. Harangues are directed to evil spirits supposed to cause the sickness, and often are accentuated by noises to frighten such spirits away. Suggestion is exercised in many ways directly and indirectly. Curative ceremonies usually combine all or most of the agencies mentioned. Some of them, such as Matthews describes among the Navaho, are very elaborate, prolonged, and costly. The fetishes used are peculiarly shaped stones or wooden objects, lightning-riven wood, feathers, claws, hair, figurines of mythic animals, representations of the sun, of lightning, etc., and are supposed to embody a mysterious power capable of preventing disease or of counteracting its effects. Mechanical means of curing consist of rubbing, pressure with the hands or feet, or with a sash or cord (as in labor or in painful affections of the chest), bonesetting, cutting, cauterizing, scarifying, cupping (by

sucking), blood-letting, poulticing, clysmata, sweat bath, sucking of snake poison or abscesses, counter irritation, tooth pulling, bandaging, etc. Dieting and total abstinence from food were forms of treatment in vogue in various localities. Vegetable medicines were, and in some tribes still are, numerous. Some of these are employed by reason of a real or fancied resemblance to the part affected, or as fetishes, because of a supposed mythical antagonism to the cause of the sickness. Thus, a plant with a worm-like stem may be given as a vermifuge; one that has many hair-like processes is used among the Hopi to cure baldness. Among the Apache the sacred tule pollen known as *ha-dn-tin* is given or applied because of its supposed supernatural beneficial effect. Other plants are employed as remedies simply for traditional reasons, without any formulated opinion as to their modes of action. Finally, all the tribes are familiar with and employ cathartics and emetics; in some cases also diaphoretics, diuretics, cough medicines, etc. Every tribe has also knowledge of some of the poisonous plants in its neighborhood and their antidotes.

The parts of plants used as medicines are most often roots, occasionally twigs, leaves, or bark, but rarely flowers or seeds. They are used either fresh or dry, and most commonly in the form of a decoction. Of this a considerable quantity, as much as a cupful, is administered at a time, usually in the morning. Only exceptionally is the dose repeated. Generally only a single plant is used, but among some Indians as many as four plants are combined in a single medicine; some of the Opata mix indiscriminately a large number of substances. The proprietary medicines are sold at a high price. Some of these plants, so far as they are known, possess real medicinal value, but many are quite useless for the purpose for which they are prescribed. There is a prevalent belief that the Indians are acquainted with valuable specifics for venereal diseases, snake bites, etc., but how far this belief may be true has not yet been shown.

Animal and mineral substances are also occasionally used as remedies. Among Southwestern tribes the bite of a snake is often treated by applying to the wound a portion of the ventral surface of the body of the same snake. The Papago use crickets as medicine; the Tarahumare, lizards; the Apache, spiders' eggs. Among the Navaho and others red ochre combined with fat is used externally to prevent sunburn. The red, barren clay from beneath a campfire is used by White Mountain Apache women to induce sterility;

the Hopi blow charcoal, ashes, or other products of fire on an inflamed surface to counteract the supposed fire which causes the ailment. Antiseptics are unknown, but some of the cleansing agents or healing powders employed probably serve as such, though undesignedly on the part of the Indians.

The exact manner of therapeutic action is as absolutely unknown to the Indian as it is to the ignorant white man. Among some tribes the term for medicine signifies "mystery," but among others a distinction is made between thaumaturgic practices and actual medicines. Occasionally the term "medicine" is extended to a higher class of greatly prized fetishes that are supposed to be imbued with mysterious protective power over an individual or even over a tribe (see *Orenda*). Such objects form the principal contents of the so-called medicine-bags.

In many localities there was prepared on special occasions a tribal "medicine." The Iroquois used such a remedy for healing wounds, and the Hopi still prepare one on the occasion of their Snake dance. Among the tribes who prepare *tiswin*, or *tesvino*, particularly the Apache, parts of a number of bitter, aromatic, and even poisonous plants, especially a species of datura, are added to the liquid to make it "stronger"; these are termed medicines.

The causation and the nature of disease being to the Indian in large part mysteries, he assigned them to supernatural agencies. In general, every illness that could not plainly be connected with a visible influence was regarded as the effect of an introduction into the body, by malevolent or offended supernatural beings or through sorcery practised by an enemy, of noxious objects capable of producing and continuing pain or other symptoms, or of absorbing the patient's vitality. These beliefs, and the more rational ones concerning many minor indispositions and injuries, led to the development of separate forms of treatment, and varieties of healers.

In every Indian tribe there were, and in some tribes still are, a number of men, and perhaps also a number of women, who were regarded as the possessors of supernatural powers that enabled them to recognize, antagonize, or cure disease; and there were others who were better acquainted with actual remedies than the average. These two classes were the "physicians." They were oftentimes distinguished in designation and differed in influence over the people as well as in responsibilities. Among the Dakota one was called *wakan witshasha*, 'mystery man', the other *pejihuta witshasha*, 'grass-

root man'; among the Navaho one is *khatlali*, 'singer', 'chanter'; the other *izéélíni*, 'maker of medicines'; among the Apache one is *taiyin*, 'wonderful,' the other simply *izé*, 'medicine.'

The mystery man, or thaumaturgist, was believed to have obtained from the deities, usually through dreams, but sometimes before birth, powers of recognizing and removing the mysterious causes of disease. He was "given" appropriate songs or prayers, and became possessed of one or more powerful fetishes. He announced or exhibited these attributes, and after convincing his tribesmen that he possessed the proper requirements, was accepted as a healer. In some tribes he was called to treat all diseases, in others his functions were specialized, and his treatment was regarded as efficacious in only a certain line of affections. He was feared as well as respected. In numerous instances the medicine-man combined the functions of a shaman or priest with those of a healer, and thus exercised a great influence among his people. All priests were believed to possess some healing powers. Among most of the populous tribes the medicine-men of this class were associated in guilds or societies, and on special occasions performed great healing or "life (vitality) giving" ceremonies, which abounded in songs, prayers, ritual, and drama, and extended over a period of a few hours to nine days.

The ordinary procedure of the medicine-man was about as follows: He inquired into the symptoms, dreams, and transgressions of tabus of the patient, whom he examined, and then pronounced his opinion as to the nature (generally mythical) of the ailment. He then prayed, exhorted, or sang, the last, perhaps, to the accompaniment of a rattle; made passes with his hand, sometimes moistened with saliva, over the part affected; and finally placed his mouth over the most painful spot and sucked hard to extract the immediate principle of the illness. This result he apparently accomplished, often by means of sleight-of-hand, producing the offending cause in the shape of a thorn, pebble, hair, or other object, which was then thrown away or destroyed; finally he administered a mysterious powder or other tangible "medicine," and perhaps left also a protective fetish. There were many variations of this method, according to the requirements of the case, and the medicine-man never failed to exercise as much mental influence as possible over his patient. For these services the healer was usually well compensated. If the case would not yield to the simpler treatment,

a healing ceremony might be resorted to. If all means failed, particularly in the case of internal diseases or of adolescents or younger adults, the medicine-man often suggested a witch or wizard as the cause, and the designation of some one as the culprit frequently placed his life in jeopardy. If the medicine-man lost several patients in succession, he himself might be suspected either of having been deprived of his supernatural power or of having become a sorcerer, the penalty for which was usually death.

These shaman healers as a rule were shrewd and experienced men; some were sincere, noble characters, worthy of respect; others were charlatans to a greater or less degree. They are still to be found among the less civilized tribes, but are diminishing in number and losing their influence. Medicine-women of this class were found among the Apache and some other tribes.

The most accomplished of the medicine-men practised also a primitive surgery, and aided, by external manipulation and otherwise, in difficult labor. The highest surgical achievement, undoubtedly practised in part at least as a curative method, was trephining. This operation was of common occurrence and is still practised in Peru, where it reached its highest development among American tribes. Trephining was also known in quite recent times among the Tarahumare of Chihuahua, but has never been found north of Mexico.

The other class of medicine men and women corresponds closely to the herbalists and the old-fashioned rural midwives among white people. The women predominated. They formed no societies, were not so highly respected or so much feared as those of the other class, were not so well compensated, and had less responsibility. In general they used much more common sense in their practice, were acquainted with the beneficial effects of sweating, poulticing, moxa, scarification, various manipulations, and numerous vegetal remedies, such as purgatives, emetics, etc. Some of these medicine-women were frequently summoned in cases of childbirth, and sometimes were of material assistance.

Besides these two chief classes of healers there existed among some tribes large medicine societies, composed principally of patients cured of serious ailments. This was particularly the case among the Pueblos. At Zuñi there still exist several such societies, whose members include the greater part of the tribe and whose organization and functions are complex. The ordinary members are not actual healers, but are believed to be more

competent to assist in the particular line of diseases which are the specialty of their society and therefore may be called by the actual medicine-men for assistance. They participate also in the ceremonies of their own society. See *Anatomy, Artificial Head Deformation, Health and Disease, Physiology*.

For writings on the subject consult Hrdlicka, *Physiological and Medical Observations*, Bull. 33, B. A. E., 1907 (in press). (A. H.)

Medilding ('place of boats'). A Hupa village, the most important of the southern division of this people, on the E. side of Trinity r., Cal., 2 m. from the S. end of Hupa valley. (P. E. G.)

Ipuukhamam.—Goddard, inf'n, 1903 (Karok name). **Kahteti**.—Gibbs, MS., B. A. E., 1852 (Yurok name). **Ka-la-tih**.—Meyer, Nach dem Sacramento, 282, 1855. **Ka-tah-te**.—McKee (1851) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 194, 1853. **Matilden**.—Spalding in Ind. Aff. Rep., 82, 1870. **Matilton**.—Goddard, Life and Culture of the Hupa, 12, 1903. **Medildin**.—Ibid. **Mi-til'-ti**.—Powers in Cont. N. A. Ethnol., III, 73, 1877. **Olleppauh'l-kah-teht'l**.—Gibbs in Schoolcraft, Ind. Tribes, III, 139, 1853.

Medoctec. A former Malecite village on St John r., New Brunswick, about 10 m. below the present Woodstock. In 1721 the name occurs as that of an Abnaki tribe. (J. M.)

Madocteg.—St Maurice (1760) in N. Y. Doc. Col. Hist., X, 1064, 1858. **Medocktaek**.—Gyles (1736) in Drake, Trag. Wild., 78, 1841. **Medoctec**.—Writer of 1723 in Me. Hist. Soc. Coll., VII, 5, 1876. **Medocteck**.—Memoir of 1724 in N. Y. Doc. Col. Hist., IX, 940, 1855. **Medoctek**.—Vaudreuil (1721), *ibid.*, 904. **Medoctek**.—Beauharnois (1745), *ibid.*, X, 13, 1858. **Medocthek**.—Iberville (1701), *ibid.*, IX, 733, 1855 (the river). **Medoktek**.—Shea, Cath. Miss., 143, 1855. **Medoctec**.—Lotter, map, ca. 1770.

Medvednaia (Russ.: 'bearish', from *medved*, 'bear'). A Yukonikhotana settlement on the S. side of Yukon r., Alaska; pop. 15 in 1880.—Petroff in 10th Census, Alaska, 12, 1884.

Meecombe. An Abnaki village on lower Penobscot r., Me., in 1602-09.—Purchas (1625) in Me. Hist. Soc. Coll., V, 156, 1857.

Meeshawn. A former Nauset village near Truro, Barnstable co., Mass. In 1698 it contained about 50 inhabitants.

Meeshawn.—Bourne (1674) in Mass. Hist. Soc. Coll., 1st s., I, 196, 1806. **Meshawn**.—Freeman, *ibid.*, 1st s., VIII, 160, 1802.

Meetkeni. A former Tolowa village on the S. fork of Smith r., Cal.

Mé'-ét-ke'-ni.—Dorsey, Smith River MS. vocab., B. A. E., 1884 (Khaamotene name). **Mé'-rxét-ke**.—Dorsey, Chetco MS. vocab., B. A. E., 1884 (Chetco name).

Meggeckessou. Mentioned as if a Delaware village in 1659. The editor of the New York Colonial Documents locates it at Trenton Falls, N. J., on Delaware r. **Mechekessouw**.—Hudde (1662) in N. Y. Doc. Col. Hist., XII, 370, 1877. **Meggeckessouw**.—Beeckman (1663), *ibid.*, 446. **Meggeckessou**.—Beeckman (1659), *ibid.*, 255.

Mehashunga (*Me-hä-shun'-gä*, 'duck'). A Kansa gens.—Morgan, Anc. Soc., 156, 1877.

Meherrin. An Iroquoian tribe formerly residing on the river of the same name on the Virginia-North Carolina border. Jefferson confounded them with the Tutelo. According to official colonial documents they were a remnant of the Conestoga or Susquehanna of upper Maryland, dispersed by the Iroquois about 1675, but this also is incorrect, as they are found noted under the name "Menheyricks" in the census of Virginia Indians in 1669, at which time they numbered 50 bowmen, or approximately 180 souls (Neill, Virginia, Carolorum, 326, 1886). It is possible that the influx of refugee Conestoga a few years later may have so overwhelmed the remnant of the original tribe as to give rise to the impression that they were all of Conestoga blood. They were commonly regarded as under the jurisdiction of Virginia, although their territory was claimed also by Carolina. They were closely cognate with the Nottoway, q. v. (J. M.)

Maharim.—Newnam (1722) in Humphreys, Acct., 140, 1730. **Maherin**.—Doc. of 1705 in N. C. Col. Rec., I, 615, 1886. **Maherine**.—Doc. of 1703, *ibid.*, 570. **Mahering**.—Boundary Com'rs (1728), *ibid.*, II, 748. **Maherrin**.—Council of 1726, *ibid.*, 640. **Maherring**.—Lawson (1710), Hist. Car., 383, 1860. **Maheron**.—Council of 1726 in N. C. Col. Rec., II, 640, 1886. **Meherine**.—Council of 1724, *ibid.*, 525. **Meherins**.—Doc. of 1712, *ibid.*, I, 891. **Meheron**.—Doc. of 1721, *ibid.*, II, 426. **Meherries**.—Schoolcraft, Ind. Tribes, V, 36, 1855. **Meherrin**.—Council of 1726 in N. C. Col. Rec., II, 643, 1886. **Meherring**.—Doc. of 1715, *ibid.*, 204. **Meherrins**.—Pollock (1712), *ibid.*, I, 884. **Meherron**.—Hyde (1711), *ibid.*, 751. **Menchærink**.—Lederer (German, 1670) in Hawks, N. C., II, 52, 1858. **Menderink**.—Ogilby map (1671), *ibid.* (misprint after Lederer's map). **Mendoerink**.—Lederer, map (1670), *ibid.* (German form misprinted). **Mendwink**.—Lederer (1670), Discov., map, repr. 1902. **Menhering**.—Doc. of 1722 in N. C. Col. Rec., II, 475, 1886. **Menheyricks**.—Census of 1669 quoted by Neill, Va. Carolorum, 326, 1886. **Meherries**.—Keane in Stanford, Compend., 522, 1878 (misprint).

Mehkoa ('squirrel'). A gens of the Abnaki, q. v.

Meh'-ko-ä'.—Morgan, Anc. Soc., 174, 1877. **Mikowa**.—J. D. Prince, inf'n, 1905 (modern St Francis Abnaki form).

Meipontsky. A former tribe of piedmont Virginia, probably of Siouan stock, incorporated about 1700 with the Christians Indians. See Mooney, Siouan Tribes of the East, Bull. B. A. E., 1894. **Meipontsky**.—Albany conf. (1722) in N. Y. Doc. Col. Hist., V, 673, 1855. **Meipoutsky**.—Byrd, Hist. Div. Line, II, 257, 1866.

Mejia. A hacienda 5 leagues below Isleta, N. Mex., on the Rio Grande, in 1692. At this date it probably contained a few Piro, or perhaps some Tigua from Isleta.—Vargas (1692) quoted by Davis, Span. Conq. N. Mex., 351, 1869; Bancroft, Ariz. and N. Mex., 200, 1889.

Mekadewagamitigweyawininiwak (*Mä'-k-adäwägamitigwëyā-wininiwäg*, 'people of the black water river.'—W. J.). A Chipewya band formerly living on Black r., S. E. Mich.

Black-River band.—Washington treaty (1836) in U. S. Ind. Treat., 227, 1873. *Mā kadawagami tigweya-winiwag.*—Wm. Jones, inf'n, 1906. *Mekadewagamitigweya-winiwag.*—Gatschet, *Ojibwa MS.*, B. A. E., 1882. *Wakazoo.*—Smith in Ind. Aff. Rep., 53, 1851.

Mekewe. A former Chumashan village near Santa Inez, Santa Barbara co., Cal.—Taylor in Cal. Farmer, May 4, 1860.

Mekichuntun (*Mē'-ki-tūn'-tūn*). A former village of the Chastacosta on Rogue r., Oreg.—Dorsey in Jour. Am. Folk-lore, III, 234, 1890 (given as a gens.).

Mekumtk (*Me'-kūmtk*, 'long tree moss'). A former Alsea village, the highest on the N. side of Alsea r., Oreg.—Dorsey in Jour. Am. Folk-lore, III, 230, 1890.

Melejo. A Diegueño rancheria near San Diego, s. Cal.; probably identical with "Mileotonac, San Felipe," which was represented in the treaty of Santa Isabel in 1852.

Melejo.—Ortega (1775) quoted by Bancroft, *Nat. Races*, I, 253, 1884. **Mielo-to-nac, San Felipe.**—H. R. Ex. Doc. 76, 34th Cong., 3d sess. 132, 1857.

Meletecunc. Given as the name of a Delaware tribe formerly on the coast of New Jersey. Proud in 1798 applies this name to Metedeconk r. in Ocean co.

Meletecunc.—Macaulay, N. Y., II, 293, 1829. **Moerozh-kongy.**—De Laet (ca. 1633) in N. Y. Hist. Soc. Coll., 2d s., I, 315, 1841.

Melona. A Timucuan village on the s. bank of lower St. Johns r., Fla., in the 16th century.—De Bry, *Brev. Nar.*, II, map, 1591.

Melozikakat. A Yukonikhotana village of 30 inhabitants, on Melozikakat r., a N. affluent of the Yukon, Alaska.—Petroff in 10th Census, Alaska, 12, 1884.

Melukitz. A Kusan village or tribe on the N. side of Coos bay, coast of Oregon. Probably the village most often referred to by writers.—Milhau, *Coos bay MS. vocab.*, B. A. E.; also MS. letter to Gibbs, B. A. E.

Melungeon. See *Croatan Indians*.

Memkumlis ('islands in front'). A village of the Mamalelekala and Koeksotenok, on Villageids., at the mouth of Knight inlet, Brit. Col.; pop. 215 in 1885.

Mem-koom-lish.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 65. **Memkumlis.**—Boas in Bull. Am. Geog. Soc., 227, 1887.

Memoggyins (*Me'mogg'ins*, 'having salmon traps'). A gens. of the Koeksotenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. for 1895, 330.

Memramcook (same as *amlamkook*, 'variegated'). Mentioned by Rand (First Reading Book in Micmac, 81, 1875) as one of the 7 districts of the Micmac country. **Memramcook.**—Alcedo, *Die. Geog.*, III, 147, 1788.

Menacupunt. A village of the Powhatan confederacy, in 1608, on Pamunkey r., King William co., Va.—Smith (1629), Virginia, I, map, repr. 1819.

Menaskunt. A village of the Powhatan confederacy, in 1608, on the N. bank of Rappahannock r., Richmond co., Va.—

Smith (1629), Virginia, I, map, repr. 1819.

Menatonon. A chief, in 1585-86, of the Chowanoc (q. v.), an Algonquian tribe formerly living in N. E. North Carolina, but now extinct. He was prominent during the time that Ralph Layne was in charge of the party sent out by Sir Walter Raleigh to establish a colony, and was one of the chiefs from whom Layne obtained most of his information regarding the country visited, Menatonon being made a prisoner a few days for the purpose. This knowledge of the new country is included in the report sent to Raleigh. According to Layne (Hakluyt, Voy., III, 312, 1810), Menatonon was lame, but for a savage was very grave and wise, and well acquainted not only with his own territory but with the surrounding regions and their productions. It is probable that he died soon after Layne's visit, as John White, who was in the country two years later, mentions his wife and child as belonging to Croatan, but says nothing of him. (C. T.)

Menawzhetaunaung. An Ottawa village, about 1818, on an island in the Lake of the Woods, on the s. boundary of Manitoba, Canada. (J. M.)

Me-nau-zhe-tau-naung.—Tanner, *Narr.*, 202, 1830. **Me-nau-zhe-taw-naun.**—*Ibid.*, 198. **Me-naw-zhe-tau-naung.**—*Ibid.*, 236.

Menchú. Apparently a former Cochimi rancheria in Lower California, not far from Concho bay, on the gulf coast.—Doc. Hist. Mex. 4th s., v, 66, 1857.

Mendica. A tribe, met by Cabeza de Vaca during the earlier part of his stay in Texas (1527-34), that lived "in the rear," i. e., inland. Nothing further is known of it. The country mentioned was probably occupied by Karankawan tribes, which are now extinct. See Cabeza de Vaca, Smith trans., 84, 1851; Gatschet, *Karankawa Inds.*, 46, 1891. (A. C. F.)

Menemesseg. A rendezvous of Nipmuc, Narraganset, and other hostile Indians in 1676, during King Philip's war, near New Braintree, Worcester co., Mass.

Meminimisset.—Fiske (1775) in Mass. Hist. Soc. Coll., 1st s., I, 258, 1806. **Menemesseg.**—Mass. Hist. Soc. Coll., 1st s., VI, 205, 1800. **Menemesse.**—Gookin (1677) in Trans. Am. Antiq. Soc., II, 487, 1836. **Miminimisset.**—Hutchinson in Mass. Hist. Soc. Coll., 1st s., I, 259, 1806. **Mominimisset.**—Whitney in Barber, *Hist. Coll.*, 559, 1839.

Menenquen. An unidentified tribe or band represented at the mission of San Antonio de Valero, Texas, between 1740 and 1750. They allied in their gentile state with the Caguas (Cavas?) and Si-james, who were related to the Emets and Sanas. There is some indication that they were from the middle or lower Guadalupe country. Some words of their language are preserved (Manzanet, 1690, in Texas Hist. Ass'n Quar., II, 309, 1899;

MS. Baptismal records of Mission Valero, partidas 564, 571, 869). See *Meracouman*.

(H. E. B.)

Menanque.—Baptismal records cited, partida 869.
Menanquen.—*Ibid.*, 571. **Menaquen.**—*Ibid.*, 577.
Merguan.—*Ibid.*, 448 (identical?). **Merhuan.**—*Ibid.*, 455 (identical?).

Menesouhatoba. A Dakota tribe or division, probably the Mdewakanton.

Menesouhatoba.—Pachot (1722) in Margry, *Déc.*, VI, 518, 1886. **Scioux des Lacs.**—*Ibid.*

Menewa ('great warrior'). A half-breed Creek, second chief of the Lower Creek towns on Tallapoosa r., Ala.; born about 1765. He was noted for trickery and daring in early life, when he was known as Hothlepoya ('crazy war hunter') and annually crossed the Cumberland to rob the white settlers in Tennessee of their horses. A murder committed in his neighborhood was charged to his band, and the people of Georgia burned one of their towns in revenge. It was suspected that MacIntosh had instigated the murder for the very purpose of stirring up trouble between the whites and his rival. When Tecumseh came to form a league against the white people, Menewa, foreseeing that MacIntosh with American aid and support would attack him in any event, readily joined in the conspiracy. He began the Creek war and was the war chief of his people, the head chief of the tribe being a medicine-man. Relying on a prophecy of the latter, Menewa made a wrong disposition of his men at the battle of the Horseshoe Bend, Gen. Jackson quickly discerning the vulnerable point in the Indian defenses. Menewa slew the false prophet with his own hand before dashing at the head of his warriors from the breastworks, already breached by the American cannon, into the midst of the Tennesseans, who were advancing to the assault. Of 900 warriors 830 were killed, and all the survivors, save one, were wounded. Menewa, left for dead on the field, revived in the night and, with other survivors, reached the hidden camp in the swamps where the women and children were waiting. The men on their recovery made their submission individually. Menewa's village was destroyed and his wealth in horses and cattle, peltry, and trade goods had disappeared. After his wounds were healed he reassumed authority over the remnant of his band and was in later years the leader of the party in the Creek Nation which opposed further cession of land to the whites and made resistance to their encroachments. MacIntosh counseled acquiescence in the proposal to deport the whole tribe beyond the Mississippi, and when for this he was condemned as a traitor, Menewa was reluctantly persuaded to execute the death sentence.

In 1826 he went with a delegation to Washington to protest against the treaty by which MacIntosh and his confederates, representing about one-tenth of the nation, had at Indian Spring, Jan. 8, 1821, presumed to cede to the United States the fertile Creek country. He proposed, in ceding the Creek country to the Government for white settlement, to reserve some of the land to be allotted in severalty to such of the nation as chose to remain on their native soil rather than to emigrate to a strange region. Through his advocacy the Government was induced to parcel some of the land among the Creeks who were desirous and capable of subsisting by agriculture, to be held in fee simple after a probationary term of five years. An arbitrary method of allotment deprived Menewa of his own farm and, as the one that he drew was undesirable, he sold it and bought other land in Alabama. When some of the Creeks became involved in the Seminole war of 1836, he led his braves against the hostiles. In consideration of his services he obtained permission to remain in his native land, but nevertheless was transported with his people beyond the Mississippi.

(F. H.)

Mengakonkia. A division of the Miami, living in 1682 in central Illinois with the Piankashaw and others.

Mangakekias.—Shea in Wis. Hist. Soc. Coll., III, 134, 1857. **Mangakekis.**—Bacqueville de la Potherie, II, 261, 1753. **Mangakokis.**—*Ibid.*, 335. **Mangakonkia.**—Jes. Rel. 1674, LVIII, 40, 1899. **Megacockia.**—La Salle (1682) in Margry, *Déc.*, II, 201, 1877.

Menhaden. A fish of the herring family (*Alosa menhaden*), known also as bonyfish, mossbunker, hardhead, pauhagen, etc., found in the Atlantic coast waters from Maine to Maryland. The name is derived from the Narraganset dialect of Algonquian. Roger Williams (1643) calls *munnawhattaug* a "fish like a herring," the word being really plural and signifying, according to Trumbull (Natick Dict., 69, 1903), 'they manure.' The reference is to the Indian custom of using these fish as manure for cornfields, which practice the aborigines of New England transmitted to the European colonists. *Menhaden* is thus a corruption of the Narraganset term for this fish, *munnawhat*, 'the fertilizer.' See *Pogy*.

(A. F. C.)

Meniolagomeka. A former Delaware or Munsee village on Aquanshicola cr., Carbon co., Pa. In 1754 the inhabitants, or part of them, joined the Moravian converts at New Gnadenhuetten in the same county.

(J. M.)

Meniolagamika.—Heckewelder in Trans. Am. Philos. Soc., n. s., IV, 359, 1834. **Meniolagomekah.**—Loskiel, Hist. Miss. United Breth., pt. 2, 26, 1794.

Menitegow (prob. for *Mini tigunk*, 'on the island in the river.'—W. J.). A

former Chippewa village on the E. bank of Saginaw r., in lower Michigan.—Saginaw treaty (1820) in U. S. Ind. Treat., 142, 1873.

Menominee (*meno*, by change from *mino*, 'good', 'beneficent'; *min*, a 'grain', 'seed', the Chippewa name of the wild rice.—Hewitt. Full name *Menominiwok ininiwok*, the latter term signifying 'they are men'). An Algonquian tribe, the members of which, according to Dr William Jones, claim to understand Sauk, Fox, and Kickapoo far more easily than they do Chippewa, Ottawa, and Potawatomi, hence it is possible that their linguistic relation is near to the former group of Algonquians. Grignon (Wis. Hist. Soc.

adopted after the latter reached their historic seat; it is possible they were previously known as Noquet. Charlevoix (Jour. Voy., II, 61, 1761) says: "I have been assured that they had the same original and nearly the same languages with the Noquet and the Indians at the Falls."

The people of this tribe, so far as known, were first encountered by the whites when Nicolet visited them, probably in 1634, at the mouth of Menominee r., Wis.-Mich. In 1671, and henceforward until about 1852, their home was on or in the vicinity of Menominee r., not far from where they were found by Nicolet, their settlements extending at times to Fox r. They have generally been at peace with the whites. A succinct account of them, as well as a full description of their manners, customs, arts, and beliefs, by Dr W. J. Hoffman, appears in the 14th Rep. Bureau of Ethnology, 1896. In their treaty with the United States, Feb. 8, 1831, they claimed as their possession the land from the mouth of Green bay to the mouth of Milwaukee r., and on the west side of the bay from the height of land between it and L. Superior to the headwaters of Menominee and Fox rs., which claim was granted. They now reside on a reservation near the head of Wolf r., Wis.

Major Pike described the men of the tribe as "straight and well made, about the middle size; their complexions generally fair for savages, their teeth good, their eyes large and rather languishing; they have a mild but independent expression of countenance that charms at first sight." Although comparatively indolent, they are described as generally honest, theft being less common than among many other tribes. Drunkenness was their most serious fault, but even this did not prevail to the same extent as among some other Indians. Their beliefs and rituals are substantially the same as those of the Chippewa. They have usually been peaceful in character, seldom coming in contact with the Sioux, but bitter enemies of the neighboring Algonquian tribes. They formerly disposed of their dead by inclosing the bodies in long pieces of birchbark, or in slats of wood, and burying them in shallow graves. In order to protect the body from wild beasts, three logs were placed over the grave, two directly on the grave, and the third on these, all being secured by stakes driven on each side. Tree burial was occasionally practised.

The Menominee—as their name indicates—subsisted in part on wild rice (*Zizania aquatica*); in fact it is spoken of by early writers as their chief vegetal food. Although making such constant

AMISKEWEU—MENOMINEE MAN. (MCKENNEY AND HALL)

Coll., III, 265, 1857) speaks of the Noquet as a part of the Menominee, and states that "the earliest locality of the Menominee, at the first visits of the whites, was at Bay de Noque and Menominee r., and those at Bay de Noque were called by the early French Des Noques or Des Noquia." (See *Noquet*.) The Jesuit Relation for 1671 includes the Menominee among the tribes driven from their country—that is, "the lands of the south next to Michilimackinac," which is the locality where the Noquet lived when they first became known to the French. It is generally believed that the Noquet, who disappeared from history at a comparatively early date, were closely related to the Chippewa and were incorporated into their tribes; nevertheless, the name Menominee must have been

use of it from the earliest notices we have of them, and aware that it could be readily grown by sowing in proper ground, Jenks (19th Rep. B. A. E., 1021, 1901), who gives a full account of the Menominee method of gathering, preserving, and using the wild rice, states that they absolutely refuse to sow it—evidently owing to their common unwillingness to “wound their mother, the earth.”

Chauvignerie gives their principal totems as the Large-tailed Bear, the Stag, and the Kilou (a sort of eagle). Neill (Hist. Minn., 1858) classes the Menominee, evidently on French authority, as Folles Avoines of the Chat and Original or Wild Moose and Elk. Hoffman gives the modern totems as follows:

I. The Owa'sse wi'dishi'anun, or Bear phratry, consisting of the following totems and subphratries: Owa'sse (Bear), Miqki'no (Mud-turtle), Kitā'mi (Porcupine), with the Namā'nu (Beaver) and O'sass (Muskrat) and subphratries.

II. The Kinē'u' wi'dishi'anun, or Eagle phratry, consisting of the following totems: Pināsh'iu (Bald Eagle), Kaka'k (Crow), Inā'qtēk (Raven), Ma'qkuana'ni (Red-tail Hawk), Hinanā'shiu' (Golden Eagle), Pe'nik'i'konau (Fish-hawk).

III. The Otā'tshia wi'dishi'anun, or Crane phratry, consisting of the following totems: Otā'tshia (Crane), Shakshak'eu (Great Heron), Os'se (“Old Squaw” Duck), O'kawa'siku (Coot).

IV. The Moqwai'o wi'dishi'anun, or Wolf phratry, consisting of the following totems: Moqwai'o (Wolf), “Hana” [ānā'm] (Dog), Apa'q'ssos (Deer).

V. The Mons wi'dishi'anun, or Moose phratry, with the following totems: Mō's (Moose), Oma'skos (Elk), Wabā'shiu (Marten), Wi'tshik (Fisher).

The earlier statements of Menominee population are unreliable. Most of the estimates in the nineteenth century vary from 1,300 to 2,500, but those probably most conservative range from 1,600 to 1,900. Their present population is about 1,600, of whom 1,370 are under the Green Bay school superintendency, Wis. Their villages (missions) were St Francis and St Michael.

The Menominee have entered into the following treaties with the United States: (1) Treaty of peace at St Louis, Mo., Mar. 30, 1817; (2) Treaty of Prairie du Chien, Wis., Aug. 19, 1825, with the Menominee and other Indians, fixing boundary lines between the several tribes; (3) Treaty of Butte des Morts, Wis., Aug. 11, 1827, defining boundary lines between the Menominee, Chippewa, and Winnebago; (4) Treaty of Washington, Feb. 8, 1831, defining boundary lines and ceding lands to the United States, a portion of the latter to be for the

use of certain New York Indians; (5) Treaty of Washington, Feb. 17, 1831, modifying the treaty of Feb. 8, 1831, in regard to the lands ceded for the use of the New York Indians; (6) Treaty of Washington, Oct. 27, 1832, in which certain modifications are made in regard to the lands ceded for the use of the New York Indians (Stockbridges and Munsee), and to certain boundary lines; (7) Articles of agreement made at Cedar Point, Wis., Sept. 3, 1836, ceding certain lands to the United States; (8) Treaty of Lake Powaw-hay-kon-nay, Oct. 18, 1848, ceding all their lands in Wisconsin, the United States to give them certain lands which had been ceded by the Chippewa; (9) Treaty at the Falls of Wolf r., May 12, 1854, by which they ceded the reserve set apart by treaty of Oct. 18, 1848, and were assigned a reserve on Wolf r., Wis.; (10) Treaty of Keshena, Wis., Feb. 11, 1856, ceding two townships of their reserve for the use of the Stockbridges and the Munsee.

Menominee. A Potawatomi village, taking its name from the resident chief, formerly situated on the N. side of Twin lakes, near the site of Plymouth, Marshall co., Ind., on a reservation sold in 1836. The name is also written *Menomonee*.

(J. M.)

Menoquet (possibly for *Mino'kwat*, 'good ice,' or *Mind'kwit*, 'banked cloud,' or *Mend'kwatwi*, 'fair weather.'—W. J.). A Potawatomi village, commonly called "Menoquet's village" from the name of a chief, formerly situated near the present Monoquet, Kosciusko co., Ind., on a reservation sold in 1836. The name is spelled also *Menoequet*, *Menoga* (*Indiana Geol. Rep.*, map, 1883), *Minoquet*, and *Monoquet*.

Menoquet's Village. A Chippewa village, so called after its chief, formerly on Cass r., lower Michigan, on a reservation sold in 1837.

Menostamenton. An unidentified division of the Sioux.

Manostamenton.—Jefferys, *Am. Atlas*, map 5, 1776. **Menostamenton.**—De l'Isle, map of La., in Neill, *Hist. Minn.*, 164, 1858.

Mento. A name used by French writers of the 17th and 18th centuries to designate a people in the vicinity of Arkansas r. and the southern plains. Marquette heard of them during his descent of the Mississippi in 1673, and located them on his map as w. of that river; Douay (1687) placed them near Red r. of Louisiana; Tonti (1690) states that they were in the vicinity of the Quapaw, and De l'Isle's map (1703) puts them on middle Arkansas r. La Harpe (1719) says they were 7 days' journey s. w. of the Osage. Beaurain about that time visited the people and gives the names of the 9 "nations" which, he says, formed one continuous village lying in a beautiful situation, the houses joining one another from E. to w. on the border of a s. w. branch of Arkansas r. The "nations" mentioned include the Tonkawa, Wichita, Comanche, Adai, Caddo, Waco, etc. The Mento were enemies of the Spaniards and the Apache tribes.

(A. C. F.)

Manton.—Iberville (1702) in *Margry, Déc.*, IV, 599, 1886. **Ma'w'zu-we.**—Dorsey, *Kansa MS.*, B. A. E., 1882 (Kansa name). **Matora.**—Marquette, map (1673) in *Shea, Discov.*, 263, 1852. **Matoua.**—*Shea, ibid.* **Mauton.**—Tonti (ca. 1690) in *French, Hist. Coll. La.*, I, 83, 1846. **Mento.**—La Harpe (1719) in *Margry, Déc.*, VI, 315, 1886. **Mentons.**—Jefferys, *Am. Atlas*, map 5, 1776. **Mentous.**—Hennepin, *New Discov.*, pt. II, 43, 1698. **Mintou.**—Coxe, *Carolina*, II, map, 1741.

Mentokakat. A Koyukukhotana village on the left bank of the Yukon, Alaska, 20 m. above the mouth of Melozi r.; pop. 46 in 1844; 20 in 1880.

Mentokakat.—Petroff in 10th Census, Alaska, 12, 1884. **Minkhotliatno.**—Zagoskin quoted by Petroff, *ibid.*, 37. **Montekakat.**—U. S. Land Off. map of Alaska, 1898.

Menunkatuc (prob. from *munon'kutteau*, 'that which fertilizes or manures land,' hence 'menhaden country.'—Trumbull).

A village, under a sachem squaw, formerly at Guilford, New Haven co., Conn., on a tract sold in 1639.

(J. M.)

Manunkatuck.—Doc. of 1641 cited by Trumbull, *Ind. Names Conn.*, 29, 1881. **Menunkatuc.**—Drake, *Ind. Chron.*, 157, 1836. **Menunkatuck.**—Ruggles in *Mass. Hist. Soc. Coll.*, 1st s., IV, 182, 1795. **Menunketuck.**—Trumbull, *op. cit.* **Menunquatucke.**—*Ibid.* **Monunkatuck.**—*Ibid.* **Munnucketucke.**—*Ibid.* **Mununketucke.**—*Ibid.*

Meochkonck. A former Minisink village probably situated about upper Delaware r. ins. E. New York.—Van der Donck (1656) quoted by Ruttenber, *Tribes Hudson R.*, 96, 1872.

Mepayaya. A tribe mentioned in the manuscript relation of Francisco de Jesus María, in 1691, in his list of the Texas (i. e., the group of customary allies, including the Hasinai), as s. w. of the Nabadache country of Texas. This may

be the Payaya tribe, who were in the vicinity of San Antonio. (H. E. B.)

Mequachake ('red earth.'—Hewitt). One of the 5 general divisions of the Shawnee, whose villages on the headwaters of Mad r., Logan co., Ohio, were destroyed by United States troops in 1791. (J. M.)

Machachac.—Drake, Tecumseh, 50, 1852. **Machichac**.—Ibid., 71. **Mackacheek**.—Howe, Hist. Coll., 150, 1851. **Mackacheek**.—Royce in 18th Rep. B. A. E., Ohio map, 1899. **Magueck**.—Alcedo, Dic. Geog., III, 22, 1788 (probably identical). **Makostrake**.—McKenney and Hall, Ind. Tribes, III, 111, 1854. **Maquiches**.—Stone, Life of Brant, II, 43, 1861. **Me-nekut'thégi**.—Gatschet, Shawnee MS., 1879. **Mequachake**.—Johnston (1819) in Brinton, Lenape Leg., 29, 1885.

Meracouman. A tribe or village mentioned by Joutel as being on or near the route taken when going with La Salle in 1687 from Ft St Louis on Matagorda bay to Maligne (Colorado) r., Tex. If the list of so-called tribes given by the Ebahamo Indians and recorded by Joutel followed the geographic order of his line of march, the Meracouman must have dwelt near the Colorado r. of Texas. Joutel remarks that when the Indians approached or bathed in the current of the river, the horses always fled. Gatschet states that the custom of the Karankawa Indians of anointing their skin with shark's oil caused horses and cattle to run from the disagreeable odor to the distance of two or three miles. As Karankawan tribes are said to have dwelt in the vicinity of Colorado r., it is possible that the Meracouman may have belonged to that stock (see Gatschet, Karankawa Inds., 1891). Perhaps they are the Maliacones of Cabeza de Vaca or the Manico of Manzanet. In 1739 there were neophytes of the Merguan, or Merhuan, tribe at San Antonio de Valero mission (Baptismal records, partidas 448, 455, MS., cited by H. E. Bolton, inf'n, 1906). They were with others who appear to have come from near Guadalupe r., and they may be identical with the Meracouman, as well as with the Menenquen (q. v.). (A. C. F. H. E. B.)

Meracouman.—Joutel (1687) in French, Hist. Coll. La., I, 137, 1846. **Meraquaman**.—Joutel (1687) in Margry, Déc., III, 288, 1878. **Muracumanes**.—Barcia, Ensayo, 271, 1723.

Merced (Span.: 'grace', 'mercy'). A group of Cajunche rancherias, situated, in 1775, in N. E. Lower California, w. of the Rio Colorado, and 4 leagues s. w. of Santa Olalla, a Yuma rancheria. These settlements contained about 300 natives when visited by Father Garcés in 1775 and were provided with abundant corn, melons, calabashes, and beans, but with little wheat. See Garcés, Diary (1775), 172-173, 1900.

Merced. A Pima rancheria, visited by Father Kino in 1700, and placed on maps

of Kino (1701) and Venegas (1759) N. E. of San Rafael, in what is now s. Arizona. **La Merced**.—Venegas, Hist. Cal., I, 300, map, 1759. **Merced**.—Kino map (1701) in Bancroft, Ariz. and N. Mex., 360, 1889.

Merced. Mentioned as a tribe apparently inhabiting the Merced r. region, California. Probably Moquelumnan.

Mercedes.—Barbour et al. (1851) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 60, 1853.

Mer, **Gens de la** (French: 'people of the sea,' or **Gens de la Mer du Nord**, 'people of the sea of the north'). A collective term applied by the early Jesuits to the Algonquian tribes about Hudson bay, Canada. (J. M.)

Gens de la Mer du Nord.—Jes. Rel. 1670, 79, 1858. **Gens de Mer**.—Ibid., 1643, 3, 1858.

Merip. A Yurok village on Klamath r., Cal., about 10 m. below the mouth of the Trinity. (A. L. K.)

Merkitok. An Eskimo winter habitation near Bute bay, s. w. Greenland.—Crantz, Hist. Greenland, I, 8, 1767.

Merric. A small Algonquian tribe or division formerly inhabiting the s. coast of Queens co., Long Island, N. Y., from Rockaway to South Oyster bay. Their name survives in the hamlet of Merricks, which is on the site of their principal village. (J. M.)

Marricke.—Doc. of 1675 in N. Y. Doc. Col. Hist., XIV, 705, 1883. **Meracook**.—Treaty of 1656 in Rutenber, Tribes of Hudson River, 125, 1872. **Mericoock**.—Doc. of 1657 in N. Y. Doc. Col. Hist., XIV, 416, 1883. **Mericke**.—Thompson, Long Id., 344, 1839. **Merikoke**.—Wood in Macauley, N. Y., II, 252, 1829. **Meroke**.—Thompson, Long Id., 67, 1839. **Merriack**.—Deed of 1643 in N. Y. Doc. Col. Hist., XIV, 530, 1883. **Merric**.—Thompson, Long Id., 67, 1839. **Merricke**.—Doc. of 1675 in N. Y. Doc. Col. Hist., XIV, 705, 1883.

Mershom. A former Chumashan village at Cañada de los Sauces, w. of San Buenaventura, Ventura co., Cal.

Mer-cóm.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884 (c=sh).

Mesa Chiquita (Span.: 'small mesa' or table-land). A Diegueño village in w. San Diego co., Cal.—Jackson and Kinney, Rep. Miss. Inds., 24, 1883.

Mesa del Nayarit. A pueblo of the Cora in the Sierra de Nayarit, on the upper waters of the Rio de Jesus María, in the N. part of the Territory of Tepic, lat. 23° 25', Mexico.—Lumholtz, Unknown Mex., I, 500, 1902.

Mesa Grande (Span.: 'large mesa' or table-land). A small Diegueño village in w. San Diego co., Cal., with 103 inhabitants in 1880. The name is now applied to a reservation of 120 acres of patented, largely desert land, 75 m. from Mission Tule River agency. See Jackson and Kinney, Rep. Mission Inds., 24, 1883; Ind. Aff. Rep., 175, 1902.

Mescal (Aztec: *mexcalli*, 'mell [maguey] liquor'). The fleshy leaf bases and trunk of various species of agave. It was roasted in pit ovens and became a sweet and nutritious food among the

Indians of the states on both sides of the Mexican boundary. Mescal pits are usually circular depressions in the ground, 6 to 20 ft in circumference, sloping evenly to the center, a foot to 3 ft in depth, and lined with coarse gravel. A fire was built in the pit, raked out after the stones had become hot, and the mescal plants put in and covered with grass. After two days' steaming the pile was opened and the mescal was ready for consumption.

The product must not be confounded with the distilled spirit known in Mexico under the same name, nor with the *peyote* cactus. Mescal is a valuable food resource among the Apache (a division of whom, the Mescaleros, is named from their custom of eating mescal), as well as among the Mohave, Yuma, Ute, Paiute, and practically every tribe of the region producing the agave. An extensive commerce in this sweet was carried on with outlying tribes, as the Hopi and other Pueblos. So far as known mescal was not fermented by the Indians to produce an intoxicating drink before the coming of the Spaniards. The food value of mescal is regarded as of such importance that the entire population of Presidio del Norte (El Paso), on the failure of their crops half a century ago, subsisted for six months on roasted agave (Bartlett, Pers. Narr., II, 291, 1854). See *Peyote*. (W. H.)

Mescaleros (Span.: 'mescal people,' from their custom of eating mescal). An Apache tribe which formed a part of the Faraones and Vaqueros of different periods of the Spanish history of the S. W. Their principal range was between the Rio Grande and the Pecos in New Mexico, but it extended also into the Staked plains and southward into Coahuila, Mexico. They were never regarded as so warlike as the Apache of Arizona, otherwise they were generally similar. Mooney (field notes, B. A. E., 1897) records the following divisions: Nataina, Tuetinini, Tsihlinainde, Guhlkaide, and Tahuunde. These bands intermarry, and each had its chief and subchief. The Guhlkaide are apparently identical with the "Cuelcajenne" of Orozco y Berra and others, who classed them as a division of the Llaneros; the "Natages" are probably the same as the Nataina rather than the Lipan or the Kiowa Apache, while the Tsihlinainde seem to be identifiable with the "Chilpaines." In addition Orozco y Berra gives the Lipillanes as a Llanero division.

The Mescaleros are now on a reservation of 474,240 acres in s. New Mexico, set apart for them in 1873. Population 460 in 1905, including about a score of Lipan, q. v. (F. W. H.)

Ahuatcha.—Gatschet, Yuma-Spr., I, 413, 1883 (Mohave name). **Apaches des 7 Rivières**.—Baudry des Lozières, Voy. Louisiane, map, 1802 (named from seven rivers in s. e. N. Mex.). **Apaches Llaneros**.—Bonnycastle, Span. Am., 68, 1819. **Apaches Mescaleros**.—Ibid. **Apaches of Seven Rivers**.—Jefferys, Am. Atlas, map 5 (1763), 1776. **Apachos Mescaleros**.—Morse, Am. Univ. Geog., I, 685, 1819. **Chi-she'**.—Hodge, field notes, B. A. E., 1895 (Keresan name). **Ebikwita**.—Gatschet, Creek Migr. Leg., I, 23, 1884 (here given as a synonym of Cherokee). **Escequatas**.—Neighbors in H. R. Doc. 100, 29th Cong., 2d sess., 5, 1847. **Esikwita**.—Mooney in 17th Rep. B. A. E., 245, 1898 (Kiowa name). **Es-ree-que-tees**.—Butler and Lewis in H. R. Doc. 76, 29th Cong., 2d sess., 6, 1847. **Es-se-kwit'-ta**.—ten Kate, Synonymie, 9, 1884 (Comanche name: trans., 'gray buttocks'), but really signifying 'gray dung'. **Essekwi'ta**.—ten Kate, Reizen in N. Am., 376, 1885. **Esse-qua-ties**.—Butler and Lewis in H. R. Doc. 76, 29th Cong., 2d sess., 7, 1847. **Euquato'ps**.—Schoolcraft (after Neighbors), Ind. Tribes, I, 518, 1851 (probably misprint of Esequato'ps=Esikwita). **Ho-tashin**.—Mooney, field notes, B. A. E., 1897 (Comanche name: apparently a corrupted Mescalero word). **Inatahin**.—Ibid. ('mescal people': Lipan name). **Mamakans Apaches**.—Warden, Account U. S. A., III, 562, 1819 (probably identical). **Mascaleros**.—Schoolcraft, Ind. Tribes, v, 207, 1855. **Masceleros**.—Ibid. **Mescaleres**.—Robin, Voy. à la Louisiane, III, 15, 1807. **Mescalero Apaches**.—Bell in Jour. Ethnol. Soc. Lond., I, 240, 1869. **Mescaleros**.—Tex. State Arch., doc. 503, 1791. **Mescalers**.—Ind. Aff. Rep., 218, 1861. **Mescallos**.—Haines, Am. Indian, 134, 1888. **Mescalos**.—Taylor in Cal. Farmer, Apr. 17, 1863. **Mescalero Apaches**.—Meriwether in Sen. Ex. Doc. 69, 34th Cong., 1st sess., 15, 1856. **Mescaluros**.—Box, Advent., 320, 1869. **Mescatarks**.—Ind. Aff. Rep., 429, 1853 (misprint). **Mescolero**.—Ind. Aff. Rep., 1857, 288, 1858. **Mescaleros**.—Gregg, Comm. Prairies, I, 290, 1844. **Miscaleros**.—Morgan in N. Am. Narr., 117, 1833. **Muska-le-ras**.—Schoolcraft, Ind. Tribes, I, 518, 1851. **Mus-ka-leros**.—Ind. Aff. Rep. 1849, 28, 1850. **Muskeleras**.—Neighbors in H. R. Doc. 100, 29th Cong., 2d sess., 5, 1847. **Muskeleros**.—Ind. Aff. Rep., 574, 1848. **Nashkali dinne**.—Gatschet, notes, 1886 (Navaho name). **Natahē'**.—Mooney, field notes, B. A. E., 1897 ('mescal people': Lipan name). **Natahin**.—Ibid. (Jicarilla name). **Na-ta'-né**.—Hodge, field notes, B. A. E., 1895 (Picuris name). **Ndatahē'**.—Mooney, field notes, B. A. E., 1897 (Lipan name). **Pa-ha-sa-be'**.—ten Kate, Synonymie, 8, 1884 (Tesuque name). **Sacramentos**.—Hamilton, Mex. Handbk., 48, 1883. **Sacramento Apaches**.—Parke, Map New Mex., 1851 (doubtless identical although located as distinct). **Saline Apaches**.—Vargas (1692) quoted by Davis, Span. Conq. N. Mex., 364, 1869. **Sejen-né**.—Escudero, Not. Estad. de Chihuahua, 212, 1834 (native name). **Tashi**.—ten Kate, Reizen in N. Am., 376, 1885. **Tiyitiwa hunpūn**.—Gatschet, notes, 1885 (Isleta name). **Tsi'-se'**.—Hodge, field notes, B. A. E., 1895 (San Ildefonso Teva name, cf. *Chi-shē'*, above).

Mescalos. A former tribe or tribes in N. E. Mexico and s. Texas. The one oftenest referred to lived not far from the junction of the Salado with the Rio Grande, and Mescalos are mentioned at the neighboring mission of San Juan Bautista, founded in 1699. These spoke a Coahuiltecan dialect. De Leon, in 1689, mentions them in connection with the Hapes, Jumenes, and Xiabu. (H. E. B.) **Mescale**.—De Leon (1689) in Tex. Hist. Ass'n Quar., VIII, 205, 1905. **Mescate**.—Manzanet, ibid.

Meseckunnoghquoh. See *Little Turtle*.

Mesheka (*Me-she'-kä*, 'mud turtle'). A gens of the Chippewa, q. v.—Morgan, *Anc. Soc.*, 166, 1877.

Meshekenoghqua. See *Little Turtle*.

Mesheketeno. A Potawatomi village which took its name from the resident chief, situated on Kankakee r., a short distance above the present Kankakee, N. E. Illinois, in 1833.—Camp Tippecanoe treaty (1834) in U. S. Ind. Treaties, 698, 1873.

Mesheckunnoghquoh. See *Little Turtle*.

Meshingomesia. A former Miami village, commonly called after a chief of this name, situated on a reservation on the N. E. side of Mississinewa r., in Liberty tp., Wabash co., Ind. The reserve was originally established for Meshingomesia's father, Metosinia, or Matosinia, in 1838, and its inhabitants were known as Meshingomesia's band. In 1872 the land was divided among the surviving occupants and patented to them, being the last land held as an Indian reservation in Indiana.

(J. M.)

Me-shing-go-me-sia.—Royce in 1st Rep. B. A. E., 262, 1881. **Me-shing-go-me-zia.**—Treaty of 1840 in U. S. Ind. Treat., 510, 1873. **Me-shin-gi-me-yia.**—Hough, map in Indiana Geol. Rep., 1883. **Shingle-masy.**—Common local form.

Meshkemau. An Ottawa village, commonly called "Meshkemau's village," from the name of its chief, formerly existing on Maumee bay, Lucas co., Ohio, on land sold in 1833. The name is also written Meskemau and Mishkemau.

Meshtshe (*Měc'-tēč*, 'village at the mouth of a small creek'). A former Mishikhwut-metunne village on upper Coquille r., Oreg.—Dorsey in Jour. Am. Folk-lore, III, 232, 1890.

Mesitas (Span.: 'little mesas' or tablelands). An ancient settlement of the Tepecano, the ruins of which are situated E. of the Río de Bolaños, about 3 m. S. E. of Mezquitic, in Jalisco, Mexico.—Hrdlicka in Am. Anthropol., v, 389, 409, 1903.

Meskwadare (for *Miskwādāsi*, 'small water-turtle.'—W. J.). A gens of the Chippewa, q. v.

Me-skwa-da'-re.—Morgan, *Anc. Soc.*, 166, 1877. **Miskwādāsi.**—Wm. Jones, *inf'n*, 1906.

Mesquawbuck ('red rock place.'—Hewitt). A former Potawatomi village, commonly known as "Mesquawbuck's village," from a chief of this name, near the present Oswego, Kosciusko co., Ind., on a reservation sold in 1836. The name is spelled also Mesquabuck and Musquabuck.

(J. M.)

Mesquite (adapted from Aztec for *Prosopis juliflora*). A village of the central Papago, probably in Pima co., S. Ariz.; said to have 500 inhabitants in 1863 and 70 families in 1865.

Mesquit.—Poston in Ind. Aff. Rep. 1863, 385, 1864.

Mesquite.—Browne, Apache Country, 291, 1869.

Misquito.—Bailey in Ind. Aff. Rep., 208, 1858. **Mus-**

quito.—*Ibid.*, 135, 1865. **Raiz del Mesquite.**—Orozco y Berra, *Geog.*, 348, 1864 (sig. 'Mesquite root' probably identical).

Mesquites. A tribe represented in the 18th century at the San Antonio missions, Texas. They are mentioned as early as 1716, by Espinosa, who met one Indian of this tribe W. of Arroyo Hondo (Diario, 1716, MS.); he also met others near the Brazos with the Tonkawan Indians of Ranchería Grande. In 1727 Rivera mentions them at San Antonio with the Payayas and Aguastayas (Diario, leg. 1994, 1736). There are proofs that in their gentile state they intermarried with the Ervapiames and Muruames (Baptismal Rec. of Valero, partidas 194, 418), and also with the Payayas (*ibid.*, partida 90). The first baptism of one of this tribe recorded at San Antonio de Valero is dated Nov. 8, 1720. In 1734 one person at a residencia in San Antonio acted as interpreter for Xarame, Payaya, Siaguan, Aguastaya, and Mesquite witnesses (Residencia de Bustillos y Zevallos, Béxar archives, 1730-36); but too much must not be inferred from this circumstance. In 1768 Solís reported Mesquites at San José mission, with Pampopas, Aguastallas, Pastias, and Xarames (Diario, Mem. Nueva España, xxvii, 270), and in 1793 Revillagigedo implied that this tribe constituted a part of the few neophytes still at this mission (Carta, Dic., 27, 1793). A tribe called Mesquites lived in 1757 across the Río Grande at Villa de Santander. These were divided into 4 bands, consisting of 150 families (Tiendo de Cuervo, Revista, Archivo General, MS.). (H. E. B.)

Mesquita.—Baptismal records cited above, partida 310. **Mesquites.**—Solís (1767) quoted by H. E. Bolton, *inf'n*, 1906. **Mesquittes.**—Residencia, cited above, 1734. **Mezquites.**—Rivera, Diario, leg. 1994, 1736.

Messiah legends. See *Ghost dance*.

Mestethltun (*Mēs-tēč'-tūn*). A former village of the Tolowa, on the coast near Crescent, Cal.—Dorsey in Jour. Am. Folk-lore, III, 236, 1890.

Mestizo. See *Métis*, *Mixed-bloods*.

Meta. A Yurok village on Klamath r., Cal., 4 or 5 m. above Klamath bluffs.

Me'h-teh.—Gibbs in Schoolcraft, Ind. Tribes, III, 138, 1853. **Meta.**—A. L. Kroeber, *inf'n*, 1905. **Mi-ta.**—Powers in Cont. N. A. Ethnol., III, 44, 1877.

Metacom, Metacomet. See *King Philip*.

Metal-work. Before the arrival of the whites, the tribes N. of Mexico had made considerable progress in the arts of metal-lurgy, dealing almost exclusively with copper (q. v.). The other metals utilized were gold, silver, iron, and galena (lead ore). Galena was known only in the form of ore, and the same is true of iron (hematite, pyrites, etc.), except where chance bits of meteoric iron came into the hands of the native artisan. Copper alone was mined (see *Mines and Quarries*).

The four metals, copper, gold, silver, and iron (meteoric), were shaped mainly by cold-hammering and grinding, but heat no doubt was employed to facilitate the hammering processes and in annealing. It is believed that copper was sometimes swedged, or in sheet form pressed into molds. But the remarkable repoussé figures representing elaborately costumed

REPOUSSÉ FIGURE IN SHEET-COPPER, FROM A GEORGIA MOUND. (THOMAS)

and winged personages in sheet metal, found in mounds in Georgia (Thomas), and other more highly conventionalized figures from Florida mounds (Moore), give evidence of a degree of skill seemingly out of keeping with what is known of the general accomplishments of the northern tribes. Cushing, however, has demonstrated that repoussé work of like char-

COPPER EAR ORNAMENT, WITH COPY BY WILLOUGHBY, USING ONLY STONE TOOLS; 1-2. (WILLOUGHBY)

acter can be accomplished by simple methods—the employment of pressure with a bone or an antler point, the sheet being placed upon a yielding surface, as of buckskin; but some of this work, especially the Georgia specimens, shows a degree of precision in execution apparently beyond the reach of the methods thus suggested.

Examples of overlaying or plating with thin sheets of copper, found by Moore in

the mounds of Florida and Alabama, and by Putnam, Moorehead, Mills, and others in the mounds of Ohio, are hardly less remarkable; but that these are well within the range of workmen of intelligence employing only stone tools has been amply proved by Willoughby. The thin sheets of copper are readily produced by hammering with stone tools with the aid of annealing processes and the skilful use of rivets (Moore). It can hardly be doubted that copper, gold, and silver were sometimes melted by aboriginal metal-workers N. of Mexico, and that

METHOD OF INDENTING AND CUTTING COPPER PLATES. (CUSHING)

bits of native copper were freed from the matrix of rock by this means. There seems to be no satisfactory record, however, of casting the forms of objects even in the rough, and there is no proof that ores of any kind were reduced by means of heat. It is a remarkable fact that up to the present time no prehistoric crucible, mold, pattern, or metal-working tool of any kind whatsoever has been identified. No metal-worker's shop or furnace has been located, although caches of implements and of the blank forms of implements more or less worked have been found in various places,

suggesting manufacture in numbers by specialists in the art. The use of artificial alloys was unknown, the specimens of gold-silver and gold-copper alloys obtained in Florida being of exotic origin. Stories of the hardening of copper by these or other American tribes, otherwise than by mere hammering, are all without a shadow of foundation. A few of the tribes, notably the Navaho and some of the Pueblos of Arizona and New Mexico, and the Haida, Tlingit, and others in the far Northwest, are skilful metal-workers, although the art as practised by the Navaho and described by Matthews, while primitive in character, was adopted from the Spaniards. The Haida, Tlingit, and other tribes of British Columbia and Alaska have probably retained the aboriginal methods in part at least. Niblack (Rep. Nat. Mus. 1888, p. 320) speaks of this work as follows: "The tools with which the Indian artisan works out the surprisingly well-finished metal ornaments and implements of this region are few in number. For bracelet making the silversmith has a hammer, several cold chisels, and an etching tool which is merely a sharpened steel point or edge. Improvised iron anvils replace the stone implements of this kind doubtlessly used in former days. Copper is beaten into the required shapes. Steel tools now used are very deftly tempered and sharpened by the native artisan, who retains the primitive form of his implement or tool, and merely substitutes the steel for the former stone blade or head. The ingenuity which the Indians show in adapting iron and steel to their own uses is but one of the many evidences of their cleverness and intelligence." See *Copper, Gold, Iron, Silver*.

The working of metals by primitive methods are treated more or less fully in the following works: Cushing in Am. Anthropol., vii, 1894; Foster, Prehist. Races, 1878; Fowke, Archaeol. Hist. Ohio, 1902; Holmes in Am. Anthropol., iii, 1901; Hoy in Trans. Wis. Acad. Sci., iv, 1878; McGuire in Am. Anthropol., v, no. 1, 1903; Matthews in 2d Rep. B. A. E., 1883; Moore (1) in Am. Anthropol., v, no. 1, 1903, (2) in Jour. Acad. Nat. Sci. Phila., 1894-1903; Moorehead in Am. Anthropol., v, no. 1, 1903; Niblack in Rep. Nat. Mus. 1888, 1890; Packard in Smithsonian. Rep. 1892, 1893; Putnam in Ann. Reps. Peabody Mus.; Schoolcraft, Ind. Tribes, i-vi, 1851-57; Squier and Davis, Ancient Monuments, 1848; Thomas in 12th Rep. B. A. E., 1894; Willoughby in Am. Anthropol., v, no. 1, 1903. (w. h. h.)

Metamapo. A Calusa village on the s. w. coast of Florida, about 1570.—Fontaneda Memoir (ca. 1575), Smith trans., 19, 1854.

Metate (Aztec: *metlatl*). The name commonly given to the somewhat flat stones on which maize, acorns, seeds, chile, and other foods are ground by crushing and rubbing with a hand-stone called a muller, or mano (Spanish 'hand'). With tribes depending largely on such materials for food, mealing stones of one kind or another are an important factor in their domestic economy. The metates of middle America are often elaborate in shape, many of them being carved to represent animal forms, the upper surface, or back, serving for the grinding plate. In New Mexico and Arizona the slabs, although carefully shaped, are usually without legs or other projections; often they are trough-shaped, and

METATE USED BY UTA UTES (1-8)

OBLONG MULLER; NEW MEXICO (1-5)

the muller used is an oblong flattish stone of subrectangular outline. The modern Pueblo Indians combine two or more of the mealing plates in a group bedded side by side in clay and separated and surrounded by stone slabs, adobe, or boards to retain the meal. The surfaces of the metates, as well as of the mullers, are of different textures, grading from coarse lava to fine sandstone, and corn crushed on the coarser stone is passed to the others in succession for further refinement until the product is almost as fine as wheat flour. The processes for pulverizing and for pulping are practically the same, the grain or other substance being treated dry in one case and

SET OF GRADED METATES; HOPI (MINDELEFF)

moist in the other. The Mexican type of metate does not extend northward much beyond the limits of the Pueblo region, although similar flattish stones were and are used for grinding in many parts of the country. The typical grinding plate grades through many intermediate forms into the typical mortar, and the mano or muller similarly passes from the typical flattish form into the

discoidal and cylindrical pestle. Many of these hand-stones serve equally well for rubbing, rolling, and pounding. See *Mortars, Mullers, Notched plates, Pestles*.

DISCOIDAL MULLER; CALIFORNIA (1-3)

PESTLE-MULLER; ILLINOIS (1-4)

Consult Cushing in *Millstone*, ix, x, 1884-1885; Fewkes (1) in 17th Rep. B. A. E., 1898, (2) 22d Rep. B. A. E., 1903; Mindeleff in 8th Rep. B. A. E., 1891; James Stevenson in 2d Rep. B. A. E., 1883; M. C. Stevenson in 23d Rep. B. A. E., 1904. (W. H. H.)

Metate ruin. A prehistoric pueblo ruin in the Petrified Forest, across the wash from the "petrified bridge," near the Navaho-Apache co. boundary, Arizona; locally so called on account of the numerous stone milling troughs, or metates, set on edge in circular or linear form and scattered over the surface. The builders of the pueblo are unknown. The pottery, gray-brown and black in color, is coarse in texture and decorated with rude incision and by indented coiling.—Hough in Rep. Nat. Mus. 1901, 318, 1903.

Metates. A former Opata pueblo at the E. base of the Sierra de Teras, about 12 m. W. of Baseraca, E. Sonora, Mexico. Possibly identical with Teras, Guapacomatzi, or Toapara, which pueblos are mentioned in early documents as being in that vicinity.—Bandelier in Arch. Inst. Papers, iv, 524 et seq., 1892.

Metewa (prob. for *Metawü*, 'he sulks.'—W. J.). A Potawatomi chief, distinguished in his tribe as a warrior and an orator. When the Potawatomi were subsidized by the British at the beginning of the War of 1812 he was one of the leaders of the party that massacred the families of the garrison and citizens of Chicago as they were retreating to Detroit. He led the band that harassed the troops who marched in the fall of 1812 to the relief of Ft. Wayne and was shot in the arm by Gen. W. H. Harrison. At a council held at Chicago in 1821 he impressed the whites by his eloquence and reasoning powers, and also when the treaty of the Wabash was concluded in 1826. He advocated the education of Indian youth and sent several from his tribe to the Choctaw academy in Kentucky. He died in a drunken debauch at Ft. Wayne, in 1827, after having conducted difficult negotiations with dignity and skill in a conference with commissioners of the Government.—McKenney and Hall, *Ind. Tribes*, 59-64, 1858. See *Muskwawasepecotan*.

Meteahke. A Mandan band.

High Village.—Morgan, *Anc. Soc.*, 158, 1877. *Me-te-ah'-ke.*—*Ibid.*

Metewemesick ('place of black earth'). A former Nipmuc (?) settlement on Quinebaug r., near Sturbridge, Mass.—Roger Williams (1643) quoted by Tooker, *Algonquian Series*, viii, 33, 1901.

Methow (*Met'-how*). A Salishan tribe of E. Washington, formerly living about Methow r. and Chelan lake, now chiefly gathered on the Colville res. Their number is not officially reported.

Battle-le-mule-emauch.—Ross, *Adventures*, 290, 1847. **Lahtohs.**—Van Valkenburgh in *Ind. Aff. Rep.*, 235, 1865 (perhaps a misprint for Methows). **Meat-who.**—Ross, op. cit. **Meshons.**—Mooney in 14th Rep. B. A. E., 734, 1896. **Met-cow-we.**—*Orig. Jour. Lewis and Clark*, iv, 321, 1905. **Metowwee.**—Lewis and Clark, *Exped.*, ii, 252, 1814. **Metowwee.**—*Ibid.*, ii, 318, 1817. **Methau.**—*Ind. Aff. Rep.*, 253, 1877. **Methews.**—H. R. Doc. 102, 43d Cong., 1st sess., 1, 1874. **Methoms.**—Shanks, et al. (1873), *ibid.*, 4. **Methow.**—*Ind. Aff. Rep.*, 302, 1877. **Mitau.**—Mooney in 14th Rep. B. A. E., pl. lxxxviii, 1896. **Mithouies.**—Winans in *Ind. Aff. Rep.*, 23, 1870.

Methy. The burbot (*Lotamaculosa*), the *loche* of the Canadian French, a fish common in the waters of N. W. Canada. The word is taken from the name of this fish in the Wood Cree dialect of Algonquian, the Cree proper term being *mihyey*, according to Lacombe. L. Methy in Athabasca is named from this fish; also a lake in Labrador. (A. F. C.)

Meti. A former rancheria of gentile (probably Diegueño) Indians near San Diego, S. Cal.—Ortega (1775) quoted by Bancroft, *Hist. Cal.*, i, 253, 1884.

Métis ('mixed', from French *métis*, a derivative of Latin *miscere*, 'to mix'), or *metif*. A term used by the French-speaking population of the N. W. to designate persons of mixed white and Indian blood. Among the Spanish-speaking population of the S. W. the word *mestizo*, of the same derivation, is used, but is applied more especially to those of half-white and half-Indian blood. The term *mustee*, a corruption of *mestizo*, was formerly in use in the Gulf states. In the W. the term "half-breed" is loosely applied to all persons of mixed white and Indian blood, without regard to the proportion of each. See *Mixed-bloods*.

(J. M.)

Maitiffs.—Brevel *vide* Sibley (1805) in *Am. State Papers*, *Ind. Aff.*, i, 730, 1832. **Mestigos.**—Williams, *Vt.*, i, 494, 1809 (misprint). **Mestizo.**—Correct Spanish form; feminine *mestiza*. **Métis.**—Correct French form. **Mustees.**—Report of 1741 in Carroll, *Hist. Coll. S. C.*, ii, 353, 1836. **Mustees.**—Bermuda Royal Gazette, July 13, 1875, *vide* Jour. Anthropol. Inst., v, 491, 1876 (used in Bermuda for descendants of Indian slaves brought from the U. S.). **Wissakodewinini.**—Baraga, *Ojibwe-Eng. Dict.*, 421, 1880 (Chippewa name: 'half-burnt wood man'; from *wissakode*, 'burnt trees', referring to their mixed light and dark complexion; pl. *Wissakodewininiwog*. He gives *aiabüwisid* as the literal word for 'half-breed').

Metlakatla. A Tsimshian town 15 m. S. of Port Simpson, Brit. Col. Anciently

there were many towns in this neighborhood, and while the mission station of the Church of England (established in 1857 at a Tsimshian village of the same name) was conducted by Rev. Wm. Duncan, Metlakatla was a flourishing place. Trouble arising over the conduct of his work, Duncan moved in 1887 to Port Chester, or New Metlakatla, on Annette id., Alaska, and most of the Indians followed him. The old town, which contained 198 inhabitants in 1906, is now the site of an Indian school of the Church of England. New Metlakatla, including whites and Indians, numbered 823 in 1890 and 465 in 1900. See *Missions*. (J. R. S.)

Metlah Catlah.—Horetzky, Canada on Pac., 148, 1874. **Metlahcatlah.**—Tolmie and Dawson, Vocab. Brit. Col., map, 1884. **Metlahkatlah.**—Heming in Can. Pacific R. R. Rep. Prog., iii, 1877. **Metlakatla.**—Whymper, Alaska, 59, 1869. **Metlakatla.**—Can. Ind. Aff., pt. II, 68, 1902. **Metla-katla.**—Dawson, Queen Charlotte Ids., 123b, 1880.

Metoac (contraction of *Meht-anaw-ack*, 'land of the ear-shell or periwinkle.'—Tooker). A collective term embracing the Indians of Long Island, N. Y., who seem to have been divided into the following tribes, subtribes, or bands: Canarsee, Corchaug, Manhasset, Massapequa, Matinecoc, Merrie, Montauk, Nesaquake, Patchoag, Rockaway, Secatoag, Setauket, and Shinnecock. There were besides these some minor bands or villages which have received special designations. They were closely connected linguistically and politically, and were probably derived from the same immediate ethnic stem. Rutenber classes them as branches of the Mahican. The Montauk, who formed the leading tribe in the eastern part of the island, are often confounded with the Metoac, and in some instances the Canarsee of the western part have also been confounded with them. The eastern tribes were at one time subject to the Pequot and afterward to the Narraganset, while the Iroquois claimed dominion over the western tribes. They were numerous at the first settlement of the island, but rapidly wasted away from epidemics and wars with other Indians and with the Dutch, disposing of their lands piece by piece to the whites. About 1788 a large part of the survivors joined the Brotherton Indians in Oneida co., N. Y. The rest, represented chiefly by the Montauk and Shinnecock, have dwindled to perhaps a dozen individuals of mixed blood. The Indians of Long Island were a seafaring people, mild in temperament, diligent in the pursuits determined by their environment, skilled in the management of the canoe, seine, and spear, and dexterous in the making of seawan or wampum (Flint). The chieftaincies were hereditary by lineal descent, including females when there was no male representative.

The Metoac villages were Canarsee, Cotsjewaninck, Cutchogue (Corchaug), Jameco, Keskaechquerem (?), Maryckenwikingh, Maspeth (Canarsee), Mattituck (Corchaug), Merrie, Mirrachtauhacky, Mochgonnekonek, Montauk, Nachaquatuck, Nesaquake, Ouheywickingh, Patchoag, Rechquaakie, Setauket, Sichteyhacky, Wawepex (Matinecock). (J. M.) **La Porcelaine.**—Vaudrenil (1724) in N. Y. Doc. Col. Hist., ix, 937, 1855. **Long Island Indians.**—Common early English name. **Malowwacks.**—Hall, N. W. States, 34, 1849 (misprint form and wrongly located). **Matauwakes.**—Thompson, Long id., 53, 1839. **Matowacks.**—Patent of 1664 in N. Y. Doc. Col. Hist., ii, 296, 1858 ("Matowacks or Long Island"). **Mattowawacky.**—De Laet (ca. 1633) in N. Y. Hist. Soc. Coll., 2d s., i, 296, 1841. **Mattowax.**—Shea, Cath. Metocaum. A village, probably of the Chowanoc, situated on Chowan r., in the present Bertie co., N. C., in 1585.

Metackwem.—Lane (1586) in Hakluyt, Voy., iii, 312, 1810. **Metocaum.**—Smith (1629), Va., i, map, repr. 1819. **Metocunent.**—Dutch map (1621) in N. Y. Doc. Col. Hist., i, 1856.

Metousecpinioneuk (prob. for *Métusène-niwûgi*, lit. 'men who walk with bare [feet]'; it is not the idiom for that phrase, however, but a term referring to people in general.—W. J.). A term apparently applied by Bacqueville de la Potherie (Hist. Am., ii, 103, 1753) to the Foxes, Illinois, Kickapoo, Miami, etc., collectively.

Metsmetskop ('low, miserable, stinking'). A name applied by Natchezkop of the upper class to those of the lowest social grade. This was composed principally of people of the same blood but also included some small alien tribes. Cf. *Stinkards*. (J. R. S.)

Miche-Miche-Quipy.—Du Pratz, Hist. La., ii, 393, 1758. **Miché Michéqui.**—Bossu (1751), Travels La., 65, 1771 (sig. 'stinking fellow'). **Puants.**—Ibid., 394 (applied also to the Winnebago). **Stinkards.**—Latham, Essays, 408, 1860. **Stinkards.**—Pénicaut (1704) in French, Hist. Coll. La., n. s., 94, 1869.

Metstoasath (*Metstō'asath*). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes of Canada, 31, 1890.

Metukatoak. A Kaviagmiut village at Port Clarence, Alaska.—Eleventh Census, Alaska, 162, 1893.

Metutahanke ('lower village'). One of two Mandan villages in 1804; situated on Missouri r., about 4 m. below Knife r., N. Dak. It was almost exterminated by smallpox in 1837.

Matoolonha.—Thwaites, Orig. Jour. Lewis and Clark, vii, index, 1905. **Matootonha.**—Lewis and Clark, Exped., i, 120, 1814. **Ma-too-ton'-ka.**—Lewis and Clark, Discov., 24, 1806. **Métutahanke.**—Matthews, Ethnog. and Philol. Hidatsa, 14, 1877. **Mih-tutta-hang-kusch.**—Maximilian as quoted by Matthews, op. cit. **Mih-Tutta-Hang-Kush.**—Maxi-

milian, Trav., 335, 1843. **Mitutahankish**.—Matthews, Ethnol. and Philol. Hidatsa, 14, 1877. **Mitutahankuc**.—Dorsey in Am. Natur., 829, Oct. 1882.

Mexam. See *Mriksah*.

Meyascosic. A village of the Powhatan confederacy, in 1608, on the N. side of James r., in Charles City co., Va.—Smith (1629), Va., 1, map, repr. 1819.

Meyemma. Mentioned by Gibbs (Schoolcraft, Ind. Tribes, III, 139, 1853) as a Hupa village in Hupa valley, Cal., in 1851. Not identified. The name is perhaps of Yurok origin.

Meyo. The Lizard clan of the pueblo of Laguna, N. Mex. Although Laguna was not founded until 1699, the origin of the clan is unknown to the natives. It forms a phratry with the Skurshka (Water-snake), Sqowi (Rattlesnake), and Hatsi (Earth) clans, which came from Sia, Oraibi (probably), and Jemez, respectively. (F. W. H.)

Méyo-háno.—Hodge in Am. Anthropol., IX, 351, 1896 (*hánoch* = 'people').

Mezquital (Span: 'mesquite grove'). A former pueblo of the Tepehuane on the upper waters of Rio de San Pedro, s. Durango, Mexico, and the seat of a Spanish mission. It is now a Mexican town. S. Francisco del Mezquital.—Orozco y Berra, Geog., 318, 1864.

Mgezewa (for *Me'gezi*, 'bald eagle'). A gens of the Potawatomi, q. v.

Mégezi.—Wm. Jones, inf'n., 1906. *M'-ge-ze'-wá*.—Morgan, Anc. Soc., 167, 1877.

Miacomit. A village formerly on Nantucket id., off the s. coast of Massachusetts.—Writer of 1807 in Mass. Hist. Soc. Coll., 2d s., III, 26, 1846.

Miahwahpitsiks (*Mi-ah-wah'-pit-siks*, 'seldom lonesome'). A division of the Piegan tribe of the Siksika.

Mi-ah-wah'-pit-siks.—Grinnell, Blackfoot Lodge Tales, 209, 1892. *Seldom Lonesome*.—Ibid., 225.

Miakechakesa. One of the two divisions of the Sisseton Sioux. Their habitat in 1824 was the region of Blue Earth and Cottonwood rs., Minn., extending westward to the Coteau des Prairies. Unlike the Kahra, they had no fixed villages, no mud or bark cabins. They hunted on Blue Earth r. in winter, and during the summer pursued the buffalo as far as Missouri r. They numbered about 1,000.

Lower Sissetons.—Minn. Hist. Soc. Coll., III, 250, 1880. **Mi-ah-kee-jack-sah**.—Lewis and Clark, Discov., 34, 1806. **Mia Kechakesa**.—Long, Exped. St. Peter's R., I, 378, 1824. *South Sissetons*.—Ind. Aff. Rep., 495, 1839.

Miami (?Chippewa: *Oumamneg*, 'people who live on the peninsula'). An Algonquian tribe, usually designated by early English writers as *Twightwees* (*twá'h twá'h*, the cry of a crane.—Hewitt), from their own name, the earliest recorded notice of which is from information furnished in 1658 by Gabriel Druillettes (Jes. Rel. 1658, 21, 1858), who called them the Oumamik, then living 60 leagues from

St Michel, the first village of the Potawatomi mentioned by him; it was therefore at or about the mouth of Green bay, Wis. Tailhan (Perrot, Mémoire) says that they withdrew into the Mississippi valley, 60 leagues from the bay, and were established there from 1657 to 1676, although Bacqueville de la Potherie asserts that, with the Mascoutens, the Kickapoo, and part of the Illinois, they came to settle at that place about 1667. The first time the French came into actual contact with the Miami was when Perrot visited them about 1668. His second visit was in 1670, when they were living at the headwaters of Fox r., Wis. In 1671 a part at least of the tribe were living with the Mascoutens in a palisaded

LUM-KI-KUM—MIAMI

village in this locality (Jes. Rel. 1671, 45, 1858). Soon after this the Miami parted from the Mascoutens and formed new settlements at the s. end of L. Michigan and on Kalamazoo r., Mich. The settlements at the s. end of the lake were at Chicago and on St Joseph r., where missions were established late in the 17th century, although the former is mentioned as a Wea village at the time of Marquette's visit, and Wea were found there in 1701 by De Courtemarche. It is likely that these Wea were the Miami mentioned by Allouez and others as being united with the Mascoutens in Wisconsin. The chief village of the Miami on St Joseph r. was, according to Zenobius (Le Clercq, II, 133), about 15 leagues inland, in lat. 41°. The extent of territory occupied by this tribe a few years later compels the conclusion that the Miami

in Wisconsin, when the whites first heard of them, formed but a part of the tribe, and that other bodies were already in N. E. Illinois and N. Indiana. As the Miami and their allies were found later on the Wabash in Indiana and in S. W. Ohio, in which latter territory they gave their name to three rivers, it would seem that they had moved S. E. from the localities where first known within historic times. Little Turtle, their famous chief, said: "My fathers kindled the first fire at Detroit; thence they extended their lines to the headwaters of the Scioto; thence to its mouth; thence down the Ohio to the mouth of the Wabash, and thence to Chicago over L. Michigan." When Vincennes was sent by Gov. Vaudreville in 1705 on a mission to the Miami they were found occupying principally the territory N. W. of the upper Wabash. There was a Miami village at Detroit in 1703, but their chief settlement was still on St Joseph r. In 1711 the Miami and the Wea had three villages on the St Joseph, Maumee, and Wabash. Kekionga, at the head of the Maumee, became the chief seat of the Miami proper, while Ouiatenon, on the Wabash, was the headquarters of the Wea branch. By the encroachments of the Potawatomi, Kickapoo, and other northern tribes the Miami were driven from St Joseph r. and the country N. W. of the Wabash. They sent out colonies to the E. and formed settlements on Miami r. in Ohio, and perhaps as far E. as the Scioto. This country they held until the peace of 1763, when they retired to Indiana, and the abandoned country was occupied by the Shawnee. They took a prominent part in all the Indian wars in Ohio valley until the close of the war of 1812. Soon afterward they began to sell their lands, and by 1827 had disposed of most of their holdings in Indiana and had agreed to remove to Kansas, whence they went later to Indian Ter., where the remnant still resides. In all treaty negotiations they were considered as original owners of the Wabash country and all of W. Ohio, while the other tribes in that region were regarded as tenants or intruders on their lands. A considerable part of the tribe, commonly known as Meshingomesia's band, continued to reside on a reservation in Wabash co., Ind., until 1872, when the land was divided among the survivors, then numbering about 300.

The Miami men were described in 1718 as "of medium height, well built, heads rather round than oblong, countenances agreeable rather than sedate or morose, swift on foot, and excessively fond of racing." The women were generally well clad in deerskins, while the men used scarcely any covering and were tattooed all over the body. They were hard-

working, and raised a species of maize unlike that of the Indians of Detroit, described as "white, of the same size as the other, the skin much finer, and the meal much whiter." According to the early French explorers the Miami were distinguished for polite manners, mild, affable, and sedate character, and their respect for and perfect obedience to their chiefs, who had greater authority than those of other Algonquian and N. W. tribes. They usually spoke slowly. They were land travelers rather than canoe men. According to Hennepin, when they saw a herd of buffalo they gathered in great numbers and set fire to the grass about the animals, leaving open a passage where they posted themselves with their bows and arrows; the buffalo, seeking to escape the fire, were compelled to pass the Indians, who killed large numbers of them. The women spun thread of buffalo hair, with which they made bags to carry the meat, toasted or sometimes dried in the sun. Their cabins were covered with rush mats. According to Perrot, the village which he visited was situated on a hill and surrounded by a palisade. On the other hand, Zenobius says that La Salle, who visited the villages on St Joseph r., taught them how to defend themselves with palisades, and even made them erect a kind of fort with intrenchments. Infidelity of the wife, as among many other Indians, was punished by clipping the nose. According to early explorers, they worshiped the sun and thunder, but did not honor a host of minor deities, like the Huron and the Ottawa. Three forms of burial appear to have been practised by the division of the tribe living about Ft Wayne: (1) The ordinary ground burial in a shallow grave prepared to receive the body in a recumbent position. (2) Surface burial in a hollow log; these have been found in heavy forests; sometimes a tree was split and the halves hollowed out to receive the body, when it was either closed with withes or fastened to the ground with crossed stakes; sometimes a hollow tree was used, the ends being closed. (3) Surface burial wherein the body was covered with a small pen of logs, laid as in a log cabin, the courses meeting at the top in a single log.

The French authors commonly divided the Miami into six bands: Piankashaw, Wea, Atchatchakangouen, Kilatika, Mengakonkia, and Pepickokia. Of these the first two have come to be recognized as distinct tribes; the other names are no longer known. The Pepickokia, mentioned in 1796 with the Wea and Piankashaw, may have been absorbed by the latter. Several treaties were made with

a band known as Eel Rivers, formerly living near Thorntown, Boone co., Ind., but they afterward joined the main body on the Wabash.

According to Morgan (Anc. Soc., 168, 1877) the Miami have 10 gentes: (1) Mowhawa (wolf), (2) Mongwa (loon), (3) Kendawa (eagle), (4) Ahpakosea (buzzard), (5) Kanozawa (Kanwasowau, panther), (6) Pilawa (turkey), (7) Ahseponna (raccoon), (8) Monnato (snow), (9) Kulswa (sun), (10) Water. Chauvignerie, in 1737, said that the Miami had two principal totems—the elk and crane—while some of them had the bear. The French writers call the Atchatchakangouen (Crane) the leading division. At a great conference on the Maumee in Ohio in 1793 the Miami signed with the turtle totem. None of these totems occurs in Morgan's list.

It is impossible to give a satisfactory estimate of the numbers of the Miami at any one time, on account of confusion with the Wea and Piankashaw, who probably never exceeded 1,500. An estimate in 1764 gives them 1,750; another in the following year places their number at 1,250. In 1825 the population of the Miami, Eel Rivers, and Wea was given as 1,400, of whom 327 were Wea. Since their removal to the W. they have rapidly decreased. Only 57 Miami were officially known in Indian Ter. in 1885, while the Wea and Piankashaw were confederated with the remnant of the Illinois under the name of Peoria, the whole body numbering but 149; these increased to 191 in 1903. The total number of Miami in 1905 in Indian Ter. was 124; in Indiana, in 1900, there were 243; the latter, however, are greatly mixed with white blood. Including individuals scattered among other tribes, the whole number is probably 400.

The Miami joined in or made treaties with the United States as follows: (1) Greenville, O., with Gen. Anthony Wayne, Aug. 3, 1795, defining the boundary between the United States and tribes w. of Ohio r. and ceding certain tracts of land; (2) Ft Wayne, Ind., June 7, 1803, with various tribes, defining boundaries and ceding certain lands; (3) Grouseland, Ind., Aug. 21, 1805, ceding certain lands in Indiana and defining boundaries; (4) Ft Wayne, Ind., Sept. 30, 1809, in which the Miami, Eel River tribes, and Delawares ceded certain lands in Indiana, and the relations between the Delawares and Miami regarding certain territory are defined; (5) Treaty of peace at Greenville, O., July 22, 1814, between the United States, the Wyandot, Delawares, Shawnee, Seneca, and the Miami, including the Eel River and Wea tribes; (6) Peace treaty of Spring Wells, Mich., Sept. 8, 1815, by the Miami and other tribes; (7)

St Mary's, O., Oct. 6, 1818, by which the Miami ceded certain lands in Indiana; (8) Treaty of the Wabash, Ind., Oct. 23, 1826, by which the Miami ceded all their lands in Indiana, n. and w. of Wabash and Miami rs.; (9) Wyandot village, Ind., Feb. 11, 1828, by which the Eel River Miami ceded all claim to the reservation at their village on Sugar Tree cr., Ind.; (10) Forks of Wabash, Ind., Oct. 23, 1834, by which the Miami ceded several tracts in Indiana; (11) Forks of the Wabash, Ind., Nov. 6, 1838, by which the Miami ceded most of their remaining lands in Indiana, and the United States agreed to furnish them a reservation w. of the Mississippi; (12) Forks of the Wabash, Ind., Nov. 28, 1840, by which the Miami ceded their remaining lands in Indiana and agreed to remove to the country assigned them w. of the Mississippi; (13) Washington, June 5, 1854, by which they ceded a tract assigned by amended treaty of Nov. 28, 1840, excepting 70,000 a. retained as a reserve; (14) Washington, Feb. 23, 1867, with Seneca and others, in which it is stipulated that the Miami may become confederated with the Peoria and others if they so desire.

Among the Miami villages were Chicago, Chippekawka, Choppatee's village, Kekionga, Kenapacomaqua, Kokomo, Kowasikka, Little Turtle's village, Meshingomesia, Missiniquimeschan (Piankashaw), Mississinewa, Osaga, Pahedketeha, Piankashaw (Piankashaw), Pickawillanee, Raccoon's village, Seek's village, St Francis Xavier (mission, with others), Thorntown (Eel River Miami).

Miami River. A Seminole settlement, with 63 inhabitants in 1880, about 10 m. N. of the site of Ft Dallas, not far from Biscayne bay, on Little Miami r., Dade

co., Fla.—MacCauley in 5th Rep. B. A. E., 478, 1887.

Miantonomo. A noted chief of the Narraganset, nephew of Canonicus. In 1632 he visited Boston and was received by the governor. He was more than once suspected of disloyalty to the English, but managed to clear himself when summoned to Boston in 1636. He helped the English against the Pequot the next year and warred against the Mohegan. In 1638 he signed the tripartite agreement between the English of Connecticut, the Narraganset, and the Mohegan. He is said to have been impressed by the preaching of Roger Williams in 1643. During the years 1640-42 he was suspected of treachery to the English, but again made satisfactory explanations. In 1643 war broke out between the Mohegan and the Narraganset, and in a battle in which the latter were defeated Miantonomo was taken prisoner. He was delivered to the English at Hartford, was tried at Boston in September, 1643, by the Court of Commissioners of the United Colonies of New England, who, after referring the matter to the convocation of the clergy, which condemned him, sentenced him to death at the hands of Uncas. This sentence was barbarously executed by Wawequa, the brother of Uncas, in the presence of the latter. For this disgraceful proceeding the English authorities were to blame, as otherwise Uncas would never have taken his prisoner's life. De Forest (Hist. Inds. of Conn., 198, 1852) takes a rather high view of the character of Miantonomo, whom he characterizes as "respected and loved by everyone who was not fearful of his power." Theological bias against Roger Williams and his Indian friends played some part in the matter of his treatment by the commissioners. He was buried where he fell, and the spot, on which a monument was erected in 1841, has since been known as Sachem's Plains. Miantonomo is praised in Durfee's poem, "What cheer." Nanantenoo was a son of Miantonomo. (A. F. C.)

Miawkinaiykis ('big topknots'). A division of the Piegan tribe of the Siksika. **Big Topknots**.—Grinnell, Blackfoot Lodge Tales, 209, 1892. **Mi-aw'-kin-ai-yiks**.—*Ibid.*, 225.

Mica. This durable and showy mineral was in very general use by the Indian tribes E. of the great plains, the translucent variety known as muscovite being most highly prized. It was mined at many points in the Appalachian highland, from Georgia to St Lawrence r. (see *Mines and Quarries*). It occurs also in South Dakota, but it is not probable that the mound-building tribes obtained it from this source. From the Eastern highland it passed, by trade or other-

wise, to remote parts: to Florida in the s. and to the upper Mississippi valley in the n. w. The crystals were often of large size, measuring 2 ft or more in diameter. The sheets into which they were readily divided were much prized for mirrors, and were also cut into a great variety of shapes for personal ornaments, and possibly also for ceremonial use. Sheets of mica were used also for burial with the dead and as sacrificial offerings. Squier and Davis give an account of the discovery of 14 human skeletons that were carefully covered with mica plates, estimated at 15 or 20 bushels, some of the plates being from 8 to 10 in. long and from 4 to 5 in. wide, and all from $\frac{1}{2}$ to 1 in. in thickness. Atwater describes the discovery of many thick sheets, one of which measured 36 in. long by 18 in. wide. With a skeleton in the Grave Creek mound, near Wheeling, W. Va., 150 disks of sheet mica, measuring from $1\frac{1}{2}$ to 2 in. in diameter and having each 1 or 2 perforations, were found. From the Turner mounds in Hamilton co., Ohio, several ornamental figures of sheet mica were obtained; one of them is a grotesque human figure, others are animal forms, including a serpent (Putnam). Mica occurs on many sacrificial altars of the mound-builders, who no doubt regarded it as of special significance.

Micacuopsiba. An unidentified Dakota division formerly roaming on the upper St Peter's (Minnesota) r., Minn., in 1804. *Cut bank.*—Orig. Jour. Lewis and Clark, i, 133, 1904. *Mi ca cu op si ba.*—*Ibid.*

Michacondibi (*mitcha* 'large', *indibe* or *gindibe* 'head': 'big head' (Baraga), possibly referring to the Têtes de Boule). An Algonquian (?) tribe or band, probably a part of the Cree or of the Maskegon, formerly on a river of the same name (Albany r.?) entering the s. end of Hudson bay from the s. w. Lahontan placed them about the headwaters of Ottawa r. **Machakandibi.**—Lahontan, *New Voy.*, i, 231, 1703. **Machandibi.**—Lahontan (1703), *New Voy.*, map, 1735. **Machantiby.**—La Chesnaye (1697) in Margry, *Déc.*, vi, 6, 1886. **Michacondibis.**—Bacqueville de la Potherie, *Hist. Am.*, ii, 49, 1753.

Michahai. A Yokuts (Mariposan) tribe near Squaw valley, in the Kings r. drainage, s. central Cal.

Michaha.—Wessells (1853) in H. R. Ex. Doc. 76, 34th Cong., 3d sess., 31, 1857. **Michahai.**—A. L. Kroeber, *inf'n*, 1906.

Michibousa. Mentioned by Tonti (French, *Hist. Coll. La.*, i, 82, 1846) in connection with and apparently as one of the tribes of the Illinois confederacy in

1681. The name is perhaps an erroneous designation for some well-known tribe or band.

Michigamea (Algonquian: 'great water,' from *michi* 'great,' 'much,' *guma* 'water'. Baraga gives the correct form of 'Michigam' as *Mishigamaw*, 'the big lake', while Dr Wm. Jones says that the Chippewa of the n. shore of L. Superior refer to L. Michigan by the name *Mishawigima*, 'big, wide, or expansive waste,' on account of the few or no islands). A tribe of the Illinois confederacy, first visited by Marquette when he descended the Mississippi in 1673. Their village was situated at that time on the w. side of the Mississippi and near a lake bearing the same name as the tribe, probably Big lake, between the St Francis and Mississippi rs., Ark. This tribe was the most southerly of the confederacy, and its extreme southern situation has led some authors to the conclusion that the people were not Algonquian, but this is an evident error. It must have been shortly previous to the time that the first knowledge of the tribes of this general region was obtained that a group or division of the Illinois confederacy, including the Cahokia, Tamaroa, and possibly the Michigamea, pushed southward to escape the attacks of the Sioux and the Foxes. It is therefore probable that at this period the Michigamea moved on into s. Illinois, and thence passed over into s. e. Missouri. The intimate relation of the ancient remains of these two sections would seem to confirm this opinion. About the end of the 17th century they were driven out by the Quapaw or Chickasaw, crossing over into Illinois and joining the Kaskaskia. According to Chauvignerie their totem was the crane. He attributed to them 250 warriors, which is evidently an exaggeration, as he estimated the whole Illinois confederacy at only 508 warriors. It is probable that the Michigamea were only a remnant at the time they joined the Kaskaskia. They were never prominent in Indian affairs. In 1803 Gen. W. H. Harrison supposed that there was but one man of the tribe left alive, but as late as 1818 the names of 3 Michigamea appear as signers of a treaty with the Illinois. (J. M. C. T.)

Michikinikwa. See *Little Turtle*.

Michilimackinac (*Mishinima'kinung*, 'place of the big wounded person,' or 'place of the big lame person.'—W. J.). A name applied at various times to Mackinac id. in Mackinac co., Mich.; to the village on this island; to the village and fort at Pt St Ignace on the opposite mainland, and at an early period to a considerable extent of territory in the upper part of the lower peninsula of Michigan. It is derived from the name of a supposed extinct Algonquian tribe, the Mishinimaki or Mishinimakinago.

According to Indian tradition and the Jesuit Relations, the Mishinimaki formerly had their headquarters at Mackinac id. and occupied all the adjacent territory in Michigan. They are said to have been at one time numerous and to have had 30 villages, but in retaliation for an invasion of the Mohawk country they were destroyed by the Iroquois. This must have occurred previous to the occupancy of the country by the Chippewa on their first appearance in this region. A few were still there in 1671, but in Charlevoix's time (1744) none of them remained. When the Chippewa appeared in this section they made Michilimackinac id. one of their chief centers, and it retained its importance for a long period. In 1761 their village was said to contain 100 warriors. In 1827 the Catholic part of the inhabitants, to the number of 150, separated from the others and formed a new village near the old one. When the Hurons were driven w. by the Iroquois they settled on Mackinac id., where they built a village some time after 1650. Soon thereafter they removed to the Noquet id. in Green bay, but returned about 1670 and settled in a new village on the adjacent mainland, where the Jesuits had just established the mission of St Ignace. After this the Hurons settled near the mission; the fugitive Ottawa also settled in a village on the island where Nouvel established the mission of St Francis Borgia among them in 1677, and when the Hurons removed to Detroit, about 1702, the Ottawa and Chippewa continued to live at Michilimackinac. (J. M. C. T.)

Michipicoten (*Mishibigwadunk*, 'place of bold promontories,' or 'region of big places.'—W. J.). The designation of the Algonquian Indians living on Michipicoten r., Ontario, n. of L. Superior, and extending into Ruperts Land. In Canada they are officially classed as "Michipicoten and Big Heads," consisting of two bands belonging to different tribes. The smaller band consists of Chipewewa and are settled on a reservation known as Gros Cap, on the w. side of the river, near its mouth; the other band belongs to the Maskegon and resides mainly near the Hudson's Bay Co.'s post on Brunswick lake, on the n. side of the dividing ridge. The two bands together numbered 283 in 1884, and 358 in 1906. See *Têtes de Boule*. (J. M.)

Michirache. An Iowa phratry. Its gentes are Shuntanthka, Shuntanhewe, Shuntankhoche, and Manyikakhthi.

Me-je'-ra-ja.—Morgan, Anc. Soc., 156, 1877. **Mi-te'-ra-tee**.—Dorsey, Teiwere MS. vocab., B. A. E., 1879. **Mi-te'-ra-tee**.—Dorsey in 15th Rep. B. A. E., 238, 1897. **Wolf**.—Morgan, op. cit.

Michiyu (*Mic-hi-yu*). A former Chumashan village between Pt Conception and Santa Barbara, Cal., at the place now called San Onofre.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Michopdo. A former Maidu village near Chico, at the edge of the foothills, about 5 m. s. of the junction of Little and Big Butte crs., in Butte co., Cal.; pop. 90 in 1850. (R. B. D.)

Ma-chuck-nas.—Johnston (1850) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 45, 1853. **Ma-chuc-na**.—Day (1850), *ibid.*, 39. **Michopdos**.—Powers in Overland Mo., XII, 420, 1874. **Mich-op-do**.—Powers in Cont. N. A. Ethnol., III, 282, 1877. **Michopdo**.—Dixon in Bull. Am. Mus. Nat. Hist., XVII, pl. xxxviii, 1905. **Mitshopda**.—Curtin, MS. vocab., B. A. E., 1885. **Wachuknas**.—Schoolcraft, Ind. Tribes, VI, 710, 1857.

Mickesawbee. A former Potawatomi village at the site of the present Coldwater, Mich., on a reservation sold in 1827. **Mickesawbe**.—Treaty of 1827 in U. S. Ind. Treat., 675, 1873. **Mick-ke-saw-be**.—Chicago treaty (1821), *ibid.*, 152.

Micksucksealton. Said by Lewis and Clark to be a tribe of the Tushpaw (q.v.) living on Clarke r. above the falls, and numbering 300, in 25 lodges, in 1805.

Micksicksealton.—Clark and Voorhis (1805) in Orig. Jour. Lewis and Clark, VI, 114, 1905. **Micksuck-seal-ton**.—Lewis and Clark, Exped., I, map, 1814. **Micksucksealton**.—*Ibid.*, II, 475, 1814. **Miksucksealton**.—Drake, Bk. Inds., ix, 1848.

Mimmac (*Migmak*, 'allies'; *Nigmak*, 'our allies.'—Hewitt). The French called them *Souriquois*. An important Algonquian tribe that occupied Nova Scotia, Cape Breton and Prince Edward ids., the n. part of New Brunswick, and probably points in s. and w. Newfoundland. While their neighbors the Abnaki have close linguistic relations with the Algon-

quian tribes of the great lakes, the Mimmac seem to have almost as distant a relation to the group as the Algonquians of the plains (W. Jones). If Schoolcraft's supposition be correct, the Mimmac must have been among the first Indians of the n. e. coast encountered by Europeans, as he thinks they were visited by Sebastian Cabot in 1497, and that the 3 natives he took to England were of this tribe. Kohl believes that those captured by Cortereal in 1501 and taken to Europe were Mimmac. Most of the early voyagers to this region speak of the great numbers of Indians on the n. coast of Nova Scotia and New Brunswick, and of their fierce and warlike character. They early became friends of the French, a friendship which was lasting and which the English—after the treaty of Utrecht in 1713, by which Acadia was ceded to them—found impossible to have transferred to themselves for nearly half a century. Their hostility to the English prevented for a long time any serious attempts at establishing British settlements on the n. coasts of Nova Scotia and New Brunswick, for although a treaty of peace was concluded with them in 1760, it was not until 1779 that disputes and difficulties with the Mimmac ceased. In the early wars on the New England frontier the Cape Sable Mimmac were especially noted.

The missionary Biard, who, in his Relation of 1616, gives a somewhat full account of the habits and characteristics of the Mimmac and adjacent tribes, speaks in perhaps rather too favorable terms of them. He says: "You could not distinguish the young men from the girls, except in their way of wearing their belts. For the women are girdled both above and below the stomach and are less nude than the men. . . . Their clothes are trimmed with leather lace, which the women curry on the side that is not hairy. They often curry both sides of elk skin, like our buff skin, then variegate it very prettily with paint put on in a lace pattern, and make gowns of it; from the same leather they make their shoes and strings. The men do not wear trousers . . . they wear only a cloth to cover their nakedness." Their dwellings were usually the ordinary conical wigwams covered with bark, skins, or matting. Biard says that "in summer the shape of their houses is changed; for they are broad and long that they may have more air." There is an evident attempt to show these summer bowers in the map of Giacomo di Gastaldi, made about 1550, given in vol. III of some of the editions of Ramusio. Their government was similar to that of the New England Indians; polygamy was not common, though practised to some

extent by the chiefs; they were expert canoeemen, and drew much of their subsistence from the waters. Cultivation of the soil was very limited, if practised at all by them, when first encountered by the whites. Biard says they did not till the soil in his day.

According to Rand (Micmac First Reading Book, 1875), they divided their country, which they called Megumage, into 7 districts, the head-chief living in the Cape Breton district. The other six were Pictou, Memramcook, Restigouche, Eskegawaage, Shubenacadie, and Annapolis. The first three of these formed a group known as Sigunikt; the other three formed another group known as Kespoogwit. In 1760 the Micmac bands or villages were given as Le Have, Miranichi, Tabogimik, Pohomoosh, Gediak (Shediac), Pictou, Kashpugowit (Kespoogwit), Chignecto, Isle of St Johns, Nalkitgoniash, Cape Breton, Minas, Chigabennakadik (Shubenacadie), Keshpugowit (Kespoogwit, duplicated), and Rishebouctou (Richibucto). The Gaspeians are a band of Micmac differing somewhat in dialect from the rest of the tribe.

In 1611 Biard estimated the Micmac at 3,000 to 3,500. In 1760 they were reported at nearly 3,000, but had been lately much wasted by sickness. In 1766 they were again estimated at 3,500; in 1880 they were officially reported at 3,892, and in 1884 at 4,037. Of these, 2,197 were in Nova Scotia, 933 in New Brunswick, 615 in Quebec, and 292 on Prince Edward id. In 1904, according to the Report of Canadian Indian Affairs, they numbered 3,861, of whom 579 were in Quebec province, 992 in New Brunswick, 1,998 in Nova Scotia, and 292 on Prince Edward id. The number in Newfoundland is not known.

The Micmac villages are as follows: Antigonishe (?), Beaubassin (mission), Boat Harbor, Chignecto, Eskusone, Indian Village, Isle of St Johns, Kespoogwit, Kigicapiagiak, Le Have, Maria, Minas, Miramichi, Nalkitgoniash, Nipigiguit, Pictou, Pohomoosh, Restigouche, Richibucto, Rocky Point, Shediac, Shubenacadie, and Tabogimik. (J. M. C. T.)

Acadian.—Latham in Trans. Philol. Soc. Lond., 59, 1856 (misprint). **Acadian Indians.**—Jefferys, French Doms., pt. 1, 66, 1761 (Dawson in Hind, Lab. Penin., II, 44, 1863, says Acadia is a Micmac word used in composition to denote the local abundance of objects referred to). **Bark Indians.**—Buchanan, N. Am. Inds., 156, 1824. **Kinckemoaks.**—Rasle (1724) in Mass. Hist. Soc. Coll., 2d s., VIII, 248, 1819 (misreading of MS. or misprint).

Matu-es'-wi skitchi-nu-uk.—Chamberlain, Malesit MS., B. A. E., 1882 (Malesite name, meaning 'porcupine Indians'; so called on account of their using porcupine quills in ornamentation).

Mechimacks.—Boudinot, Star in the West, 127, 1816.

Megum.—Rand, Micmac First Reading Book, 81, 1875 (a Micmac so calls himself). **Megumawaach.**—Rand, Eng.-Micmac Diet., 169, 1888. **Michmacs.**—Trader in Smith, Bouquet's Exped., 69, 1766.

Mickemac.—Lahontan (1703) quoted by Richard-

son, Arctic Exped., II, 38, 1851. **Mickmacks.**—Longueuil (1726) in N. Y. Doc. Col. Hist., IX, 956, 1855. **Mickmacks.**—Quotation in Drake, Bk. Inds., bk. 3, 137, 1848. **Mickmacks.**—Longueuil (1726) in N. Y. Doc. Col. Hist., IX, 956, 1855. **Micmacks.**—Bégon (1725), *ibid.*, 943. **Mic Maes.**—Potter in Me. Hist. Soc. Coll., IV, 192, 1856. **Micmaes.**—Doc. of 1696 in N. Y. Doc. Col. Hist., IX, 643, 1855. **Miggamaes.**—Rouilland, Noms Géographiques, 63, 1906.

Mikemak.—Lahontan, New Voy., I, 223, 1703 (given also by Gatschet, Penobscot MS., 1887, as their Penobscot name, 'Mikéma'); singular, Mikéma). **Mikmaes.**—Vaudreuil (1757) in N. Y. Doc. Col. Hist., X, 658, 1858. **Mikmak.**—Cocquard (1757), *ibid.*, 529. **Mukmacks.**—Buchanan, N. Am. Inds., I, 139, 1824.

Shannok.—Gatschet in Proc. Am. Philos. Soc., 409, 1885. **Shanung.**—Gatschet, quoting Latham, *ibid.* **Shawnuk.**—Gatschet, *ibid.* **Shénack.**—Lloyd, quoting Payton, in Jour. Anthropol. Inst., IV, 29, 1875 ('bad Indians'; Beothuk name). **Soricoi.**—DuCreux map of Canada (1660) cited by Vetromile, Abnakis, 21, 1866 (Latin form). **Sorriquois.**—Vetromile in Me. Hist. Soc. Coll., VI, 210, 1859. **Souricois.**—Champlain (1603), *Cuvres*, II, 58, 1870. **Sourikois.**—Jes. Rel. 1652, 26, 1858. **Sourikwosiorum.**—De Laet (1633) quoted by Tanner, Narr., 329, 1830. **Sourikois.**—Jes. Rel. 1611, 8, 1858. **Souriquoi.**—De Laet (1633) quoted by Barton, New Views, xxxv, 1795. **Sourriquois.**—Vetromile in Me. Hist. Soc. Coll., VI, 203, 1859. **Surikois.**—Lords of Trade (1721) in N. Y. Doc. Col. Hist., V, 592, 1855.

Micoma. A Chumashan village between Goleta and Pt Conception, Cal., in 1542.—Cabrillo, Narr. (1542) in Smith, Colec. Doc. Fla., 183, 1857.

Miconope. See *Mikanopy*.

Middle Creeks. A term used by some English writers to designate the Creeks on lower Tallapoosa r., Ala., Spanish and French writers sometimes using the name Talipate, or Talepuse. (A. S. G.)

Middle-settlement Indians. The Cherokee formerly living in upper Georgia and w. North Carolina, as distinguished from those in South Carolina and Tennessee.—Imlay, W. Ter., 363, 1797.

Middle Town. A former Seneca village, 3 m. above the site of Chemung, N. Y., destroyed by Sullivan in 1779.—Jones (1780) in N. Y. Doc. Col. Hist., VIII, 785, 1857.

Miduuski. An Ahtena village on the E. bank of Copper r., Alaska, below the mouth of Tonsina cr.

Miemissouks. Given as the name of a tribe somewhere between Bellingham bay and Fraser r., in Washington or British Columbia. Probably Salishan, otherwise unidentifiable.

Mie-mis-souks.—Starling in Ind. Aff. Rep., 170, 1852. **Misonk.**—*Ibid.*, 171.

Mienikashika ('those who became human beings by means of the sun'). A Quapaw gens.

Mi-e'nikaci'ya.—Dorsey in 15th Rep. B. A. E., 229, 1897. **Sun gens.**—*Ibid.*

Migichihiliñiou (*Migiziwinninwag*, 'people of the Eagle clan'; or perhaps *Migiziwinninwag*, 'people with wampum'; or 'people with the cowrie shells.'—W. J.). Given by Dobbs as the name of a band of (Algonquian?) Indians residing on the "Lake of Eagles," between L. Winnipeg and Lake of the Woods—probably Eagle lake, some distance N. E. of Lake of the Woods. He thinks they were

related to the Assiniboin, "because of the great affinity of their language." As this statement is in contradiction to his subsequent assertion, known from other evidence to be correct, that the Assiniboin dwelt w. of L. Winnipeg, it may be inferred that these "Eagle-men" belong to the Chippewa, who have among their gentes one named *Omegeeze*, "Bald Eagle." (J. M. C. T.)

Eagle-eyed Indians.—Dobbs, Hudson Bay, 24, 1744.
Eagle Eyed Indians.—Ibid., map. **Migiehilini-**
 os.—Ibid., 24.

Miguihui. A Chumashan village, one of the two popularly known as Dos Pueblos, in Santa Barbara co., Cal.; also a village in Ventura co.

Migiu.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884. **Miguigui.**—Taylor in Cal. Farmer, July 24, 1863 (Ventura co.). **Miguihui.**—Ibid., Apr. 24, 1863.

Mihtukmechakick. A name, signifying 'tree eaters,' which, according to Roger Williams' Key (Mass. Hist. Soc. Coll., 1st s., III, 209, 1794), referred to "a people so called (living between three or four hundred m. w. into the land) from their eating *mih-tuck-quash*, 'trees.' They are men-eaters; they set no corn, but live on the bark of chestnut and walnut and other fine trees. They dry and eat this bark with the fat of beasts and sometimes of men. This people are the terror of the neighboring natives." The name Adirondack (q. v.), applied by the Iroquois to certain Algonquian tribes of Canada, signifies 'they eat trees'. (J. M. C. T.)

Miitsr. The Humming-bird clan of San Felipe pueblo, N. Mex., of which there were only one or two survivors in 1895.

Miitsr-hano.—Hodge in Am. Anthropol., IX, 351, 1896 (*háno* = 'people').

Mikakhenikashika ('those who made or adopted the stars as their mark or means of identity as a people.'—La Flesche). A Quapaw gens.

Mika'q'e ní'kaci'ya.—Dorsey in 15th Rep. B. A. E., 229, 1897. **Star gens.**—Ibid.

Mikanopy ('head chief'). A Seminole chief. On May 9, 1832, a treaty was signed purporting to cede the country of the Seminole to the United States in exchange for lands w. of the Mississippi. The Seminole had already relinquished their desirable lands near the coast and retired to the pine barrens and swamps of the interior. Mikanopy, the hereditary chief, who possessed large herds of cattle and horses and a hundred negro slaves, stood by young Osceola and the majority of the tribe in the determination to remain. Neither of them signed the agreement to emigrate given on behalf of the tribe by certain pretended chiefs on Apr. 23, 1835. In the summer of that year the Indians made preparations to resist if the Government attempted to remove them. When the agent notified them on Dec. 1 to deliver their horses

and cattle and assemble for the long journey they sent their women and children into the interior, while the warriors were seen going about in armed parties. The white people had condemned the Seminole as a degenerate tribe, enervated through long contact with the whites. Although Mikanopy, who was advanced in years, was the direct successor of King Payne, the chief who united the tribe, the agent said he would no longer recognize him as a chief when he absented himself from the council where the treaty was signed. When the whites saw that the Seminole intended to fight, they abandoned their plantations on the border, which the Indians sacked and burned. Troops were

MIKANOPY. (McKENNEY AND HALL)

then ordered to the Seminole country, and a seven-years' war began. In the massacre of Dade's command, Dec. 28, 1836, it is said that Mikanopy shot the commander with his own hand. He took no further active part in the hostilities. He was short and gross in person, indolent, and self-indulgent in his habits, having none of the qualities of a leader.—McKenney and Hall, Ind. Tribes, II, 271, 1858.

Mikasi ('coyote and wolf people'). A subgens of the Mandhinkagaghe gens of the Omaha.

Mikas.—Dorsey in 15th Rep. B. A. E., 228, 1897.

Mikasuki. A former Seminole town in Leon co., Fla., on the w. shore of Miccosukee lake, on or near the site of the present Miccosukee. The name has been

applied also to the inhabitants as a division of the Seminole. They spoke the Hitchiti dialect, and, as appears from the title of B. Smith's vocabulary of their language, were partly or wholly emigrants from the Sawokli towns on lower Chattahoochee r., Ala. The former town appears to have been one of the 'red' or 'bloody' towns, for at the beginning of the Seminole troubles of 1817 its inhabitants stood at the head of the hostile element and figured conspicuously as "Red Sticks," or "Batons Rouges," having painted high poles, the color denoting war and blood. At this time they had 300 houses, which were burned by Gen. Jackson. There were then several villages near the lake, known also as Mikasuki towns, which were occupied almost wholly by negroes. In the Seminole war of 1835-42 the people of this town became noted for their courage, dash, and audacity. (A. S. G. C. T.)

Baton Rouge.—Drake, Abor. Races of N. Am., bk. 4, 404, 1880. **Mackasookos.**—U. S. Ind. Treat. (1797), 69, 1837. **Mecosukee.**—Hitchcock (1836) in Drake, Bk. Inds., bk. 4, 93, 1848. **Mekasowsky.**—Pénière in Morse, Rep. to Sec. War, 311, 1822. **Micasukee.**—Knox (1791) in Am. State Papers, Ind. Aff., i, 127, 1832. **Micasukeys.**—Morse, Rep. to Sec. War, 364, 1822. **Micasuks.**—Jesup (1837) in H. R. Doc. 78, 25th Cong., 2d sess., 81, 1838. **Micasuksy.**—Galt (1837) in H. R. Doc. 78, 25th Cong., 2d sess., 104, 1838. **Micasooky.**—Hawkins (1813) in Am. State Papers, Ind. Aff., i, 852, 1832. **Micosaukie.**—Schoolcraft, Ind. Tribes, II, 335, 1852. **Mic-co-soo-e.**—Hawkins (1799), Sketch, 25, 1848. **Mickasauky.**—Drake, Bk. Inds., bk. 4, 125, 1848. **Micka Sukees.**—Duval (1849) in Senate Ex. Doc. 49, 31st Cong., 1st sess., 144, 1850. **Mickasukians.**—Belton (1836) in Drake, Bk. Inds., bk. 4, 77, 1848. **Mikasauks.**—Ibid., ix. **Mikasuki.**—Gatschet, Creek Migr. Leg., i, 76, 1884. **Mikasuky.**—Drake, Ind. Chron., 200, 1886. **Miksesokee.**—ten Kate, Reizen in N. A., 462, 1885 (Mikasauksies, or). **Red-stick.**—Pénière in Morse, Rep. to Sec. War, 311, 1822.

Mikaunikashinga ('raccoon people'). A subgens of the Ibache gens of the Kansa. **Coon.**—Stubbs, Kaw MS. vocab., B. A. E., 25, 1877. **Me-ká'**—Morgan, Anc. Soc., 156, 1877. **Mika nikashing-ga.**—Stubbs, op. cit. **Mika qia jinga.**—Dorsey in 15th Rep. B. A. E., 231, 1897 ('small lean raccoon'). **Mika unikaci-ga.**—Ibid. **Raccoon.**—Morgan, op. cit.

Mikechuse. A former hostile tribe living n. and e. of San Joaquin r., Cal., among the foothills of the Sierra Nevada on the headwaters of Tuolumne, Merced, and Mariposa rs. Probably Moquelumnan. See Barbour, et al. (1851) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 61, 1853.

Mikinakwadshiwininiwak (*M'k'ina'ki-wadsh'wininiw'ig*, 'people of the Turtle mtn.'—W. J.). A Chippewa band living in the Turtle mtn. region, North Dakota, adjoining the Canadian line. In 1905 they were under the jurisdiction of the Fort Totten School, and numbered 211 full-bloods and 1,996 mixed-bloods.

Mi'kina'kiwadiwininiwak.—Wm. Jones, inf'n, 1906 (correct form). **Mikinakwadshi-winiwak.**—Gatschet, Ojibwa MS., B. A. E., 1882. **Montagnèse.**—De Smet, Missions, 109, 1844. **Turtle Mountain Chippewa.**—Common name.

Mikissioua (*M'g'eshi-wisow'a*, 'he goes by the name of the bald eagle.'—W. J.). A gens of both the Sauk and the Foxes, q. v. Cf. *Pamissouk*.

Megeshi-wisow'a.—Wm. Jones, inf'n, 1906 (correct form). **Mikissioua.**—Jes. Rel. 1672-73, LVIII, 40, 1899. **Mikissoua.**—Lapham, Inds. Wis., 15, 1870.

Miko. See *Mingo*.

Mikonoh (*M'k'ina'k*, 'snapping turtle'). A gens of the Chippewa, q. v.

Mi'kina'k.—Wm. Jones, inf'n, 1906. **Mik-o-noh'.**—Morgan, Anc. Soc., 166, 1877.

Mikonotunne ('people among the white-clover roots'). A former Tututni village on the n. side of Rogue r., Oreg., 14 m. from its mouth. Parrish (Ind. Aff. Rep. 1854, 496, 1855) stated that the village was about 7 m. above the Tututni and that the inhabitants claimed about 12 m. of Rogue r., extending as far as the territory of the Chastacosta. In 1854 they were connected with Pt Orford agency and numbered 124; in 1884 J. O. Dorsey found the survivors on Siletz res., Oreg., numbering 41 persons.

Macanoota.—Ind. Aff. Rep. 1864, 505, 1865. **Macanootna.**—Newcomb, ibid., 162, 1861. **Macanootonys.**—Taylor in Cal. Farmer, June 8, 1860. **Macanotens.**—Palmer in Ind. Aff. Rep. 1856, 219, 1857. **Mac-en-noot-e-ways.**—Ind. Aff. Rep., 470, 1865. **Mac-en-noot-en-ays.**—Victor in Overland Monthly, vii, 347, 1871. **Mac-en-o-tin.**—Kautz, MS. Toutouten census, B. A. E., 1855. **Mackanootenay's Town.**—Harper's Mag., xiii, 525, 1856. **Mackanotin.**—Parrish in Ind. Aff. Rep. 1854, 496, 1855. **Mack-en-oot-en-ay.**—Huntington in Ind. Aff. Rep. 1867, 62, 1868. **Mac-not-na.**—Dorsey, Siletz Agency MS. census roll, 1884. **Mac-o-no-tin.**—Kautz, MS. Toutouten census, B. A. E., 1855. **Mak-in-o-ten.**—Gibbs, MS., B. A. E. **Maknootenay.**—Everette, Tutu MS. vocab., B. A. E., 1883. **Mak-nu'-tène.**—Ibid. (= 'people by the land along the river'). **Maquelnoteer.**—Taylor in Cal. Farmer, June 8, 1860. **Maquelnoten.**—Schoolcraft, Ind. Tribes, vi, 702, 1857. **Mec-a-no-to-ny.**—Abbott, MS. Coquille census, B. A. E., 1858. **Me-ka-nen.**—Schumacher in Bull. U. S. Geog. and Geol. Surv., iii, 31, 1877. **Mi'-ko-no' jünne'**—Dorsey in Jour. Am. Folk-lore, iii, 233, 1890 (Tututni name). **Mi'-kwun-nu' jünne'**—Ibid. (Naltunetunne name).

Mikulitsh (*M'ku-tit'e*). A former village of the Kuitsh at the mouth of Winchester bay, Oreg.—Dorsey in Jour. Am. Folk-lore, iii, 231, 1890.

Milakitekwa. Classified by Gibbs as a band of Okinagan, though more nearly connected with the Colville, formerly residing on the w. fork of Okinakane r., Wash.

Mil-a-ke-t-kun.—Stevens in Ind. Aff. Rep., 445, 1854. **Milakitekwa.**—Gibbs in Pac. R. R. Rep., i, 412, 1855.

Milijaes. A former tribe of N. E. Mexico or s. Texas, probably Coahuiltecan, gathered into the mission of San Bernardo de la Candela.—Orozco y Berra, Geog., 302, 1864.

Military Societies. Although the various tribes were in a state of chronic warfare one with another, little is known of their system of military organization, with the exception, perhaps, of those of the Plains and the Pueblo regions. There is abundant evidence, however, that the military code was as carefully developed

as the social system among most of the tribes N. of Mexico. The exceptions were the Eskimo and the thinly scattered bands of the extreme N., the California tribes, and the various bands W. of the Rocky mts. commonly grouped as Paiute. East of the Mississippi, where the clan system was dominant, the chief military functions of leadership, declaration, and perhaps conclusion of war, seem to have been hereditary in certain clans, as the Bear clan of the Mohawk and Chipewewa, and the Wolf or Munsee division of the Delawares. It is probable that if their history were known it would be found that most of the distinguished Indian leaders in the colonial and other early Indian wars were actually the chiefs of the war clans or military societies of their respective tribes. If we can trust the Huguenot narratives, the ancient tribes of N. Florida and the adjacent region had a military system and marching order almost as exact as that of a modern civilized nation, the various grades of rank being distinguished by specific titles. Something similar seems to have prevailed among the Creeks, where, besides war and peace clans, there were war and peace towns, the war or "red" towns being the assembly points for all war ceremonies, including the war dance, scalp dance, and torture of prisoners. The "Red Stick" band of the Seminole, noted in the Florida wars as the most hostile portion of the tribe, seem to have constituted in themselves a war society. Among the confederated Sauk and Foxes, according to McKenney and Hall, nearly all the men of the two tribes were organized into two war societies which contested against each other in all races or friendly athletic games and were distinguished by different cut of hair, costume, and dances. With the more peaceful and sedentary Pueblo tribes, as the Zuñi and Hopi, military matters were regulated by a priesthood, as the "Priesthood of the Bow" of the Zuñi, which formed a close corporation with initiation rites and secret ceremonies.

Throughout the plains from N. to S. there existed a military organization so similar among the various tribes as to suggest a common origin, although with patriotic pride each tribe claimed it as its own. Maximilian was inclined to ascribe its origin to the Crows, perhaps on the ground of their well-known ceremonial temperament, but it is probably much older than their traditional separation from the Hidatsa. In each tribe the organization consisted of from 4 to 12 societies of varying rank and prominence, ranging from boys or untried warriors up to old men who had earned retirement by long years of service on the warpath

and thenceforth confined themselves to the supervision of the tribal ceremonies. The name of each society had reference to some mystic animal protector or to some costume, duty, or peculiarity connected with the membership. Thus, among the Kiowa there were 6 warrior societies, known respectively as Rabbits, Young Mountain Sheep, Horse Caps, Black Legs, Skunkberry People (*alias* Crazy Horses), and Chief Dogs. The Rabbit society consisted of boys of about 10 to 12 years of age, who were trained in their future duties by certain old men, and who had a dance in which the step was intended to imitate the jumping motion of a rabbit. The next four societies named were all of about equal rank, varying only according to the merit or reputation of the officers at any particular time; but the K'oitseño or 'Chief Dogs' were limited to 10 picked and tried warriors of surpassing courage, each of whom, at his investiture with the sacred sash of the order, took a solemn obligation never, while wearing it, to turn his face from the enemy in battle except at the urgent appeal of the whole war party. It was the duty of the leader, who wore a black sash passing around his neck and hanging down to the ground, to dismount and anchor himself in the front of the charge by driving his lance through the end of the sash into the earth, there to exhort the warriors without moving from his station unless, should the battle be lost, they released him by pulling out the lance. Should they forget or be prevented in the hurry of flight, he must die at his post. In consequence of the great danger thus involved, the K'oitseñ scarf was worn only when it was the deliberate intention to fight a pitched and decisive battle.

Each society had its own dance, songs, ceremonial costume, and insignia, besides special tabus and obligations. The ceremonial dance of one society in each tribe was usually characterized by some species of clown play, most frequently taking the form of speech and action the reverse of what the spectators were expecting. The organization among the Arapaho, Cheyenne, Sioux, and other tribes was essentially the same as among the Kiowa. At all tribal assemblies, ceremonial hunts, and on great war expeditions, the various societies took charge of the routine details and acted both as performers and as police. Among the Cheyenne the Hotimitáneo, or Dog Men society ("Dog Soldiers"), acquired such prominence in the frontier wars by virtue of superior number and the bravery of their leadership that the name has frequently been used by writers to designate the whole organization.

Consult Clark, Ind. Sign Lang., article "Soldier" and tribal articles, 1885; Cushing in 2d Rep. B. A. E., 1883; De Bry, Brev. Narr., 1591; G. A. Dorsey in Field Columb. Mus. Pub., Anthropol. ser., ix, no. 1, 1905; J. O. Dorsey in Am. Nat., xix, no. 7, 1885; Gatschet, Creek Migr. Leg., i, ii, 1884-88; Grinnell, Blackfoot Lodge Tales, 1892; Maximilian, Travels, 1843; Mooney (1) in 14th Rep. B. A. E., 1896; (2) in 17th Rep. B. A. E., 1898.

(J. M.)

Milkwane. A Luiseño village formerly in the neighborhood of San Luis Rey mission, s. Cal.—Taylor in Cal. Farmer, May 11, 1860.

Milky Wash ruin. A prehistoric pueblo ruin extending $\frac{3}{4}$ of a mile along the edge of Milky hollow, about 9 m. E. of the Petrified Forest, Apache co., Ariz. Much of the ruin has disappeared over the bluff. The houses were small and rudely constructed; the pottery is coarse and undecorated, and red, gray, and black in color; stone implements show excellent workmanship. A feature of the ruin is its stove-like fire altars. See Hough in Rep. Nat. Mus. 1901, 319-20, 1903.

Milky Hollow Ruin.—Hough, *ibid.*, pl. 53.

Millich. The Chehalis name of a village on the s. side of Grays harbor, Wash.—Gibbs, MS. no. 248, B. A. E.

Milly. The handsome young daughter of Hillis Hadjo (q. v.), a Seminole chief. When, in Dec. 1817, a party of Seminoles captured an American named McKrimmon and carried him to Mikasuki, Hillis Hadjo, who resided in that town, ordered him to be burnt to death. The stake was set, McKrimmon with his head shaved was bound to it, and wood was piled about him. When the Indians finished their dance and were about to kindle the fire, Milly rushed to her father and upon her knees begged that he would spare the prisoner's life; but it was not until she evinced a determination to perish with him that her plea was granted. McKrimmon was subsequently sold to the Spaniards and thus obtained his liberty. After Hillis Hadjo's death, Milly, who with her father's family was captured by American troops, received an offer of marriage from McKrimmon, but refused to accept it until she was satisfied that the offer was prompted by motives other than his obligation to her for saving his life. See McKenney and Hall, Ind. Tribes, iii, 193, 1838; Drake, Inds., 403, 1880.

Milpais. A Papago village with 250 inhabitants in 1869 (Browne, Apache Country, 291, 1869). Probably intended for *Malpais* (Span.: 'bad land', locally referring specifically to spread-out lava), or for *Milpas* ('cultivated patches').

Milpillas. Two Tepehuane pueblos, one known as Milpillas Grandes (Span. 'great

little-cultivated-patches'), the other as Milpillas Chiquitas, both situated in s. w. Durango, Mexico. The inhabitants of both villages are now much mixed with whites and Aztecs.

Milpillas.—Orozco y Berra, Geog., 281, 1864. **Santa María Milpillas.**—*Ibid.*, 319.

Milwaukee ('fine land', from *milo* or *mino* 'good', *aki* 'land'.—Baraga. Cf. Kelton, cited below). A former village with a mixed population of Mascoutens, Foxes, and Potawatomi, situated on Milwaukee r., Wis., at or near the site of the present Milwaukee, in 1699. See St Cosme, cited below, and Warren, Hist. Ojibways, 32, 1885. Cf. *Miskouakimna*. **Meliwarik.**—St Cosme (1699) in Shea, Early Voy., 50, 1861. **Melleki.**—Old map (ca. 1699), followed in map in Latham, Inds. Wis., 1870. **Melleoki.**—Shea, Early Voy., 50, 1861 (early map form). **Meloki.**—*Ibid.* **Melwarck.**—St Cosme (1699) quoted by Latham, op. cit., 5. **Melwarik.**—*Ibid.* **Milwaukee.**—Dick (1827) in H. R. Mimal. A former Maidu village on the w. bank of Feather r., just below Yuba city, Sutter co., Cal. (R. B. D.)

Mimai.—Dixon in Bull. Am. Mus. Nat. Hist., xvii, pl. xxxviii, 1905 (misprint). **Mimal.**—Bancroft, Nat. Races, i, 450, 1882. **Wi-ma.**—Powers in Cont. N. A. Ethnol., iii, 282, 1877.

Mimbrenos (Span.: 'people of the willows'). A branch of the Apache who took their popular name from the Mimbres mts., s. w. N. Mex., but who roamed over the country from the E. side of the Rio Grande in N. Mex. to San Francisco r. in Arizona, a favorite haunt being near Lake Guzman, w. of El Paso, in Chihuahua. Between 1854 and 1869 their number was estimated at 400 to 750, under Mangas Coloradas (q. v.). In habits they were similar to the other Apache, gaining a livelihood by raiding settlements in New Mexico, Arizona, and Mexico. They made peace with the Mexicans from time to time and before 1870 were supplied with rations by the military post at Janos, Chihuahua. They were sometimes called Coppermine Apache on account of their occupancy of the territory in which the Santa Rita mines in s. w. N. Mex. are situated. In 1875 a part of them joined the Mescaleros and a part were under the Hot Springs (Chiricahua) agency, N. Mex. They are now divided between the Mescalero res., N. Mex., and Ft Apache agency, Ariz., but their number is not separately reported. (F. W. H.)

Mina. The extinct Salt clans of Sia and San Felipe pueblos, N. Mex.

Mina-háno.—Hodge in Am. Anthropol., IX, 352, 1896 (*háno*=‘people’).

Minas. A Micmac village or band in Nova Scotia in 1760.—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 115, 1809.

Minatti. A village, probably Seminole, formerly at the source of Peace cr., w. central Florida, probably in the present Polk co. (H. R. Doc. 78, 25th Cong., 2d sess., map, 768-9, 1838). The name evidently bears no relation to the present Manatee in Manatee co.

Minemaung. A Potawatomi village, called after a chief of this name, near the present Grantpark, Kankakee co., N. E. Illinois, on land ceded in 1832.—Camp Tippecanoe treaty (1832) in U. S. Ind. Treaties, 698, 1873.

Mines and Quarries. The term mining is usually applied to operations connected with the procuring of metals from the earth, while the term quarrying is applied to the procuring of stone. The former term sometimes refers also to the obtaining of minerals occurring in minute quantities, as turquoise, or of substances, as clay, salt, and ocher, not usually removed in solid or bulky bodies, especially where deep excavations or tunneling are required. Gold, silver, and copper were used by many of the more progressive American tribes before the discovery; but copper was the only metal extensively used N. of Mexico. The smelting of ores was probably imperfectly understood, even by the most advanced tribes, and iron, except in meteoric form or in the ore, was unknown. Their most important mines of copper (q. v.) with which we are acquainted were in N. Michigan penin. and on Isle Royale in L. Superior. Here the native metal occurs in masses and bits distributed in more or less compact bodies of eruptive rock. The mining operations consisted in removing the superficial earth and débris and in breaking up the rock with stone sledges and by the application of heat, thus freeing the masses of metal, some of which were of large size. One specimen, partially removed from its bed by the aborigines and then abandoned, weighed nearly 3 tons. “It was 16½ feet below the surface, and under it were poles, as if it had been entirely detached, but it had not been much displaced” (Winchell in Pop. Sci. Monthly, Sept. 1881). Another very large mass encountered in the shaft of the Minnesota mine on Ontonagon r., Mich., which had been partially

removed by the native miners, is referred to by MacLean: “The excavation [ancient] reached a depth of 26 ft., which was filled up with clay and a matted mass of moldering vegetable matter. At a depth of 18 ft., among a mass of leaves, sticks, and water, Mr Knapp discovered a detached mass of copper weighing 6 tons. This mass had been raised about 5 ft. along the foot of the lode on timbers by means of wedges and was left upon a cobwork of logs. These logs were from 6 to 8 in. in diameter, the ends of which plainly showed the marks of a cutting tool. The upper surface and edges of the mass of copper were beaten and pounded smooth, showing that the irregular protruding pieces had been broken off. Near it were found other masses. On the walls of the shaft were marks of fire. Besides charcoal there was found a stone sledge weighing 36 pounds and a copper maul weighing 25 pounds. Stone mauls, ashes, and charcoal have been found in all these mines” (MacLean, Mound Builders, 76-77, 1904). The excavations were generally not deep, being merely pits, but tunneling was occasionally resorted to (Gillman). In McCargole’s cove, on Isle Royale, nearly a square mile of the surface has been worked over, the pits connecting with one another over a large part of the area. Countless broken and unbroken stone sledges, mostly roundish boulders of hard stone brought from the lake shore many miles away, are scattered over the surface and mixed with the débris. As indicated by the presence of rough grooves and notches, these implements were generally hafted for use. A remnant of a withe handle was preserved in one instance, and a wooden shovel, a wooden basin, a wooden ladder, and a piece of knotted rawhide string are among the relics obtained from the ancient pits by modern miners.

In glacial times extensive surfaces of the copper-bearing rocks were swept by the under surfaces of the great ice sheets, and thus many masses and bits of the metal, more or less scarred and battered, were carried southward over Michigan, Wisconsin, and Minnesota, and even farther s. These masses, deposited with the rocky débris of moraines, were collected and utilized by the natives. The masses of copper, when obtained, were probably in the main carried away to distant settlements to be worked into implements, utensils, and ornaments. The distribution of the product was very wide, extending over the entire country E. of the great plains. Cinnabar, ocher, salt, alum, and clay were mined in many sections of the country, Indians sometimes going long distances in quest of these materials. Coal was and is ob-

tained from exposures in the bluffs, by the Hopi Indians, and there is historical testimony that it was thus procured for pottery-burning in former times. Iron oxides were extensively mined by some tribes, as is illustrated in an iron mine recently opened in Franklin co., Mo., where deep, sinuous galleries had been excavated in the ore body for the purpose of obtaining the red and yellow oxides for paint (Holmes).

SECTION OF PAINT MINE IN A BED OF IRON ORE; MISSOURI. DEPTH OF EXCAVATIONS ABOUT 20 FT. (HOLMES)

The quarrying of stone for the manufacture of implements, utensils, and ornaments was one of the great industries of the native tribes. Ancient excavations, surrounded by the débris of implement-making, are of common occurrence in the United States. Flint (q. v.) and other varieties of stone sufficiently brittle to be shaped by the fracture processes were especially sought, but soapstone, mica, and turquoise were also quarried. The flinty rocks include chert (usually called flint), novaculite, quartz, quartzite, jasper, argillite, rhyolite, and obsidian (q. v.). The best known flint quarries are those on Flint Ridge, Licking co., Ohio; at Mill Creek, Union co., Ill., and in the vicinity of Hot Springs, Ark. Many others have been located, and doubtless still others remain undiscovered in the forests and mountains.

At Flint Ridge extensive beds of richly colored flint of excellent quality occur, forming the summit of the flattish ridge. The ancient pittings cover hundreds of acres, and in numerous cases are still open to a depth of from 10 to 20 ft. About the pits are ridges and heaps of débris and many shop sites where the implement forms were roughed out, and masses of fractured flint and flakage, as well as countless hammerstones used in the shaping operations (see *Stone-work*). The flint body was first uncovered, probably with the aid of stone, antler, and wooden tools, and then broken up with heavy stone hammers, aided by the application of heat. Similar quarries occur in Coshocton co., as well as in other parts

of Ohio, and in West Virginia, Indiana, Kentucky, and Tennessee. The quarries in Arkansas are perhaps even more extensive than those in Ohio, the stone in the best known examples being a fine-grained variety of chert known as novaculite (q. v.), which occurs in beds of great thickness and undetermined extent. The phenomena of the quarries correspond closely with those of Flint Ridge (Holmes). Similar quarries of chert are found at many points in Missouri and Indian Territory (Holmes). The great group of quarries found in the vicinity of Mill Creek, Ill., presents superficial indications corresponding closely with those of the Ohio and Arkansas quarries, but the stone obtained was a gray flint, which occurs in the form of nodular and lenticular masses, mostly of irregular outline. These concretions were well suited to the manufacture of the large flaked implements—spades, hoes, knives, and spearheads—found distributed over a vast area in the middle Mississippi valley. The original pittings, excavated in the compact deposits of calcareous clay and sand in which the nodules are embedded, often reached a depth of 25 ft or more. A rude stone pick was used in excavating, and stone as well as antler hammers were employed in the flaking work (Phillips). See *Flint*. Quarries of quartzite (q. v.) occur in Wyoming (Dorsey); of argillite (q. v.) in Bucks co., Pa. (Mercer); of jasper (q. v.) in the same county (Mercer); and of rhyolite (q. v.) in Adams co. (Holmes). Differing in type from the preceding are the extensive quarries on Piney branch of Rock cr., in the suburbs of Washington, D. C. Here quartzite boulders were quarried from the Cretaceous bluffs for the manufacture of flaked implements (Holmes). See *Quartzite*.

SECTION OF FILLED-UP BOULDER QUARRY; D. C. HEIGHT OF QUARRY FACE ABOUT 10 FT. (HOLMES)

Steatite (q. v.), called also soapstone, was quarried at many points along the Atlantic slope of the Appalachian highland from Georgia to New York, also in

the New England states, and in the far West, especially in California. This stone was easily carved, and, because it is not

WALL OF SOAPSTONE QUARRY SHOWING STUMPS LEFT IN REMOVING LUMPS OF THE ROCK; CALIFORNIA. (HOLMES)

readily fractured by heat, was much used by the Indians for cooking vessels and for tobacco pipes. The masses of this rock were uncovered, and lumps large enough to be shaped into pots were cut out with the aid of well-sharpened picks and chisels of stone (Holmes, McGuire, Schumacher, Reynolds, Angell).

Mica (q. v.) was quarried in many places in Virginia and North Carolina, the pittings being numerous and large. The sheets of this material were used by the natives for mirrors and for the manufacture of ornaments. Building stone was required in great quantities in the building of pueblos and cliff-dwellings in the arid region, but surface rock was so readily available that deep quarrying was not necessary. Catlinite (q. v.), a red-clay stone, was extensively quarried for the manufacture of tobacco pipes and ornaments. The quarries are situated in Pipestone co., Minn., and are still worked to some extent by the neighboring Siouan tribes. The industry is not regarded as a very ancient one, although the manu-

factured articles are widely distributed (Catlin, Holmes).

Turquoise (q. v.) is found in several of the Western states, but so far as known was mined extensively at only two points, Los Cerrillos, near Santa Fé, N. Mex. (Blake, Silliman), and at Turquoise mtn., Cochise co., Ariz. These mines were operated by the natives before the arrival of the Spanish, as is indicated by the pittings and rude stone mining tools found associated with them. The mines were operated also by the Spaniards, and in more recent years in a desultory way by the present inhabitants of the region. The mines at Los Cerrillos seem to have been extensively worked by the aborigines. Blake, who examined the site about 1855, says: "On reaching the locality I was struck with astonishment at the extent of the excavation. It is an immense pit with precipitous sides of angular rock, projecting in crags, which sustain a growth of pines and shrubs in the fissures. On one side the rocks tower into a precipice and overhang so as to

form a cave; at another place the side is low and formed of the broken rocks which were removed. From the top of the cliff the excavation appears to be 200 ft in depth and 300 or more in width. The bottom is funnel-shaped and formed by the sloping banks of the debris of fragments of the sides. On this debris, at the bottom of the pit, pine trees over a hundred years old are now growing, and the

CATLINITE (PIPESTONE) QUARRY WORKED BY SIOUX INDIANS. THE LEDGE OF PIPESTONE APPEARS NEAR BASE OF WALL. (BENNETT)

bank of refuse rock is similarly covered with trees. This great excavation is made in the solid rocks, and tens of thousands of tons of rock have been broken out. This is not the only opening; there are several pits in the vicinity more limited in extent, some of them being apparently much more recent" (Blake in Am. Jour. Sci., 2d s., xxv, 227, 1858). Silliman (Eng. and Min. Jour., xxxii, 169, 1881) speaks of finding in these mines "numerous stone hammers, some to be held in the hand and others

swung as sledges, fashioned with wedge-shaped edges and a groove for a handle. A hammer weighing over 20 pounds was found while I was at the Cerrillos, to which the withe was still attached, with its oak handle; the same scrub-oak which is found growing abundantly on the hill-sides, now quite well preserved after at least two centuries of entombment in this perfectly dry rock. The stone used for these hammers is the hard and tough hornblende andesite, or propylite, which forms the Cerro de Oro and other Cerrillos hills. With these rude tools, and without iron and steel, using fire in place of explosives, these patient old workers managed to break down and remove the incredible masses of these tufaceous rocks which form the mounds already described."

Among the various works which may be consulted on the native copper mines are: Foster and Whitney in H. R. Ex. Doc. 69, 31st Cong., 1st sess., 1850; Gillman in Smithsonian. Rep. 1873, 1874; Holmes in Am. Anthropol., n. s., III, 1901; McLean, Mound Builders, 1879; Packard in Am. Antiq., xv, no. 2, 1893; Whittlesey in Smithsonian. Cont., XIII, 1862; Winchell in Pop. Sci. Mo., Sept. 1881. Quarries of brittle varieties of stone are described by Dorsey in Pub. 51, Field Columbian Mus., 1900; Smith (Fowke) in Nat. Mus. Rep. 1884, 1885; Holmes (1) in Bull. 21, B. A. E., 1894, (2) in 15th Rep. B. A. E., 1897; Mercer (1) in Am. Anthropol., VII, 1894, (2) in Proc. A. A. S., XLII, 1894, (3) in Proc. Am. Philos. Soc., XXXIV, 396, 1895; Phillips in Am. Anthropol., n. s., II, 37, 1900. Soapstone quarries are described by Angell in Am. Nat., XII, 1878; Holmes in 15th Rep. B. A. E., 1897; McGuire in Trans. Anthropol. Soc. Wash., II, 1883; Schumacher in 11th Rep. Peabody Mus., 1878. Pipestone quarries by Catlin, N. Am. Inds., I, 1866; Holmes in Proc. A. A. S., XLI, 1892. Turquoise by Blake (1) in Am. Jour. Sci., 2d s., XXV, 1858, (2) in Am. Antiq., XXI, 1899; Kunz, Gems and Precious Stones, 1890; Silliman in Eng. and Min. Jour., XXXII, 1881. (W. H. H.)

Minesetperi ('those who defecate under the bank.'—H. L. Scott). A division of the Crows, more commonly known as River Crows, who separated from the Mountain Crows about 1859 and settled on Missouri r.

Mine-set-peri.—Culbertson in Smithsonian. Rep. 1850, 144, 1851. **Minesupérik**.—Col. H. L. Scott, inf'n, 1906 (proper form, with meaning above given). **Minneh-sup-pay-deh**.—Anon. MS. Crow vocab., B. A. E. **River Crows**.—Pease in Ind. Aff. Rep. 1871, 420, 1872. **Sap-suckers**.—Culbertson, op. cit.

Mingan (*Ma'ingün*, 'wolf'). A Montagnais (Algonquian) village near the mouth of Mingan r., on the N. shore of the Gulf of St. Lawrence, Quebec. It is the general rendezvous for all the Indians

for several hundred miles around. The name occurs in the grant of the seigniorship in 1661, and a mission was probably established there soon after (Hind, Lab. Penin., I, 43-44, 1863). The village numbered 178 inhabitants in 1884, and 241 in 1906.

(J. M.)

Ma'ingan.—Wm. Jones, inf'n, 1906.

Minghasanwetazhi (*Min'xa-san-wet'aj*, 'touches not swans'). A subgen of the Mandinkagaghe gens of the Omaha.—Dorsey in 15th Rep. B. A. E., 228, 1897.

Minghaska (*Min'xa'ska*, 'swan'). A gentile subdivision of the Osage.—Dorsey in 15th Rep. B. A. E., 234, 1897.

Minghaskainihkashina (*Min'xa'ska i'niy-k'äci'w'a*, 'swan people'). A subgen of the Minkin gens of the Osage.—Dorsey in 15th Rep. B. A. E., 233, 1897.

Mingko. The 'Royal' clan of the Ishpanee phratry of the Chickasaw, so called because it was the chief or ruling clan.

Ming-ko.—Morgan, Anc. Soc., 163, 1877. **Mingo**.—Gatschet, Creek Migr. Leg., I, 96, 1884.

Mingo. The Choctaw and Chickasaw equivalent of the Muskogee *miko*, 'chief', both words being of frequent use by historians and travelers in the Gulf states during the colonial period. (A. F. C.)

Mingo (Algonquian: *Mingwe*, 'stealthy, treacherous'). A name applied in various forms by the Delawares and affiliated tribes to the Iroquois and cognate tribes, and more particularly used during the late colonial period by the Americans to designate a detached band of Iroquois who had left the villages of the main body before 1750 and formed new settlements in Pennsylvania, on upper Ohio r., in the neighborhood of the Shawnee, Delawares, and neighboring tribes. From that period their relations were more intimate with the western tribes than with the Iroquois, and they were frequently hostile to the whites while the parent body was at peace. They gradually moved down the Ohio, and just previous to the Revolution were living in the vicinity of Steubenville, Ohio. In 1766 their settlement, known as Mingo town, contained 60 families, and was the only Indian settlement on the Ohio from Pittsburgh to Louisville (Hutchins, Descrip., 1778). From the Ohio they crossed over to the headwaters of Scioto and Sandusky rs., where they began to be known as the Senecas of Sandusky, either because the majority were Seneca or because all the western Iroquois were supposed to be Seneca. They were called Seneca in their first relations with the Government, and that name thus became their official designation, generally with a descriptive addition to indicate their habitat. About 1800 they were joined by a part of the Cayuga, who had sold their lands in New York. In Ohio one part formed a con-

nection with the Shawnee at Lewistown, while the rest had their village on Sandusky r. The mixed band at Lewistown became known as the Mixed Senecas and Shawnees, to distinguish them from the others, who were still called Senecas of Sandusky. In 1831 both bands sold their lands in Ohio and removed to a tract in Kansas, on Neosho r., whence they removed in 1867 to Indian Territory, where they now are, the two bands being united and having no connection with the Shawnee. In 1831 the Sandusky band numbered 251, but by 1885 the entire body had become reduced to 239. In 1905 they numbered 366.

On Herman's map of 1670 is a notice of a tribe called the Black Minquas living beyond the mountains on the large Black Minqua r., probably the Ohio r. Formerly, by means of a branch of this river which approached a branch of the Susquehanna above the Conestoga fort (probably the Juniata r.), "those Black Minquas came over and as far as Delaware to trade, but the Sassquahana and Sinnicus Indians [Conestoga and Seneca] went over and destroyed that very great Nation." This statement and the location make it probable that the Black Minquas were the Erie, q. v. (J. M.)

Five Nations of the Sciota Plains.—Bouquet (1764), quoted by Rupp, W. Penn., app., 144, 1846. **Mincoos.**—Cowley (1775) in Arch. of Md., 94, 1892 (misprint). **Mingo.**—See *Iroquois*. **Neosho-Senecas.**—Schoolcraft, Ind. Tribes, iv, 591, 1854. **Sandusky Senecas.**—Lang and Taylor, Rep., 26, 1843. **Senecas of Ohio.**—Ft Stanwix treaty (1768) in N. Y. Doc. Col. Hist., viii, 111, 1857. **Senecas of Sandusky.**—Seneca Agency treaty (1832) in U. S. Ind. Treaties, 659, 1837. **Senecas of Sandusky and Stony creek.**—Greenville treaty (1814) in Am. St. Papers, Ind. Aff., i, 826, 1832. **Senecas of the Glazie.**—Mau-see council (1793), *ibid.*, 357. **Six Nations living at Sandusky.**—Greenville treaty (1795) quoted by Harris, Tour, 250, 1805.

Miniconjou ('those who plant beside the stream'). A division of the Teton Sioux. Their closest affinity is with the Oglala, Brulé, and Hunkpapa Teton. As the whites did not come into actual contact with the Teton tribes until recent times, there is no evidence as to their antiquity as distinct organizations. The first mention of the Miniconjou, unless under some unidentified name, is by Lewis and Clark (1804). These authors (Expedition, i, 61, 1814) speak of them as "Tetons Minnakenozzo, a nation inhabiting both sides of the Missouri above the Cheyenne r., and containing about 250 men." This indicates a population of perhaps 800, probably much below their actual number. Their history since they became known to the whites consists, like that of the other Sioux, of little else than war with and raids upon other tribes and depredations on the whites. They are frequently alluded to in official and other reports as among the most

unruly and troublesome of the Teton tribes. Haydensays: "This band, though peaceable when ruled by good chiefs, has always been very wild and independent, seldom visiting the trading posts, either on the Platte or on the Missouri, and having no intercourse with white men except with a few traders during the winter season." They were estimated in 1850 by Culbertson (Smithson. Rep. for 1850, 142) at 270 lodges, or between 2,100 and 2,200 people. At this time, and until brought upon reservations, they roamed over the Black hills and headwaters of Cheyenne r., being usually found from Cherry cr. on the Cheyenne to Grand r. Gen. Warren (1856) estimated them at 200 lodges and 1,600 souls. The Ind. Aff. Rep. for 1863 gives 1,280 as the population. They are now located with other Sioux bands on Cheyenne River res., S. Dak., but are not separately enumerated.

The divisions given by Lewis and Clark are as follows: (1) Minnakineazzo (Miniconjou), (2) Wanneewackataonelar, (3) Tarcoehparh. Culbertson (Smithson. Rep. 1850, 142, 1851), mentions four: (1) River that Flies, (2) Those that Eat no Dogs, (3) Shell-earring band, (4) Lejagadateah. Swift (1884), from information received from Indian sources, gives the following divisions (15th Rep. B. A. E., 220, 1897): (1) Unkcheyuta, (2) Glaglahecha, (3) Sunkayuteshni (Those that Eat no Dogs), (4) Nighetanka, (5) Wakpokinyan, (6) Inyanhaoin (Shell-earring band), (7) Shikshichela, (8) Waglezoin, (9) Wannawegha (probably the Wanneewackataonelar).

The Miniconjou were participants in the peace treaty of Ft Sully, S. Dak., Oct. 10, 1865, and in the treaty of Ft Laramie, Wyo., Apr. 29, 1868, by which they and other Sioux tribes were pledged to cease hostilities and the United States agreed to set apart for them a reservation.

E., 220, 1897 (own name). **Minna-ke-nozzo**.—Coyner, Lost Trappers, 70, 1847. **Min-na-kine-az-zo**.—Lewis and Clark, Discov., 34, 1806. **Minneacarguis**.—Ind. Aff. Rep., 1856, 68, 1857. **Minnecaushas**.—Ind. Aff. Rep., 301, 1854. **Minnecongoux**.—Ind. Aff. Rep., 1859, 120, 1860. **Minnecongous**.—Corliss, Lacotah MS. vocab., B. A. E., 107, 1874. **Minnecongaw**.—Boller, Among Inds. in Far W., 29, 1868. **Minnecongou**.—Gale, Upper Miss., 226, 1867. **Minneconjon**.—U. S. Ind. Treat. (1866), 890, 1873. **Minneconjos**.—Sen. Ex. Doc. 91, 34th Cong., 1st sess., 11, 1856. **Minneconjoux**.—Stanley in Poole, Among the Sioux, app., 232, 1881. **Minneconjos**.—Harney in Sen. Ex. Doc. 94, 34th Cong., 1st sess., 1, 1856. **Minneconjou**.—Brackett in Smithsonian. Rep. for 1876, 466. **Minne Congoux Sioux**.—Ind. Aff. Rep., 1855, 79, 1856. **Minne-Cousha**.—Bordeau in H. R. Rep., 63, 33d Cong., 2d sess., 13, 1855. **Minneconzues**.—Ind. Aff. Rep., 295, 1854. **Min-ne-kan'-zu**.—Hayden, Ethnogr. and Philol. Mo. Val., 371, 1862. **Minnekonjo**.—Ind. Aff. Rep., 247, 1877. **Minnecongaw**.—Parkman, Oregon Trail, 126, 1883. **Minnikan-jous**.—Warren (1855), Neb. and Ariz., 48, 1875. **Minnikanye Wozhipu**.—Burton, City of Sts., 119, 1861 (trans. 'those who plant by the water'). **Monecoshe Sioux**.—Ind. Aff. Rep., 1864, 228, 1865. **Teton-Menna-Kanozo**.—Lewis and Clark, Exped., i, map, 1814. **Té-ton-min-na-kine-az-zo**.—Lewis and Clark, Discov., 30, 1806. **Tetons Mennakenozzo**.—Long, Exped. St. Peter's R., i, 381, 1824. **Tetons Minnakenozzo**.—Lewis and Clark, Exped., i, 61, 1814. **Tetons Minnakeazzo**.—Lewis, Trav., 171, 1809. **Tetons Minnekincazzo**.—Farnham, Trav., 32, 1843. **Winnakenozzo**.—Ramsey in Ind. Aff. Rep., 87, 1850 (misprint), 'sun people'.

Mininikashina (*Mini'niy k'aciwa*, 'sun people'). A subgens of the Minkin gens of the Osage.—Dorsey in 15th Rep. B. A. E., 233, 1897.

Minisha ('red water'). An Oglala band under Eagle-that-Sails, in 1862. Cf. *Itazipecho*.

Min-i-sha'.—Hayden, Ethnogr. and Philol. Mo. Val., 376, 1862. **Red water band**.—Culbertson in Smithsonian. Rep. 1850, 142, 1851.

Minishinakato. A band of the Assiniboin.

Gens du Lac.—Hayden, Ethnogr. and Philol. Mo. Val., 387, 1862. **Min'-i-shi-nak'-a-to**.—Ibid.

Minisink ('the place of the Minsi.'—Heckewelder). The leading division of the Munsee (q. v.), with whom they are often confounded. They lived on the headwaters of Delaware r., in the s. w. part of Ulster and Orange cos., N. Y., and the adjacent parts of New Jersey and Pennsylvania. Their principal village, which bore the same name, was the council place of the Munsee, and seems to have been in Sussex co., N. J., near the point where the state line crosses Delaware r. They are said to have had three villages in 1663. The Munsee who moved w. with the Delawares were mainly of this division. (J. M.)

Manessings.—Kregier (1663) in N. Y. Doc. Col. Hist., xiii, 339, 1881. **Manissing**.—Ibid., 325. **Manissing**.—Ibid. **Menesiks**.—Croghan (1759) in Proud, Pa., ii, 297, 1798. **Menessings**.—Doc. of 1663 in N. Y. Doc. Col. Hist., xiii, 276, 1881. **Menisink**.—Doc. of 1755 in Rupp, Northampton, etc., Cos., 88, 1845. **Menissineck**.—Doc. of 1663 in N. Y. Doc. Col. Hist., xiii, 289, 1881. **Menissing**.—Beckman (1660), ibid., xii, 315, 1877. **Menissinges**.—Conference of 1660, ibid., xiii, 167, 1881. **Menissins**.—Beckman (1663), ibid., xii, 438, 1877. **Menissink**.—Doc. (1756) in Rupp, Northampton, etc., Cos., 106, 1845. **Menessineck**.—Schuyler

(1694) in N. Y. Doc. Col. Hist., iv, 99, 1854. **Minisicks**.—Swartwout (1662), ibid., xiii, 229, 1881. **Minising**.—Mandillon, Spectateur Américain, map, 1785. **Minisinks**.—Boudinot, Star in the West, 127, 1816. **Minissens**.—La Salle (1681) in Margry, Déc., ii, 148, 1877 (probably intended for Munsee). **Minissingh**.—Beckman (1660) in N. Y. Doc. Col. Hist., xii, 306, 1877. **Minissinks**.—Beckman (1663), ibid., 438. **Minisuk**.—McKenney and Hall, Ind. Tribes, iii, 80, 1858. **Minnessink**.—Van der Donck (1656) in Kuttentber, Tribes Hudson It., 96, 1872. **Minnisink**.—Canajoharie conf. (1759) in N. Y. Doc. Col. Hist., vii, 382, 1856 (location). **Minissinscks**.—Schuyler (1694), ibid., iv, 99, 1854. **Minissinke**.—New York conf. (1681), ibid., xiii, 551, 1881. **Minusing**.—Proud, Pa., ii, 320, 1798. **Monnesick**.—Addam (1653) in Drake, Bk. Inds., bk. 2, 79, 1848.

Miniskuyakichun ('wears salt'). A band of the Brulé Teton Sioux.

Miniskuya kichun.—Dorsey (after Cleveland) in 15th Rep. B. A. E., 219, 1897. **Miniskuya-kite'wa**.—Ibid.

Minkekhanye (*Min'-qe' qan'-ye*, 'big raccoon'). A subgens of the Ruche, the Pigeon gens of the Iowa.—Dorsey in 15th Rep. B. A. E., 239, 1897.

Minkeyine (*Min'-ke' yin'-e*, 'young raccoon'). A subgens of the Ruche, the Pigeon gens of the Iowa.—Dorsey in 15th Rep. B. A. E., 239, 1897.

Minkin (*Min k'in*, 'sun-carrier'). The 3d gens on the Tsishu side of the Osage tribal circle; also the 8th Kansa gens.—Dorsey in 15th Rep. B. A. E., 231, 233, 1897.

Minnehaha. The heroine in Henry Wadsworth Longfellow's *Song of Hiawatha*. Her father, home, and nationality are given in the lines—

At the doorway of his wigwam
Sat the Ancient Arrow-maker,
In the land of the Dacotahs,
Making arrow heads of jasper,
Arrow heads of chalcedony,
At his side, in all her beauty,
Sat the lovely Minnehaha,
Sat his daughter, Laughing Water.

Minnehaha of the song is the poet's own creation. Some of the elements of her creation, such as nationality and name, were suggested from a book called *Life and Legends of the Sioux*, by Mrs Mary Eastman (N. Y., 1849). The book contains some observations on life of the Sioux, together with a miscellaneous assortment of sentiment and romance. The scene of the events related in the narratives is on the Mississippi with the center in and around Ft Snelling. This lay on the borderland between the Sioux and the Chippewa, who at the time were constantly at war with each other. So when the Algonkin hero is told by his grandmother that the time has come for him to marry, and he replies and makes known his selection in the words that—

In the land of the Dacotahs
Lives the Arrow-maker's daughter,

we have the following dialogue which may be taken as an embodiment of the

underlying motive in the poet's mind in the creation of his Minnehaha:

Bring not to my lodge a stranger
From the land of the Dacotahs!
Very fierce are the Dacotahs,
Often is there war between us,
There are feuds yet unforgotten,
Wounds that ache and still may open!

For that reason, if no other,
Would I wed the fair Dacotah,
That our tribes might be united,
That old feuds might be forgotten,
And old wounds be healed forever!

The name Minnehaha is first met with in Mrs Eastman's book. In the introduction of that work she makes the statement that between Ft Snelling and the Falls of St Anthony "are the Little Falls 40 ft. in height on a stream that empties into the Mississippi. The Indians call them Minnehaha, or 'Laughing Waters.'" This is plainly the source of the heroine's name. The word Minnehaha is taken from the Teton dialect of the Dakota language. It is a compound, the first part of which is *mini* and means water. *Mini* occupies initial place in composition, as, *minito* blue water, *minisapa* black water, *miniyaya* water-cask. The rendering of Minnehaha as 'Laughing Water' is explained as follows: The verb to laugh is *ika* (i=German *ch*); to laugh at, *ihalia*; and the noun laughter is *hahia*. Hence, Minnehaha is literally 'water laughter.' The more reasonable definition of Minnehaha is to be sought from such a source as that given in the Dakota-English Dictionary of Stephen Return Riggs, according to whom *hahia* as a noun in compounds denotes 'cascade,' 'cataract'; hence *mini-hahia* would signify 'waterfall.' (w. j.)

Minnepata ('falling water'). A division of the Hidatsa.

Minipātā.—Matthews, inf'n, 1885. **Min-ne-pā'-ta**.—Morgan, *Anc. Soc.*, 159, 1877. **Water**.—*Ibid.*

Minnetarees of Knife River. An unidentified Hidatsa division, mentioned by Lewis and Clark (*Exped.*, I, 330, 1814). Possibly the Amahami.

Mipshuntik (*Mi'-p'cūn-tik*). A former Yaquina village on the N. side of Yaquina r., on the site of Toledo, Benton co., Ore.—Dorsey in *Jour. Am. Folk-lore*, III, 229, 1890.

Miqkano ('mud-turtle'). A subphratry or gens of the Menominee.—Hoffman in 14th Rep. B. A. E., pt. I, 42, 1896.

Miramichi. A former Micmac village on the right bank of Miramichi r., New Brunswick, where it flows into the Gulf of St Lawrence. The French had a mission there in the 17th century, and in 1760 there was a Micmac village or band of that name. (J. M.)

Mirimichi.—Frye (1760) in *Mass. Hist. Soc. Coll.*, 1st s., X, 115, 1809. **Merrimichi**.—*Mass. Hist. Soc. Coll.*, 1st s., III, 100, 1794. **Miramichi**.—Beauharnois (1745) in *N. Y. Doc. Col. Hist.*, X, 5, 1858.

Mirimichy.—Stiles (1761) in *Mass. Hist. Soc. Coll.*, 1st s., X, 116, 1809. **Mizamichis**.—Shea, *Miss. Val.*, 86, 1852 (misprint).

Miscanaka. The site of San Buenaventura mission, Cal. (Taylor in *Cal. Farmer*, July 24, 1863). Said by Indians in 1884 to be the name of a former Chumashan village at the site of the present school-house in that town. (H. W. H.)

Miscanaka.—Taylor, op. cit. **Mite-ka'-na-kau**.—Henshaw, *Buenaventura MS. vocab.*, B. A. E., 1884 (*tc=ch*).

Miseekwigweelis. A division of the Skagit tribe, now on Swinomish res., Wash. They participated with other tribes in the treaty of Pt Elliott, Wash., Jan. 22, 1855, by which they ceded lands to the United States and agreed to settle on a reservation.

Bes-he-kwe-guelts.—Mallet in *Ind. Aff. Rep.*, 198, 1877. **Mee-see-quai-ghich**.—U. S. *Ind. Treat.* (1855), 378, 1873. **Miseekwigweelis**.—Gibbs in *Cont. N. A. Ethnol.*, I, 180, 1877. **Mis-kai-whu**.—Gibbs in *Pac. R. R. Rep.*, I, 436, 1855.

Misesopano. A Chumashan village w. of Pueblo de las Canoas (San Buenaventura), Ventura co., Cal., in 1542; placed by Taylor on the Rafael Gonzales farm.

Misesopano.—Cabrillo (1542) in *Smith, Coloc. Doc. Fla.*, 181, 1857. **Mississipone**.—Taylor in *Cal. Farmer*, Apr. 17, 1863. **Pona**.—*Ibid.*

Mishawum (probably from *mishawumut*, 'a great spring'.—S. D. in *Mass. Hist. Soc. Coll.*, 2d s., X, 174, 1823; Jones (*Ind. Bul.*, 1867) translates it 'large peninsula'). A Massachusetts village formerly at Charlestown, near Boston, Mass. It was commonly known as Sagamore John's town, from the name of a resident chief. The English settled there in 1628. (J. M.)

Misham.—Drake, *Ind. Chron.*, 155, 1836. **Mishawum**.—Pemberton in *Mass. Hist. Soc. Coll.*, 1st s., III, 241, 1794. **Sagamore John's Town**.—Early English writers.

Mishcup. One of the New England names of the porgy (*Sparus argyrops*). Roger Williams (1643) gives *mishcup-paog*, the plural form, as the word for bream in the Narraganset dialect of Algonquian. *Mishcup*, the singular, is derived from *mishe*, 'great', and *kuppi*, 'close together', referring to the scales of the fish. From *mischuppapog* have been derived *scuppapug* and *scup*; also *porgy* or *paugee*. (A. F. C.)

Mishikhwutmetunne ('people who dwell on the stream called Mishi'). An Athapaskan tribe formerly occupying villages on upper Coquille r., Ore. In 1861 they numbered 55 men, 75 women, and 95 children (*Ind. Aff. Rep.*, 162, 1861). In 1884 the survivors were on Siletz res. Dorsey (*Jour. Am. Folk-lore*, III, 232, 1890) in that year obtained the following list of their villages (which he calls gentes) as they formerly existed on Coquille r. from the Kusan country to the head of the stream, although not necessarily at one period: Chockrelatan, Chuntshataa-

tunne, Duldulthawaiame, Enitunne, IIssethlthawaiame, Katomemetunne, Khinukhtunne, Khweshtunne, Kimestunne, Kthukhwestunne, Kthunataachuntunne, Meshtshe, Nakhituntunne, Nakhochatunne, Natarghilitunne, Natsushltatunne, Nilestunne, Rghoyinestunne, Sathlrehkhtun, Sekhushituntunne, Sunsunnestunne, Sushltakhotthattunne, Thikwanatiyatunne, Thltsharghilitunne, Thltsumetunne, Thlulchikhwtumetunne, Timethltunne, Tkhluhkhastunne, Tsatarghekhetunne, Ththinatlitunne, Tulwtumetunne, Tuskhlustunne, and Tustatunkhuushi.

Coquell.—Ind. Aff. Rep., 263, 1884. **Coquill.**—Newcomb in Ind. Aff. Rep., 162, 1861. **Coquilla.**—Ibid., 221. **Coquille.**—Abbott, MS. Coquille vocab., B. A. E., 1858. **De-d'a téné.**—Everette, Tutu MS. vocab., B. A. E., 1883 (= 'people by the northern water'). **Ithalé téné.**—Gatschet, Umpqua MS. vocab., B. A. E., 1877 (Umpqua name). **Kiguel.**—Robertson, Oregon, 129, 1846. **Kukwil.**—Dorsey, Alsea MS. vocab., B. A. E., 1884 (Alsea name). **Ku-kwil' júnne.**—Dorsey, Chetco MS. vocab., B. A. E., 1884 (Chetco name). **Ku-kwil' tún júnne.**—Dorsey, Naltunne-túnne MS. vocab., B. A. E., 1884 (Naltunne name). **Mi-ci'-kqwút-me' túnne.**—Dorsey in Jour. Am. Folk-lore, III, 232, 1890. **Mi-ci'-qwt.**—Dorsey, Chastacosta MS. vocab., B. A. E., 1884. **Upper Coquille.**—Dorsey in Am. Antiq., VII, 41, 1885.

Mishikinakwa. See *Little Turtle*.

Mishongnovi (*Mi-shong'-no-vi*, from *mishóninipituvi*, 'at the place of the other which remains erect,' referring to two irregular sandstone pillars, one of which has fallen. A. M. Stephen). A pueblo of the Hopi in N. E. Arizona, on the Middle mesa of Tusayan. The original pueblo, which stood w. of the present Mishongnovi and formed one of the villages of the ancient province of Tusayan, was abandoned about 1680 and the present town built. Mishongnovi was a visita of the mission of Shongopovi during the mission period (1629-80) and bore the name of San Buenaventura. Pop. 221 in 1870; 241 in 1877; 289 in 1882; 242 in 1891. See Mindeleff in 8th Rep. B. A. E., 26, 66-70, 1891; Fewkes in 17th Rep. B. A. E., 582, 1898; Dorsey and Voth in Field Colum. Mus. Pub. no. 66, 1902. (F. w. H.)

Buenaventura.—Vargas (1692) quoted by Davis, Span. Conq. N. Mex., 368, 1889. **Macanabi.**—Senex, map, 1710. **Maconabi.**—De l'Isle, Carte Mex. et Floride, 1703. **Majanani.**—Onate (1598) in Doc. Inéd., xvi, 207, 1871. **Manzana.**—Schoolcraft, Ind. Tribes, i, 519, 1851. **Masagnebe.**—Garcés (1776), Diary, 394, 1900 (Yavapai form). **Masagneve.**—Garcés (1775-6) quoted by Bancroft, Ariz. and N. Mex., 137, 1889. **Masanais.**—Arrowsmith, map N. A., 1795, ed. 1814. **Masagueve.**—Garcés (1775-6) quoted by Bancroft, Ariz. and N. Mex., 395, 1889 (Yavapai form). **Ma-shong'-ni-vi.**—Powell, 4th Rep. B. A. E., xl, 1886. **Mashóninipituvi.**—Stephen in 8th Rep. B. A. E., 26, 1891. **Ma-sang-na-vay.**—Irvine in Ind. Aff. Rep., 160, 1877. **Mausand.**—Calhoun quoted by Donaldson, Moqui Pueblo Inds., 14, 1893. **Mee-shom-o-neer.**—French, Hist. Coll. La., II, 175, note, 1875. **Me-shong-a-na-we.**—Crothers in Ind. Aff. Rep., 324, 1872. **Meshongnavi.**—Mason quoted by Donaldson, Moqui Pueblo Inds., 14, 1893. **Me-shung-a-na-we.**—Palmer in Ind. Aff. Rep., 133, 1870. **Me-shung-ne-vi.**—Shipley in Ind. Aff. Rep., 310, 1891. **Michonguave.**—Moffet in Overland

Monthly, 243, Sept. 1889. **Micongnivi.**—Ind. Aff. Rep., lxxx, 1886. **Mi-con'-in-o-vi.**—Fewkes in Am. Anthropol., v, 225, 1892. **Mi-con-o-vi.**—Ibid., 13. **Mi-shan-qu-na-vi.**—Ward (1861) quoted by Donaldson, Moqui Pueblo Inds., 14, 1893. **Mi-shong-i-niv.**—Powell, ibid. (misquoted). **Mi-shong'-i-ni-vi.**—Powell in Scribner's Mag., 196, 202, Dec. 1875. **Mi-shong-in-ovi.**—Stephen quoted by Donaldson, Moqui Pueblo Inds., 14, 1893. **Mishongnavi.**—Donaldson, ibid., 4. **Mishongop-avi.**—Bandelier in Arch. Inst. Papers, III, 135, 1890. **Mi-shon-na-vi.**—Donaldson, Moqui Pueblo Inds., pl. p. 62, 1893. **Monsonabi.**—Vargas (1692) quoted by Davis, Span. Conq. N. Mex., 367, 1869. **Monsonabi.**—Davis, El Gringo, 115, 1857. **Mooshahneh.**—Ives, Colorado R., 124, 1861. **Mooshanave.**—Taylor in Cal. A., 245, 1885. **Mossonganabi.**—Dominguez and Escalante (1776) in Doc. Hist. Mex., 2d s., 1, 548, 1854. **Moszasnavi.**—Cortez (1799) quoted in Pac. R. R. Rep., pt. 3, 121, 1856. **Mow-shai-i-na.**—Domenech, Deserts N. A., i, 185, 1860. **Moxainabe.**—Vetancurt (1693), Teatro Mex., III, 321, 1871. **Moxainabi.**—Vetancurt misquoted by Bancroft, Ariz. and N. Mex., 173, 1889. **Moxainavi.**—Bancroft, ibid., 349. **Moxionavi.**—Vargas (1692) quoted, ibid., 201. **Moxonau.**—Alcedo, Dic. Geog., III, 260, 1788. **Moxonavi.**—Villa-Señor, Teatro Am., pt. 2, 425, 1748. **Mú-shai-è-nò-wá.**—Pac. R. R. Rep., III, pt. 3, 13, 1856 (Zuni name). **Mú-shai-i-na.**—Ibid. (own name). **Mushánganevi.**—Gatschet in Mag. Am. Hist., 206, 1882. **Mushangene-vi.**—Loew in Pop. Sci. Monthly, v, 352, 1874. **Mu-shang-newy.**—Bourke, Moquis of Ariz., 90, 1884. **Mushanguewy.**—Bourke misquoted by Donaldson, Moqui Pueblo Inds., 14, 1893. **Mushá-ni.**—Barber in Am. Nat., 730, 1877. **Mushauguevy.**—Bourke in Proc. Am. Antiq. Soc., I, 244, 1881. **S. Buen. de Mosaguavi.**—Vargas (1692) quoted by Bancroft, Ariz. and N. Mex., 201, 1889. **Tse-itso-kit.**—Stephen, MS., B. A. E., 1887 (Navaho name: 'Great rocky dune'). **Tset-so-kit.**—Eaton in Schoolcraft, Ind. Tribes, IV, 220, 1854 (Navaho name).

Mishpapsna (*Mic-páp'-sná*). A former Chumashan village at the arroyo near Carpinteria, Santa Barbara co., Cal.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Mishtapalwa (*Mic-ta-pal'-wa*). A former Chumashan village at La Matanza, near San Buenaventura, Ventura co., Cal.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Mishtapawa (*Mic-ta-pá-wá*). One of the former Chumashan villages near Santa Inez mission, Santa Barbara co., Cal.—Henshaw, Santa Inez MS. vocab., B. A. E., 1884.

Mishtawayawininiwak. The Chippewa name for that part of the tribe living in Canada.

Mictawayáng.—Wm. Jones, inf'n, 1905 (c=sh). **Mishtawayawininiwak.**—A. S. Gatschet, Ojibwa MS., B. A. E., 1882 (*wininiwak*='people').

Mishumash (*Mic-hu'-mac*, native name of Santa Cruz id. and the islanders). A village of the Santa Cruz islanders of California, who belonged to the Chumashan

family.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Misinagua. A Chumashan village w. of Pueblo de las Canoas (San Buenaventura), Ventura co., Cal., in 1542. Placed by Taylor near San Marcos.

Misinagua.—Cabrillo (1542) in Smith, Colec. Doc. Fla., 181, 1857. **Misinajua.**—Taylor in Cal. Farmer, Apr. 17, 1863.

Misisagaikaniwininiwak (*Mishisaganiwininiwak*, 'people of the big lake.'—W. J.). A Chippewa band, taking its popular name from its residence on Mille Lac, E. Minn. They were included among the "Chippewa of the Mississippi" in the treaty of Washington, Feb. 22, 1855, by which a reserve was assigned to them in Crow Wing co., Minn. There are now (1905) 1,249 Mille Lac Chippewa under the White Earth agency in the same state.

Mille Lac band.—Treaty of 1863 in U. S. Ind. Treat., 215, 1873. **Mishisagaikaniwininiwak.**—Wm. Jones, inf'n, 1906. **Misisagaikani-wininiwak.**—Gatschet, Ojibwa MS., B. A. E., 1882.

Misketoiitok (*Mis-ke-toi'-i-tok*). A former Hupa village on or near Trinity r., Cal.—Powers in Cont. N. A. Ethnol., III, 73, 1877.

Miskouaha. One of the 4 divisions of the Nipissing at the Lake of the Two Mountains, Quebec, in 1736. Their totem was blood, for which reason they were also called Gens du Sang.

Gens du Sang.—Chauvignerie (1736) in N. Y. Doc. Col. Hist., IX, 1053, 1855. **Miskouachakhi.**—Jes. Rel. 1643, 38, 1858 (same?). **Miskouaha.**—Chauvignerie, op. cit. **Miskouakes.**—Chauvignerie as quoted by Schoolcraft, Ind. Tribes, III, 554, 1853.

Miskouakimina (prob. for *Meskwakimina*, 'red-earth town,' i. e., 'Fox town.'—W. J.). Marked on La Tour's map of 1784 as if a Fox village near the site of Milwaukee, Wis., on the w. shore of L. Michigan. The Sauk are marked on the same map as in the adjacent region.

Miskut. A former Hupa village on the E. bank of Trinity r., Cal., about $\frac{3}{4}$ m. below Takimilding. (P. E. G.)

Agarais.—Gibbs in Schoolcraft, Ind. Tribes, III, 139, 1853. **A-gar-it-is.**—McKee in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 194, 1853. **Eh-grertsh.**—Gibbs, MS., B. A. E., 1855. **Hergerits.**—Goddard, inf'n, 1903 (Yurok name). **Miscots.**—Keane in Stanford, Compend., 522, 1878. **Miscott.**—Ind. Aff. Rep., 82, 1870. **Mis'-kut.**—Powers in Cont. N. A. Ethnol., III, 73, 1877. **Misküt.**—Goddard, Life and Culture of the Hupa, 13, 1903. **O-gahrit-tis.**—Meyer, Nach dem Sacramento, 282, 1855.

Miskwagamiwisagaigan ('red - water lake', from *miskwa* 'red', *gami* 'fluid, water', *saga-igan* 'lake'). A Chippewa band living about Red lake and Red Lake r., N. Minn., and numbering 1,353 under the Leech Lake agency in 1905. By treaty at the Old crossing of Red Lake r., Minn., Apr. 12, 1864, this band and the Pembina ceded all their lands in Minnesota.

Chippewa of Red Lake.—Ind. Aff. Rep. 1905, 516, 1906 (official name). **Chippeways of Red Lake.**—Lewis, Travels, 178, 1809. **Miskü-Gami-Saga-igan-anishinabeg.**—Gatschet, op. cit. ('Red fluid lake

Indians'). **Miskwa-gamiwi-saga-igan.**—Gatschet, Ojibwa MS., B. A. E., 1882. **Miskwagamiwisagaigan.**—Wm. Jones, inf'n, 1905. **Miskwä-kä Mewë Sägagan Wënenëwak.**—Long, Exped. St Peter's R., II, 153, 1824.

Mismatuk (*Mis-ma'-tuk*). A former Chumashan village in the mountains near Santa Barbara, Cal., in a locality now called Arroyo Burro.—Henshaw, Santa Barbara MS. vocab., B. A. E., 1884.

Mispu (*Mis'-pu*). A former Chumashan village near the light-house at Santa Barbara, Cal., in a locality now called El Castillo Viejo.—Henshaw, Buenaventura MS. vocab., B. A. E., 1884.

Misshawa (*Mishäwä*, 'elk'). A gens of the Potawatomi, q. v.

Micäwä.—Wm. Jones, inf'n, 1905 (c=sh). **Mishä'-wä.**—Morgan, Anc. Soc., 167, 1877.

Missiassik (on the etymology of the name, see McAleer, Study in the Etymology of Missisquoi, 1906). An Algonquian tribe or body of Indians belonging to the Abnaki group, formerly living on Missisquoi r. in N. Vermont. Whether they formed a distinct tribe or a detached portion of some known Abnaki tribe is uncertain. If the latter, which seems probable, as the name "Wanderers" was sometimes applied to them, it is possible they were related to the Sokoki or to the Pequawket. They had a large village at the mouth of Missisquoi r., in Franklin co., on L. Champlain, but abandoned it about 1730 on account of the ravages of an epidemic, and removed to St Francis, Quebec. They subsequently sold their claims in Vermont to the "Seven Nations of Canada." Chauvignerie in 1736 gives 180 as the number of their warriors, indicating a population of 800. They seem to have been on peaceable terms with the Iroquois.

(J. M. C. T.)

Masiassuck.—Douglass, Summary, I, 185, 1755. **Massassuk.**—La Tour, map, 1784. **Messiasics.**—Boudinot, Star in the West, 127, 1816 (possibly the Missisaga). **Michiskoui.**—Chauvignerie (1736) in Schoolcraft, Ind. Tribes, III, 553, 1853. **Misiskoui.**—Beauharnois (1744) in N. Y. Doc. Col. Hist., IX, 1110, 1855 (village). **Missiassik.**—Vater, Mith., pt. 3, sec. 3, 390, 1816. **Missiscoui.**—De Bougainville (1757) in N. Y. Doc. Col. Hist., x, 607, 1858. **Missiskouy.**—Doc. of 1746, ibid., 32. **Wanderers.**—Chauvignerie, op. cit. (given as synonymous with Michiskoui).

Missinguimeschan. A former Piankashaw (?) village near the site of Washington, Daviess co., Ind.—Hough, map in Ind. Geol. Rep., 1883. Cf. *Meshingomesia*.

Mission. One of the three bodies of Seaton Lake Lillooet on the w. side of Seaton lake, under the Williams Lake agency, Brit. Col.; pop. 73 in 1906.—Can. Ind. Aff., pt. II, 77, 1906.

Mission (Burrard Inlet). The name given by the Canadian Dept. of Indian Affairs to one of six divisions of Squawmish under the Fraser River agency, Brit. Col.; pop. 213 in 1906.

Mission Indians of California. The first settlements in California were not made until more than a century after the earliest colonization of the peninsula of

toward the system, which amounted to little else than beneficent servitude. There were many attempts at escape from the missions. Generally these were fruitless, both on account of the presence of a few soldiers at each mission and through the aid given these by other Indians more under the fathers' influence. The Indians at each mission lived at and about it, often in houses of native type and construction, but were dependent for most of their food directly on the authorities. They consisted of the tribes of the region in which the mission was founded and of more distant tribes, generally from the interior. In some cases these were easily induced to settle at the mission and to subject themselves to its discipline and routine, the neophytes afterward acting as agents to bring in their wilder brethren.

The number of Indians at each mission varied from a few hundred to two or three thousand. There were thus in many cases settlements of considerable size; they possessed large herds of cattle and sheep and controlled many square miles of land. Theoretically this wealth was all the property of the Indians, held in trust for them by the Franciscan fathers. In 1834 the Mexican government, against the protests of the missionaries, secularized the missions. By this step the property of the missions was divided among the Indians, and they were freed from the restraint and

Lower California. The mission of San Diego, founded in 1769, was the first permanent white settlement within the limits of the present state; it was followed by 20 other Franciscan missions, founded at intervals until the year 1823 in the region between San Diego and San Francisco bay and just N. of the latter. With very few exceptions the Indians of this territory were brought under the influence of the missionaries with comparatively little difficulty, and more by persuasion than by the use of force. There is scarcely a record of any resistance or rebellion on the part of the natives resulting in the loss of life of even a single Spaniard at any of the missions except at San Diego, where there occurred an insignificant outbreak a few years after the foundation.

The influence of the missions was probably greater temporally than spiritually. The Indians were taught and compelled to work at agricultural pursuits and to some extent even at trades. Discipline, while not severe, was rigid; refusal to work was met by deprivation of food, and absence from church or tardiness there, by corporal punishments and confinement. Consequently the Indians, while often displaying much personal affection for the missionaries themselves, were always inclined to be recalcitrant

authority of their former masters. In a very few years, as might have been expected and as was predicted by the fathers, the Indians had been either deprived

of their lands and property or had squandered them, and were living in a hopeless condition. Their numbers decreased rapidly, so that to-day in the region between San Francisco and Santa Barbara there are probably fewer than 50 Indians. In s. California the decrease has been less rapid, and there are still about 3,000 of what are known as Mission Indians; these are, however, all of Shoshonean or Yuman stock. The decrease of population began even during the mission period, and it is probable that the deaths exceeded the births at the missions from the first, though during the earlier years the population was maintained or even increased by accessions from unconverted tribes. At the time of secularization, in 1834, the population of many missions was less than a decade earlier. The total number of baptisms during the 65 years of mission activity was about 90,000, and the population in the territory subject to mission influence may be estimated as having been at any one time from 35,000 to 45,000. At this proportion the population of the entire state, before settlement by the whites, would have been at least 100,000, and was probably much greater. See *California, Indians of*, with accompanying map, also *Missions; Population*. (A. L. K.)

Mission Valley. The local name of a band of Salish of Fraser superintendency, Brit. Col.—Can. Ind. Aff. 1878, 79, 1879.

Missions. From the very discovery of America the spiritual welfare of the native tribes was a subject of concern to the various colonizing nations, particularly Spain and France, with whom the Christianization and civilization of the Indians were made a regular part of the governmental scheme, and the missionary was frequently the pioneer explorer and diplomatic ambassador. In the English colonization, on the other hand, the work was usually left to the zeal of the individual philanthropist or of voluntary organizations.

First in chronologic order, historic importance, number of establishments, and population come the Catholic missions, conducted in the earlier period chiefly by Jesuits among the French and by Franciscans among the Spanish colonies. The earliest mission establishments within the present United States were those begun by the Spanish Franciscan Fathers, Padilla, Juan de la Cruz, and Descalona of the Coronado expedition, among the Quivira (Wichita), Pecos, and Tigua in 1542. Three years later the work was begun among the Texas tribes by Father Olmos. A century thereafter the first Protestant missions (Congregational) were founded by Mayhew and Eliot in Massachusetts. From that period the work

was carried on both N. and S. until almost every denomination was represented, including Orthodox Russian in Alaska and the Mormons in Utah.

THE SOUTHERN STATES.—All of this region, and even as far N. as Virginia, was loosely designated as Florida in the earlier period, and was entirely within the sphere of Spanish influence until about the end of the seventeenth century. The beginning of definite mission work in the Gulf territory was made in 1544 when the *Catholic* Franciscan Father Andrés de Olmos, a veteran in the Mexican field, struck northward into the Texas wilderness, and after getting about him a considerable body of converts led them back into Tamaulipas, where, under the name of Olives, they were organized into a regular mission town. In 1549 the Dominican Father Luis Cáncer with several companions attempted a beginning on the w. coast of Florida, but was murdered by the Indians almost as soon as his feet touched the land. In 1565 St Augustine (San Agustín) was founded and the work of Christianizing the natives was actively taken up, first by the Jesuits, but later, probably in 1573, by the Franciscans, who continued with it to the end. Within twenty years they had established a chain of flourishing missions along the coast from St Augustine to St Helena, in South Carolina, besides several others on the w. Florida coast. In 1597 a portion of the Gualte tribe (possibly the Yamasi) on the lower Georgia coast, under the leadership of a rival claimant for the chieftainship, attacked the neighboring missions and killed several of the missionaries before the friendly Indians could gather to the rescue. In consequence of this blow the work languished for several years, when it was taken up with greater zeal than before and the field extended to the interior tribes. By the year 1615 there were 20 missions, with about 40 Franciscan workers, established in Florida and the dependent coast region. The most noted of these missionaries is Father Francisco Pareja, author of a grammar and several devotional works in the Timucua language, the first books ever printed in any Indian language of the United States and the basis for the establishment of the Timucuan linguistic family. In the year 1655 the Christian Indian population of n. Florida and the Georgia coast was estimated at 26,000. The most successful result was obtained among the Timucua in the neighborhood of St Augustine and the Apalachee around the bay of that name. In 1687 the Yamasi attacked and destroyed the mission of Santa Catalina on the Georgia coast, and to escape pursuit fled to the English colony of Carolina. The traveler Dick-

enson has left a pleasant picture of the prosperous condition of the mission towns and their Indian population as he found them in 1699, which contrasts strongly with the barbarous condition of the heathen tribes farther s., among whom he had been a prisoner.

The English colony of Carolina had been founded in 1663, with a charter which was soon after extended southward to lat. 29°, thus including almost the whole area of Spanish occupancy and mission labor. The steadily-growing hostility between the two nations culminated in the winter of 1703-4, when Gov. Moore, of Carolina, with a small force of white men and a thousand or more well-armed warriors of Creek, Catawba, and other savage allies invaded the Apalachee country, destroyed one mission town after another, with their churches, fields, and orange groves, killed hundreds of their people, and carried away 1,400 prisoners to be sold as slaves. Anticipating the danger, the Apalachee had applied to the governor at St Augustine for guns with which to defend themselves, but had been refused, in accordance with the Spanish rule which forbade the issuing of firearms to Indians. The result was the destruction of the tribe and the reversion of the country to a wilderness condition, as Bartram found it 70 years later. In 1706 a second expedition visited a similar fate upon the Timucua, and the ruin of the Florida missions was complete. Some effort was made a few years later by an Apalachee chief to gather the remnant of his people into a new mission settlement near Pensacola, but with only temporary result.

In the meantime the French had effected lodgment at Biloxi, Miss. (1699), Mobile, New Orleans, and along the Mississippi, and the work of evangelizing the wild tribes was taken up at once by secular priests from the Seminary of Foreign Missions in Quebec. Stations were established among the Tunica, Natchez, and Choctaw of Mississippi, the Taensa, Huma, and Ceni (Caddo) of Louisiana, but with slight result. Among the Natchez particularly, whose elaborately organized native ritual included human sacrifice, not a single convert rewarded several years of labor. In 1725 several Jesuits arrived at New Orleans and took up their work in what was already an abandoned field, extending their effort to the Alibamu, in the present state of Alabama. On Sunday, Nov. 28, 1729, the Natchez war began with the massacre of the French garrison while at prayer, the first victim being the Jesuit Du Poisson, the priest at the altar. The "Louisiana Mission," as it was called, had never flourished, and the events and after con-

sequences of this war demoralized it until it came to an end with the expulsion of the Jesuits by royal decree in 1764.

The advance of the French along the Mississippi and the Gulf coast aroused the Spanish authorities to the importance of Texas, and shortly after the failure of La Salle's expedition 8 Spanish presidio missions were established in that territory. Each station was in charge of two or three Franciscan missionaries, with several families of civilized Indians from Mexico, a full equipment of stock and implements for farmers, and a small guard of soldiers. Plans were drawn for the colonization of the Indians around the missions, their instruction in religion, farming, and simple trades and home life, and in the Spanish language. Through a variety of misfortunes the first attempt proved a failure and the work was abandoned until 1717 (or earlier, according to La Harpe), when it was resumed—still under the Franciscans—among the various subtribes of the Caddo, Tonkawa, Carrizos, and others. The most important center was at San Antonio, where there was a group of 4 missions, including San Antonio de Padua, the famous Alamo. The mission of San Sabá was established among the Lipan in 1757, but was destroyed soon after by the hostile Comanche. A more successful foundation was begun in 1791 among the now extinct Karankawa. At their highest estate, probably about the year 1760, the Indian population attached to the various Texas missions numbered about 15,000. In this year Father Bartolomé García published a religious manual for the use of the converts at San Antonio mission, which remains almost the only linguistic monument of the Coahuiltecan stock. The missions continued to flourish until 1812, when they were suppressed by the Spanish Government and the Indians scattered, some rejoining the wild tribes, while others were absorbed into the Mexican population.

In 1735 the *Moravians* under Spangenberg started a school among the Yamacraw Creeks a few miles above Savannah, Ga., which continued until 1739, when, on refusal of the Moravians to take up arms against the Spaniards, they were forced to leave the colony. This seems to be the only attempt at mission work in either Georgia or South Carolina from the withdrawal of the Spaniards until the Moravian establishment at Spring Place, Ga., in 1801.

The great Cherokee tribe held the mountain region of both Carolinas, Georgia, Alabama, and Tennessee, and for our purpose their territory may be treated as a whole. Dismissing as doubtful Bristock's account, quoted by Shea, of a Cherokee mission in 1643, the earliest

missionary work among them appears to have been that of the mysterious Christian Priber, supposed, though not proven, to have been a French *Jesuit*, who established his headquarters among them at Tellico, E. Tenn., in 1736, and proceeded to organize them into a regular civilized form of government. After 5 years of successful progress he was seized by the South Carolina authorities, who regarded him as a French political emissary, and died while in prison. In 1801 the *Moravians* Steiner and Byhan began the Cherokee mission of Spring Place, N. W. Ga., and in 1821 the same denomination established another at Oothcaloga, in the same vicinity. Both of these existed until the missions were broken up by the State of Georgia in 1843. In 1804 Rev. Gideon Blackburn, for the *Presbyterians*, established a Cherokee mission school in E. Tennessee, which did good work for several years until compelled to suspend for lack of funds. In 1817 the American Board of Commissioners for Foreign Missions, under joint *Congregational* and *Presbyterian* management, established its first station in the tribe at Brainerd, not far from the present Chattanooga, Tenn., followed within a few years by several others, all of which were in flourishing condition when broken up in the Removal controversy in 1834. Among the most noted of these missionaries was Rev. S. A. Worcester, one of the principals in the founding of the 'Cherokee Phoenix' in 1828, the author of a large number of religious and other translations into Cherokee and the steadfast friend of the Indians in the controversy with the State of Georgia. He ministered to the tribe from his ordination in 1825 until his death in 1859, first in the old nation and afterward at Dwight, Ark., and Park Hill, near Tahlequah, Ind. T. Of an earlier period was Rev. Daniel S. Buttrick, 1817-47, who, however, never mastered the language sufficiently to preach without an interpreter. A native convert of the same period, David Brown, completed a manuscript translation of the New Testament into the new Cherokee syllabary in 1825.

In 1820 the American Board, through Rev. Mr Chapman, established Dwight mission for the Arkansas Cherokee, on Illinois cr., about 5 m. above its junction with the Arkansas, near the present Dardanelle, Ark. Under Rev. Cephas Washburn it grew to be perhaps the most important mission station in the S. W. until the removal of the tribe to Indian Ter., about 1839. From this station some attention also was given to the Osage. Of these missions of the American Board, Morse says officially in 1822: "They have been models, according to which other societies

have since made their establishments." As was then customary, they were largely aided by Government appropriation. On the consolidation of the whole Cherokee nation in Indian Ter. the missionaries followed, and new stations were established which, with some interruptions, remained in operation until the outbreak of the Civil war.

In 1820 a *Baptist* mission was established at Valleytown, near the present Murphy, W. N. Car., in charge of Rev. Thomas Posey, and in 1821 another of the same denomination at Coosawatee, Ga. A few years later the Valleytown mission was placed in charge of Rev. Evan Jones, who continued with it until the removal of the tribe to the W. He edited for some time a journal called the 'Cherokee Messenger,' in the native language and syllabary, and also made a translation of the New Testament. The mission work was resumed in the new country and continued with a large measure of success down to the modern period. Among the prominent native workers may be named Rev. Jesse Bushyhead.

After many years of neglect the Muskogean tribes again came in for attention. In 1881 the *Congregational-Presbyterian* American Board, through Rev. Cyrus Kingsbury, established the first station among the Choctaw at Eliot, on Yalabusha r. in N. Miss. Three years later it was placed in charge of Rev. Cyrus Byington, the noted Choctaw philologist, who continued in the work there and in the Indian Ter., for nearly half a century, until his death in 1868. The Eliot mission in its time was one of the most important in the southern country. In 1820 a second Choctaw mission, called Mayhew, was begun, and became the residence of Rev. Alfred Wright, also known for his linguistic work. On the removal of the tribe to Indian Ter., about 1830, it became necessary to abandon these stations and establish others in the new country beyond the Mississippi. Among the most noted was Wheelock, organized by Rev. Alfred Wright in 1832. Others were Stockbridge, Bennington, Mt Pleasant, and Spencer Academy. The American Board also extended its effort to the immigrant Creeks, establishing in their nation, under the supervision of Rev. R. M. Loughridge, Kowetah (Kawita) mission in 1843, and Tullahassee shortly after, with Oak Ridge, among the removed Seminole, a few years later. Most of these continued until the outbreak of the Civil war, and were reorganized after the war was over. The school at Cornwall, Conn., was also conducted as an auxiliary to the mission work of the earlier period (see *New England*). Among the Presbyterian workers

who have rendered distinguished service to Muskogean philology in the way of religious, educational, and dictionary translation may be noted the names of Byington, Williams, Alfred and Allen Wright, for the Choctaw, with Fleming, Loughridge, Ramsay, Winslett, Mrs Robertson, and the Perrymans (Indian) for the Creeks.

The *Baptists* began work in the Indian Ter. about 1832, and three years later had 4 missionaries at as many stations among the Choctaw, all salaried as teachers by the United States, "so that these stations were all sustained without cost to the funds which benevolence provided for many purposes" (McCoy). In 1839 they were in charge of Revs. Smedley, Potts, Hatch, and Dr Allen, respectively. Missions were established about the same time among the Creeks, the most noted laborers in the latter field being Rev. H. F. Buckner, from 1849 until his death in 1882, compiler of a Muskogee grammar and other works in the language, with Rev. John Davis and Rev. James Perryman, native ministers who had received their education at the Union (Presbyterian) mission among the Osage (see *Interior States*). As auxiliary to the work of this denomination, for the special purpose of training native workers, the American Baptist Board in 1819 established at Great Crossings, in Kentucky, a higher school, known as the Choctaw Academy, sometimes as Johnson's Academy. Although intended for promising youth of every tribe, its pupils came chiefly from the Choctaw and the Creeks until its discontinuance about 1843, in consequence of the Indian preference for home schools.

Work was begun by the *Methodists* among the Creeks in Indian Ter. about 1835, but was shortly afterward discontinued in consequence of difficulties with the tribe, and was not resumed until some years later.

MIDDLE ATLANTIC STATES. The earliest mission establishment within this territory was that founded by a company of 8 Spanish *Jesuits* and lay brothers with a number of educated Indian boys, under Father Juan Bautista Segura, at "Axacan," in Virginia, in 1570. The exact location is uncertain, but it seems to have been on or near the lower James or Pamunkey r. It was of brief existence. Hardly had the bark chapel been erected when the party was attacked by the Indians, led by a treacherous native interpreter, and the entire company massacred, with the exception of a single boy. The massacre was avenged by Menendez two years later, but the mission effort was not renewed.

The next undertaking was that of the English *Jesuits* who accompanied the

Maryland colony in 1633. The work was chiefly among the Conoy and Patuxent of Maryland, with incidental attention to the Virginia tribes. Several stations were established and their work, with the exception of a short period of warfare in 1639, was very successful, the principal chiefs being numbered among the converts, until the proscription of the Catholic religion by the Cromwell party in 1649. The leader of the Maryland mission was Father Andrew White, author of the oft-quoted "Relatio" and of a grammar and dictionary of the Piscataway (?) language.

The New York mission began in 1642, among the Mohawk, with the ministrations of the heroic Jesuit captive, Father Isaac Jogues, who met a cruel death at the hands of the same savages 4 years later. During a temporary peace between the French and the Iroquois in 1653 a regular post and mission church were built at Onondaga, the capital of the confederacy, by permission of the league. The Oneida, Cayuga, and Seneca invited and received missionaries. Much of their welcome was undoubtedly due to the presence in the Iroquois villages of large numbers of incorporated Christian captives from the destroyed Huron nation. The truce lasted but a short time, however, and before the summer of 1658 the missionaries had withdrawn and the war was again on. In 1666 peace was renewed and within a short time missions were again founded among all the tribes. In 1669 a few Christian Iroquois, sojourning at the Huron mission of Lorette, near Quebec, Canada, withdrew and formed a new mission settlement near Montreal, at a place on the St. Lawrence known as La Prairie, or under its mission name, St. François Xavier des Prés, the precursor of the later St. François Xavier du Sault and the modern Caughnawaga. The new town soon became the rallying point for all the Christian Iroquois, who removed to it in large numbers from all the tribes of the confederacy, particularly from the Mohawk towns. There also gathered the Huron and other Christian captives from among the Iroquois, as also many converts from all the various eastern Algonquian tribes in the French alliance. To this period belongs the noted Jesuit scholar, Etienne de Carheil, who, arriving in 1666, devoted the remaining 60 years of his life to work among the Cayuga, Hurons, and Ottawa, mastering all three languages, and leaving behind him a manuscript dictionary of Huron radices in Latin and French.

In 1668 also a considerable body of Christian Cayuga and other Iroquois, together with some adopted Hurons, crossed Lake Ontario from New York and set-

tled on the n. shore in the neighborhood of Quinté bay. At their request *Sulpician* priests were sent to minister to them, but within a few years the immigrant Indians had either returned to their original country or scattered among the other Canadian missions. In 1676 the Catholic Iroquois mission town of The Mountain was founded by the Sulpician fathers on the island of Montreal, with a well-organized industrial school in charge of the Congregation sisters. In consequence of these removals from the Iroquois country and the breaking out of a new war with the Five Tribes in 1687, the Jesuit missions in New York were brought to a close. In the seven years' war that followed, Christian Iroquois of the missions and heathen Iroquois of the Five Nations fought against each other as allies of French or English, respectively. The Mountain was abandoned in 1704, and the mission transferred to a new site at the Sault au Recollet, n. of Montreal. In 1720 this was again removed to the Lake of Two Mountains (Oka, or Canasadaga) on the same island of Montreal, where the Iroquois were joined by the Nipissing and Algonkin, of the former Sulpician mission town of Isle aux Tourtes. Among the noted workers identified with it, all of the scholarly Sulpician order, may be named Revs. Déperét, Güen, Mathevet, 1746-81; De Terlaye, 1754-77; Guichart, Dufresne, and Jean Andre Cuoc, 1843-90. Several of these gave attention also to the Algonkin connected with the same mission, and to the Iroquois of St Regis and other stations. All of them were fluent masters of the Iroquois language, and have left important contributions to philology, particularly Cuoc, whose "*Études philologiques*" and Iroquois dictionary remain our standard authorities.

All effort among the villages of the confederacy was finally abandoned, in consequence of the mutual hostility of France and England. In 1748 the Sulpician Father François Picquet founded the new mission settlement of Presentation on the St Lawrence at Oswegatchie, the present Ogdensburg, N. Y., which within three years had a prosperous population of nearly 400 families, drawn chiefly from the Onondaga and Cayuga tribes. About 1756 the still existing mission town of St Francis Regis (St Regis), on the s. side of the St Lawrence where the Canada-New York boundary intersects it, was founded under Jesuit auspices by Iroquois emigrants from Caughnawaga mission. The Oswegatchie settlement declined after the Revolution until its abandonment in 1807. Caughnawaga, St Regis, and Lake of Two Mountains still exist as Catholic Iroquois mis-

sion towns, the two first named being the largest Indian settlements n. of Mexico.

About the year 1755 the first mission in w. Pennsylvania was established among the Delawares at Sawcunk, on Beaver r., by the *Jesuit* Virot, but was soon discontinued, probably on account of the breaking out of the French and Indian war.

Philology owes much to the labor of these missionaries, particularly to the earlier Jesuit, Jacques Bruyas, and the later secular priest, Father Joseph Marcoux (St Regis and Caughnawaga, 1813, until his death in 1855), whose monumental Iroquois grammar and dictionary is the fruit of forty years' residence with the tribe. Of Father Bruyas, connected with the Sault Ste Louis (Caughnawaga) and other Iroquois missions from 1667 until his death in 1712, during a part of which period he was superior of all the Canadian missions, it was said that he was a master of the Mohawk language, speaking it as fluently as his native French, his dictionary of Mohawk root words being still a standard. Father Antoine Rinfret, 1796-1814, has left a body of more than 2,000 quarto pages of manuscript sermons in the Mohawk language; while Rev. Nicolas Burtin, of Caughnawaga (1855-), is an even more voluminous author.

The *Lutheran* minister, John Campanius Holm (commonly known as Campanius), chaplain of the Swedish colony in Delaware in 1643-48, gave much attention to missionary work among the neighboring Indians and translated a catechism into the Delaware language. This seems to have been the only missionary work in the Atlantic states by that denomination.

Under the encouragement of the English colonial government the *Episcopalians*, constituting the established Church of England, undertook work among the Iroquois tribes of New York as early as the beginning of the 18th century. In 1700 a Dutch Calvinist minister at Schenectady, Rev. Bernardus Freeman, who had already given sufficient attention to the Mohawk to acquire the language, was employed to prepare some Gospel and ritual translations, which formed the basis of the first booklet in the language, published in Boston in 1707. In 1712 the English Society for the Propagation of the Gospel sent out Rev. William Andrews, who, with the assistance of a Dutch interpreter, Lawrence Claesse, and of Rev. Bernardus Freeman, translated and published a great part of the liturgy and some parts of the Bible 3 years later. The work grew and extended to other tribes of the Iroquois confederacy, being especially fostered at a later period by Sir William Johnson, superintendent for Indian affairs, who had

published at his own expense, in 1769, a new edition of the Episcopal liturgy in the Mohawk language, the joint work of several missionaries, principal of whom was Rev. Henry Barclay. From this time until 1777 the principal worker in the tribe was Rev. John Stuart, who translated the New Testament into Iroquois. On the removal of the Mohawk and others of the Iroquois to Canada, in consequence of the Revolutionary war, a new edition was prepared by Daniel Claus, official interpreter, and published under the auspices of the Canadian provincial government. In 1787 a new translation of the Book of Common Prayer, prepared by the noted chief, Joseph Brant (see *Thegandewaga*), who had been a pupil of Wheelock's school, in Connecticut, was published at the expense of the English Government. In 1816 another edition appeared, prepared by the Rev. Eleazer Williams, a mixed-blood Caughnawaga, sometimes claimed as the "Lost Dauphin." Mr Williams labored chiefly among the Oneida in New York. He was succeeded, about 1821, by Solomon Davis, who followed the tribe in the emigration to Wisconsin. The latter was the author of several religious books in the Oneida dialect, including another edition of the Book of Common Prayer, published in 1837. In 1822 the Society for the Propagation of the Gospel, already noted, definitely transferred its operations to the Iroquois res., on Grand r., Ontario, where it still continues, its principal establishment being the Mohawk Institute, near Brantford. For this later period the most distinguished name is that of Rev. Abraham Nelles, chief missionary to the Six Nations of Canada for more than 50 years, almost up to his death in 1884. He was also the author of a translation of the Common Prayer, in which he was aided by an educated native, Aaron Hill. (See also *Canada, East*.)

Of less historic importance was the Munsee mission of Crossweeksung, near the present Freehold, N. J., conducted by Rev. David Brainerd for the Society for the Propagation of the Gospel, in 1746-47.

In Virginia a school for the education of Indians was established in connection with William and Mary College, Williamsburg, about 1697, chiefly through the effort of Mr Robert Boyle, and some Indians were still under instruction there as late as 1760. Some earlier plans to the same end had been frustrated by the outbreak of the Indian war of 1622 (Stith). Under Gov. Spotswood a school was established among the Saponi about 1712, but had only a brief existence. Both of these may be considered as under *Episcopalian* auspices.

In 1766, the *Congregational* minister Rev. Samuel Kirkland began among the Oneida of New York the work which he conducted with success for a period of nearly 40 years. The Stockbridge and Brotherton missions in New York and Wisconsin by the same denomination are properly a continuation of New England history, and are so treated in this article. To a later period belongs the Congregational mission among the Seneca of New York, maintained by Rev. Asher Wright from his first appointment in 1831 until his death in 1875. A fluent master of Seneca, he was the author of a number of religious and educational works in the language, besides for some years publishing a journal of miscellany in the same dialect.

The *Friends*, or *Quakers*, in Pennsylvania and New Jersey, from their first coming among the Indians, had uniformly cultivated kindly relations with them, and had taken every opportunity to enforce the teachings of Christianity by word and example, but seem not to have engaged in any regular mission work or established any mission schools in either of these colonies.

As early as 1791 the noted Seneca chief, Cornplanter, impressed by the efforts of the Quakers to bring about a friendly feeling between the two races, requested the Philadelphia yearly meeting to take charge of three boys of his tribe for education, one of them being his own son. In 1796 the meeting began regular work among the Iroquois in New York by establishing three workers among the Oneida and the Tuscarora. These teachers gave first attention to the building of a mill and a blacksmith shop, the introduction of farm tools, and the instruction of the Indians in their use. The women were instructed in household duties, including spinning and weaving. A school was also commenced, and the work progressed until 1799, when, in consequence of the suspicions of the Indians as to the ultimate purpose, the Quakers withdrew, leaving all their working plant behind. In 1798, on invitation of the Seneca, they established a similar working mission on the Allegany res., and later at Cattaraugus and Tunesassah, with the good result that in a few years most of the bark cabins had given place to log houses, and drunkenness was almost unknown. They remained undisturbed through the war of 1812, at one time forestalling a smallpox epidemic by the vaccination of about 1,000 Indians, but were soon afterward called on to champion the cause of their wards against the efforts at removal to the W. In the meantime the New York meeting, about 1807, had started schools among the

Stockbridge and Brotherton tribes from New England, then living in the Oneida country. Owing to the drinking habits of the Indians, but little result was accomplished. The removal of the Oneida and Stockbridges, about 1822, and the subsequent disturbed condition of the tribes brought about, first, the curtailment of the work, and afterward its abandonment, about 1843.

In 1740 the *Moravian* missionary, Christian Rauch, began a mission among the Mahican at Shecomeco, near the present Pine Plains, Dutchess co., N. Y., which attained a considerable measure of success until the hostility of the colonial government, instigated by the jealousy of those who had traded on the vices of the Indians, compelled its abandonment about 5 years later. During its continuance the work had been extended, in 1742, to the Scaticook, a mixed band of Mahican and remnant tribes settled just across the line, about the present Kent, Conn. Here a flourishing church was soon built up, with every prospect of a prosperous future, when the blow came. Some of the converts followed their teachers to the W.; the rest, left without help, relapsed into barbarism. The Shecomeco colony removed to Pennsylvania, where, after a brief stay at Bethlehem, the Moravian central station, a new mission, including both Mahican and Delawares, was established in 1746 at Gnadenhuetten, on Mahoning r., near its junction with the Lehigh. A chief agent in the arrangements was the noted philanthropist, Count Zinzendorf. Gnadenhuetten grew rapidly, soon having a Christian Indian congregation of 500. Missions were founded at Shamokin and other villages in e. Pennsylvania, which were attended also by Shawnee and Nanticoke, besides one in charge of Rev. David Zeisberger among the Onondaga, in New York. The missionaries, as a rule, if not always, served without salary and supported themselves by their own labors. All went well until the beginning of the French and Indian war, when, on Nov. 24, 1755, Gnadenhuetten was attacked by the hostile savages, the missionaries and their families massacred, and the mission destroyed. The converts were scattered, but after some period of wandering were again gathered into a new mission at Nain, near Bethlehem, Pa. On the breaking out of Pontiac's war in 1763 an order was issued by the Pennsylvania government for the conveyance of the converts to Philadelphia. This was accordingly done, and they were detained there under guard, but attended by their missionary, Bernhard Grube, until the close of the war, suffering every hardship and in constant danger of massacre by the excited borderers.

On the conclusion of peace they established themselves on the Susquehanna at a new town, which was named Friedenshuetten, near the Delaware village of Wyalusing. In 1770 they again removed to Friedensstadt, on Beaver cr., in w. Pennsylvania, under charge of Zeisberger, and two years later made another removal to the Muskingum r., in Ohio, by permission of the western Delawares. By the labor of the missionaries, David Zeisberger, Bishop John Ettwein, Johannes Roth, and the noted John Heckewelder, who accompanied them to the W., the villages of Schoenbrunn and Gnadenhuetten were established in the midst of the wild tribes within the present limits of Tuscarawas co., the first-named being occupied chiefly by Delawares, the other by Mahican. The Friedensstadt settlement was now abandoned. In 1776 a third village, Lichtenau (afterward Salem), was founded, and the Moravian work reached its highest point of prosperity, the whole convert population including about 500 souls. Then came the Revolution, by which the missions were utterly demoralized until the culminating tragedy of Gnadenhuetten, Mar. 8, 1782, when nearly 100 Christian Indians, after having been bound together in pairs, were barbarously massacred by a party of Virginia borderers. Once more the missionaries, Zeisberger and Heckewelder, gathered their scattered flock, and after another period of wandering, settled in 1787 at New Salem, at the mouth of Huron r., L. Erie, N. Ohio. A part of them settled, by invitation of the British Government, at Fairfield, or Moraviantown, on Thames r., Ontario, in 1790, under the leadership of Rev. Christian Dencke, while the rest were reestablished in 1798 on lands granted by the United States at their former towns on the Muskingum. Here Zeisberger died in 1808, after more than 60 years of faithful ministry without salary. He is known to philologists as the author of a grammar and dictionary of the Onondaga, besides several smaller works in the Delaware language.

The mission, by this time known as Goshen, was much disturbed by the War of 1812, and the subsequent settlement of the country by the whites so far demoralized it that in 1823 those then in charge brought it to a close, a small part of the Indians removing to the W., constituting the present Munsee Christians in Kansas, while the remainder joined their brethren in Ontario, Canada. The latter, whose own settlement also had been broken up by the events of the same war, had been gathered a few years before into a new town called New Fairfield, by Rev. Mr. Dencke, already mentioned, who had also

done work among the Chippewa. Dencke died in retirement in 1839, after more than 40 years of missionary service, leaving as his monument a manuscript dictionary of the Delaware language and minor printed works, including one in Chippewa. The Moravian mission at New Fairfield was kept up for a number of years after his death, but was at last discontinued, and both the "Moravians" and the "Munsees" of the Thames are now credited officially either to the Methodist or to the Episcopal (Anglican) church (see *Canada, East*).

The Munsee who had removed with the Delawares to Kansas were followed a few years later by Moravian workers from Canada, who, before 1840, had a successful mission among them, which continued until the diminishing band ceased to be of importance. Among the workers of this later period may be named Rev. Abraham Luckenbach, "the last of the Moravian Lenapists," who ministered to his flock during a 3 years' sojourn in Indiana, and later in Canada, from 1800 to his death in 1854, and was the author of several religious works in the language. Dencke, founder of the Thames r. colony, was also the author of a considerable manuscript religious work in the language and probably also of a grammar and dictionary.

Another Moravian missionary, Rev. John C. Pylæus, labored among the Mohawk from 1744 to 1751, and has left several manuscript grammatic and devotional works in that and the cognate dialects, as also in Mahican and Delaware. For several years he acted as instructor in languages to the candidates for the mission service. Rev. Johannes Roth, who accompanied the removal to Ohio in 1772, before that time had devoted a number of years to the work in Pennsylvania, and is the author of a unique and important religious treatise in the Unami dialect of the Delaware.

A remarkable testimony to the value of the simple life consistently followed by the Moravians is afforded in the age attained by many of their missionaries in spite of all the privations of the wilderness, and almost without impairment of their mental faculties, viz: Pylæus, 72 years; Heckewelder, 80; Ettwein, 82; Zeisberger, 87, and Grube, 92.

NEW ENGLAND.—The earliest New England mission was attempted by the French Jesuit Father Peter Biard among the Abnaki on Mt Desert id., Maine, in 1613, in connection with a French post, but both were destroyed by an English fleet almost before the buildings were completed. In the next 70 years other Jesuits, chief among whom was Father Gabriel Druillettes (1646-57), spent much

time in the Abnaki villages and drew off so many converts to the Algonkin mission of Sillery (see *Canada, East*) as to make it practically an Abnaki mission. In 1683 the mission of St Francis de Sales (q. v.) was founded at the Falls of the Chaudière, Quebec, and two years later Sillery was finally abandoned for the new site. Among those gathered at St Francis were many refugees from the southern New England tribes, driven out by King Philip's war, the Pennacook and southern Abnaki being especially numerous. In 1700 the mission was removed to its present location, and during the colonial period continued to be recruited by refugees from the New England tribes. About 1685 missions were established among the Penobscot and the Passamaquoddy, and in 1695 the celebrated Jesuit Father Sebastian Râle (Rasle, Rasles) began at the Abnaki mission at Norridge-wock on the Kennebec (the present Indian Old Point, Me.) the work which is so inseparably connected with his name. He was not, however, the founder of the mission, as the church was already built and nearly the whole tribe Christian. In 1705 the church and village were burned by the New Englanders, but rebuilt by the Indians. In 1713 a small band removed to the St Lawrence and settled at Bécancour, Quebec, where their descendants still remain. In 1722 the mission was again attacked and pillaged by a force of more than 200 men, but the alarm was given in time and the village was found deserted. As a part of the plunder the raiders carried off the manuscript Abnaki dictionary to which Râle had devoted nearly 30 years of study, and which ranks as one of the great monuments of our aboriginal languages. On Aug. 23, 1724, a third attack was made by the New England men, with a party of Mohawk allies, and the congregation scattered after a defense in which seven chiefs fell, the missionary was killed, scalped, and hacked to pieces, and the church plundered and burned. Râle was then 66 years of age. His dictionary, preserved at Harvard University, was published in 1833, and in the same year a monument was erected on the spot where he met his death. The mission site remained desolate, a large part of the Indians joining their kindred at St Francis. The minor stations on the Penobscot and St John continued for a time, but steadily declined under the constant colonial warfare. In 1759 the Canadian Abnaki mission of St Francis, then a large and flourishing village, was attacked by a New England force under Col. Rogers and destroyed, 200 Indians being killed. It was afterward rebuilt, the present site being best known as Pierreville, Quebec. The Ab-

naki missions in Maine were restored after the Revolution and are still continued by Jesuit priests among the Penobscot and the Passamaquoddy.

Among other names distinguished in the Abnaki mission the first place must be given to the Jesuits Aubéry and Lesueur. Father Aubéry, after 10 years' work among the Indians of Nova Scotia, went in 1709 to St Francis, where he remained until his death in 1755. He acquired a fluent use of the language, in which he wrote much. Most of his manuscripts were destroyed in the burning of the mission in 1759, but many are still preserved in the mission archives, including an Abnaki dictionary of nearly 600 pages. Father Lesueur labored first at Sillery and then at Bécancour from 1715, with a few interruptions, until 1753, leaving as his monument a manuscript 'Dictionnaire de Racines' (Abnaki) of 900 pages, now also preserved in the mission archives. To the later period belong Rev. Ciquard, who ministered from 1792 to 1815 on the Penobscot, the St John, and at St Francis; Father Romagné, with the Penobscot and the Passamaquoddy from 1804 to 1825; Rev. Demilier, a Franciscan, who labored with marked success to the same tribes from 1833 to 1843, and the Jesuit Father Eugène Vétromile in the same field from about 1855 to about 1880. Each one of these has made some contribution to the literature of the language, the last-named being also the author of a history of the Abnaki and of two volumes of travels in Europe and the Orient.

The beginning of *Protestant* work among the Indians of s. New England may fairly be credited to Roger Williams, who, on being driven from his home and ministry in Massachusetts for his advocacy of religious toleration in 1635, took refuge among the Wampanoag and Narraganset, among whom he speedily acquired such influence that he was able to hold them from alliance with the hostiles in the Pequot war. In 1643 Thomas Mayhew, jr (*Congregational*), son of the grantee of Marthas Vineyard, Mass., having learned the language of the tribe on the island, began among them the work which was continued in the same family for four generations, with such success that throughout the terror of King Philip's war in 1675-76 the Christian Indians on the island remained quiet and friendly, although outnumbering the whites by 10 to 1. Thomas Mayhew, the younger, was lost at sea in 1657, while on a missionary voyage to England. The work was then taken up by his father, of the same name, and the native convert Hiacoomes. It was continued from about 1673 by John Mayhew, son of the first-

named, until his death in 1689, and then by Experience Mayhew, grandson of Thomas the elder, nearly to the time of his death in 1758. Each one of these learned and worked in the Indian language, in which Thomas, jr, and Experience prepared some small devotional works. The last of the name was assisted also for years by Rev. Josiah Torrey, in charge of a white congregation on the island. In 1720 the Indians of Marthas Vineyard numbered about 800 of an estimated 1,500 on the first settlement in 1642. They had several churches and schools, so that most of those old enough could read in either their own or the English language. The last native preacher to use the Indian language was Zachariah Howwoswe (or Hossweit), who died in 1821.

As far back as 1651 a building had been authorized at Harvard College for the accommodation of Indian pupils, but only one Indian (Caleb Cheeshateamuck) is on record as having finished the course, and he died soon afterward of consumption.

The most noted mission work of this section, however, was that begun by the noted Rev. John Eliot (*Congregational*) among a remnant of the Massachusetts tribe at Nonantum, now Newton, near Boston, Mass., in the fall of 1646. He was then about 42 years of age and had prepared himself for the task by three years of study of the language. The work was extended to other villages, and the reports of his and Mayhew's success led to the formation in 1649 of the English "Corporation for the Propagation of the Gospel among the Indians in New England" for the furtherance of the mission. As early as 1644 the Massachusetts government had made provision looking to the instruction of the neighboring tribes in Christianity, Eliot himself being the pioneer. In 1650 a community of Christian Indians, under a regular form of government, was established at Natick, 18 m. s. w. of Boston, and became the headquarters of the mission work. In 1674 the "Praying Indians," directly under the care of Eliot and his coadjutor, Samuel Danforth, in the Massachusetts Bay jurisdiction, numbered 14 principal villages with a total population exceeding 1,000, among the Massachusetts, Pawtucket, Nipmuc, and other tribes of e. Massachusetts, each village being organized on a religious and industrial basis. The Christian Indians of Plymouth colony, in s. e. Massachusetts, including also Nantucket, Marthas Vineyard, etc., under Revs. John Cotton and Richard Bourne, were estimated at nearly 2,500 more. Most of the converts however were drawn from broken and subject

tribes. The powerful Wampanoag, Narraganset, and Mohegan rejected all missionary advances, and King Philip scornfully told Eliot that he cared no more for his gospel than for a button upon his coat. Most of Eliot's work fell to the ground with the breaking out of King Philip's war in the following year. The colonists refused to believe in the friendship of the converts, and made such threats against them that many of the Indians joined the hostiles and afterward fled with them to Canada and New York. The "praying towns" were broken up, and the Indians who remained were gathered up and held as prisoners on an island in Boston harbor until the return of peace, suffering much hardship in the meantime, so that the close of the war found the two races so embittered against each other that for some time it was impossible to accomplish successful results. Of the 14 praying towns in 1674 there were left only 4 in 1684. Eliot remained at his post until his death in 1690, in his 86th year, leaving behind him as his most permanent monument his great translation of the Bible into the Natick (Massachusetts) language, besides a grammar and several minor works in the language (see *Bible translations, Eliot Bible*). Daniel Gookin, whose father had been official Indian superintendent, was Eliot's coadjutor in the later mission period. Eight years after Eliot's death the Indian church at Natick had but 10 members, and in 1716 it became extinct, as did the language itself a generation later.

Among Eliot's co-workers or successors in the same region the best known were Samuel Danforth, sr, from 1650 until his death in 1674; Rev. John Cotton, who preached to the Indians of both Natick and Plymouth from 1669 to 1697, being "eminently skilled in the Indian language"; his son, Josiah Cotton, who continued his father's work in the Plymouth jurisdiction for nearly 40 years; Samuel Treat, who worked among the Nauset Indians of the Cape Cod region from 1675 until his death in 1717, and translated the Confession of Faith into the language; Grindal Rawson, about 1687 to his death in 1715, the translator of 'Spiritual Milk'; and Samuel Danforth the younger, who labored in E. Massachusetts from 1698 to his death in 1727, and was the author of several religious tracts in the native language. These and others were commissioned and salaried by the society organized in 1649.

About 1651 Rev. Abraham Pierson, under the auspices of the same society, began preaching to the Quinnipiac Indians about Branford, w. Connecticut, and continued until his removal about 1669, when the work was undertaken by a successor,

but with little result to either, the Indians showing "a perverse contempt," notwithstanding presents made to encourage their attendance at the services. A few years later Rev. James Fitch was commissioned to work among the Mohegan, and succeeded in gathering a small congregation, but found his efforts strongly opposed by Uncas and the other chiefs. The mission probably came to an end with King Philip's war. Efforts were continued at intervals among the tribal remnants of s. New England during the next century, partly through the society founded in 1649 and partly by colonial appropriation, but with little encouraging result, in consequence of the rapid decrease and demoralization of the Indians, the only notable convert being Samson Occom (q. v.). The English society withdrew support about 1760. A last attempt was made among the Mohegan by Miss Sarah L. Huntington in 1827, and continued for several years, chiefly by aid of governmental appropriation (De Forest).

In 1734 a Congregationalist mission was begun among the Mahican in western Massachusetts by Rev. John Sergeant, under the auspices of the Society for the Propagation of the Gospel in Foreign Parts. By hard study and constant association he was soon able to preach to them in their own language, into which he translated several simple devotional works. In 1736 the converts were gathered into a regular mission town, which was named Stockbridge, from which central point the work was extended into Connecticut and New York, and even as far as the Delaware r. In 1743 Rev. David Brainerd, who had been working also among the Mahican at the village of Kaunaumeeek, across the New York line, brought his congregation to consolidate with that of Stockbridge. Mr Sergeant died in 1749, and after a succession of briefer pastorates the work was taken up, in 1775, by his son, Rev. John Sergeant, jr, who continued with it until the end of his life. The westward advance of white settlement and the demoralizing influence of two wars accomplished the same result here as elsewhere, and in 1785 the diminishing Stockbridge tribe removed to New Stockbridge, N. Y., on lands given by the Oneida. Their leader in this removal was the educated Indian minister Samson Occom. Mr Sergeant himself followed in the next year. The mission was at that time supported by the joint effort of American and Scotch societies, including the corporation of Harvard College. In 1795 the settlement consisted of about 60 families, mostly improvident, unacquainted with the English language, and "in their dress and manners uncivilized" (Abo-

rigines Com., 1844). Besides preaching to them in their own language, Mr Sergeant prepared for their use several small religious works in the native tongue. In 1821, with their chief, Solomon Aupaumut, they removed again (their missionary being unable to accompany them on account of old age), this time to the neighborhood of Green Bay, Wis., where about 520 "Stockbridge and Munsee," of mixed blood, still keep the name. Among the later missionaries the most distinguished is Rev. Jeremiah Slingerland, an educated member of the tribe, who served, from 1849, for more than 30 years. Merged with them are all who remain of the Brotherton band of New York, made up from tribal remnants of Connecticut, Rhode Island, and Long Island—Mohegan, Pequot, Narraganset, and Montauk—gathered into a settlement also in the Oneida country by the same Occom in 1786. These in 1795 were reported as numbering about 39 families, all Christian, and fairly civilized. Among the names connected with the Stockbridge mission is that of Rev. Jonathan Edwards, jr, author of a short treatise on the Mahican ("Muhhekaneev") language (1788), and of John Quinney and Capt. Hendrick Aupaumut, native assistants and translators under the elder Sergeant. For the Scaticook mission see *Moravians—New York*.

In addition to the regular mission establishments some educational work for the Indians was carried on in accord with a declared purpose at Harvard College, Cambridge, Mass., as already noted; at Moore's charity school for Indians, founded by Rev. Eleazer Wheelock at Lebanon, Conn., in 1754, and transferred in 1769 to Hanover, N. H., under the name of Dartmouth College, and the Foreign Mission School at Cornwall, Conn., by the American Board of Commissioners for Foreign Missions, beginning in 1817. The net result was small. (See *Education*.)

THE INTERIOR STATES.—The whole interior region of the United States, stretching from the English seaboard colonies to the main divide of the Rocky mts., was included under the French rule in the two provinces of Canada and Louisiana, and with one or two exceptions the mission work was in charge of French *Jesuits* from the first occupancy up into the American period. The very first mission worker, however, within this great region was the heroic Spanish Franciscan, Father Juan de Padilla, who gave up his life for souls on the Kansas prairies, as narrated elsewhere, nearly as early as 1542 (see *New Mexico, Arizona, and California*). The first mission west of the Huron country was established in 1660, probably on Kewee-

naw bay, Mich., by the veteran Huron missionary, the Jesuit René Menard, in response to repeated requests of visiting Chippewa and Ottawa. In the next year, while attempting to reach a colony of fugitive Hurons who had called him from Green Bay, he was lost in the forest and is believed to have been murdered by the Indians. In 1665 Father Claude Allouez established the mission of Saint Esprit on the s. shore of L. Superior, at La Pointe Chegoimegon (Shaugwaumikong), now Bayfield, Wis. Besides working here among the Ottawa and Huron refugees from the older missions destroyed by the Iroquois, he visited all the other tribes of the upper lake region from the Miami and the Illinois to the Sioux. Within the next few years other missions were established at Sault Ste Marie (Sainte Marie), Mackinaw (St Ignace), Green Bay (St François Xavier), and among the Foxes (St Marc) and Mascoutens (St Jacques), the two last named being about the southern Wisconsin line. Among other workers of this period were Dablon, Druliettes, and the noted discoverer, Marquette. The mission of St Joseph on the river of that name, near the present South Bend, Ind., was established by Allouez among the Potawatomi in 1688. It continued, with interruptions, until the removal of the tribe to the W. in 1839-41, when the missionaries accompanied the Indians and re-established the work in the new field. To this later period, in Indiana, belong the names of Fathers Rézé, Badin, Desseille, and Petit. The mission at Lapointe was abandoned in 1671 on account of the hostility of the Sioux, but most of the others continued, with some interruptions, down to the temporary expulsion of the Jesuits in 1764. A mission begun among the Sioux in 1728 was brought to a close soon after in consequence of the war with the Foxes.

The first regular mission among the Illinois (Immaculate Conception) was founded by Marquette in 1674 near the present Rockford, Ill., where at that time 8 confederate tribes were camped in a great village of 350 communal houses. It was known later as the Kaskaskia mission. Other missions were established also among the Peoria, on Peoria lake and at Cahokia, opposite St Louis; with such result that by 1725 the entire Illinois nation was civilized and Christian. Besides Marquette, the most prominent of the Illinois missionaries were Râle, noted elsewhere in connection with the Abnaki mission, and Father James Gravier, who arrived in 1693 and died 12 years later of wounds received from hostile Indians, leaving as his monument the great manuscript Peoria dictionary of 22,000 words. Despite apparent success,

the final result in Illinois was the same as elsewhere. The Natchez and Chickasaw wars interrupted the mission work for some years, and gave opportunity for invasion by hostile northern tribes. The dissipations consequent upon the proximity of garrison posts completed the demoralization, and by 1750 the former powerful Illinois nation was reduced to some 1,000 souls, with apparently but one mission. The Indiana missions at St Joseph (Potawatomi and Miami), Vincennes (? Piankashaw), and on the Wabash (Miami) continued to flourish until the decree of expulsion, when the mission property was confiscated by the French government, although the Jesuits generally chose to remain as secular priests until their death. Their successors continued to minister to Indians as well as to whites until the disruption and removal of the tribes to the W., between 1820 and 1840, when the work was taken up in their new homes by missionaries already on the ground. The majority of the Indians of Michigan and Wisconsin remained in their old homes at missions in those states, kept in existence either as regular establishments or as visiting stations served by secular priests. The most distinguished of these later missionaries was the noted author and philologist, Bishop Frederick Baraga, of the imperial house of Hapsburg, who, after having voluntarily forfeited his estates to devote his life to the Indians, came to America in 1830, and for 36 years thereafter until his death labored with success, first among the Ottawa at Arbre Croche in lower Michigan, and afterward at St Joseph, Green Bay, Lapointe, and other stations along the upper lakes, more particularly at the Chippewa village of L'Anse, on Keweenaw bay, which he converted into a prosperous Christian settlement. Even when past 60 years of age, this scion of Austrian nobility slept upon the ground and sometimes walked 40 m. a day on snowshoes to minister to his Indians. Besides numerous devotional works in Ottawa and Chippewa, as well as other volumes in German and Slavonic, he is the author of the great Grammar and Dictionary of the Chippewa Language, which after half a century still remains the standard authority, having passed through three editions.

In 1818 was begun, near Pembina, on Red r., just inside the U. S. boundary, the Chippewa mission, afterward known as Assumption, which became the central station for work among the Chippewa of Minnesota and the Mandan and others of the upper Missouri. The most noted name in this connection is that of Rev. G. A. Belcourt, author of a dictionary of the Chippewa language, second in im-

portance only to that of Baraga. In 1837 Father Augustin Ravoux established a mission among the Santee Sioux at Fari-bault's trading post in E. Minnesota, learning the language and ministering to the eastern bands for a number of years. In 1843 (or 1844) he published a devotional work in that dialect, which has passed through two editions. The first regular mission station among the Menominee of Wisconsin was established in 1844, and among the Winnebago, then at Long Prairie, Minn., in 1850. For 20 years earlier missionary work had been done among them, notably by Father Samuel Mazzuchelli, whose Winnebago Prayer Book, published in 1833, is mentioned by Pilling as "the first publication, so far as I know, of a text in any of the dialects in the Siouan family." In the farther W. work was carried on among all of the immigrant, and the principal of the native, tribes, the chief laborers again being the Jesuits, whose order had been restored to full privilege in 1814. As the whole country was now explored and organized on a permanent governmental basis, and the Indian day was rapidly waning, these later missions have not the same historic interest that attaches to those of the colonial period, and may be passed over with briefer notice. Chief among them were the Potawatomi missions of St Stanislaus and St Mary, in Kansas, founded in 1836 by the Belgian Jesuits Von Quick-enborne, Hoecken, Peter J. de Smet, and others, working together, and the Osage mission of St Francis Hieronymo, founded about 1847 by Fathers Shoenmaker and Bax. The girls of these two mission schools were in charge respectively of the Sisters of the Sacred Heart and the Sisters of Loretto. Temporary missions were also established in 1836 and 1847 respectively among the Kickapoo and the Miami.

The remote Flatheads in the mountains at the head of Missouri r. had heard of Christianity and had been taught the rudimentary doctrines by some adopted Caughnawaga Indians, and in 1831 they sent a delegation all the long and dangerous way to St Louis to ask of Indian Superintendent Clark that missionaries be sent among them. To do this was not possible at the time, but with persevering desire other delegations were sent on the same errand, some of the envoys dying on the road and others being murdered by the Sioux, until the request met response. In 1834 the *Methodist* missionary, Jason Lee, with several assistants, accompanied a trading expedition across the mountains, but, changing his original purpose, passed by without visiting the Flatheads and established himself in the vicinity of the trading post of Ft Van-

couver, nearly opposite the mouth of the Willamette, in Washington. Another embassy from the Flatheads, in 1839, was successful, and in the next year the noted Belgian Jesuit, Peter John de Smet, priest, explorer, and author, was on the ground, 1,600 Indians of the confederated tribes being gathered to await his coming. In 1841 he founded the mission of St Mary on Bitter-root r., w. Mont., making it a starting point for other missions farther to the w., to be noted elsewhere. On account of the hostility of the Blackfeet the mission was abandoned in 1850, to be succeeded by that of St Ignatius on Flathead lake, within the present Flathead reservation, which still exists in successful operation, practically all of the confederated tribes of the reservation having been Christian for half a century. The principal co-workers in the Flathead mission were the Jesuits Canestrelli, Giorda, Mengarini, Point, and Ravalli. The first three of these have made important contributions to philology, chief among which are the Salish Grammar of Mengarini, 1861, and the Kalispel Dictionary, 1877, of Giorda, of whom it is said that he preached in six Indian languages.

Next in chronologic order in the central region, after the Catholics, come the *Moravians*. Their work among the Delawares and associated tribes in Ohio, and later in Ontario and Kansas, was a continuation of that begun among the same people in New York and Pennsylvania as early as 1740, and has been already noted.

After them came the *Friends*, or, as more commonly known, the Quakers. In all their missionary effort they seem to have given first place to the practical things of civilization, holding the doctrinal teaching somewhat in reserve until the Indians had learned from experience to value the advice of the teacher. In accord also with the Quaker principle, their method was essentially democratic, strict regard being given to the wishes of the Indians as expressed through their chiefs, their opinions being frequently invited, with a view to educating them to a point of self-government. In 1804 the Maryland yearly meeting, after long councils with the Indians, established an industrial farm on upper Wabash r. in Indiana, where several families from the neighboring Miami, Shawnee, and others soon gathered for instruction in farming. For several years it flourished with increasing usefulness, until forced to discontinue by an opposition led by the Shawnee prophet (see *Tenskwatawa*). The work was transferred to the main Shawnee settlement at Wapakoneta, Ohio, where, in 1812, a saw mill and grist mill were built, tools distributed, and a farm colony was

successfully inaugurated. The war compelled a suspension until 1815, when work was resumed. In 1822 a boarding school was opened, and both farm and school continued, with some interruptions, until the final removal of the tribe to the W. in 1832-33. The teachers followed, and by 1837 the Shawnee mission was reestablished on the reservation in Kansas, about 9 m. w. from the present Kansas City. It was represented as flourishing in 1843, being then perhaps the most important among the immigrant tribes, but suffered the inevitable result on the later removal of the Shawnee to the present Oklahoma. The work was conducted under the joint auspices of the Indiana, Ohio, and Maryland yearly meetings, aided in the earlier years by liberal contributions from members of the society in England and Ireland. The most noted of the teachers were Isaac Harvey and his son, Henry Harvey, whose work covers the period from 1819 to 1842. During the period of the "peace policy" administration of Indian affairs, for a term of about a dozen years beginning in 1870, considerable work was done by laborers of the same denomination among the Caddo, Kiowa, Cheyenne, and other tribes of Oklahoma, but without any regular mission or school establishment. The best known of these workers was Thomas C. Battey, author of 'A Quaker among the Indians,' who conducted a camp school among the Kiowa in 1873.

The *Presbyterians*, who now stand second in the number of their mission establishments in the United States, began their labors in the Central states about the same time as the Friends, with a mission farm among the Wyandot on Sandusky r. in Ohio, in charge of Rev. Joseph Badger. It continued until 1810, when it was abandoned in consequence of the opposition of the traders and the conservative party led by the Shawnee prophet. Morse's report on the condition of the tribes in 1822 makes no mention of any Presbyterian mission work at that time excepting among the Cherokee (see *Southern States*). A few years later the Rev. Isaac Van Tassel, under authority from the American Board, was in charge of a mission among the Ottawa, at Maumee, Ohio. He compiled an elementary reading book, printed in 1829, the first publication in the Ottawa language.

In 1827, under the auspices of the American Board of Commissioners for Foreign Missions, a *Congregational* mission was begun among the Chippewa on Mackinaw id., upper Michigan, by Rev. J. D. Stevens and wife, who with others afterward extended their labors into n. Wisconsin, and later were transferred to the

Sioux mission. In 1829 Rev. Frederick Ayer joined the Mackinaw station, and, after two years' study of the language, opened among the Chippewa at Sandy Lake, Minn., in 1831, what is said to have been the first school in Minnesota. He is the author of a small text-book in the language. Other stations were established soon after among the same tribe, at Lapointe, Wis., Pokegama lake, and Leech lake, Minn., but seem to have been discontinued about 1845. The Mackinaw mission had already been abandoned. Rev. Peter Dougherty, under the direct auspices of the Presbyterian mission board, labored among the Chippewa and the Ottawa at Grand Traverse bay, lower Michigan, in 1843-47+ and is the author of several text-books and small religious works in the language of the former tribe.

In 1834 two volunteer workers, Mr Samuel W. Pond and his brother Gideon, took up their residence in a village of the Santee Sioux on L. Calhoun, near the present St Paul, Minn. They afterward became regularly ordained missionaries under the American Board, continuing in the work for 18 years. In the same year Rev. Thomas S. Williamson, "the father of the Dakota mission," made a reconnaissance of the field for the same Board, and on his favorable report two mission stations were established in 1835—one at L. Harriet, near St Paul, under Rev. J. D. Stevens, formerly of the Mackinaw mission, the other under Williamson himself at Lac-qui-parle, high up on Minnesota r. With Mr Williamson then or later were his wife, his daughter, and his two sons, all of whom became efficient partners in the work. In 1837 Rev. Stephen R. Riggs, with his wife, Mary, and his son, Alfred L.—all known in mission annals—joined the station at Lac-qui-parle. In the next 10 or 12 years, as the good will of the Indians was gradually won and the working force increased, other stations were established, all among the Santee Sioux in Minnesota. Among these was the one started by Rev. John F. Aiton, in 1848, at Redwing, where Revs. Francis Denton and Daniel Gavan, for the Evangelical Missionary Society of Lucerne, had established the "Swiss mission" in 1837, these two missionaries now combining forces with the American workers. In 1852, in consequence of a cession of Indian land, the eastern station, then at Kaposia, was removed by Williamson to Yellow Medicine on the upper Minnesota, and two years later, in consequence of the burning of the Lac-qui-parle station, that mission also was removed to Hazelwood, in the same neighborhood.

The work continued with varying success until interrupted by the Sioux out-

break in the summer of 1862, when the missions were abandoned and the missionaries sought safety within the older settlements. Throughout the troubles the Christian Sioux generally remained friendly and did good service in behalf of the endangered settlers. As a result of the outbreak the Santee Sioux were removed to Niobrara, N. E. Nebr., where they now reside. The missionaries followed, and in 1866 the "Niobrara mission" was organized, the work being extended to other neighboring bands of Sioux, and the principal workers being Revs. John P. Williamson and Alfred L. Riggs, sons of the earlier missionaries. Nearly all the earlier Presbyterian work among the Sioux, as among the Cherokee, was conducted through the American Board of Commissioners for Foreign Missions.

To the Congregational missionaries we owe most of our knowledge of the Sioux language, their work being almost entirely in the Santee or eastern dialect. Stevens, the Pond brothers, all of the Williamsons, and Stephen and Alfred Riggs have all made important contributions, ranging from school text-books and small devotional works up to dictionaries, besides adapting the Roman alphabet to the peculiarities of the language with such success that the Sioux have become a literary people, the majority of the men being able to read and write in their own language. It is impossible to estimate the effect this acquisition has had in stimulating the self-respect and ambition of the tribe. Among the most important of these philologic productions are Riggs' Grammar and Dictionary of the Dakota Language, published by the Smithsonian Institution in 1852, with a later revision by Dorsey, and Riggs and Williamson's Dakota Bible, published in 1880, being then, in Pilling's opinion, with two exceptions, the only complete Bible translation in any Indian language since Eliot's Bible in 1663. In much of the earlier linguistic work the missionaries had the efficient cooperation of Joseph Renville, an educated half-blood. As an adjunct to the educational work, a monthly journal was conducted for about 2 years by Rev. G. H. Pond, chiefly in the native language, under the title of 'The Dakota Friend,' while its modern successor, 'Iapi Oyay' ('The Word Carrier'), has been conducted under the auspices of the Niobrara mission since 1871.

In 1821 two Presbyterian missions were established among the Osage by the United Foreign Missionary Society. One of these, Harmony, was near the junction of the Marais des Cygnes with the Osage r., not far from the present Rich Hill,

Mo.; the other, Union, was on the w. bank of Neosho r., about midway between the present Muskogee and Ft Gibson, Okla. Both were established upon an extensive scale, with boarding schools and a full corps of workers; but in consequence of differences with the agent and an opposition instigated by the traders, the Osage field was abandoned after about 15 years of discouraging effort (McCoy). One of these workers, Rev. William B. Montgomery, compiled an Osage reading book, published in 1834. Among others connected with the mission were the Revs. Chapman, Pixley, Newton, Sprague, Palmer, Vaill, Belcher, and Requa. The missions conducted by the same denomination among the removed Southern tribes in Oklahoma are noted in connection with the Southern states.

In 1834 two Presbyterian workers, Revs. John Dunbar and Samuel Allis, began work among the Pawnee of Nebraska under the auspices of the American Board, and later were joined by Dr Satterlee. After some time spent in getting acquainted with the people and the language, a permanent station was selected on Plum cr., a small tributary of Loup r., in 1838, by consent of the Pawnee, who in the meantime had also acknowledged the authority of the Government. Circumstances delayed the work until 1844, when a considerable mission and a Government station were begun, and a number of families from the different bands took up their residence adjacent thereto. In consequence, however, of the repeated destructive inroads of the Sioux, the ancient enemies of the Pawnee, the mission effort was abandoned in 1847 and the tribe returned to its former wild life.

About the year 1835 work was begun by the Presbyterian Board of Foreign Missions among the Iowa and Sauk, then residing on Missouri r. in e. Nebraska. Attention was given also to some others of the removed tribes, and about 10 years later a mission was established among the Omaha and the Oto at Bellevue, near the present Omaha, Nebr., where, in 1850, Rev. Edward McKenney compiled a small Omaha primer, the first publication in that language. Both missions continued down to the modern period, despite the shifting fortunes of the tribes. Other prominent workers were Rev. Samuel Irvin, who gave 30 years of his life, beginning in 1837, to the first tribes named; and Rev. William Hamilton, who, beginning also in 1837, with the same tribes, was transferred to the Bellevue mission in 1853, rounding out a long life with a record of half a century spent in the service. Working in collaboration these two produced several religious and linguistic works in the Iowa language, published

by the Mission press from 1843 to 1850, besides a collection of Omaha hymns and some manuscript translations by Mr Hamilton alone at a later period.

The pioneer *Methodist* mission work in the central region appears to have been inaugurated by a volunteer negro minister, Rev. Mr Stewart, who in 1816 began preaching among the Wyandot, about Sandusky, in Ohio, and continued with such success that 3 years later a regular mission was established under Rev. James B. Finley. This is the only work by that denomination noted in Morse's Report of 1822. In 1835, with liberal aid from the Government, as was then customary, the Southern branch established a mission about 12 m. from the present Kansas City, in Kansas, among the immigrant Shawnee. In 1839 it was in charge of Rev. Thomas Johnson, and 3 years later was reported in flourishing condition, with boarding school and industrial farm. In 1855 both this mission and another, established by the Northern branch, were in operation. Smaller missions were established between 1835 and 1840 among the Kickapoo (Rev. Berryman in charge in 1839), Kansa (Rev. W. Johnson in charge in 1839), Delawares, Potawatomi, and united Peoria and Kaskaskia, all but the last-named being in Kansas. A small volume in the Shawnee language and another in the Kansa were prepared and printed for their use by Mr Lykins, of the Shawnee Baptist mission. The work just outlined, with some work among the immigrant Southern tribes (see *Southern States*), seems to be the sum of Methodist mission labors outside of the Chippewa territory until a recent period. In 1837 a mission was started by Rev. Alfred Brunson among the Santee Sioux at Kaposia, or Little Crow's village, a few miles below the present St Paul, Minn., which existed until 1841, when, on the demand of the Indians, it was discontinued.

In 1823 the Wesleyan Methodist Society of England began work among the Chippewa and related bands in Ontario (see *Canada, East*), and some 20 years later the American Methodists began work in the same tribe along the s. shore of L. Superior in upper Michigan. In 1843 Rev. J. H. Pitzel took charge of the work, with headquarters at Sault Ste Marie as the principal station. Another station was established at Keweenaw pt. about the same time by Rev. John Clark. Others were established later at Sandy lake and Mille Lac, Minn., also among the Chippewa, and all of these were in successful operation in 1852.

The earliest *Baptist* worker in the central region was Rev. Isaac McCoy, afterward for nearly 30 years the general agent

in the Indian mission work of that denomination. In 1818 he began preaching among the Wea in Indiana, and in 1820 organized at Ft Wayne, Ind., a small school for the children of the neighboring tribes, then in the lowest state of demoralization from wars, removals, drunkenness, and the increasing pressure of a hostile white population. His earliest associate was Mr Johnston Lykins, then a boy of 19, but later distinguished as a voluminous translator and author of a system of Indian orthography. Two years later this school was discontinued, and by treaty arrangement with the Government, which assumed a large part of the expense, two regular missions were established, viz: Carey (1822) for the Potawatomi, on St Joseph r. near the present South Bend, Ind., and Thomas (1823) among the Ottawa, on Grand r., Mich. Mr Lykins took charge among the Ottawa, to whom he was soon able to preach in their own language, while Mr McCoy continued with the Potawatomi. In consequence of the inauguration of the Government plan for the removal of the Indians to the W., both missions were abolished in 1830, the work being resumed among the Indians in their new homes in Kansas. A small mission established among the Chippewa at Sault Ste Marie, Mich., under Rev. A. Bingham about 1824, continued a successful existence in charge of its founder for about 25 years.

In 1831, while the removal of the Indians was still in progress, the Shawnee Mission was established under Mr Lykins about 10 m. s. w. from the present Kansas City, among the Shawnee. In the fall of 1833 Rev. Jotham Meeker, one of the former assistants in the E., arrived with a printing press and types, with which it was proposed to print for distribution among the various neighboring tribes educational and devotional works in their own languages according to a new phonetic system devised by Mr Meeker. The work of translating and printing was actively taken up, the first issue being a Delaware primer in 1834, believed to be the first book printed in Kansas. Within the next few years small volumes by various missionary workers were printed in the Shawnee, Delaware, Potawatomi, Ottawa, Wea, Kansa, Osage, Iowa, Oto, Creek, and Choctaw languages, besides a small journal in the Shawnee language. Not alone the Baptists, but also Methodists and Presbyterians working in the same field, availed themselves of the services of the Shawnee mission press. In the meantime other missions were established among the Delawares (Mr Ira D. Blanchard, 1833), Oto (Rev. Moses Merrill, 1833), Iowa

(1834?), Ottawa (Rev. Jotham Meeker, 1837), and Potawatomi (Mr Robert Simerwell, 1837), besides stations among the removed southern tribes of Indian Ter. (See *Southern States*.) All of these first-named were within what is now Kansas excepting the Oto mission known as Bellevue, which was at the mouth of Platte r., near the present Omaha, Nebr. At this station Mr Merrill, who had previously worked among the Chippewa, made such study of the language that within 3 years he was able to preach to the Indians without an interpreter, besides compiling a book of hymns and one or two other small works in Oto. He died in 1840. The various missions remained in successful operation until about 1855, when, in consequence of the disturbed condition of affairs in Kansas, they were discontinued. All of the tribes have since been removed to Indian Ter.

The *Episcopalians* appear to have done no work in the interior until about 1830, when they had a station in the vicinity of Sault Ste Marie, Mich., among the Chippewa. In 1852 a mission was established among the Chippewa of Gull lake, Minn., by Rev. J. L. Breck, and in 1856 at Leech lake by the same worker. In 1860, through the efforts of Bishop H. B. Whipple, a mission was established among the Santee Sioux at the lower Sioux agency, Redwood, Minn., in charge of Rev. Samuel D. Hinman. The work was interrupted by the outbreak of 1862, but on the final transfer of the Indians to Niobrara, Nebr., in 1866, was resumed by Mr Hinman, who had kept in close touch with them during the period of disturbance. A large mission house, known as St Mary's, was erected, which later became the central station for the work of this denomination among the Sioux and neighboring tribes. In 1870 St Paul's mission was established at the Yankton Sioux agency, S. Dak., by Rev. Joseph W. Cook, and in 1872 work was begun at the Lower Brulé Sioux agency, S. Dak., by Rev. W. J. Cleveland, and extended later to the Upper Brulé and Oglala Sioux of Rosebud and Pine Ridge agencies, S. Dak. In the meantime Rev. J. Owen Dorsey had begun to labor among the Ponca, also in South Dakota, in 1871. The work is still being actively carried on in the same field. All of the Sioux missionaries named have rendered valuable service to philology in the preparation of hymnals, prayer books, etc., in the native language, together with a small mission journal 'Anpao' ('The Daybreak'), issued for a number of years in the Yankton Sioux dialect. The ethnologic researches of Mr Dorsey place him in the front rank of investigators, chief among his many contributions being his great monograph

upon the Dhegiha (Omaha and Ponca) language, published under direction of the Bureau of American Ethnology, in whose service he spent the last years of his life. In connection with the Episcopal mission may be noted the lace-making industry for Indian women instituted by Miss Sibyl Carter, chiefly among the Chippewa.

In 1847 the *Lutherans*, under the auspices of the Evangelical Lutheran Missionary Society of Dresden, Germany, began work among the Chippewa in lower Michigan, principally in the present Saginaw and Gratiot cos. The first mission school was opened in that year at Frankenmuth, on Cass r., by Rev. A. Craemer. In 1847 he was joined by Rev. Edward Baierlein, who, a year or two later, established a second station at Bethany, on Pine r., in Gratiot co. Here Mr Baierlein compiled a small volume of reading lessons and Scripture stories, published in 1852. In the next year he was recalled and we hear no more of the mission, which was probably discontinued soon after.

In 1846 the first *Mormon* emigrants crossed the plains from Illinois and, after a long and toilsome journey, settled at Great Salt lake, Utah, where they have since transformed the desert into a garden and built up a religious commonwealth which now exercises a dominant influence over large portions of the Mountain states. Their religious tradition regards the Indians as the descendants of the so-called Lost Ten Tribes of Israel (q. v.), and while no statistics are available it is known that their unsalaried missionaries from the first have given special attention to the Indian tribes, with the result that many among the Ute, Shoshoni, Paiute, and others at least nominally belong to that denomination. In 1905-6 their missionary effort was extended to the Cheyenne and other tribes of Oklahoma.

One of the most recent mission enterprises undertaken in the middle W. is that of the *Memmonites*, a small but influential denomination of German origin, professing the principles of peace and nonresistance common to the Moravians and the Quakers. After a short preliminary sojourn in 1877, regular work was begun among the Arapaho at Darlington, Okla., by Rev. Samuel D. Haury in 1880, the enterprise being aided by the active cooperation of the Government and local Indian agent. In 1883 another station was opened at Cantonment, about 70 m. n. w., among the Cheyenne, by Mr Haury, while Rev. H. R. Voth took charge of the work at Darlington and continued with it until transferred to a new field of duty in Arizona about 10 years later. Two other stations were

afterward established among the same tribes, and provision was made for the industrial training of Indian boys in schools and private homes in Kansas. In 1890 the Cantonment mission received an important accession in the arrival of Rev. Rudolph Petter and wife from Switzerland, who at once devoted themselves to a systematic study of the Cheyenne language in the tipi camps. The schools at both principal stations were in flourishing condition until the withdrawal of Government aid compelled their discontinuance in 1902. The Cantonment mission is still kept up, the Cheyenne work being in charge of Mr Petter and his wife, assisted by Miss Bertha Kinsinger, while Rev. John A. Funk ministers to the Arapaho. There is also a small station among the Cheyenne at Hammon, in charge of Rev. H. J. Kliever, and another among the Northern Cheyenne at Busby, Mont., in charge of Rev. and Mrs Gustav Linscheid since its establishment in 1904. To Mr Petter we are indebted for our principal knowledge of the Cheyenne language, into which he has translated some parts of the Bible, a number of hymns, and the 'Pilgrim's Progress,' besides being the author of a reading book and an extended manuscript grammar and dictionary.

THE COLUMBIA REGION.—Through the influence of Catholic Caughnawaga and of some of the employés of the Hudson's Bay Co., many individuals among the tribes of the Columbia r., particularly Flatheads and Nez Percés, had adopted the principles and ceremonies of the Christian religion as early as 1820, leading later to the request for missionaries, as already noted. The first mission of the Columbia region was established in 1834 by a party under Rev. Jason Lee, for the *Methodists*, on the e. side of the Willamette at French Prairie, about the present Oregon City, Oreg. In 1840 it was removed to Chemeketa, 10 m. farther up the river. Other stations were established later at The Dalles of the Columbia, Oreg., by Revs. Lee and Perkins, in 1838; near Pt Adams, at the mouth of the Columbia, Oreg., by Rev. J. H. Frost, in 1841; and at Ft Nisqually on Puget sd., Wash., by Rev. J. P. Richmond in 1842. The tribes most directly concerned at the four stations, respectively, were the Kalapuya, Wasco, Clatsop, and Nisqualli, all in process of swift decline. For various reasons no success attended the project. The children in the schools sickened and died; one missionary after another resigned and went home; and Lee, as superintendent in charge, so far neglected his duties that in 1844 he was deposed and the church board, after investigation, ordered the discontinuance

of the work, which had already cost a quarter of a million dollars. The Dalles station was bought by the Presbyterians, who now entered the same field (see Bancroft, Hist. Oreg., 1, 1886).

In the fall of 1836 the *Presbyterians*, under the leadership of Rev. Marcus Whitman, established their first mission in the Columbia region at Waiilatpu, now Whitman, on Wallawalla r., s. e. Wash., in territory claimed by the Cayuse tribe. The site had been selected by an advance agent, Rev. Samuel Parker, a few months earlier. Rev. H. H. Spalding, of the same party, about the same time, established a mission among the Nez Percés at Lapwai, on Clearwater r., a few miles above the present Lewiston, Idaho. Early in 1839 a second station was begun among the Nez Percés at Kamiah, higher up the Clearwater, but was discontinued in 1841. Revs. E. Walker and C. C. Eells established themselves at Chemakane, N. E. Wash., on a lower branch of Spokane r., among the Spokan.

The Spokan, whose chief had been educated among the whites, proved friendly, but from the very beginning the Cayuse and a considerable portion of the Nez Percés maintained an insulting and hostile attitude, the Cayuse particularly claiming that the missionaries were intruders upon their lands and were in league with the immigrants to dispossess the Indians entirely. In consequence the Kamiah station was soon abandoned. At Waiilatpu, the main station, Whitman was more than once in danger of personal assault, the irritation of the Indians constantly growing as the flood of immigrants increased. In consequence of the continued opposition of the Cayuse and the Nez Percés, the mission board in 1842 ordered the abandonment of all the stations but Chemakane. Whitman then crossed the mountains to New York to intercede for his mission, with some degree of success, returning the next year to find his wife a refugee at one of the lower settlements, in consequence of the burning of a part of the mission property by the Cayuse, who were restrained from open war only by the attitude of the Government agent and the Hudson's Bay Co.'s officers. In the summer of 1847 the Cayuse and neighboring tribes were wasted by an epidemic of measles and fever communicated by passing immigrant trains, all of which made Waiilatpu a stopping point. Two hundred of the Cayuse died within a few weeks, while of the Nez Percés the principal chief and 60 of his men fell victims. A rumor spread among the Cayuse that Whitman had brought back the disease poison from the E. and unloosed it for their destruction. The danger became so imminent that, actuated partly also by

the opposition of the mission board, he decided to abandon Waiilatpu and remove to the former Methodist station at The Dalles, which he had already bought for his own denomination. At the same time he began negotiations with the Catholics for their purchase of Waiilatpu. Before the removal could be made, however, the blow fell. On Nov. 29, 1849, the Cayuse attacked Waiilatpu mission, killed Dr and Mrs Whitman and 7 others and plundered the mission property. Within a few days thereafter, before the Indians dispersed to their camps, 4 others of the mission force were killed, making 13 murdered, besides 2 children who died of neglect, or 15 persons in all. The rest, chiefly women, were carried off as prisoners and subjected to abuse until rescued by the effort of the Hudson's Bay Co., a month later. The Catholic Bishop Brouillet, who was on his way from below to confer with Whitman about the sale of the mission property, was one of the first to learn of the massacre, and hastening forward was allowed to bury the dead and then found opportunity to send warning to the Lapwai mission in time for Spalding and his party to make their escape, some of them being sheltered by friendly Nez Percés, although the mission buildings were plundered by the hostiles. The Spokan chief, Garry, remained faithful and gave the people at Chemakane mission a bodyguard for their protection until the danger was past. As a result of the Indian war which followed the Presbyterian missions in the Columbia region were abandoned. During the brief period that the station at Kamiah had continued, the missionary Rev. Asa Smith had "reduced the Nez Percé dialect to grammatical rules." In 1839 the Lapwai mission received a small printing outfit with which Spalding and his assistants printed small primers, hymns, and portions of scripture in the language of the tribe by the aid of native interpreters. A Spokane primer of 1842, the joint work of Walker and Eells, is said to have been the third book printed in the Columbia r. region.

As we have seen, the first Christian teaching among the tribes of the Columbia region had come from the *Catholic* employees of the Hudson's Bay Co., through whose efforts many of the Nez Percés, Flatheads, and others had voluntarily adopted the Christian forms as early as 1820, and some years later sent delegates to St Louis to make requests for missionaries, to which the Methodists were first to respond. In 1838 Father Francis Blanchet and Modeste Demers arrived at Ft Vancouver, Wash., on the Columbia, from Montreal, to minister particularly to the French employees of the

Hudson's Bay Co., having visited the various tribes farther up along the river en route. In the next year St Francis Xavier mission was established by Blanchet on the Cowlitz, in w. Washington, and St Paul mission at the French settlement on the lower Willamet, at Champoege, Oreg., while Father J. B. Bolduc, afterward the pioneer missionary on Vancouver id., began preaching to the tribes on Puget sd. In 1841 the Jesuit de Smet had founded the mission of St Mary among the Flatheads in w. Montana (see *Interior States*), while a companion Jesuit, Father Nicholas Point, established the Sacred Heart mission among the Cœur d'Alènes in Idaho.

In 1844 de Smet brought out from Europe a number of Jesuits and several sisters of the order of Notre Dame. Regular schools were started and the tribes on both sides of the river as far up as the present Canadian boundary were included within the scope of the work. In the meantime Blanchet had been made archbishop of the Columbia territory and had brought out from Quebec 21 additional recruits—Jesuits, secular priests, and sisters—with which reinforcements 6 other missions were founded in rapid succession, viz: St Ignatius, St Francis Borgia, and St Francis Regis, in Washington, among the Upper Pend d'Oreilles, Lower Pend d'Oreilles, and Colvilles, respectively, with 3 others across the line in British Columbia. Of these the first-named was the principal station, in charge of the Jesuit Fathers De Vos and Accolti. In the summer of 1847 Father N. C. Pandosy and 3 others, the first Oblate fathers in this region, established a mission at Ahtanam among the Yakima in e. Washington; Father Pascal Ricard, Oblate, founded St Joseph on the Sound near the present Olympia; and in October of the same year, after some negotiation for the purchase of the Presbyterian establishment under Whitman at Waiilatpu, Father John Brouillet arrived to start a mission among the Cayuse. Hardly had he reached the nearest camp, however, when the news came of the terrible Whitman massacre, and Brouillet was just in time to bury the dead and send warning to the outlying stations, as already detailed. The project of a mission among the Cayuse was in consequence abandoned. In the next year the secular Fathers Rousseau and Mesplée founded a station among the Wasco, at The Dalles of Columbia r., Oreg. Work was attempted among the degenerate Chinook in 1851, but with little result. Father E. C. Chirouse, best known for his later successful work at Tulalip school, began his labors among the tribes of Puget sd. and the lower

Columbia about the same period. With the exception of the Wasco and Chinook, these missions, or their successors, are still in existence, numbering among their adherents the majority of the Christian Indians of Washington and s. Idaho. At the Tulalip school 'The Youth's Companion,' a small journal in the Indian language, set up and printed by the Indian boys, was begun in 1881 and conducted for some years. Father Louis Saintonge, for some years with the Yakima and Tulalip missions, is the author of several important linguistic contributions to the Chinook jargon and the Yakima language. Father Pandosy also is the author of a brief 'Grammar and Dictionary' of the Yakima.

NEW MEXICO AND ARIZONA.—As all of this region was colonized from Spain, the entire mission work until a very recent period was conducted by the *Catholics* and through priests of the Franciscan order. The earliest exploration of the territory w. of the Rio Grande was made by the Franciscan friar, Marcos de Niza, in 1539, and it was through his representations that the famous exploration of Coronado was undertaken a year later. Five Franciscans accompanied the army, and on the return of the expedition in 1542 three of these volunteered to remain behind for the conversion of the savages. Fray Luis de Escalona, or Descalona, chose Cicuye (Pecos) for his labors. Fray Juan de Padilla, with a few companions and a herd of sheep and mules, pushed on to distant Quivira, somewhere on the plains of Kansas. Fray Juan de la Cruz stayed at Tiguex, Coronado's winter quarters, properly Puaray on the Rio Grande, near the present Bernalillo, N. Mex. On arriving at Pecos Fray Luis sent back the message that while the tribe was friendly the medicine-men were hostile and would probably cause his death. So it apparently proved, for nothing more was ever heard of his fate or of that of Fray Juan de la Cruz at Tiguex. Of Fray Juan de Padilla it was learned years afterward that he had been killed by the Quivira people for attempting to carry his ministrations to another tribe with which they were at war.

In 1580 three other Franciscans, Rodriguez, Santa Maria, and Lopez, crossed the Rio Grande with a small escort and attempted to establish a mission at the same town of Tiguex, by that time known as Puaray, but were killed by the Indians within a few months of their arrival.

In 1598 Juan de Onate with a strong party of 100 men, besides women and children, and 7,000 cattle, entered the country from Mexico and within a few months had received the submission of all the Pueblo tribes as far as the remote Hopi of Ari-

zona, organizing a regular colonization and governmental administration and dividing the region into 7 mission districts in charge of a force of Franciscan friars. In 1617 the Pueblo missions counted 11 churches, with 14,000 "converts." In 1621 there were more than 16,000 converts, served by 27 priests in charge of Father Alonso Benavides, whose *Memorial* is our principal source of information for this period. Another distinguished name of this epoch is that of Father Geronimo de Zarate Salmeron, missionary, philologist, and historian. In 1630 there were some 50 priests serving more than 60,000 Christianized Indians in 90 pueblos, with 25 principal mission centers and churches. To this period belong the mission ruins at Abó and Tabira, or "Gran Quivira" (one of which may be the San Isidro of the lost Jumano tribe), which were abandoned in consequence of Apache invasions about 1675. The entire Pueblo population to-day numbers barely 10,000 souls in 25 villages.

About this time we begin to observe the first signs of revolt, due partly to the exactions of the Spanish military authorities, but more, apparently, to the attachment of the Indians, particularly the medicine-men, to their own native ceremonies and religion. About the year 1650 the wild tribes, known collectively as Apache, began the series of destructive raids which continued down almost to the present century. Increasing friction between the missionaries and the military administration prevented any united effort to meet the emergency. Missionaries were killed in outlying districts and several pueblos were wiped out by the wild tribes, until in 1675, after the murder of several missionaries and civilians and the execution or other punishment of the principals concerned, the Pueblo chiefs, led by Popé (q. v.) of San Juan, sent to the governor a message declaring that they would kill all the Spaniards and flee to the mountains before they would permit their medicine-men to be harmed. Conditions rapidly grew worse, until it was evident that a general conspiracy was on foot and an appeal was sent to Mexico by the governor for reinforcements. Before help could arrive, however, the storm broke, on August 10, 1680, the historic Pueblo revolt, organized and led by Popé.

Says Bancroft (*Hist. Ariz. and N. Mex.*, 1889): "It was the plan of the New Mexicans to utterly exterminate the Spaniards; and in the massacre none were spared—neither soldier, priest, or settler, personal friend or foe, young or old, man or woman—except that a few beautiful women and girls were kept as captives."

Those in the S. were warned in time to escape, but those in the N., E., and W. perished to the number of over 400 persons, including 21 missionaries (see list, *ibid.*, p. 179). Santa Fé itself, with a Spanish population of 1,000, after a battle lasting all day, was besieged nearly a week by 3,000 Indians, who were finally driven off by Gov. Otermin in a desperate sortie in which the Indians lost 350 killed. The result was the entire evacuation of New Mexico by the Spaniards until its reconquest by Vargas in 1692-94, when most of the missions were reestablished. The Pueblo spirit was not crushed, however, and in the summer of 1696 there was another outbreak by five tribes, resulting in the death of five missionaries, besides other Spaniards. The rising was soon subdued, except among the Hopi, who deferred submission until 1700, but only one of their seven or eight towns, Awatobi, would consent to receive missionaries again. For the favor thus shown to Christians the other Hopi combined forces and utterly destroyed Awatobi and killed many of its people before the close of the year. The Hopi did not again become a mission tribe, but in 1742 more than 440 Tigua, who had fled to the Hopi at the time of the great revolt, were brought back and distributed among the missions of the Rio Grande until they could be resettled in a new town of their own. (See *Sandia*.)

In 1733 Father Mirabal established a mission among the wild Jicarilla, on Trampas r., a few leagues from Taos, N. Mex. In 1746 and 1749 attempts were made to gather a part of the Navaho into 2 new missions established in the neighborhood of Laguna, but the undertaking was a failure. In the latter year the number of Christian Indians in New Mexico, including the vicinity of El Paso, was reported to be about 13,000. By this time the territory had been organized as a bishopric, and with the increase of the Spanish population the relative importance of the mission work declined. In 1780-81 an epidemic of smallpox carried off so many of the Christian Indians that by order of the governor the survivors were the next year concentrated into 20 missions, the other stations being discontinued. As the Indians assimilated with the Spanish population the missions gradually took on the character of ordinary church establishments, the Franciscans being superseded by secular priests. The majority of the Pueblo Indians of to-day, excepting those of Hopi and Zuñi, are at least nominal Christians.

In the more recent historic period work has also been conducted at several pueblos by various Protestant denominations. In 1854 a Baptist minister, Rev. Samuel

Gorman, began a mission at Laguna, N. Mex., which was kept up for several years. In 1894 Rev. C. P. Coe, of the same denomination, began a similar work for the Hopi of Arizona. The *Memonites*, represented by Rev. H. R. Voth, had begun a year earlier at Oraibi a successful work among the Hopi, which is still carried on, being now in charge of Revs. Jacob Epp and John B. Frey.

About the year 1876 the *Presbyterians*, through Rev. John Menaul, established a mission at Laguna, the undertaking being afterward extended to Jemez and Zuni, N. Mex., besides an industrial school opened at Albuquerque in 1881. By means of a printing press operated at Laguna, with the aid of Indian pupils, several small devotional and reading books have been published by Menaul and Bercovit, connected with the mission, which still continues.

With the exception of those among the Hopi, before the great revolt, the only missions in Arizona before the transfer of the territory to the United States were two in number, viz.: San Xavier del Bac and San Miguel de Guevavi, established under *Jesuit* auspices on the upper waters of Santa Cruz r., among a subtribe of the Pima, about 1732.

The Pima missions were a northern extension of the Jesuit mission foundation of northern Sonora, Mexico. The noted German Jesuit explorer, Father Eusebio Kino (properly Kühne), made several missionary expeditions into s. Arizona between 1692 and his death in 1710, but so far as known no regular stations were established until long after his death, the first priests in charge in 1732 being two other Germans, Father Felipe Segesser, at Bac, and Father Juan Grashoffer, at Guevavi. Besides the main establishment, several other Indian villages were designated as 'visitas,' or visiting stations. The Pima mission never flourished. In 1750 the tribes revolted and the missions were plundered, most of the missionaries escaping, and by the time peace was restored the contest had begun against the Jesuits, which resulted in the expulsion of the order from Spanish territory in 1767. Their place was at once filled by the Franciscans, but the work languished and steadily declined under the attacks from the wild tribes. About the year 1780 Guevavi was abandoned in consequence of Apache raids, and Tuma-cacori, in the same general region, was made mission headquarters. The work came to an end by decree of the revolutionary government in 1828, shortly after the transfer of authority from Spain to Mexico.

CALIFORNIA.—As in other parts of Spanish America, the *Catholics* were the sole

mission workers in California until within a very recent period. The most noted of all the Spanish missions were the Franciscan missions of California, whose story is so closely interwoven with the history and romance of the Pacific coast, and whose ruins still stand as the most picturesque landmarks of the region. Their story has been told so often that we need not here go into details. The first one was established in 1769 at San Diego, near the s. boundary, by Father Junípero Serra (to whose memory a monument was erected at Monterey in 1891), who advanced slowly along the coast and passed the work on to his successors, until in 1828 there was a chain of 21 prosperous missions extending northward to beyond San Francisco bay. The full list, in the order of their establishment, with the names of the founders or superiors in charge of the California mission district at the time, is as follows: 1, San Diego de Alcalá (Serra, 1769); 2, San Carlos Borromeo de Monterey, alias Carmel (Serra, 1770); 3, San Antonio de Pádua (Serra, 1771, July); 4, San Gabriel Arcangel (Serra, 1771, Sept.); 5, San Luis Obispo de Tolosa (Serra, 1772); 6, San Francisco de Asis, alias Dolores (Serra, 1776, Oct.); 7, San Juan Capistrano (Serra, 1776, Nov.); 8, Santa Clara (Serra, 1777); 9, San Buenaventura (Serra, 1782); 10, Santa Barbara (Palou, 1786); 11, La Purísima Concepcion (Palou, 1787); 12, Santa Cruz (Palou, 1791, Sept.); 13, Nuestra Señora de la Soledad (Palou, 1791, Oct.); 14, San José (Lasuen, 1797, June 11); 15, San Juan Bautista (Lasuen, 1797, June 24); 16, San Miguel (Lasuen, 1797, July); 17, San Fernando Rey (Lasuen, 1797, Sept.); 18, San Luis Rey de Francia (Peyri, 1798); 19, Santa Inez (Tapis, 1804); 20, San Rafael (Payeras, 1817); 21, San Francisco Solano, alias San Solano or Sonoma (Sonoma, 1823); 22, La Purísima Concepcion, on lower Colorado r. (Garcés, 1780); 23, San Pedro y San Pablo de Bicuñer, on lower Colorado r., possibly in Lower California (Garcés, 1780).

Among the many devoted workers connected with the California missions during the 65 years of their existence the most prominent, after Serra, are Fathers Crespi, Palou, and Peyri, the last-named being the founder, and for a number of years the superior, of San Luis Rey, which shared with San Diego the honor of being the largest and most important of the series. In 1810 the neophyte population of San Diego was 1,611, while that of San Luis Rey was 1,519.

The mission buildings, constructed entirely by Indian labor under supervision of the fathers, were imposing structures of brick and stone, some of which even in their roofless condition have defied the

decay of 70 years. Around each mission, except in the extreme N., were groves of palms, bananas, oranges, olives, and figs, together with extensive vineyards, while more than 400,000 cattle ranged the pastures. Workshops, schoolrooms, store-rooms, chapels, dormitories, and hospitals were all provided for, and in addition to religious instruction and ordinary school studies, weaving, pottery-making, carpentry, and every other most useful trade and occupation were taught to the neophytes, besides the violin and other instruments to those who displayed aptitude in music. There were fixed hours for prayers and work, with three hours of rest at noon, and dancing and other amusements after supper and the angelus, which was one hour before sunset. The diet consisted of an abundance of fresh beef, mutton, wheat and corn bread, and beans, from their own herds and plantations. From the sale of the surplus were bought clothing, tobacco, and trinkets for the Indians, and the necessary church supplies. At seasonable intervals there were outing excursions to allow the neophytes to visit their wilder relatives in the hills. The missionaries taught by practical example at the plow, the brick-kiln, and in the vineyard. Duflot de Mofras, who made an official tour of the missions on behalf of the French government shortly before their utter ruin, says: "Necessity makes the missionaries industrious. One is struck with astonishment at seeing that with such small resources, generally without any European workmen, and with the aid of savage populations whose intelligence was of the lowest order and who were often hostile, besides the vast agricultural culture, they have been able to execute such extensive works of architecture and mechanical structures, such as mills, machinery, and workshops, besides bridges, roads, and canals for irrigation. The construction of almost all these missions required that timber, often cut upon steep mountains, should be brought 25 to 30 miles, and that the Indians should be taught how to make lime, cut stone, and mould bricks. This fact can not be mistaken—it was not merely by proselytism that the old missionaries succeeded in attracting the Indians. In the work of their conversion, if religion was the end, material comfort was the means. The missionaries had re-solved the great problem of making labor attractive."

The Indians themselves, of many tribes and dialects, were for the most part unwarlike and tractable, but without native energy, and probably, in their original condition, lower in the scale of civilization and morality than any others within the limits of the United States. Infanti-

cide prevailed to such a degree that even the most earnest efforts of the missionaries were unable to stamp it out, the fact showing how little the new teaching really affected the deeper instinct of the savage. Although there were frequent raids by the wild tribes, there was little serious opposition to mission discipline, which was supported when necessary by military assistance from the nearest garrison. Despite regular life, abundance of food, and proper clothing according to the season, the Indian withered away under the restrictions of civilization supplemented by epidemic diseases introduced by the military garrisons or the seal hunters along the coast. The death rate was so enormous in spite of apparent material advancement that it is probable that the former factor alone would have brought about the extinction of the missions within a few generations.

But all this prosperity at last excited the cupidity of the recently established revolutionary government of Mexico, and in 1833-34 decrees were passed to "secularize" the missions and to expel the missionaries, who, as Spaniards, were hated by the revolutionists. The mission funds and vast herds were confiscated, the lands were distributed to eager political adventurers, and minor vandals completed the work of destruction by taking even the tiles from the roofs and digging up the vines and fruit trees in the gardens. Some abortive provision was made for the Indians, of which in their helplessness they were unable to avail themselves, and in a few years, left without their protectors, they had again scattered to the mountains and swamps or sunk into the lowest degradation in the new mining towns. In 1834, when the blow came, the California missions had 30,650 Indians, with 424,000 cattle, 62,500 horses and mules; 321,900 sheep, goats, and hogs; and produced 122,500 bushels of wheat and corn. In 1842 there remained only 4,450 Indians, 28,220 cattle, and the rest in proportion. To-day, according to official report, there remain of the old Mission Indians only 2,855, whose condition is a subject of constant serious concern to philanthropists.

Two other California missions have a briefer history. In 1780 the military commander of the Sonora district determined to establish among the warlike Yuma two garrison posts with colony and mission attachments, despite the protests of the missionaries concerned, who foresaw that the combination would be disastrous to their own part of the work. Two sites were selected, however, in the fall of the year on the w. bank of the Colorado—the one, La Purísima Concepcion, occupying the site of old Ft Yuma, the

other, San Pedro y Pablo de Bicuñer, being 8 or 10 m. lower down, possibly just across the present Mexican border. Purísima mission was placed in charge of Father Francisco Garcés, the explorer, with Father Juan Barreneche as his assistant, while the other was given over to Fathers Diaz and Moreno. The event was as predicted. Within a year the Yuma were roused to hostility by the methods and broken promises of the military commander. In July, 1781, both settlements were attacked almost simultaneously, the buildings plundered and burned, the commander and every man of the small garrison killed after a desperate resistance, the four missionaries and nearly all the men of the colonies also butchered, and the women and several others carried off as captives. A subsequent expedition rescued the captives and buried the dead, but the Yuma remained unsubdued and the colony undertaking was not renewed. (See *California, Indians of; Mission Indians of California.*)

ALASKA.—Alaska was discovered by the Russians in 1741 and remained a possession of Russia until transferred to the United States in 1867. In 1794 regular missionary work was begun among the Aleut on Kodiak id. by monks of the *Greek Catholic* (Russian orthodox) church, under the Archimandrite Joassaf, with marked success among the islanders, but with smaller result among the more warlike tribes of the mainland. Within a few years the savage Aleut were transformed to civilized Christians, many of whom were able to read, write, and speak the Russian language. Among the pioneer workers were Fathers Juvenal, murdered in 1796 by the Eskimo for his opposition to polygamy, and the distinguished John Veniaminov, 1823 to about 1840, the historian and philologist of the Alaskan tribes, and author of a number of religious and educational works in the Aleut and Tlingit languages, including an Aleut grammar and a brief dictionary. Fathers Jacob Netzevloff and Elias Tishnoff also have made several translations into the Aleut language. About the time of the transfer to the United States the Christian natives numbered 12,000, served by 27 priests and deacons, with several schools, including a seminary at Sitka. Chapels had been established in every important settlement from Prince William id. to the outermost of the Aleutian ids., a distance of 1,800 m., besides other stations on the Yukon, Kuskokwim, and Nushagak rs., and regular churches at Sitka, Killisnoo, and Juneau. In 1902 the Greek church had 18 ministers at work in Alaska. (See *Russian influence.*)

The first Protestant missions after the transfer to the United States were begun by

the *Presbyterians* in 1877, under the supervision of Rev. Sheldon Jackson and Mrs A. R. McFarland, with headquarters at Ft Wrangell, where a school had already been organized by some Christian Indians from the Methodist station at Ft Simpson, Brit. Col. Within the next 18 years some 15 stations had been established among the Indians of the s. coast and islands, besides two among the Eskimo, at Pt Barrow and on St Lawrence id. Among the earliest workers, besides those already named, were Rev. J. G. Brady, Rev. E. S. Willard, and Mr Walter Stiles. The principal schools were at Sitka (1878) and Juneau (1886). At Pt Barrow a herd of imported reindeer added to the means of subsistence. The majority of these missions are still in successful operation.

The next upon the ground were the *Catholics*, who made their first establishment at Wrangell in 1878, following with others at Sitka, Juneau, and Skagway. In 1886-87 they entered the Yukon region, with missions at Nulato on the Yukon/St Ignatius on the Kuskokwim, St Mary's (Akularak), St Michael, Nome, Kusilvak id., Nelson id., Holy Cross (Koserefsky), and others, the largest schools being those at Koserefsky and Nulato. With the exception of Nulato all were in Eskimo territory. In 1903 the work was in charge of 12 Jesuits and lay brothers, assisted by 11 sisters of St Anne. The Innuut grammar and dictionary of Father Francis Barnum (1901) ranks as one of the most important contributions to Eskimo philology.

In 1884 the *Moravians*, pioneer workers among the eastern Eskimo, sent a commission to look over the ground in Alaska, and as a result a mission was established at Kevinak among the Eskimo of Kuskokwim r. in the next year by Revs. W. H. Weinland and J. H. Kilbuck, with their wives. In the same year other stations were established at Kolmakof, on the upper Kuskokwim, for Eskimo and Indians together, and farther s., at Carmel, on Nushagak r. In 1903 there were 5 mission stations in Eskimo territory, in charge of 13 white workers, having 21 native assistants, with Rev. Adolf Stecker as superintendent. The reindeer herd numbered nearly 400.

In 1886 the *Episcopalians* began work with a school at St Michael, on the coast (Eskimo), which was removed next year to Anvik, on the Yukon, in charge of Rev. and Mrs Octavius Parker and Rev. J. H. Chapman. In 1890 a mission school was started at Pt Hope (Eskimo), under Dr J. B. Driggs, and about the same time another among the Tanana Indians in the middle Yukon valley, by Rev. and Mrs T. H. Canham. In 1903 the Episcopalians in Alaska, white and

native, counted 13 churches, a boarding school, and 7 day schools, with a total working force of 31.

The *Baptists* also began work in 1886 on Kodiak id., under Mr W. E. Roscoe. In 1893 a large orphanage was erected on Wood id., opposite Kodiak, by the Woman's Home Mission Society, its sphere of influence now including a great part of the Alaska peninsula westward from Mt St Elias.

The *Methodists*, beginning also in 1886, have now several stations in s. e. Alaska, together with the flourishing Jesse Lee Industrial Home, under the auspices of the Methodist Woman's Home Mission Society, on Unalaklik id.

In 1887 the *Swedish Evangelical Union* of Sweden, through Revs. Axel Karlson and Adolf Lydell, respectively, established stations at Unalaklik on Bering sea (Eskimo) and at Yakutat, on the s. coast among the Tlingit. In 1900, in consequence of an epidemic, an orphanage was founded on Golofnin bay. The civilizing and Christianizing influence of the Swedish mission is manifest over a large area.

In 1887 the Kansas Yearly Meeting of *Friends* began work on Douglas id., near Juneau, through Messrs E. W. Weesner and W. H. Bangham, chiefly for the white population. In 1892 a school was opened among the Kake Indians of Kuiu and Kupreanof ids., under the auspices of the Oregon meeting, and in 1897 another mission, under the auspices of the California meeting, was established among the Eskimo in Kotzebue sd. Here also is now a large reindeer herd.

In 1890 the *Congregationalists*, under auspices of the American Missionary Association, established the Eskimo mission school of Wales, at C. Prince of Wales, on Bering str., under Messrs W. T. Lopp and H. R. Thornton, the latter of whom was afterward assassinated by some rebellious pupils. In 1902 the school was in prosperous condition, with more than a hundred pupils and a herd of about 1,200 reindeer.

In 1900 the *Lutherans*, under the auspices of the Norwegian Evangelical Church, established an orphanage at the Teller reindeer station, Port Clarence, Bering str., under Rev. T. L. Brevig, assisted by Mr A. Hovick, the missionaries having charge also of the Government reindeer herds at the place. It was at Teller station that Rev. Sheldon Jackson, in 1892, inaugurated the experiment of introducing Siberian reindeer to supplement the rapidly diminishing food supply of the natives, as the whale had been practically exterminated from the Alaska coast. The experiment has proved a complete success, the original imported

herd of 53 animals having increased to more than 15,000, with promise of solving the problem of subsistence for the Eskimo as effectually as was done by the sheep introduced by the old Franciscans among the Pueblos and through them the Navaho.

For METLAKATLA, see *Canada, West*.

PRESENT CONDITIONS.—It may be said that at present practically every tribe officially recognized within the United States is under the missionary influence of some religious denomination, workers of several denominations frequently laboring in the same tribe. The complete withdrawal of Government aid to denominational schools some years ago for a time seriously crippled the work and obliged some of the smaller bodies to abandon the mission field entirely. The larger religious bodies have met the difficulty by special provision, notably in the case of the Catholics, by means of aid afforded by the Preservation Society, the Marquette League, and by the liberality of Mother Katharine Drexel, founder of the Order of the Blessed Sacrament, for Indian and Negro mission work. The Catholic work is organized under supervision of the Bureau of Catholic Indian Missions, established in 1874, with headquarters at Washington. The report for 1904 shows a total of 178 Indian churches and chapels served by 152 priests; 71 boarding and 26 day schools, with 109 teaching priests, 384 sisters, and 138 other religious or secular teachers and school assistants. The principal orders engaged are the Jesuits, Franciscans, and Benedictines, and the sisters of the orders of St Francis, St Anne, St Benedict, St Joseph, Mercy, and Blessed Sacrament.

Of the other leading denominations engaged in Indian mission work within the United States proper, according to the official Report of the Board of Indian Commissioners for 1903, the *Presbyterians* come first, with 101 churches, 69 ordained missionaries and a proportionate force of other workers, and 32 schools. Next the *Methodists*, with 40 ordained missionaries, but with only one school; *Episcopalians*, 14 missions, 28 ordained missionaries, and 17 schools; *Baptists*, 14 missions, 15 ordained missionaries, and 4 schools—exclusive of the Southern Baptists, not reported; *Congregationalists* (American Missionary Association), 10 missions, 12 ordained missionaries, and 5 schools; *Friends*, 10 missions, 15 ordained missionaries, and 1 school; *Mennonites*, 5 missions, 6 ordained missionaries, but no school; *Moravians*, 3 missions, 3 ordained missionaries, and no school. Statistics for any other denominations, including the *Mormons*, are not given. The missionary work of each denomination re-

ported is in charge of a central organization.

CANADA, EAST; NEWFOUNDLAND, ETC.—Canada, being originally a French possession, the mission work for a century and a half was almost entirely with the *Catholics*. Port Royal, now Annapolis, Nova Scotia, was founded in 1605, and the resident priest, Father Flèche, divided his attention between the French settlers and the neighboring Micmac. In 1611 the Jesuits, Fathers Peter Biard and Emond Masse, arrived from France, but finding work among the Micmac made difficult by the opposition of the governor, they went to the Abnaki, among whom they established a mission on Mt Desert id., Maine, in 1613. The mission was destroyed in its very beginning by the English Captain Argall (see *New England*). In 1619 work was resumed among the Micmac and the Malecite of Nova Scotia, New Brunswick, and lower Quebec under the Récollet Franciscans and continued for at least half a century. The most distinguished of these Récollets was Father Chrestien Le Clercq, who, while stationed at the Micmac mission of Gaspé, at the mouth of the St Lawrence, from 1655 to about 1665, mastered the language and devised for it a system of hieroglyphic writing which is still in use in the tribe. Another of the same order is said to have been the first to compile a dictionary of a Canadian language, but the work is now lost. The eastern missions continued, under varying auspices and fortunes, until the taking of Louisburg, Nova Scotia, by the English in 1745, when all the missionaries in Nova Scotia and New Brunswick were either deported or compelled to seek other refuge. In their absence the Abbé Maillard, of Nova Scotia, ministered for some years to the Micmac and the Malecite, at first in secret and then openly after the peace of 1760. To him we owe a Micmac grammar and a treatise on the customs of the Indians. It was not until within the last century, when international and sectarian jealousies had largely passed away, that the work was resumed, continuing without interruption to the present time.

Work was begun in 1615 by the Récollets among the roving Montagnais and Algonkin of the Saguenay, Ottawa, and lower St Lawrence region. The pioneers were Fathers Dolbeau, Jamet, and Du Plessis, together with Father Le Caron in the Huron field. In 1636 Dolbeau had extended his ministrations to the outlying bands of the remote Eskimo of Labrador. The principal missions were established at Tadousac (Montagnais), the great trading resort at the mouth of the Saguenay; Gaspé (Montagnais and Micmac) and Three Rivers (Montagnais

and Algonkin), all in Quebec province; Miscou, N. B., for the Micmac, and on Georgian bay for the Hurons. In 1625 the Récollets called the Jesuits to their aid, and a few years later withdrew entirely, leaving the work to be continued by the latter order. In 1637 the Jesuit mission of St Joseph was founded by Le Jeune at Sillery, near Quebec, and soon became the most important colony of the christianized Montagnais and Algonkin. In 1646, at the request of the Abnaki, Father Gabriel Druillettes was sent to that tribe. In consequence of the later New England wars, large numbers of the Abnaki and other more southerly tribes took refuge in the Canadian missions (see *New England*).

In 1641 Fathers Charles Raymbault and Isaac Jogues, among the Ottawa bands on the headwaters of the river of that name, accompanied a party to the far W. and discovered the great L. Superior, planting a cross and preaching in the camps about the present Sault Ste Marie, Mich. In the next year a regular mission was established among the Nipissing, on the n. shore of the lake of the same name. Other missions followed, continuing until the dispersion of the Algonkin tribes by the Iroquois in 1650. Most of the fugitives fled westward, roving along the shores of L. Superior without missionary attention until visited by the Jesuit Allouez in 1667. Other names connected with this early Algonkin mission were those of Pijart, Garreau, and the pioneer explorer René Ménard. In 1657 the first Sulpicians arrived at Quebec from France, and soon afterward began work among the neighboring tribes, but with principal attention to the Iroquois colonies on both shores of L. Ontario, at Quinté and Oswegatchie (see *New York*). To this period belongs the wonderful canoe voyage of discovery by the two Sulpicians, Galinée and Dollier de Casson, in 1669-70, from Montreal up through the great lakes to Mackinaw, where they were welcomed by the Jesuits Dablon and Marquette, and then home, by way of French r., Nipissing, and the Ottawa. No less important was the discovery of an overland route from the St Lawrence to Hudson bay in 1671-72 by the Sieur St Simon, accompanied by the Jesuit Charles Albanel. Ascending the Saguenay from Tadousac they crossed the divide, and after 10 months of toilsome travel finally reached the bay near the mouth of Rupert r., where Albanel, the first missionary to penetrate this remote region, spent some time preaching and baptizing among the wandering Maskegon along the shore. In 1720 a number of the christianized Iroquois, with fragments of the Algonkin bands, after years of shifting about, were

gathered into a new mission settlement at Oka, or Lake of the Two Mountains (Lac des Deux Montagnes), also known under its Iroquois name of Canasadaga, on the N. bank of the St Lawrence, above the island of Montreal. It still exists as one of the principal Indian settlements.

Among the earlier missionaries in this region who have made important contributions to Algonquian philology may be noted: Father Louis André, Jesuit, who spent more than 40 years with the Montagnais and the Algonkin, from 1669, leaving behind him a manuscript dictionary of the Algonkin, besides a great body of other material; Father Antonio Silvy, Jesuit, of the same period, author of a manuscript Montagnais dictionary; Father Pierre Laure, Jesuit, with the Montagnais, 1720-38, author of a manuscript Montagnais grammar and dictionary, and other works; Father Jean Mathévet, Sulpician, at Oka, 1746 to 1781, the author of an Abnaki dictionary; Father Vincent Guichart, ministering to Algonkin and Iroquois at Oka from 1754 until his death in 1793, master of both languages and author of a manuscript Algonkin grammar; the Abbé Thavenet, Sulpician, at Oka, from about 1793 to 1815, author of an Algonkin grammar and dictionary and other miscellany, still in manuscript; Father J. B. La Brosse, Jesuit, with the Montagnais and Malecite, 1754 to his death in 1782, author of a number of religious and teaching works in the Montagnais language. Among the most distinguished laborers within the last century in the Montagnais, Algonkin, and Maskegon territories, stretching from the St Lawrence to Hudson bay, may be named Fathers Durocher (1829-73), Garin (1845-57), Laverlochère (1845-51), Lebre (1861-69), Guéguen (1864-88+), and Prévost (1873-88+), all of the Oblate order, and each the author of some important contribution to American philology. Rev. Charles Guay has given attention to the language among the Micmac of New Brunswick. In recent years the most prominent name is that of Father J. A. Cuoq, Sulpician, already noted, missionary at Oka for more than half a century, beginning in 1847, master of the Mohawk and Algonkin languages, and author of a dictionary of each, besides numerous other important linguistic works.

According to the official Canadian Indian Report for 1906 the Catholic Indians of the five eastern provinces numbered 18,064, including all those of Prince Edward id., Nova Scotia, and New Brunswick, nearly all those of Quebec, and two-fifths of the Christian Indians of Ontario. Every settlement of importance had a church, school, or visiting

priest, the standard for industry being fair, for temperance good, and for honesty and general morality exceptionally high.

The noted Huron missions hold a place by themselves. The beginning was made by the Récollet, Joseph le Caron, who accompanied Champlain on his visit to the Huron country in 1615. The tribe at that time occupied the shores of Georgian bay, Ontario, and with other incorporated bands may have numbered 10,000 souls or more (some estimates are much higher), in from 15 to 30 towns or villages, several of which were strongly palisaded. They were probably then of strength equal to that of their hereditary enemies and final destroyers, the Iroquois of New York. In more or less close alliance with the Hurons were the cognate Tionontati and Neutrals, farther to the S. and S. W., in the peninsula between L. Erie and L. Huron. Le Caron spent the winter with the Hurons and Tionontati, established the mission of St Gabriel, made a brief dictionary of the language, and returned to the French settlements in the spring. The work was continued for some years by other Récollets, Gabriel Sagard, author of a Huron dictionary and a history of the Récollet missions, and Nicholas Viel, who was murdered by an Indian about 1624. In 1625 the Jesuits arrived in Canada to assist the Récollets, and the next year the heroic Jean de Brébeuf and another Jesuit, with Father Joseph Dallion, Récollet, reached St Gabriel. The Neutrals also were now visited, but without successful result. The work was brought to a temporary close by the English occupancy of Canada in 1629.

In 1634, after the restoration of French control, the work was resumed, this time by the Jesuits alone, with Brébeuf as superior, assisted then or later by Fathers Daniel, Garnier, Jogues, and others of less note. The mission church of Immaculate Conception was built in 1637 at Ossossani, one of the principal towns; St Joseph was established at Teanastayae, the capital, in the next year; the principal war chief of the tribe was baptized, and Christianity began to take root, in spite of the suspicions engendered by two wasting epidemic visitations, for which the missionaries were held responsible and solemnly condemned to death, until the current of opposition was turned by Brébeuf's courageous bearing. In 1639 there were 4 established missions with 13 priests working in the Huron country and visiting in the neighboring tribes. St Marys, on Wye r., had been made the general headquarters. A visitation of smallpox again spread terror through the tribe and for a time rendered the position of the missionaries unsafe. In consequence of these successive epi-

demies within a few years several towns had been depopulated and the tribe so much weakened as to leave it an easy prey for the invading Iroquois, whose inroads now became more constant and serious than before.

In 1641 the Iroquois invaded the Huron country in force, killed many, and carried off many others to captivity. In 1648, after a temporary truce, they resumed the war of extermination, with perhaps 2,000 warriors well armed with guns obtained from the Dutch, while the Hurons had only bows. On July 4 Teananstayae, or St Joseph, on the site of the present Barrie, was attacked and destroyed, the missionary, Father Anthony Daniel, killed with several hundred of his flock, and about 700 others were carried off as captives. The whole country was ravaged throughout the fall and winter, and one town after another destroyed or abandoned. On Mar. 16, 1649, a thousand warriors attacked St Ignatius town and massacred practically the whole population, after which they proceeded at once to the neighboring town of St Louis, where the burning and massacre were repeated, and two missionaries, Brébeuf and Father Gabriel Lalemant, killed after hours of the most horrible tortures. An attack on St Marys, where Father Ragueneau was stationed, was repulsed, after which the Iroquois retired.

This was the deathblow to the Huron nation. Fifteen towns were abandoned and the people scattered in every direction. Two whole town populations submitted to the conquerors and removed in a body to the Seneca country. Others fled to the Tionontati, who were now in turn invaded by the Iroquois and compelled, by burning and massacre, with the killing of Fathers Garnier and Chabanel, to abandon their country and flee with the rest. Others took refuge on the islands of L. Huron. Some joined the Neutrals, who soon after met the same fate.

For the next 50 years the history of the confederated Huron and Tionontati remnants is a mere record of flight from pursuing enemies—the Iroquois in the E. and the Sioux in the W. A considerable body which sought the protection of the French, after several removals was finally settled by Father M. J. Chaumonot in 1693 at (New) Lorette, near Quebec, where their descendants still reside (see *Hurons; Lorette*). To Chaumonot we owe a standard grammar and dictionary of the Huron language, only the first of which is yet published. In the meantime, in 1656-57, two-thirds of this band had bodily removed to the Iroquois country to escape destruction.

The other fugitives, composed largely or principally of Tionontati, fled successively to Manitoulin id. in L. Huron; Mackinaw; the Noquet ids. in Green bay, Wis.; westward to the Mississippi; back to Green bay, where they were visited by the Jesuit Menard in 1660; to Chegoimegon, near the present Bayfield, Wis., on the shore of L. Superior, where the Jesuit Allouez ministered to them for several years; back, in 1670, to Mackinaw, whence another party joined the Iroquois, and finally down to Detroit, Mich., when that post was founded in 1702. In 1751 a part of these, under Father de la Richard, settled at Sandusky, Ohio. From this period the Wyandot, as they now began to be called, took their place as the leading tribe of the Ohio region and the privileged lighters of the confederate council fire. Their last Jesuit missionary, Father Peter Potier, died in 1781, after which they were served by occasional visiting priests and later by the Presbyterians and the Methodists, until about the period of their removal to Kansas in 1842 (see *Interior States*).

The work of the *Episcopalians* (Anglican Church) among the Iroquois of New York, beginning about 1700 and continuing in Canada after the removal of a large part of the confederacy from the United States, has already been noted (see *Middle Atlantic—New York*). In 1763 Rev. Thomas Wood of Nova Scotia, having become acquainted with the Abbé Mailard and obtained the use of his Micmac manuscript, applied himself to the study of the language, dividing his ministrations thenceforth between the Indians and the whites until his death in 1778. He preached in the native tongue, in which he produced several religious translations. This seems to have been the only work recorded for this denomination in this part of the Dominion, and in the official Canadian Indian Report for 1906 no Indians are enumerated under this heading in the provinces of Nova Scotia, New Brunswick, or Prince Edward id. In Quebec province the same report gives this denomination 119 Indians, including 60 Abnaki at St Francis and 48 Montagnais at Lake St John.

In Ontario province, besides the work already noted among the Iroquois, active and successful missionary effort has been carried on by the Episcopalians among the various Chippewa bands and others since about 1830. One of the principal stations is that at Garden River, opposite Sault Ste Marie, begun in 1835 by Rev. Mr McMurray, who was succeeded a few years later by Rev. F. A. O'Meara, afterward stationed on Manitoulin id., and

later at Port Hope on L. Ontario. Besides building up a flourishing school, Mr O'Meara found time to translate into the native language the Book of Common Prayer, considerable portions of both the Old and the New Testament, and a volume of hymns, the last in cooperation with the Rev. Peter Jacobs. He died about 1870. Of the more recent period the most noted worker is Rev. E. F. Wilson, who began his labors under the auspices of the Church Mission Society in 1868. To his efforts the Indians owe the Shingwauk and Wawanosh homes at Sault Ste Marie, Ontario, where some 60 or 80 children are cared for, educated, and taught the rudiments of trades and simple industries. A school journal, set up and printed by the Indian boys, has also been conducted at intervals, under various titles, for nearly 30 years. Mr Wilson is the author of a number of Indian writings, of which the most important is probably a 'Manual of the Ojibway Language,' for the use of mission workers.

In 1835 a mission was established also on Thames r., among the Munsee, a remnant of those Delaware refugees from the United States who for so many years of the colonial period had been the object of Moravian care (see *Middle Atlantic States*). One of the pioneer workers, Rev. Mr Flood, translated the church liturgy into the language of the tribe.

Of 17,498 Christian Indians officially reported in 1906 in Ontario province, 5,253, or not quite one-third, are credited to the *Episcopal* or Anglican church, including—Iroquois in various bands, 3,073; "Chippewas of the Thames," 593; "Ojibbewas of L. Superior," 554; "Chippewas and Saulteaux of Treaty No. 3" (Manitoba border), 709; "Munsees of the Thames" (originally Moravian converts from the United States; see *Middle Atlantic States*), 154; "Ojibbewas and Ottawas of Manitoulin and Cockburn ids.," 169; Potawatomi of Walpole id., 79; and one or two smaller groups.

The work among the Eskimo of the Labrador coast—officially a part of Newfoundland—is conducted by the *Moravians*. In 1752 a reconnoitering missionary party landed near the present Hope-dale, but was attacked by the natives, who killed Brother J. C. Ehrhardt and 5 sailors, whereupon the survivors returned home and the attempt for a time was abandoned. One or two other exploring trips were made for the same purpose, and in 1769 permission to establish missions on the Labrador coast was formally asked by the Moravians and granted by the British government. In 1771 the first mission was begun at Nain, appar-

ently by Brother Jens Haven. It is now the chief settlement on the Labrador coast. In 1776 Okak was established by Brother Paul Layritz, followed by Hope-dale in 1782, and Hebron in 1830. To these have more recently been added Zoar and Ramah. The efforts of the missionaries have been most successful, the wandering Eskimo having been gathered into permanent settlements, in each of which are a church, store, mission residence, and workshops, with dwelling houses on the model of the native iglu. Besides receiving religious instruction, the natives are taught the simple mechanical arts, but to guard against their innate improvidence, the missionaries have found it necessary to introduce the communal system, by taking charge of all food supplies to distribute at their own discretion. All the missions are still in flourishing operation, having now under their influence about 1,200 of the estimated 1,500 Eskimo along a coast of about 500 m. in length. The total number of mission workers is about 30 (see Hind, Labrador Peninsula.)

To these Moravian workers we owe a voluminous body of Eskimo literature—grammars, dictionaries, scriptural translations, hymns, and miscellaneous publications. Among the prominent names are those of Bourquin, about 1880, author of a grammar and a Bible history; Burghardt, gospel translations, 1813; Erdmann, missionary from 1834 to 1872, a dictionary and other works; Freitag, a manuscript grammar, 1839; and Kohlmeister, St John's Gospel, 1810. The majority of these Moravian publications were issued anonymously.

In 1820 the *Wesleyan Methodists*, through Rev. Alvin Torrey, began work among the immigrant Iroquois of the Ontario reservations, which was carried on with notable success for a long term of years by Rev. William Case. In 1823 Mr Case extended his labors to the Mississauga, a band of the Chippewas of L. Ontario. The most important immediate result was the conversion of Peter Jones (Kahkewakunaby), a half-breed, who was afterward ordained, and became the principal missionary among his people and the more remote Chippewa bands until his death in 1856. He is known as the author of a collection of hymns in his native language and also a small 'History of the Ojibway Indians.' Another noted missionary convert of this period was Shawundais, or John Sunday. Another native worker of a somewhat later period was Rev. Henry Steinhauer, Chippewa, afterward known as a missionary to the Cree. Still another pioneer laborer in the same region was Rev. James Evans, afterward also missionary to the Cree and inventor

of a Cree syllabary. Contemporary with the transfer of Evans and Steinhauer to the Cree in 1840, Rev. George Barnley was sent to establish a mission at Moose Factory, James bay, which, however, was soon after abandoned. Beginning in 1851 Rev. G. M. McDougall established Methodist mission stations among the Chippewa along the N. shore of L. Superior, at Garden River and elsewhere, but afterward transferred his operations also to Cree territory. In 1861-62 Rev. Thomas Hurlburt, already a veteran worker, and considered the most competent Chippewa linguist in the Methodist mission, conducted a monthly journal, 'Petaubun,' in the language, at the Sarnia station.

According to the official Canadian Indian Report for 1906, the *Methodist* Indians of E. Canada numbered 4,557 in Ontario and 505 in Quebec, a total of 5,062, none being reported for the other eastern provinces. Those in Ontario included nearly all of the "Chippewas of the Thames," "Mississaguas," and "Iroquois and Algonquins of Watha," all of the 348 "Moravians of the Thames," and a considerable percentage of the "Six Nations" on Grand r. Those in Quebec province are chiefly Iroquois of the Oka, St Regis, and Caughnawaga settlements.

Of other denominations, the same official report enumerates 1,020 *Baptists* in Ontario, almost entirely among the Six Nations on Grand r., with 99 *Congregationalists*, 17 *Presbyterians*, and a total of 370 of all other denominations not previously noted. In the other eastern provinces—Quebec, New Brunswick, Nova Scotia, and Prince Edward id.—there is no representation.

The work of Rev. Silas T. Rand among the Micmac of Nova Scotia stands in a class by itself. Educated in a Baptist seminary, he became a minister, but afterward left that denomination to become an independent worker. His attention having been drawn to the neglected condition of the Indians, he began the study of the Micmac language, and in 1849 succeeded in organizing a missionary society for their special instruction. Under its auspices until its dissolution in 1865, and from that time until his death in 1889, he gave his whole effort to the teaching of the Micmac and to the study of their language and traditions. He is the author of a Micmac dictionary and of a collection of tribal myths as well as of numerous minor works, religious and miscellaneous.

CANADA, CENTRAL (Manitoba, Assiniboia, Saskatchewan, Alberta, s. Keewatin).—In the great plains region stretching from Hudson bay southwestward to the Rocky mts., the former bat-

tle ground of Cree, Assiniboin, and Blackfeet, the *Catholics* were again the pioneers, antedating all others by a full century. According to Bryce, "the first heralds of the cross" within this area were the French Jesuits accompanying Verendrye, who in the years 1731-1742 explored the whole territory from Mackinaw to the upper Missouri and the Saskatchewan, establishing trading posts and making alliances with the Indian tribes for the French government. Among these missionaries the principal were Fathers Nicholas Gonnor, who had labored among the Sioux as early as 1727; Charles Messaiger, and Jean Aulneau, killed by the same tribe in 1736. No attempt was made during this period to form permanent mission settlements.

Then follows a long hiatus until after the establishment of the Red River colony in the early part of the 19th century by Lord Selkirk, who in 1816 brought out from eastern Canada Fathers Sévère Dumoulin and Joseph Provencher, to minister both to the colonists and to the Indian and mixed-blood population of the Winnipeg country. In 1822 Father Provencher was made bishop, with jurisdiction over all of Ruperts land and the Northwest territories, and carried on the work of systematic mission organization throughout the whole vast region until his death in 1853, when the noted Oblate missionary, Father Alexandre Taché, who had come out in 1845, succeeded to the dignity, in which he continued for many years.

The Catholic work in this central region has been carried on chiefly by the Oblates, assisted by the Gray Nuns. The first permanent mission was St Boniface, established at the site of the present Winnipeg by Provencher and Dumoulin in 1816. St Paul mission on the Assiniboin later became the headquarters of the noted Father George Belcourt, who gave most of his attention to the Saulteux (Chippewa of Saskatchewan region), and who from 1831 to 1849 covered in his work a territory stretching over a thousand miles from E. to W. For his services in preventing a serious uprising in 1833 he was pensioned both by the Government and by the Hudson's Bay Co. He is the author of a grammatic treatise and of a manuscript dictionary of the Saulteur (Chippewa) language, as well as of some minor Indian writings.

In the Cree field the most distinguished names are those of Fathers Albert Lacombe (1848-90), Alexandre Taché (1845-90), Jean B. Thibault (ca. 1855-70), Valentin Végreville (1852-90), and Émile Petitot (1862-82), all of the Oblate order, and each, besides his religious

work, the author of important contributions to philology. To Father Lacombe, who founded two missions among the Cree of the upper North Saskatchewan and spent also much time with the Blackfeet, we owe, besides several religious and text-book translations, a manuscript Blackfoot dictionary and a monumental grammar and dictionary of the Cree language. Father Végréville labored among Cree, Assiniboin, and the remote northern Chipewyan, founded five missions, and composed a manuscript grammar, dictionary, and monograph of the Cree language. Father Petitot's important work among the Cree has been overshadowed by his later great work among the remote Athapascans and Eskimo, which will be noted hereafter. Among the Blackfeet the most prominent name is that of Father Émile Legal, Oblate (1881-90), author of several linguistic and ethnologic studies of the tribe, all in manuscript.

Episcopalian work in the central region may properly be said to have begun with the arrival of Rev. John West, who was sent out by the Church Missionary Society of England in 1820 as chaplain to the Hudson's Bay Co's establishment of Ft Garry (Winnipeg), on Red r. In the three years of his ministrations, besides giving attention to the white residents, he made missionary journeys among the Cree and others for a distance of 500 m. to the w. He was followed by Rev. David Jones in 1823, by Rev. Wm. Cochrane in 1825, Rev. A. Cowley in 1841, and Rev. R. James in 1846, by whom, together, the tribes farther to the n. were visited and brought within mission influence. In 1840 a Cree mission at The Pas, on the lower Saskatchewan, was organized by Henry Budd, a native convert, and in 1846 other stations were established among the same tribe at Lac la Ronge and Lac la Crosse, by James Settee and James Beardy respectively, also native converts. In 1838 a large bequest for Indian missions within Rupert's Land, as the territory was then known, had been made by Mr James Leith, an officer of the Hudson's Bay Co., and generously increased soon after by the company itself. With the assistance and the active effort of four missionary societies of the church, the work grew so that in 1849 the territory was erected into a bishopric, and on the transfer of jurisdiction from the Hudson's Bay Co., to the Canadian government in 1870 there were 15 Episcopal missionaries laboring at the various stations in the regions stretching from Hudson bay to the upper Saskatchewan, the most important being those at York Factory

(Keewatin), Cumberland, and Carlton (Saskatchewan).

Among the most noted of those in the Cree country may be mentioned in chronologic order, Rev. Archdeacon James Hunter and his wife (1844-55), joint or separate authors of a number of translations, including the Book of Common Prayer, hymns, gospelextracts, etc., and a valuable treatise on the Cree language; Bishop John Horden (1851-90), of Moose Factory, York Factory, and Ft Churchill stations, self-taught printer and binder, master of the language, and author of a number of gospels, prayer, and hymn translations; Bishop William Bompas (1865-90), best known for his work among the more northern Athapaskan tribes; Rev. W. W. Kirkby (1852-79), author of a Cree 'Manual of Prayer and Praise,' but also best known for his Athapaskan work; Rev. John Mackay, author of several religious translations and of a manuscript grammar; and Rev. E. A. Watkins, author of a standard dictionary. Among the Blackfeet, Rev. J. W. Tims, who began his work in 1883, is a recognized authority on the language, of which he has published a grammar and dictionary and a gospel translation.

Methodist (Wesleyan) effort in the Cree and adjacent territories began in 1840. In that year Rev. James Evans and his Indian assistant, Rev. Henry Steinhauer, both already noted in connection with previous work in Ontario, were selected for the western mission, and set out together for Norway House, a Hudson's Bay Co's post at the n. end of L. Winnipeg. Evans went on without stop to his destination, but Steinhauer halted at Lac la Pluie (now Rainy Lake) to act as interpreter to Rev. William Mason, who had just reached that spot, having been sent out under the same auspices, the Wesleyan Missionary Society of England, by arrangement with the Canadian body. The joint control continued until 1855, when the Canadian Methodists assumed full charge. Mr Evans had been appointed superintendent of Methodist work for the whole region, and after establishing Rossville mission, near Norway House, as his central station, spent the next six years until his health failed, in traversing the long distances, founding several missions, mastering the Cree language, and devising for it a syllabary, which has ever since been in successful use for all literary purposes in the tribe. His first printing in the syllabary was done upon a press of his own making, with types cast from the sheet-lead lining of tea boxes and cut into final shape with a jackknife. In this primitive fashion he printed many copies of the syllabary for

distribution among the wandering bands, besides hymn collections and scripture translations. "By means of this syllabary a clever Indian can memorize in an hour or two all the characters, and in two or three days read the Bible or any other book in his own language" (MacLean). In later years, the credit for this invention was unsuccessfully claimed by some for Rev. William Mason. Rossville for years continued to be the principal and most prosperous of all the Methodist missions in the central region.

Rev. William Mason remained at Rainy Lake until that station was temporarily discontinued in 1844; he was then sent to Rossville (Norway House), where he was stationed until 1854, when the mission was abandoned by the Wesleyans. He then attached himself to the Episcopal church, with which he had formerly been connected, and was ordained in the same year, laboring thereafter at York Factory on Hudson bay until his final return to England in 1870, with the exception of 4 years spent in that country supervising the publication of his great Bible translation in the Cree language, printed in 1861. This, with several other Scripture and hymn translations, excepting a Gospel of St John, was issued under the auspices of the Episcopal Church Missionary Society. In his earlier linguistic (Methodist) work he was aided by Rev. Mr Steinhauer and John Sinclair, a half-breed, but in all his later work, especially in the Bible translation, he had the constant assistance of his wife, the educated half-breed daughter of a Hudson's Bay Co. officer. Rev. Mr Steinhauer, after some years with Mr Mason, joined Mr Evans at Norway House as teacher and interpreter. He afterward filled stations at Oxford House (Jackson bay), York Factory, Lac la Biche, White Fish Lake, Victoria, and other remote points, for a term of more than 40 years, making a record as "one of the most devoted and successful of our native Indian missionaries" (Young). Among later Methodist workers with the Cree may be mentioned Rev. John McDougall, one of the founders of Victoria station, Alberta, in 1862, and Rev. Ervin Glass, about 1880, author of several primary instruction books and charts in the syllabary.

At the same time (1840) that Evans and Mason were sent to the Cree, Rev. Robert T. Rundle was sent, by the same authority, to make acquaintance with the more remote Blackfeet and Assiniboin ("Stonies") of the upper Saskatchewan region. Visiting stations were selected where frequent services were conducted by Rundle, by Rev. Thomas Woolsey, who came out in 1855, and by others, but no regular mission was established until

begun by Rev. George M. McDougall at Edmonton, Alberta, in 1871. In 1873 he founded another mission on Bow r., Alberta, among the Stonies (western Assiniboin), and continued to divide attention between the two tribes until his accidental death 2 years later. Other stations were established later at Ft MacLeod and Morley, in the same territory. The most distinguished worker of this denomination among the Blackfeet is Rev. John MacLean (1880-89), author of a manuscript grammar and dictionary of the language, several minor linguistic papers, 'The Indians: Their Manners and Customs' (1889), and 'Canadian Savage Folk' (1896).

Presbyterian mission work was inaugurated in 1865 by the Rev. James Nisbet, among the Cree, at Prince Albert mission on the Saskatchewan. No data are at hand as to the work of the denomination in this region, but it is credited in the official report with nearly a thousand Indian communicants, chiefly among the Sioux and the Assiniboin, many of the latter being immigrants from the United States.

According to the Canadian Indian Report for 1906, the Indians of Manitoba, Saskatchewan, Alberta, and the Northwest Territories, classified under treaties 1, 2, 3, 4, 5, 6, and 7, designated as Chipewya, Cree, Saulteaux, Sioux, Assiniboin, Blackfeet, Bloods, Piegan, Sarcee, Stonies, and Chipewyan, are credited as follows: Catholic, 5,633; Anglican (Episcopal), 4,789; Methodist, 3,199; Presbyterian, 1,073; Baptist, 83; all other denominations, 80; pagan, 5,324. Some 3,308 remote northern Cree, under Treaty No. 8, and 165 non-treaty Indians are not included in the estimate.

CANADA, BRITISH COLUMBIA (including Vancouver id. and Metlakatla).—The earliest missionary entrance into British Columbia was made by the Catholics in 1839. In 1838 the secular priests Demers and Blanchet (afterward archbishop) had arrived at Fort Vancouver, Washington, as already noted (see *Columbia Region*), to minister to the employees of the Hudson's Bay Co. In the next year an Indian mission was organized at Cowlitz, with visiting stations along the shores of Puget sd., and Father Demers made a tour of the upper Columbia as far as the Okanagan in British Columbia, preaching, baptizing, and giving instruction by means of a pictograph device of Father Blanchet's invention, known as the "Catholic ladder." Copies of this "ladder" were carried by visiting Indians to the more remote tribes and prepared the way for later effort. A second journey over the same route was made by Father Demers in the next year, and in 1841 he preached for the first time

to a great gathering of the tribes on lower Fraser r. In the following year, 1842, by arrangement with the local Hudson's Bay Co. officers, he accompanied the annual supply caravan on its return from Ft Vancouver, on the Columbia, to the remote northern posts. On this trip, ascending the Columbia and passing over to the Fraser, he visited successively the Okinagan, Kamloops, Shuswap, and Takulli or Carriers, before arriving at their destination at Ft St James on Stuart lake. Return was made in the following spring, and on descending the Fraser he found that the Shuswap had already erected a chapel.

In the meantime de Smet and the Jesuits had arrived (see *Columbia Region and Interior States—Flatheads*) in the Columbia region, and between 1841 and 1844 had established a chain of missions throughout the territory, including three in British Columbia, among the Kutenai, Shuswap, and Okinagan. De Smet himself extended his visitations to the headwaters of the Athabasca, while in 1845-47 Father John Nobili, laboring among the upper tribes, penetrated to the Babines on the lake of that name. In 1847 there were seven chapels or mission stations in British Columbia, the northernmost being that among the Carriers, at Stuart Lake. In 1843 the first Hudson Bay post had been established on Vancouver id., at Camosun, now Victoria, and the beginning of missionary work among the Songish and the Cowichan was made by the secular priest, Father John Bolduc, already well known among the Sound tribes, who had for this reason been brought over by the officers in charge to assist in winning the good will of their Indian neighbors.

The Jesuit prosperity was short lived. Owing to difficulty of communication and pressing need in other fields, it was found necessary to abandon the British Columbia missions, except for an occasional visiting priest, until the work was regularly taken up by the Oblates in 1865 by the establishment of St Joseph mission near Williams lake, on the upper Fraser, by Rev. J. M. McGuckin, first missionary to the Tsilkotin tribe. Within the next few years he extended his ministrations to the remoter Sekani and Skeena. In 1873 the Stuart Lake mission was reestablished by Fathers Lejacq and Blanchet, and in 1885 was placed in charge of Father A. G. Morice, Oblate, the distinguished ethnologist and author, who had already mastered the Tsilkotin language in three years' labor in the tribe. Aside from his missionary labor proper, which still continues, he is perhaps best known as the inventor of the Déné syllabary, by means of which nearly all the Canadian Indians

of the great Athapascan stock are now able to read and write in their own language. His other works include a Tsilkotin dictionary, a Carrier grammar, numerous religious and miscellaneous translations, an Indian journal, scientific papers, 'Notes on the Western Dénés' (1893), and a 'History of the Northern Interior of British Columbia' (1904). Father J. M. Le Jeune, of the same order, stationed among the Thompson River and Shuswap Indians since 1880, is also noted as the inventor of a successful shorthand system, by means of which those and other cognate tribes are now able to read in their own languages. He is also the author of a number of religious and text books in the same languages and editor of a weekly Indian journal, the 'Kamloops Wawa,' all of which are printed on a copying press in his own stenographic characters. Another distinguished veteran of the same order is Bishop Paul Durieu, since 1854 until his recent death, laboring successively among the tribes of Washington, Vancouver id. (Ft Rupert, in Kwakiutl territory), and Fraser r.

Episcopal work began in 1857 with the remarkable and successful missionary enterprise undertaken by Mr William Duncan among the Tsimshian at Metlakatla, first in British Columbia and later in Alaska. The Tsimshian at that time were among the fiercest and most degraded savages of the N. W. coast, slavery, human sacrifice, and cannibalism being features of their tribal system, to which they were rapidly adding all the vices introduced by the most depraved white men from the coasting vessels. Moved by reports of their miserable condition Mr Duncan voluntarily resigned a remunerative position in England to offer himself as a worker in their behalf under the auspices of the London Church Missionary Society. He arrived at Ft Simpson, N. coast of British Columbia, in Oct. 1857, and after some months spent in learning the language and making acquaintance with the tribe, then numbering 2,300, opened his first school in June, 1858. By courage and devotion through danger and difficulty he built up a civilized Christian body, which in 1860 he colonized to the number of about 340 in a regular town established at Metlakatla, an abandoned village site 16 m. s. of Ft Simpson. By systematic improvement of every industrial opportunity for years the town had grown to a prosperous, self-supporting community of 1,000 persons, when, by reason of difficulties with the local bishop, upheld by the colonial government. Mr Duncan and his Indians were compelled, in 1887, to abandon their town and improvements

and seek asylum under United States protection in Alaska, where they formed a new settlement, known as New Metlakatla, on Annette id., 60 m. N. of their former home. The island, which is about 40 m. long by 3 m. wide, has been reserved by Congress for their use, and the work of improvement and education is now progressing as before the removal, the present population being about 500.

The first Episcopal bishop for British Columbia and Vancouver id. was appointed in 1859. In 1861 the Rev. John B. Good, sent out also by the London society, arrived at Esquimalt, near Victoria, Vancouver id., to preach alike to whites and Indians. At a later period his work was transferred to the Indians of Thompson and lower Fraser rs., with headquarters at St Paul's mission, Lytton. He has translated a large part of the liturgy into the Thompson River (Ntlak-yapamuk) language, besides being the author of a grammatic sketch and other papers. In 1865 Kincolith mission was established among the Niska branch of the Tsimshian, on Nass r., by Rev. R. A. Doolan, and some years later another one higher up on the same stream. Kitwinguach station, on Skeena r., was established about the same time. In 1871 Rev. Charles M. Tate took up his residence with the Nanaimo on Vancouver id., laboring afterward with the Tsimshian, Bellabella, and Fraser r. tribes. In 1876 Rev. W. H. Collison began work among the Haida at Masset, on the N. end of the Queen Charlotte ids., and in 1878 Rev. A. J. Hall arrived among the Kwakiutl at Ft Rupert, Vancouver id. Other stations in the meantime had been established throughout the S. part of the province, chiefly under the auspices of the London Church Missionary Society.

The first *Methodist* (Wesleyan) work for the Indians of British Columbia was begun in 1863 at Nanaimo, Vancouver id., by Rev. Thomas Crosby, who at once applied himself to the study of the language with such success that he was soon able to preach in it. In 1874 he transferred his labor to the Tsimshian at Port Simpson, on the border of Alaska, who had already been predisposed to Christianity by the work at Metlakatla and by visiting Indians from the S. Other stations were established on Nass r. (1877) and at Kitamat in the Bellabella tribe. Statistics show that the Methodist work has been particularly successful along the N. W. coast and in portions of Vancouver.

There is no record of *Presbyterian* mission work, but some 400 Indians are officially credited to that denomination along the W. coast of Vancouver id.

According to the Canadian Indian Report for 1906 the Christian Indians of

British Columbia are classified as follows: Catholic, 11,270; Episcopal (Anglican), 4,364; Methodist, 3,285; Presbyterian, 427; all other, 147.

CANADA, NORTHWEST (Athabasca, Mackenzie, Yukon, North Keewatin, Franklin).—The earliest missionaries of the great Canadian Northwest, of which Mackenzie r. is the central artery, were the *Catholic* priests of the Oblate order. The pioneer may have been a Father Gröllier, mentioned as the "first martyr of apostleship" in the Mackenzie district and buried at Ft Good Hope, almost under the Arctic circle. In 1846 Father Alexandre Taché, afterward the distinguished archbishop of Red River, arrived at Lac Ile à la Crosse, a Cree station, at the head of Churchill r., Athabasca, and a few months later crossed over the divide to the Chipewyan tribe on Athabasca r. Here he established St Raphael mission, and for the next 7 years, with the exception of a visit to Europe, divided his time between the two tribes. In 1847 or 1848 Father Henry Faraud, afterward vicar of the Mackenzie district, arrived among the Chipewyan of Great Slave lake, with whom and their congeners he continued for 18 years. To him we owe a Bible abridgment in the Chipewyan language. In 1852 arrived Father Valentin Végreville, for more than 40 years missionary to Cree, Assiniboin, and Chipewyan, all of which languages he spoke fluently; founder of the Chipewyan mission of St Peter, on Caribou lake, Athabasca, besides several others farther S.; and author of a manuscript grammar and dictionary of the Cree language, another of the Chipewyan language, and other ethnologic and religious papers in manuscript. In 1867 Father Laurent Legoff arrived at Caribou Lake mission, where he was still stationed in 1892. He is best known as the author of a grammar of the Montagnais, or Chipewyan language, published in 1889.

By far the most noted of all the Oblate missionaries of the great Northwest is Father Emile Petitot, acknowledged by competent Canadian authority as "our greatest scientific writer on the Indians and Eskimos" (MacLean). In 20 years of labor, beginning in 1862, he covered the whole territory from Winnipeg to the Arctic ocean, frequently making journeys of six weeks' length on snowshoes. He was the first missionary to visit Great Bear lake (1866), and the first missionary to the Eskimo of the N. W., having visited them in 1865 at the mouth of the Anderson, in 1868 at the mouth of the Mackenzie, and twice later at the mouth of Peel r. In 1870 he crossed over into Alaska, and in 1878, compelled by illness, he returned to the S., making the journey of some

1,200 m. to Athabasca lake on foot, and thence by canoe and portages to Winnipeg. Besides writing some papers relating to the Cree, he is the author of numerous ethnological and philosophical works, dealing with the Chipewyan, Slavé, Hare, Dog-rib, Kutchin, and Eskimo tribes and territory, chief among which are his *Dènè-Dindjié dictionary* (1876) and his '*Traditions Indiennes*' (1886).

Throughout the Mackenzie region the Catholics have now established regular missions or visiting stations at every principal gathering point, among the most important being a mission at Ft Providence, beyond Great Slave lake, and a school, orphanage, and hospital conducted since 1875 by the Sisters of Charity at Ft Chipewyan on Athabasca lake.

Episcopal effort in the Canadian Northwest dates from 1858, in which year Archdeacon James Hunter, already mentioned in connection with the Cree mission, made a reconnoitering visit to Mackenzie r., as a result of which Rev. W. W. Kirkby, then on parish duty on Red r., was next year appointed to that field and at once took up his headquarters at the remote post of Ft Simpson, at the junction of Liard and Mackenzie rs., 62° N., where, with the assistance of the Hudson's Bay Co's officers, he built a church and school. In 1862, after several years' study of the language, he descended the Mackenzie nearly to its mouth and crossed over the divide to the Yukon, just within the limits of Alaska, preaching to the Kutchin and making some study of the language, after which he returned to Ft Simpson. In 1869 he was appointed to the station at York Factory, on Hudson bay, where he remained until his retirement in 1878, after 26 years of efficient service in Manitoba and the Northwest. He is the author of a number of religious translations in the Chipewyan and Slavé languages.

The work begun on the Yukon by Kirkby was given over to Rev. (Archdeacon) Robert McDonald, who established his headquarters at St Matthew's mission on Peel r., Mackenzie district, "one mile within the Arctic circle." Here he devoted himself with remarkable industry and success to a study of the language of the Takudh Kutchin, into which he has translated, besides several minor works, the Book of Common Prayer (1885), a small collection of Hymns (1889), and the complete Bible in 1898, all according to a syllabic system of his own device, by means of which the Indians were enabled to read in a few weeks. In 1865 Rev. Wm. C. Bompas, afterward bishop of Athabasca and later of Mackenzie r., arrived from England. In the next 25 years he labored among the Chipewyan, Dog-ribs, Beavers, Slavé, and Ta-

kudh tribes of the remote Northwest, and gave some attention also to the distant Eskimo. He is the author of a primer in each of these languages, as well as in Cree and Eskimo, together with a number of gospel and other religious translations. Another notable name is that of Rev. Alfred Garrioch, who began work in the Beaver tribe on Peace r., Athabasca, in 1876, after a year's preliminary study at Ft Simpson. He is the founder of Unjaga mission at Ft Vermilion, and author of several devotional works and of a considerable vocabulary in the Beaver language. To a somewhat later period belong Rev. W. D. Reeve and Rev. Spendlove, in the Slave lake region. Among the principal stations are Ft Chipewyan on Athabasca lake, Ft Simpson on the middle Mackenzie, and Fts Macpherson and Lapierre in the neighborhood of the Mackenzie's mouth. Work has also been done among the Eskimo of Hudson bay, chiefly by Rev. Edmund Peck, who has devised a syllabary for the language, in which he has published several devotional translations, beginning in 1878. The greater portion of the Episcopal work in the Canadian Northwest has been under the auspices of the Church Missionary Society of London.

GREENLAND.—Greenland was first colonized from Iceland in 985 by Scandinavians, who became Christian about A. D. 1000. The aboriginal inhabitants were the Eskimo, with whom in the succeeding centuries the colonists had frequent hostile encounters, but there is no record of any attempt at missionary work. Some time shortly before the year 1500 the colony became extinct, there being considerable evidence that it was finally overwhelmed by the Eskimo savages. In 1721 the Norse Lutheran minister, Rev. Hans Egede, under the auspices of the government of Denmark, landed with his family and a few other companions upon the S. end of the island, in the belief that some descendants of the lost colony might yet be in existence. Finding no white inhabitants, he turned his attention to the evangelization of the native Eskimo, and thus became the founder both of the Greenland mission and of the modern Greenland settlement. A mission station which was named Godthaab was established on Baal r. on the W. coast, about 64° N., and became the center of operations, while Egede was made bishop and superintendent of missions. After some years of hardship and discouragement the home government was about to withdraw its support, and it seemed as if the mission would have to be abandoned, when, in 1733, the *Moravians* volunteered their aid. In the spring of that year three Moravian missionaries, Christian David, and Mat-

thew and Christian Stach, arrived from Denmark to cooperate with Egede, with such good result that the principal work finally passed over to that denomination, by which it has since been continued. Egede in 1736 returned to Denmark to establish at Copenhagen a special training seminary for the work. He died in 1758, leaving the succession in office to his son, Rev. Paul Egede. The elder Egede was the author of a 'Description of Greenland,' which has been translated into several languages, besides several scriptural works in Eskimo. His son, Paul, accompanied his father on the first trip in 1721, learned the language, and in 1734 began the missionary work which he continued to his death in 1789, having been made bishop 10 years earlier. He is the author of a standard Danish-Latin-Eskimo grammar and dictionary, besides a number of religious works in the language and a journal of the Greenland missions from 1721 to within a year of his death. Still another of the same family, Rev. Peter Egede, nephew of the first missionary, was the author of a translation of Psalms.

With the settlement of the country from Denmark and the organization of regular parishes the Lutheran missions took on new life, special attention being given to the more northern regions. Godthaab remained the principal station, and several others were established, of which the most important to-day are Nugsoak on Disko bay, w. coast, and Angmagssalik, about 66° n., on the e. coast, the northernmost inhabited spot in that direction. The friendly cooperation between the two denominations seems never to have been interrupted, the ministers in many cases sharing their labors and results in common.

The Moravian work prospered. New Herrnhut, the first and most northerly mission, was established in 1733; Lichtenfels was founded 80 m. farther s. in 1758; 300 m. farther s. Lichtenau was founded in 1774; then came Frederiksdal in 1824, Umanak in 1861, and Igdlorpait in 1864. In 1881 the mission force numbered 19 and the native membership 1,545. Since 1801 the whole Eskimo population properly resident within the Moravian mission area has been Christian, but others have since moved in from the outlying territory. The work of civilization is nearly as complete for the whole e. coast.

As the result of the literary labors of nearly two centuries of missionary students, together with a few educated natives, the Eskimo literature of Greenland is exceptionally voluminous, covering the whole range of linguistics, Bible translations, hymn books, and other religious

works, school text-books, stories, and miscellanies, besides a journal published at the Godthaab station from 1861 to 1885. With so much material it is possible only to mention the names of the principal workers in this field. For details the reader is referred to Pilling's 'Bibliography of the Eskimo Language.' In the Lutheran mission the most prominent names are Egede, father and son, Fabricius (1768-73); Janssen (period of 1850); Kjer (period of 1820); the Kleinschmidts, father and son (1793-1840); Kragh (1818-28); Steenholdt (period of 1850); Sternberg (1840-53); Thorhallesen (1776-89); Wandall (1834-40), and Wolf (1803-11). In the Moravian list are found Beck (died 1777); Beyer (period of 1750); Brodersen (period of 1790); Konigseer (period of 1780); Muller (period of 1840); together with Cranz, author of the 'History of Greenland and the Moravian Mission,' first published in 1765.

In the four centuries of American history there is no more inspiring chapter of heroism, self-sacrifice, and devotion to high ideals than that afforded by the Indian missions. Some of the missionaries were of noble blood and had renounced titles and estates to engage in the work; most of them were of finished scholarship and refined habit, and nearly all were of such exceptional ability as to have commanded attention in any community and to have possessed themselves of wealth and reputation, had they so chosen; yet they deliberately faced poverty and sufferings, exile and oblivion, ingratitude, torture, and death itself in the hope that some portion of a darkened world might be made better through their effort. To the student who knows what infinite forms of cruelty, brutishness, and filthiness belonged to savagery, from Florida to Alaska, it is beyond question that, in spite of sectarian limitations and the shortcomings of individuals, the missionaries have fought a good fight. Where they have failed to accomplish large results the reason lies in the irrepressible selfishness of the white man or in the innate incompetence and unworthiness of the people for whom they labored.

(J. M.)

Mississauga (Chippewa: *misi*, 'large,' *ság* or *sauk*, 'outlet (of a river or bay)' = 'large outlet,' referring to the mouth of Mississauga r.—Hewitt). Although this Algonquian tribe is a division or subtribe of the Chippewa, having originally formed an integral part of the latter, it has long been generally treated as distinct. When first encountered by the French, in 1634, the Mississauga lived about the mouth of the river of the same name, along the N. shore of L. Huron, and on the adjacent Manitoulin id. Although so closely allied to the Chippewa, they do not appear to have been disposed to follow that tribe in its progress westward, as there is no evidence that they were ever found in early times so far W. as Sault Ste Marie, but appear to have clung to their old haunts about L. Huron and Georgian bay. Early in the 18th century, influenced by a desire to trade with the whites, they began to drift toward the S. E. into the region formerly occupied by the Hurons, between L. Huron and L. Erie. Although they had destroyed a village of the Iroquois near Ft Frontenac about 1705, they tried in 1708 to

gain a passage through the country of the latter, to trade their peltries with the English. At this time a part or band was settled on L. St Clair. About 1720 the French established a station at the W. end of L. Ontario for the purpose of stimulating trade with the Mississauga. Near the close of the first half of the century (1746-50), having joined the Iroquois in the war against the French, the Mississauga were compelled by the latter, who were aided by the Ottawa, to abandon their country, a portion at least settling near the Seneca E. of L. Erie. Others, however, appear to have remained in the vicinity of their early home, as a delegate from a Mississauga town "on the north side of L. Ontario" came to the conference at Mt Johnson, N. Y., in June, 1755. As it is also stated that they "belong to the Chippewysee confederacy, which chiefly dwell about the L. Missillanac," it is probable that "north side of L. Ontario" refers to the shores of L. Huron. Being friendly with the Iroquois at this time, they were allowed to occupy a number of places in the country from which the Hurons had been driven. This is inferred in part from Chauvignerie's report of 1736, which locates parts of the tribe at different points on Mississauga r., Maniskoulin (Manitoulin?) id., L. St Clair, Kente, Toronto r., Matchitaen, and the W. end of L. Ontario. The land on which the Iroquois are now settled at Grand r., Ontario, was bought from them. For the purpose of sealing their alliance with the Iroquois they were admitted as the seventh tribe of the Iroquois league in 1746, at which date they were described as living in five villages near Detroit. It is therefore probable that those who went to live with the Seneca first came to the vicinity of Detroit and moved thence to W. New York. The alliance with the Iroquois lasted only until the outbreak of the French and Indian war a few years later.

According to Jones (Hist. Ojebways), as soon as a Mississauga died he was laid out on the ground, arrayed in his best clothes, and wrapped in skins or blankets. A grave about 3 ft deep was dug and the corpse interred with the head toward the W. By his side were placed his hunting and war implements. The grave was then covered, and above it poles or sticks were placed lengthwise to the height of about 2 ft, over which birch-bark or mats were thrown to keep out the rain. Immediately after the decease of an Indian, the near relatives went into mourning by blackening their faces with charcoal and putting on the most ragged and filthy clothing they possessed. A year was the usual time of mourning for a husband, wife, father or mother.

As the Mississauga are so frequently confounded with the Chippewa and other neighboring tribes who are closely connected, it is difficult to make a separate estimate of their numbers. In 1736 they were reported to number 1,300, about 250 being on Manitoulin id. and Mississauga r., and the rest in the peninsula of Ontario; in 1778 they were estimated at 1,250, living chiefly on the n. side of L. Erie, and in 1884 the number was given as 744. The population was officially reported in 1906 as 810, of whom 185 were at Mud Lake, 87 at Rice Lake, 35 at Scugog, 240 at Alnwick, and 263 at New Credit, Ontario. The New Credit settlement forms a township by itself and the Indian inhabitants have often won prizes against white competitors at the agricultural fairs. The New Credit Indians (who left the Old Credit settlement in 1847) are the most advanced of the Mississauga and represent one of the most successful attempts of any American Indian group to assimilate the culture of the whites. The Alnwick res. dates from 1830, Mud Lake from 1829, Scugog from 1842. Beldom, Chibouinani, and Grape Island were former settlements. See *Credit Indians, Matchedash*.

Mississippi tablet. See *Notched plates*.

Missogkonnog. Probably a former village or band of the Nipmuc in central Massachusetts. In 1671 the colony of Plymouth raised a force against the "Missogkonnog Indians."—Eliot (1671) in *Mass. Hist. Soc. Coll.*, 1st s., vi, 201, 1800.

Missouri ('great muddy,' referring to Missouri r.). A tribe of the Chiwere group of the Siouan family. Their name for themselves is Níutachi. According to Gale the early form of the word Missouri is Algonquian, of the Illinois dialect. The most closely allied tribes are the Iowa and the Oto. According to tradition, after having parted from the Winnebago at Green bay, the Iowa, Missouri, and Oto moved westward to Iowa r., where the Iowa stopped. The rest continued westward, reaching the Missouri at the mouth of Grand r. Here, on account of some dispute, the Oto withdrew and moved farther up Missouri r. Marquette's autograph map of 1673, which is perhaps the earliest authentic notice of the tribe, locates the Semessrit on Missouri r., apparently as far n. as the Platte. Joutel (1687) appears to have been the first writer to use the name Missouri in this form. It is stated that Tonti met the tribe a day and half's journey from the village of the Tamaroa, which was on the Mississippi, 6 leagues below Illinois r. About the beginning of the 18th century the French found them on the left bank of the Missouri, near the mouth of Grand r., and built a fort on an island near them. They continued to dwell in this locality until about 1800. According to Bourgmont (Margry, *Déc.*, vi, 393, 1886) their village in 1723 was 30 leagues below Kansas r. and 60 leagues below the principal Kansa village. About 1798 they were conquered and dispersed by the Sauk and Fox tribes and their allies. Five or six lodges joined the Osage, two or three took refuge with the Kansa, and some amalgamated with the Oto, but they soon recovered, as in 1805 Lewis and Clark found them in villages s. of Platte r., having abandoned their settlements on Grand r. some time previously on account of smallpox. They were visited again by an epidemic in 1823. Although their number was estimated in 1702 at 200 families and in 1805 by Lewis and Clark at 300 souls, in 1829, when they were found with the Oto, they numbered

only 80. Having been unfortunate in a war with the Osage, part of them joined the Iowa, and the others went to the Oto previous to the migration of the latter to Big Platte r. In 1842 their village stood on the bank of Platte r., Nebr. They accompanied the Oto when that tribe removed in 1882 to Indian Territory. There were only 40 individuals of the tribe remaining in 1885. They are now officially classed with the Oto, together numbering 368 in 1905 under the Oto school superintendent in Oklahoma. The gentes, as given by Dorsey (15th Rep. B. A. E., 240,

GEORGE BATES—MISSOURI

1897), were Tunanpin (Black bear), Hotachi (Elk), and Cheghita (Eagle) or Wakanta (Thunder-bird).

The Missouri joined in the following treaties with the United States: (1) Peace treaty of June 24, 1817; (2) Ft Atkinson, Ia., Sept. 26, 1825, regulating trade and relations with the United States; (3) Prairie du Chien, Wis., July 15, 1830, ceding lands in Iowa and Missouri; (4) Oto village, Nebr., Sept. 21, 1833, ceding certain lands; (5) Bellevue, upper Missouri r., Oct. 15, 1836, ceding certain lands; (6) Washington, Mar. 15, 1854, ceding lands, with certain reservation; (7) Nebraska City, Nebr., Dec. 9, 1854, changing boundary of reservation.

Morgan (Beach, Ind. Miscel., 220, 1877) used the term Missouri Indians to in-

clude the Ponca, Omaha, Kansa, Quappaw, Iowa, Oto, and Missouri. These are the Southern tribes of Hale (Am. Antiq., v, 112, 1883), and the Dhegiha and Chiwere groups of J. O. Dorsey. (J. o. D. C. T.)

Emissourita.—Tonti (1684) in Margry, Déc., I, 595, 1876. **Massorites**.—Coxe, Carolana, 16, 1741. **Masorites**.—Bacqueville de la Potherie, Hist. E., 240, 1897 (own name, *te-eh*). **Ni-út'-atí**.—Dorsey, Cegiha MS. Diet., B. A. E., 1878 (Omaha and Ponca name). **Ouemessourit**.—Gale, Upper Miss., 209, 1867 (transliterated from Marquette). **8emess8rit**.—Marquette, map (1673) in Shea, Discov., 268, 1852. **Ou-missouri**.—Thevenot quoted by Shea, Discov., 268, 1852. **Wacúgá**.—Dorsey, inf'n, 1883 (Osage name). **Wa-ju'-gáá**.—Dorsey, Kwapa MS. vocab., B. A. E., 1891 (Quappaw name). **Wemessourit**.—Marquette transliterated by Shea, Discov., 268, 1852.

Mistassin (from *mista-assini*, 'a great stone,' referring to a huge isolated rock in L. Mistassini, which the Indians regarded with veneration). An Algonquian tribe that lived on L. Mistassini, Quebec. They were divided by early writers into the Great and the Little Mistassin, the former living near the lake, the latter farther s. in the mountains. They first became known to the French about 1640, but were not visited by missionaries until some years later. They were attacked by the Iroquois in 1665, and in 1672 their country was formally taken possession of by the French with their consent. Although spoken of by Hind in 1863 as roving in bands with Montagnais and Nascapée over the interior of Labrador, it appears that in 1858 a portion of the tribe was on the lower St Lawrence.

Very little has been recorded in regard to their habits or characteristics. It is recorded that when attacked by the Iroquois in 1665 they had a wooden fort, which they defended successfully and with great bravery. Their only myth

mentioned is that in regard to the great rock in the lake, which they believed to be a manito. (J. M. C. T.)

Matassins.—Charlevoix (1721), Journal, I, letter XI, 276, 1761. **Mattassins**.—Barton, New Views, app., 12, 1798. **Misassins** (Petits).—La Tour, map, 1779 (misprint; the Grands Mistassins are correctly named). **Misastassins**.—Report of 1858 in Hind, Lab. Penin., I, 12, 1863. **Mistapnis**.—McKenney and Hall, Ind. Tribes, III, 81, 1854. **Mistasin-iouek**.—Jes. Rel. 1643, 38, 1858. **Mistasirenois**.—Memoir of 1706 in N. Y. Doc. Col. Hist., IX, 791, 1855. **Mistassinins**.—Jes. Rel. 1672, 55, 1858. **Mistassinini**.—Hind, Lab. Penin., I, 8, 1863. **Mistassinini**.—Ibid., 272. **Mistassins**.—Bellin, map, 1755 (Grands and Petits Mistassins). **Mistassinins**.—Jes. Rel. 1672, 44, 1858. **Mistissinnys**.—Walch, map, 1805. **Mitchitamou**.—Jes. Rel. 1640, 34, 1858. **Mustassins**.—Jes. Rel. 1676-7, LX, 244, 1900.

Mistaughchewaugh. A former Chumashan village at San Marcos, 25 m. from Santa Barbara, Cal.—Father Timeno (1856) quoted by Taylor in Cal. Farmer, May 4, 1860.

Misun (*Mi'-sún*). A former Kuitsh village on lower Umpqua r., Ore.—Dorsey in Jour. Am. Folk-lore, III, 231, 1890.

Mitaldejama. A former village, presumably Costanoan, connected with San Juan Bautista mission Cal.—Engelhardt, Franciscans in Cal., 398, 1897.

Mitcheroka ('knife'). A division of the Hidatsa.

Ma-etsi-daka.—Matthews, inf'n, 1885 (= 'small knives'). **Mit-che-ro'-ka**.—Morgan, Anc. Soc., 159, 1877.

Mithlausminthai (*Mi-clá'-us-mín-l'çai'*). A former Siuslaw village on Siuslaw r., Ore.—Dorsey in Jour. Am. Folk-lore, III, 230, 1890.

Mitling. See *Kalopaling*.

Mitline. A former village, presumably Costanoan, connected with Dolores mission, San Francisco, Cal.

Matalans.—Humboldt, Kingdom of New Spain, II, 345, 1811. **Mitline**.—Taylor in Cal. Farmer, Oct. 18, 1861.

Mitmetlelch (*Mi'tmetlel'le*). A Squaw-mish village community on Passage id., Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Mitomkai Pomo. A name, usually rendered Mtom'-kai (from *mato* 'big', *kai* 'valley'), applied to the inhabitants of Willits or Little Lake valley, Mendocino co., Cal. In the form Tomki it has been used by the whites to designate a creek e. of the range of mountains bordering Little Lake valley on the e. Most of the Mitomkai Pomo, locally known as Little Lakes, are now on Round Valley res., numbering, with the "Redwoods," 114 in 1905. (S. A. B.)

Betumki.—McKee (1851) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 146, 1853. **Bitomkhai**.—A. L. Kroeber, Univ. Cal. MS., 1903 (Upper Clear Lake form of name). **Little Lakes**.—Official form in Indian Affairs Reports. **Mi-toam' Kai Pó-mo**.—Powers in Cont. N. A. Ethnol., III, 155, 1877.

Mitrofanía. A Kaniagmiut Eskimo village on Mitrofanía id., s. of Chignik bay, Alaska; pop. 22 in 1880, 49 in 1890.—Petroff in 10th Census, Alaska, 28, 1884.

Mitsukwic. A former Nisqualli village "at the salmon trap on Squalli [Nisqualli] r.," Washington.—Gibbs, MS. No. 248, B. A. E.

Mittabuscute. A village of about 20 houses in 1676, situated on Paytuxet r., 7 or 8 m. above its mouth, in Providence or Kent co., R. I. It probably belonged to the Narraganset, but its chief disputed their claim.—Williams (1676) in Mass. Hist. Soc. Coll., 3d s., i, 71, 1825.

Mittsulstik (*Mit-ts'ul'-stik*). A former Yaquina village on the n. side of Yaquina r., Oreg., at the site of the present Newport.—Dorsey in Jour. Am. Folk-lore, iii, 229, 1890.

Mitutia. A village of the Cholovone, a division of the Yokuts, situated e. of lower San Joaquin r., Cal.—Pinart, Cholovone MS., B. A. E., 1880.

Miwok ('man'). One of the two divisions of the Moquelumnan family in central California, the other being the Olamentke. With a small exception in the w., the Miwok occupied territory bounded on the n. by Cosumnes r., on the e. by the ridge of the Sierra Nevada, on the s. by Fresno cr., and on the w. by San Joaquin r. The exception on the w. is a narrow strip of land on the e. bank of the San Joaquin, occupied by Yokuts Indians, beginning at the Tuolumne and extending northward to a point not far from the place where the San Joaquin bends to the w. The Miwok are said by Powers to be the largest "nation" in California, and a man of any of their tribes or settlements may travel from the Cosumnes to the Fresno and make himself understood without difficulty, so uniform is their language. See *Moquelumnan*. (J. C.)

Meewa.—Powers in Overland Monthly, x, 323, 1873. **Meewie.**—Ibid. **Meewoc.**—Ibid. **Mewahs.**—Ind. Aff. Rep. 1856, 244, 1857. **Miook.**—Kingsley, Standard Nat. Hist., vi, 175, 1885. **Mi'-wa.**—Powers in Cont. N. A. Ethnol., iii, 347, 1877. **Mi'-wi.**—Ibid. **Mi'-wok.**—Ibid. **Muwa.**—Merriam in Science, N. S., xix, 914, June 17, 1904.

Mixam, Mixanno. See *Mriksah*.

Mixed-bloods. To gauge accurately the amount of Indian blood in the veins of the white population of the American continent and to determine to what extent the surviving aborigines have in them the blood of their conquerors and supplanters is impossible in the absence of scientific data. But there is reason to believe that intermixture has been much more common than is generally assumed. The Eskimo of Greenland and the Danish traders and colonists have intermarried from the first, so that in the territory immediately under European supervision hardly any pure natives remain. The marriages (of Danish fathers and Eskimo mothers) have been very fertile and the

children are in many respects an improvement on the aboriginal stock, in the matter of personal beauty in particular. According to Packard (Beach, Ind. Miscel., 69, 1877) the last full-blood Eskimo on Belle Isle str., Labrador, was in 1859 the wife of an Englishman at Salmon bay. The Labrador intermixture has been largely with fishermen from Newfoundland of English descent.

Some of the Algonquian tribes of Canada mingled considerably with the Europeans during the French period, both in the E. and toward the interior. In recent years certain French-Canadian writers have unsuccessfully sought to minimize this intermixture. In the Illinois-Missouri region these alliances were favored by the missionaries from the beginning of the 18th century. As early as 1693 a member of the La Salle expedition married the daughter of the chief of the Kaskaskia. Few French families in that part of the country are free from Indian blood. The establishment of trading posts at Detroit, Mackinaw, Duluth, etc., aided the fusion of races. The spread of the activities of the Hudson's Bay Company gave rise in the Canadian Northwest to a population of mixed-bloods of considerable historic importance, the offspring of Indian mothers and Scotch, French, and English fathers. Manitoba, at the time of its admission into the dominion, had some 10,000 mixed-bloods, one of whom, John Norquay, afterward became premier of the Provincial government. Some of the employees of the fur companies who had taken Indian wives saw their descendants flourish in Montreal and other urban centers. The tribes that have furnished the most mixed-bloods are the Cree and Chippewa, and next the Sioux, of n. w. Canada; the Chippewa, Ottawa, and related tribes of the great lakes; and about Green bay, the Menominee. Toward the Mississippi and beyond it were a few Dakota and Blackfoot mixed-bloods. Harvard (Rep. Smithson. Inst., 1879) estimated the total number in 1879 at 40,000. Of these about 22,000 were in United States territory and 18,000 in Canada. Of 15,000 persons of Canadian-French descent in Michigan few were probably free from Indian blood. Some of the French mixed-bloods wandered as far as the Pacific, establishing settlements of their own kind beyond the Rocky mts. The first wife of the noted ethnologist Schoolcraft was the daughter of an Irish gentleman by a Chippewa mother, another of whose daughters married an Episcopal clergyman, and a third a French-Canadian lumberer. Although some of the English colonies endeavored to promote the intermarriage of the two

races, the only notable case in Virginia is that of Pocahontas (q. v.) and John Rolfe. The Athapaskan and other tribes of the extreme N. W. have intermixed but little with the whites, though there are Russian mixed-bloods in Alaska. In British Columbia and the adjoining parts of the United States are to be found some mixed-bloods, the result of intermarriage of French traders and employees with native women. Some intermixture of captive white blood exists among the Apache, Comanche, Kiowa, and other raiding tribes along the Mexican and Texas border, the children seeming to inherit superior industry. The Pueblos, with the notable exception of the Lagunas, have not at all favored intermarriage with Europeans. The modern Siouan tribes have intermarried to some extent with white Americans, as some of them did in early days with the French of Canada. The Five Civilized Tribes of Oklahoma—Cherokee, Choctaw, Chickasaw, Creeks, and Seminole—have a large element of white blood, some through so-called squaw-men, some dating back to British and French traders before the Revolution. In the Cherokee Nation especially nearly all the leading men for a century have been more of white than of Indian blood, the noted John Ross himself being only one-eighth Indian. Mooney (19th Rep. B. A. E., 83, 1900) considers that much of the advance in civilization made by the Cherokee has been "due to the intermarriage among them of white men, chiefly traders of the ante-Revolutionary period, with a few Americans from the back settlements." Most of this white blood was of good Irish, Scotch, American, and German stock. Under the former laws of the Cherokee Nation anyone who could prove the smallest proportion of Cherokee blood was rated as Cherokee, including many of one-sixteenth, one-thirty-second, or less of Indian blood. In 1905 the Cherokee Nation numbered 36,782 citizens. Of these, about 7,000 were adopted whites, negroes, and Indians of other tribes, while of the rest probably not one-fourth are of even approximately pure Indian blood. Some of the smaller tribes removed from the E., as the Wyandot (Hurons) and Kaskaskia, have not now a single full-blood, and in some tribes, notably the Cherokee and Osage, the jealousies from this cause have led to the formation of rival full-blood and mixed-blood factions. During the Spanish domination in the s. e. Atlantic region intermixture perhaps took place, but not much; in Texas, however, intermarriage of whites and Indians was common. The peoples of Iroquoian stock have a large admixture of white blood, French and English,

both from captives taken during the wars of the 17th and 18th centuries and by the process of adoption, much favored by them. Such intermixture contains more of the combination of white mother and Indian father than is generally the case. Some English-Iroquois intermixture is still in process in Ontario. The Iroquois of St. Regis, Caughnawaga, and other agencies can hardly boast an Indian of pure blood. According to the *Almanach Iroquois* for 1900, the blood of Eunice Williams, captured at Deerfield, Mass., in 1704, and adopted and married within the tribe, flows in the veins of 125 descendants at Caughnawaga; Silas Rice, captured at Marlboro, Mass., in 1703, has 1,350 descendants; Jacob Hill and John Stacey, captured near Albany in 1755, have, respectively, 1,100 and 400 descendants. Similar cases are found among the New York Iroquois. Dr Boas (*Pop. Sci. Mo.*, XLV, 1894) has made an anthropometric study of the mixed-bloods, covering a large amount of data, especially concerning the Sioux and the eastern Chippewa. The total numbers investigated were 647 men and 408 women. As compared with the Indian, the mixed-blood, so far as investigations have shown, is taller, men exhibiting greater divergence than women.

A large proportion of negro blood exists in many tribes, particularly in those formerly residing in the Gulf states, and among the remnants scattered along the Atlantic coast from Massachusetts southward. The Five Civilized Tribes of Oklahoma, having been slaveholders and surrounded by Southern influences, generally sided with the South in the Civil war. On being again received into friendly relations with the Government they were compelled by treaty to free their slaves and admit them to equal Indian citizenship. In 1905 there were 20,619 of these adopted negro citizens in these five tribes, besides all degrees of admixture in such proportions that the census takers are frequently unable to discriminate. The Cherokee as a body have refused to intermarry with their negro citizens, but among the Creeks and the Seminole intermarriage has been very great. The Pamunkey, Chickahominy, Marshpee, Narraganset, and Gay Head remnants have much negro blood, and conversely there is no doubt that many of the broken coast tribes have been completely absorbed into the negro race. See *Croatan Indians*, *Métis*, *Popular fallacies*. (A. F. C. J. M.)

Mixed Senecas and Shawnees. The former official designation of the mixed band of Mingo (Seneca) and Shawnee who removed from Lewistown, Ohio, to the W. about 1833 (see *Mingo*). By treaty

of 1867 the union was dissolved, the Seneca joining the band known as "Seneca of Sandusky," and the Shawnee becoming a distinct body under the name of "Eastern Shawnee." Both tribes were assigned reservations in the present Oklahoma, where they still reside, numbering 101 and 366 respectively in 1905. (J. M.)

Mixed Shoshones. Mixed bands of Ban-nock and Tukurika.—U. S. Stat., XVIII, 158, 1875.

M'ketashshekakah (*Ma'katawīnēshikā-kā*, 'big black chest,' referring to the pigeonhawk.—W. J.) The Thunder gens of the Potawatomi, Sauk, and Foxes, q. v. **Ma'katawīnēshikaka**.—Wm. Jones, inf'n. 1906. **M'ke-tash-she-kā-kah'**.—Morgan, Anc. Soc., 167, 1877.

M'ko (*Ma'kwa*, 'bear'). A gens of the Potawatomi, q. v. **Ma'kwa**.—Wm. Jones, inf'n. 1906. **M'ko'**.—Morgan, Anc. Soc., 167, 1877.

M'kwa (*Ma'kwa*, 'bear'). A gens of the Shawnee, q. v. **Ma'kwa**.—Wm. Jones, inf'n. 1906. **M'kwa'**.—Morgan, Anc. Soc., 168, 1877.

Moache. A division of the Ute, formerly roaming over s. Colorado and n. New Mexico. In 1871 they were reported to number 645; in 1903 the combined Capote, Moache, and Wiminuche on Southern Ute res. numbered 955. The name "Taos Utes" was formerly applied to those Ute who temporarily encamped in considerable numbers about Taos pueblo, N. Mex. As these were doubtless largely Moache, their synonyms are included here, although the Capote, Tabeguache, and Wiminuche were evidently also a part of them. See *Ute*.

The Moache joined with other Ute bands in the treaty of Washington, Mar. 2, 1868, affirming the treaty of Oct. 7, 1863, with the Tabeguache and defining the boundaries of their reservation.

Maquache Utes.—Taylor in Sen. Ex. Doc. 4, 40th Cong., spec. sess., 10, 1867. **Maquahache.**—Dole in Ind. Aff. Rep. 1864, 18, 1865. **Maquoeche Utahs.**—Davis, *ibid.*, 135, 1866. **Menaches.**—Graves, *ibid.*, 386, 1854. **Moguachis.**—Villa-Señor, *Theatro Am.*, pt. 2, 413, 1748. **Mohuache.**—Merriwether in Ind. Aff. Rep. 1855, 186, 1856. **Mohuache Utahs.**—Merriwether in Sen. Ex. Doc. 69, 34th Cong., 1st sess., 15, 1856. **Mohuache Utes.**—Bancroft, Ariz., and N. Mex., 665, 1859. **Mohuhaches.**—Bell, *New Tracks in N. Am.*, 1, 108, 1869. **Moquaches.**—Archuleta in Ind. Aff. Rep., 142, 1866. **Mouuache Utes.**—Colyer, *ibid.*, 1871, 191, 1872. **Muache.**—Ute treaty (1868) in U. S. Ind. Treaties, Kappeler ed., II, 990, 1904. **Muahuaches.**—Carson in Ind. Aff. Rep. 1859, 342, 1860. **Muares.**—Orozco y Berra, *Geog.*, 59, 1861 (probably identical, although given as part of Faraon Apache). **Taos.**—Wilson (1849) in Cal. Mess. and Corresp., 185, 1850. **Taos Indians.**—Cummings in Ind. Aff. Rep., 160, 1866 (identified with Moache). **Taos Yutas.**—Farnham, *Trav. Californias*, 371, 1844. **Tao Yutas.**—Farnham misquoted by Bancroft, *Nat. Races*, I, 465, 1882. **Tash-Yuta.**—Burton, *City of Saints*, 578, 1861.

Moah (*Māhwāwā*, 'wolf'). A gens of the Potawatomi, q. v. **Māhwāwā**.—Wm. Jones, inf'n. 1906. **Mo-āh'**.—Morgan, Anc. Soc., 167, 1877.

Moanahonga ('great walker'). An Iowa warrior, known to the whites as Big Neck, and called also by his people Winauguscone ('Man not afraid to travel'), because he was wont to take long trips alone, relying on his own prowess and prodigious strength. While he was of lowly birth he was exceedingly ambitious and contended for the honors and dignity for which his courage and address fitted him, but which his fellow tribesmen were loth to accord, wherefore he built a lodge apart from the rest and collected about him a band of admirers over whom he exercised the authority of chief. Gen. Clark induced him and Mahaskah to go to Washington in 1824 and there sign a treaty that purported to convey to the United States for an annual payment of \$500 for 10 years the title of all the lands of the Iowa lying within the borders of Missouri. He did not understand the treaty, and after white settlers had taken possession of a considerable part of the Indian lands he set out in 1829 to visit St. Louis for the purpose of making complaint to Gen. Clark. A party of whites encountered his company of 60 men, made them all intoxicated, and decamped with their horses, blankets, and provisions. When they recovered from their stupor one of them shot a hog to satisfy their hunger. This provoked the anger of the settlers, 60 of whom rode up and commanded the Indians to leave the country. Moanahonga then withdrew his camp about 15 m. beyond the state boundary, as he supposed. When the white party followed him he went out to meet them with his pipe in his mouth in sign of peace. As he extended his hand in greeting the borderers fired, killing his brother at his side, and an infant. The Indians flew to their arms and, inspired anew by the call for vengeance of Moanahonga's sister, who was shot in the second volley, they drove the whites from the field, although these exceeded their fighting men two to one. The man who shot his sister Moanahonga burned at the stake. The U. S. troops were ordered out, and obtaining hostages from the Iowa returned to their barracks. Moanahonga and several others of his band were arrested and tried on a charge of murder, but were acquitted. He cultivated friendly relations with the whites after this, but always went with blackened face in sign of mourning, because, as he said, he had sold the bones of his ancestors. About 5 years afterward he fell in combat with a Sioux chief. See McKenney and Hall, *Ind. Tribes*, I, 177-183, 1858.

Moapariats (*Mo-a-pa-ri'-ats*, 'mosquito creek people'). A band of Paiute formerly living in or near Moapa valley,

s. E. Nev., and numbering 64 in 1873.—Powell in Ind. Aff. Rep. 1873, 50, 1874.

Mobile (meaning doubtful). A Muskogean tribe whose early home was probably Mavila, or Mavilla, supposed to have been at or near Choctaw Bluff on Alabama r., Clark co., Ala., where De Soto, in 1540, met with fierce opposition on the part of the natives and engaged in the most obstinate contest of the expedition. The town was then under the control of Tascalusa (q. v.) probably an Alibamu chief. If, as is probable, the Mobilian tribe took part in this contest, they must later have moved farther s., as they were found on Mobile bay when the French began to plant a colony at that point about the year 1700. Wishing protection from their enemies, they obtained permission from the French, about 1708, to settle near Et Louis, where space was allotted them and the Tohome for this purpose. Little is known of the history of the tribe. In 1708 a large body of Alibamu, Cherokee, Abihka, and Catawba warriors descended Mobile r. for the purpose of attacking the French and their Indian allies, but for some unknown reason contented themselves with destroying a few huts of the Mobilians. The latter, who were always friendly to the French, appear to have been christianized soon after the French settled there. In 1741 Coxe wrote that the chief city of the once great province of Tascalusa, "Mouvilla, which the English call Maubela, and the French Mobile, is yet in being, tho' far short of its former grandeur." At this date the Mobilians and Tohome together numbered 350 families. Mention is made in the Mobile church registers of individual members of the tribe as late as 1761, after which they are lost to history as a tribe. For subsistence they relied almost wholly on agriculture. Clay images of men and women and also of animals, supposed to be objects of worship by this people, were found by the French.

The so-called Mobilian trade language was a corrupted Choctaw jargon used for the purposes of intertribal communication among all the tribes from Florida to Louisiana, extending northward on the Mississippi to about the junction of the Ohio. It was also known as the Chickasaw trade language. (A. S. G. C. T.)

Mabile.—Ranjel quoted by Halbert in Trans. Ala. Hist. Soc., III, 68, 1899. **Manilla**.—Harris, Voy. and Trav., I, 808, 1705 (misprint). **Maouila**.—La Salle (ca. 1682) in Margry, Déc., II, 197, 1877. **Maubela**.—Coxe, Carolana, 25, 1741. **Maubila**.—French, Hist. Am., I, 162, 1761.

Mocama ('on the coast'). A former Timucua district and dialect, probably about the present St Augustine, Fla.

Mocama.—Pareja (ca. 1614) quoted by Gatschet in Am. Philos. Soc. Proc., xvi, 627, 1877. **Moscama**.—Brinton, Floridian Penin., 135, 1859.

Moccasin. The soft skin shoe of the North American Indians and its imitations on the part of the whites. The word, spelled formerly also *moccason*, is derived from one of the eastern Algonquian dialects: Powhatan (Strachey, 1612), *mockasin*, *mawheasan*; Massachusetts (Eliot, ante 1660), *mohkisson*, *mohkussin*; Narraganset (Williams, 1643), *mocussin*; Micmac, *m'cusun*; Chippewa, *makinin*. It came into English through Powhatan in all probability, as well as through Massachusetts. The latter dialect has also *mokus* or *mokis*, of which the longer word seems to be a derivative. Hewitt suggests that it is cognate with *makak*, 'small case or box' (see *Mocuck*). After the moccasin have been named moccasin-fish (Maryland sunfish), moccasin-flower or moccasin-plant (lady's-slipper, known also as Indian's shoe), moccasin-snake or water-moccasin (*Ancistronodon piscivorus*), the upland moccasin (*A. atrofuscus*). In some parts of the South the term 'moccasin' is in colloquial use in the sense of intoxicated. (A. F. C.)

With the exception of the sandal-wearing Indians living in the states along the Mexican boundary, moccasins were almost universally worn. The tribes of s. E. Texas were known to the southern Plains Indians as "Barefoot Indians," because they generally went without foot-covering, only occasionally wearing sandals. The Pacific coast Indians also as a rule went barefoot, and among most tribes women did not customarily wear moccasins. There are two general types of moccasins—those with a rawhide sole sewed to a leather upper, and those with sole and upper consisting of one piece of soft leather with a seam at the instep and heel. The former belongs to the Eastern or timber tribes, the latter to the Western or plains Indians. The Eskimo have soled footwear. The chief causes influencing this distribution are the presence or absence of animals furnishing thick rawhide, the character of trails and travel, and tribal usages. The boot or legging moccasin,

worn from Alaska to Arizona and New Mexico, is still commonly a part of the woman's costume, and among most of the Pueblos the legging portion is a white-tanned deerskin to which the moccasin is attached, the skin being wrapped neatly and methodically around the calf of the leg and secured by means of a cord. Differences in cut, color, decoration, toe-piece, inset-tongue, vamp, heel-fringe, ankle-flaps, etc., show tribal and environmental characters and afford means of identification. Among the Plains tribes the decoration of moccasins presents a wide range of symbolism, and since this part of the costume has been less modified by contact with whites than other garments, it affords valuable material for the study of symbolic art.

The materials used in making moccasins are tanned skins of the larger mammals, rawhide for soles, and sinew for sewing. Dyes, pigments, quills, beads, cloth, buttons, and fur are applied to the moccasin as decoration. Many tribes make moccasins to be specially worn in ceremonies, and a number of tribes also employ their footwear in a guessing game known as the "moccasin game."

Great ingenuity was often displayed in cutting moccasins from a single piece of dressed hide, the most complicated pattern being found among the Klamath. The northern Athapaskan pattern has a T-shaped seam at the toe and heel, while in the Nez Percé type the seam is along one side of the foot from the great toe to the heel. In the moccasin of the Plains Indians the upper is in one piece and is sewed to a rawhide sole.

Consult Dixon in Bull. Am. Mus. Nat. Hist., xvii, pt. 3, 1905; Gerard in Am. Anthropol., ix, no. 1, 1907; Goddard in Univ. of Cal. Pub., Am. Archaeol. and Ethnol., i, 1903; Kroeber in Bull. Am. Mus. Nat. Hist., xviii, pt. 1, 1904; Mason (1) in Smithsonian Rep. 1886, pt. 1, 205-238, 1889, (2) in Rep. Nat. Mus. 1894, 239-593, 1896; Morgan, League Iroquois, ii, 1904; Shufeldt in Proc. Nat. Mus. 1888, 59-66, 1889; Stephen in Proc. Nat. Mus. 1888, 131-136, 1889; Willoughby in Am. Anthropol., ix, no. 1, 1907; Wissler in Trans. 13th Internat. Cong. Am., 1905. (w.h.)

Mochgonnekonck. A village on Long Island, N. Y., in 1643, probably near the present Manhasset.—Doc. of 1643 in N. Y. Doc. Col. Hist., xiv, 60, 1883.

Mochicaui (*mochic* 'tortoise', *cahui* 'hill': 'hill of the tortoise,' in allusion to the shape of a hill in the vicinity of the settlement.—Buelna). The principal settlement of the Zuaque, who speak or spoke the Tehueco and Vacoregne dialects of Cahita; situated on the E. bank of Rio Fuerte, about lat. 26° 10', N. W. Sinaloa, Mexico. The settlement is now civilized.

Mochicahuy.—Orozco y Berra, Geog., 332, 1864. **Mochicaui.**—Ribas (1645) in Bancroft, Nat. Races, i, 608, 1882. **Mochicohuy.**—Ibid., map. **Motschichahuz.**—Kino, map (1702) in Stöcklein, Neue Welt-Bott, 1726.

Mochilagua. An Opatá pueblo visited by Coronado in 1540; situated in the valley of the Rio Sonora, N. W. Mexico, doubtless in the vicinity of Arizpe. Possibly identical with one of the villages later known by another name.

Mochila.—Castañeda (ca. 1565) in Ternaux-Compans, Voy., ix, 158, 1838 (misprint). **Mochilagua.**—Castañeda in 14th Rep. B. A. E., 515, 1896.

Mocho (*El Mocho*, Span.: 'the cropped, shorn, mutilated', so called because he had lost an ear in a fight). An Apache, celebrated in manuscript narratives pertaining to Texas in the 18th century. He was captured by the Tonkawa, but because of his eloquence and prowess was elevated to the chiefship of that tribe on the death of its leader during an epidemic in 1777 or 1778. With the Spaniards *El Mocho* had a bad reputation. When he became chief the governor connived to get rid of him; to effect which Mezières bribed his rivals to allure him to the highway leading to Natchitoches, under the promise of presents when he should arrive there, and murder him, but this plot failed, and Mezières and the governor were obliged to conciliate him. Finally, in 1784, at the instigation of the government, he was killed. (H. E. B.)

Mochopa. An Opatá pueblo of Sonora, Mexico, and the seat of a Spanish mission founded between 1678 and 1730, at which latter date the population had become reduced to 24. It was abandoned between 1764 and 1800, owing to Apache depredations.

Machopo.—Davila, Sonora Histórico, 317, 1894. **Mocho.**—Hamilton, Mexican Handbook, 47, 1883. **Mochopa.**—Orozco y Berra, Geog., 333, 1864. **S. Ignacio Mochope.**—Sonora materiales (1730) quoted by Bancroft, No. Mex. States, i, 514, 1884.

Mocock. See *Mocuck*.

Moctobi. A small tribe formerly residing in s. Mississippi. They are mentioned by Iberville, in 1699, as living at that time on Pascagoula r., near the Gulf coast, associated with the Biloxi and Paskagula, each tribe having its own village (Margry, Déc., iv, 195, 1880). Sauvole, who was at Ft. Biloxi in 1699-1700, speaks of the "villages of the Pascoboulas, Biloxi, and Moctobi, which together contain not more than 20 cabins." Nothing is known respecting their language, nor has anything more been ascertained in regard to their history, but from their intimate relations with the Biloxi it is probable they belonged to the same (Siouan) linguistic stock. The name Moctobi appears to have disappeared from Indian memory and tradition, as repeated inquiry among the Choctaw and Caddo has failed to elicit any knowledge of such a tribe. What seems to be a

justifiable supposition, in the absence of further knowledge, is that the three or four small bands were the remnants of a larger tribe or of tribes which, while making their way southward, had been reduced by war, pestilence, or other calamity, and had been compelled to consolidate and take refuge under the Choctaw. Consult Mooney, *Siouan Tribes of the East*, Bull. B. A. E., 1894. See *Capinans*.

Moctobi.—Sauvole (1700) in Margry, *Déc.*, IV, 451. 1880. **Moctoby**.—Iberville (1699), *ibid.*, 195. **Moelobites**.—Gayarré, *La.*, 66, 1851. **Mouloubis**.—Iberville (1699) in French, *Hist. Coll. La.*, II, 99, 1875.

Mocuck. Defined by Bartlett (*Dict. of Americanisms*, 399, 1877) as "a term applied to the box of birch bark in which sugar is kept by the Chippewa Indians." In the forms *makak*, *mocock*, *mocuck*, *mowkouw*, *mukuk*, the word is known to the literature of the settlement of Canada and the W. in the early years of the 19th century, and is now in use among the English-speaking people of the maple-sugar region about the great lakes, and among the Canadian French as *macaque*. A trader in Minnesota in 1820 (cited by Jenks in 19th Rep. B. A. E., 1103, 1900) speaks of "a mocock of sugar, weighing about 40 pounds." The word is derived from *mā'kāk*, which in the Chippewa and closely related Algonquian dialects signifies a bag, box, or other like receptacle of birch-bark. (A. F. C.)

Modoc (from *Móatokni*, 'southerners'). A Lutuamian tribe, forming the southern division of that stock, in s. w. Oregon. The Modoc language is practically the same as the Klamath, the dialectic differences being extremely slight. This linguistic identity would indicate that the local separation of the two tribes must have been comparatively recent and has never been complete. The former habitat of the Modoc included Little Klamath lake, Modoc lake, Tule lake, Lost River valley, and Clear lake, and extended at times as far e. as Goose lake. The most important bands of the tribe were at Little Klamath lake, Tule lake, and in the valley of Lost r. Frequent conflicts with white immigrants, in which both sides were guilty of many atrocities, have given the tribe an unfortunate reputation. In 1864 the Modoc joined the Klamath in ceding their territory to the United States and removed to Klamath res. They seem never to have been contented, however, and made persistent efforts to return and occupy their former lands on Lost r. and its vicinity. In 1870 a prominent chief named Kintpuash (q. v.), commonly known to history as Captain Jack, led the more turbulent portion of the tribe back to the California border and obstinately refused to return to the reservation. The first attempt to bring back the runaways by force brought on the Modoc war of 1872-73. After some

struggles Kintpuash and his band retreated to the lava-beds on the California frontier, and from Jan. to Apr., 1873,

CHIKCHIKAM LUPATKUELATKO ("SCAR-FACED CHARLEY")—MODOC

successfully resisted the attempts of the troops to dislodge them. The progress of the war had been slow until April of

WINEMA (TOBY RIDDLE)—MODOC

that year, when two of the peace commissioners, who had been sent to treat with the renegades, were treacherously assassinated. In this act Kintpuash played

the chief part. The campaign was then pushed with vigor, the Modoc were finally dispersed and captured, and Kintpuash and 5 other leaders were hanged at Ft Klamath in Oct., 1873. The tribe was then divided, a part being sent to Indian Ter. and placed on the Quapaw res., where they had diminished to 56 by 1905. The remainder are on Klamath res., where they are apparently thriving, and numbered 223 in 1905.

The following were the Modoc settlements so far as known: Agawesh, Chakawech, Kalelk, Kawa, Keshlakchuish, Kechishkeni, Kumbatuaish, Leush, Nakoshkeni, Nushaltkagakui, Pashka, Plaikni, Shapashkeni, Sputuiskeni, Stukishkeni, Waisha, Wachamshwash, Welwashkeni, Wukakeni, Yaneks, and Yulalona. (L. F.)

Aigspaluma.—Gatschet in Cont. N. A. Ethnol., II, pt. I, xxxiii, 1890 (Sahaptin name for all Indians on Klamath res. and vicinity). **La-la-cas**.—Meacham, Wigwam and War-path, 291, 1875 (original name). **Lutmáwi**.—Gatschet, op. cit., xxxiv (name given by a part of the Pit River Indians). **Lutuam**.—Gatschet in Mag. Am. Hist., I, 165, 1877. **Lutumai**.—Curtin, Ilmawi MS. vocab., B. A. E., 1889 (Ilmawi name). **Madoc**.—Ind. Aff. Rep. 1867, 71, 1868. **Ma^o-ja**.—Dorsey, Kwapa MS. vocab., B. A. E., 1891 (Quapaw name). **Moadooc**.—Ind. Aff. Rep. 1864, II, 1865. **Moahlockna**.—Taylor in Cal. Farmer, June 22, 1860. **Moatakish**.—Gatschet in Cont. N. A. Ethnol., II, pt. II, 216, 1890 (variation of Mo^odo^okish). **Moatokish**.—Ibid. **Moatokni**.—Ibid. (own name). **Modanks**.—Wright (1853) in H. R. Ex. Doc. 76, 34th Cong., 3d sess., 28, 1857. **Modoc**.—Palmer in Ind. Aff. Rep., 471, 1854. **Mo-docks**.—Ibid., 470. **Modoes**.—Taylor in Cal. (Yreka Shasta name). **Saidoka**.—Ibid. (Shoshoni name).

Moenkapi ('place of the running water'). A small settlement about 40 m. N. W. of Oraibi, N. E. Ariz., occupied during the farming season by the Hopi. The present village, which consists of two irregular rows of one-story houses, was built over the remains of an older settlement—apparently the Rancheria de los Gandules seen by Oñate in 1604. Moenkapi is said to have been founded within the memory of some of the Mormon pioneers at the neighboring town of Tuba City, named after an old Oraibi chief. It was the headquarters of a large milling enterprise of the Mormons a number of years ago. (F. W. H.)

Concabe.—Garcés (1775-76) quoted by Bancroft, Ariz. and N. Mex., 137, 395, 1889. **Moenkapi**.—Coes, Garcés Diary, 393, 1900. **Moen-kopi**.—Mindeleff in 8th Rep. B. A. E., 14, 1891. **Moqui concabe**.—Ibid. **Moyencopi**.—Bourke, Moquis of Arizona, 229, 1884. **Muabe**.—Ibid. **Muenkapi**.—Voth, Trad. of the Hopi, 22, 1905 (correct Hopi form). **Munqui-concabe**.—Garcés (1776), Diary, 393, 1900. **Muqui concabe**.—Ibid., 394-395 (Yavapai form). **Rancheria de los Gandules**.—Oñate (1604) in Doc. Inéd., XVI, 276, 1871 (apparently identical).

Mogg. An Abnaki chief. He had long been sachem of the Norridgewock and had been converted to Christianity by Père Râle when the English settlers in Maine, in order to make good their title to territory which the Abnaki declared they had not parted with, began a series of attacks in 1722. Col. Westbrook in the first expedition found the village deserted and burned it. In 1724 the English surprised the Indians. The killing of Râle and many of the Indians, the desecration of the church, etc., left a blot on the honor of the colonists (Drake, Bk. Inds., 312, 1880). In the fight fell Mogg and other noted warriors. Whittier's poem "Mogg Megone" recounts the story. See *Missions*. (A. F. C.)

Mogollon (from the mesa and mountains of the same name in New Mexico and Arizona, which in turn were named in honor of Juan Ignacio Flores Mogollon, governor of New Mexico in 1712-15). A subdivision of the Apache that formerly ranged over the Mogollon mesa and mts. in W. New Mexico and E. Arizona (Ind. Aff. Rep., 380, 1854). They were associated with the Mimbrenos at the Southern Apache agency, N. Mex., in 1868, and at Hot Springs agency in 1875, and are now under the Ft Apache and San Carlos res., Ariz. They are no longer officially recognized as Mogollones, and their number is not separately reported. (F. W. H.)

Be-ga'-kol-kizjn.—ten Kate, Synonymie, 5, 1884. **Mogall**.—Ind. Aff. Rep. 1867, 12, 1868. **Mogallones**.—Brown, Apache Country, 290, 1869. **Mogogones**.—Ind. Aff. Rep., 380, 1854. **Mogoli**.—Ibid., 1867, 193, 1868. **Mogollon**.—Ibid., 1857, 289, 1858. **Mogollone**.—Ibid., 1858, 206. **Mogoyones**.—Ibid., 1856, 181, 1857.

Mohanet. An Indian settlement of the colony of Pennsylvania, on the E. branch of the Susquehanna, probably Iroquois.—Alcedo, Dic. Geog., III, 225, 1788.

Moharala (*Mo-har-ä'-lä*, 'big bird'). A subdivision or clan of the Delawares.—Morgan, Anc. Soc., 172, 1877.

Mohave (from *hamok* 'three', *avi* 'mountain'). The most populous and warlike of the Yuman tribes. Since known to history they appear to have lived on both sides of the Rio Colorado, though chiefly on the E. side, between the Needles (whence their name is derived) and the entrance to Black canyon. Ives, in 1857, found only a few scattered families in Cottonwood valley, the bulk of their number being below Hardyville. In recent times a body of Chemehuevi have held the river between them and their kinsmen the Yuma. The Mohave are strong, athletic, and well developed, their women attractive; in fact, Ives characterized them as fine a people physically as any he had ever seen. They are famed for the artistic painting of their bodies. Tattooing was universal, but

confined to small areas on the skin. According to Kroeber (*Am. Anthropol.*, iv, 284, 1902) their art in recent times consists chiefly of crude painted decorations

MOHAVE MAN. (AM. MUS. NAT. HIST.)

on their pottery. Though a river tribe, the Mohave made no canoes, but when necessary had recourse to rafts, or balsas, made of bundles of reeds. They had no large settlements, their dwellings being scattered. These were four-sided and low, with four supporting posts at the center. The walls, which were only 2 or 3 ft high, and the almost flat roof were formed of brush covered with sand. Their granaries were upright cylindrical structures with flat roofs. The Mohave hunted but little, their chief reliance for food being on the cultivated products of the soil, as corn, pumpkins, melons, beans, and a small amount of wheat, to which they added mesquite beans, mesquite, piñon nuts, and fish to a limited extent. They did not practise irrigation, but relied on the inundation of the bottom lands to supply the needed moisture, hence when there was no overflow their crops failed. Articles of skin and bone were very little used, materials such as the inner bark of the willow, vegetable fiber, etc., taking their place. Pottery was manufactured. Baskets were in common use, but were obtained from other tribes.

According to Kroeber, "there is no full gentile system, but something closely akin to it, which may be called either an incipient or a decadent clan system. Certain men, and all their ancestors and

descendants in the male line, have only one name for all their female relatives. Thus, if the female name hereditary in my family be Maha, my father's sister, my own sisters, my daughters (no matter how great their number), and my son's daughters, will all be called Maha. There are about twenty such women's names, or virtual gentes, among the Mohave. None of these names seems to have any signification. But according to the myths of the tribe, certain numbers of men originally had, or were given, such names as Sun, Moon, Tobacco, Fire, Cloud, Coyote, Deer, Wind, Beaver, Owl, and others, which correspond exactly to totemic clan names; then these men were instructed by Mastamho, the chief mythological being, to call all their daughters and female descendants in the male line by certain names, corresponding to these clan names. Thus the male ancestors of all the women who at present bear the name Hipa, are believed to have been originally named Coyote. It is also said that all those with one name formerly lived in one area, and were all considered related. This, however, is not the case now, nor does it seem to have been so within recent historic times." Bourke (*Jour. Am. Folk-lore*, ii, 181, 1889) has recorded some of these names, called by him gentes, and the totemic name to which each corresponds, as follows: Hualga (Moon), O-cha (Rain-cloud), Ma-ha (Caterpillar), Nol-cha (Sun), Hipa (Coy-

MOHAVE WOMAN. (AM. MUS. NAT. HIST.)

ote), Va-had-ha (Tobacco), Shul-ya (Beaver), Kot-ta (Mescal or Tobacco), Ti-hil-ya (Mescal), Vi-ma-ga (a green plant, not identified), Ku-mad-ha (Oca-

tilla or Iron Cactus), Ma-li-ka (unknown), Mus (Mesquite), Ma-si-pa (Coyote).

The tribal organization was loose, though, as a whole, the Mohave remained quite distinct from other tribes. The chieftainship was hereditary in the male line. Their dead were cremated. The population of the tribe in 1775-76 was conservatively estimated by Garcés (Diary, 443, 1900) at 3,000, and by Leroux, about 1834 (Whipple, Pac. R. R. Rep., III, 1856), to be 4,000; but the latter is probably an overestimate. Their number in 1905 was officially given as 1,589, of whom 508 were under the Colorado River school superintendent, 856 under the Ft Mohave

MOHAVE FAMILY GROUP

school superintendent, 50 under the San Carlos agency, and about 175 at Camp McDowell, on the Rio Verde. Those at the latter two points, however, are apparently Yavapai, commonly known as Apache Mohave.

No treaty was made with the Mohave respecting their original territory, the United States assuming title thereto. By act of Mar. 3, 1865, supplemented by Executive orders of Nov. 22, 1873, Nov. 16, 1874, and May 15, 1876, the present Colorado River res., Ariz., occupied by Mohave, Chemehuevi, and Kawia, was established.

Pasion, San Pedro, and Santa Isabel have been mentioned as rancherias of the Mohave. (H. W. H. F. W. H.)

Mohawk (cognate with the Narraganset *Mohowaiuck*, 'they eat (animate) things,' hence 'man-eaters'). The most easterly tribe of the Iroquois confederation. They called themselves Kaniengehaga, 'people of the place of the flint.'

In the federal council and in other intertribal assemblies the Mohawk sit with the tribal phratry, which is formally called the "Three Elder Brothers" and of which the other members are the Seneca and the Onondaga. Like the Oneida, the Mohawk have only 3 clans,

namely, the Bear, the Wolf, and the Turtle. The tribe is represented in the federal council by 9 chiefs of the rank of *roiamer* (see *Chiefs*), being 3 from every clan. These chiefships were known by specific names, which were conferred with the office. These official titles are Tekarihoken, Haienhwatha, and Satekarihwate, of the first group; Orenrehkowa, Deionhehkcon, and Sharenhowanen, of the second group; and Dehennakarine, Rastawersontha, and Shoskoharowanen, of the third group. The first two groups or clans formed an intratribal phratry, while the last, or Bear clan group, was the other phratry. The people at all times assembled by phratries, and each phratry occupied a side of the council fire opposite that occupied by the other phratry. The second title in the foregoing list has been Anglicized into Hiawatha (q. v.).

From the Jesuit Relation for 1660 it is learned that the Mohawk, during a period of 60 years, had been many times both at the top and the bottom of the ladder of success; that, being insolent and warlike, they had attacked the Abnaki and their congeners at the e., the Conestoga at the s., the Hurons at the w. and n., and the Algonquian tribes at the n.; that at the close of the 16th century the Algonkin had so reduced them that there appeared to be none left, but that the remainder increased so rapidly that in a few years they in turn had overthrown the Algonkin. This success did not last long. The Conestoga waged war against them so vigorously for 10 years that for the second time the Mohawk were overthrown so completely that they appeared to be extinct. About this time (?1614) the Dutch arrived in their country, and, being attracted by their beaver skins, they furnished the Mohawk and their congeners with firearms, in order that the pelts might be obtained in greater abundance. The purpose of the Dutch was admirably served, but the possession of firearms by the Mohawk and their confederates rendered it easy for them to conquer their adversaries, whom they routed and filled with terror not alone by the deadly effect but even by the mere sound of these weapons, which hitherto had been unknown. Thenceforth the Mohawk and their confederates became formidable adversaries and were victorious most everywhere, so that by 1660 the conquests of the Iroquois confederates, although they were not numerous, extended over nearly 500 leagues of territory. The Mohawk at that time numbered not more than 500 warriors and dwelt in 4 or 5 wretched villages.

The accounts of Mohawk migrations previous to the historical period are

largely conjectural. Some writers do not clearly differentiate between the Mohawk and the Huron tribes at the n. and w. and from their own confederates as a whole. Besides fragmentary and untrustworthy traditions little that is definite is known regarding the migratory movements of the Mohawk.

In 1603, Champlain, while at Tadousac, heard of the Mohawk and their country. On July 30, 1609, he encountered on the lake to which he gave his own name a party of nearly 200 Iroquois warriors, under 3 chiefs. In a skirmish in which he shot two of the chiefs dead and wounded the third, he defeated this party, which was most probably largely Mohawk. Dismayed by the firearms of the Frenchman, whom they now met for the first time, the Indians fled. The Iroquois of this party wore arrow-proof armor and had both stone and iron hatchets, the latter having been obtained in trade. The fact that in Capt. Hendricksen's report to the States General, Aug. 18, 1616, he says that he had "bought from the inhabitants, the Minquaes [Conestoga], 3 persons, being people belonging to this company," who were "employed in the service of the Mohawks and Machicans," giving, he says, for them, in exchange, "kettles, beads, and merchandise," shows how extensively the inland trade was carried on between the Dutch and the Mohawk. The latter were at war with the Mohegan and other New England tribes with only intermittent periods of peace. In 1623 a Mohegan fort stood opposite Castle id. in the Hudson and was "built against their enemies, the Maquaes, a powerful people." In 1626 the Dutch commander of Ft Orange (Albany), and 6 of his men, joined the Mohegan in an expedition to invade the Mohawk country. They were met a league from the fort by a party of Mohawk armed only with bows and arrows, and were defeated, the Dutch commander and 3 of his men being killed, and of whom one, probably the commander, was cooked and eaten by the Mohawk. This intermittent warfare continued until the Mohegan were finally forced to withdraw from the upper waters of the Hudson. They did not however relinquish their territorial rights to their native adversaries, and so in 1630 they began to sell their lands to the Dutch. The deed to the Manor of Renssalaerwyck, which extended w. of the river two days' journey, and was mainly on the e. side of the river, was dated in the year named. In 1637 Kilian Van Renssalaer bought more land on the e. side. Subsequently the Mohegan became the friends and allies of the Mohawk, their former adversaries.

In 1641 Ahatsistari, a noted Huron chief, with only 50 companions, attacked and defeated 300 Iroquois, largely Mohawk, taking some prisoners. In the preceding summer he had attacked on L. Ontario a number of large canoes manned by Iroquois, probably chiefly Mohawk, and defeated them, after sinking several canoes and killing a number of their crews. In 1642, 11 Huron canoes were attacked on Ottawa r. by Mohawk and Oneida warriors about 100 m. above Montreal. In the same year the Mohawk captured Father Isaac Jogues, two French companions, and some Huron allies. They took the Frenchmen to their villages, where they caused them to undergo the most cruel tortures. Jogues, by the aid of the Dutch, escaped in the following year; but in 1646 he went to the Mohawk to attempt to convert them and to confirm the peace which had been made with them. On May 16, 1646, Father Jogues went to the Mohawk as an envoy and returned to Three Rivers in July in good health. In September he again started for the Mohawk country to establish a mission there; but, owing to the prevalence of an epidemic among the Mohawk, and to the failure of their crops, they accused Father Jogues of "having concealed certain charms in a small coffer, which he had left with his host as a pledge of his return," which caused them thus to be afflicted. So upon his arrival in their village for the third time, he and his companion, a young Frenchman, were seized, stripped, and threatened with death. Father Jogues had been adopted by the Wolf clan of the Mohawk, hence this clan, with that of the Turtle, which with the Wolf formed a phratry or brotherhood, tried to save the lives of the Frenchmen. But the Bear clan, which formed a phratry by itself, and being only cousins to the others, of one of which Father Jogues was a member, had determined on his death as a sorcerer. On Oct. 17, 1646, the unfortunates were told that they would be killed, but not burned, the next day. On the evening of the 18th Father Jogues was invited to a supper in a Bear lodge. Having accepted the invitation, he went there, and while entering the lodge a man concealed behind the door struck him down with an ax. He was beheaded, his head elevated on the palisade, and his body thrown into the river. The next morning Jogues' companion suffered a similar fate. Father Jogues left an account of a Mohawk sacrifice to the god Aireskoi (i. e., *Arekwēs' quā'*, 'the Master or God of War'). While speaking of the cruelties exercised by the Mohawk toward their prisoners, and specifically toward 3 women, he said: "One of them (a thing not hitherto done)

was burned all over her body, and afterwards thrown into a huge pyre." And that "at every burn which they caused, by applying lighted torches to her body, an old man, in a loud voice, exclaimed, 'Daimon, Aireskoi, we offer thee this victim, whom we burn for thee, that thou mayest be filled with her flesh and render us ever anew victorious over our enemies.' Her body was cut up, sent to the various villages, and devoured." Megapolensis (1641), a contemporary of Father Jogues, says that when the Mohawk were unfortunate in war they would kill, cut up, and roast a bear, and then make an offering of it to this war god with the accompanying prayer: "Oh, great and mighty Aireskuoni, we know that we have offended against thee, inasmuch as we have not killed and eaten our captive enemies—forgive us this. We promise that we will kill and eat all the captives we shall hereafter take as certainly as we have killed and now eat this bear." He adds: "Finally, they roast their prisoners dead before a slow fire for some days and then eat them up. The common people eat the arms, buttocks, and trunk, but the chiefs eat the head and the heart."

The Jesuit Relation for 1646 says that, properly speaking, the French had at that time peace with only the Mohawk, who were their near neighbors and who gave them the most trouble, and that the Mohegan (Mahingans or Mahinganak), who had had firm alliances with the Algonkin allies of the French, were then already conquered by the Mohawk, with whom they formed a defensive and offensive alliance; that during this year some Sokoki (Assoksekik) murdered some Algonkin, whereupon the latter determined, under a misapprehension, to massacre some Mohawk, who were then among them and the French. But, fortunately, it was discovered from the testimony of two wounded persons, who had escaped, that the murderers spoke a language quite different from that of the Iroquois tongues, and suspicion was at once removed from the Mohawk, who then hunted freely in the immediate vicinity of the Algonkin n. of the St Lawrence, where these hitherto implacable enemies frequently met on the best of terms. At this time the Mohawk refused Sokoki ambassadors a new compact to wage war on the Algonkin.

The introduction of firearms by the Dutch among the Mohawk, who were among the first of their region to procure them, marked an important era in their history, for it enabled them and the cognate Iroquois tribes to subjugate the Delawares and Munsee, and thus to begin a career of conquest that carried their war

parties to the Mississippi and to the shores of Hudson bay. The Mohawk villages were in the valley of Mohawk r., N. Y., from the vicinity of Schenectady nearly to Utica, and their territory extended N. to the St Lawrence and S. to the watershed of Schoharie cr. and the E. branch of the Susquehanna. On the E. their territories adjoined those of the Mahican, who held Hudson r. From their position on the E. frontier of the Iroquois confederation the Mohawk were among the most prominent of the Iroquoian tribes in the early Indian wars and in official negotiations with the colonies, so that their name was frequently used by the tribes of New England and by the whites as a synonym for the confederation. Owing to their position they also suffered much more than their confederates in some of the Indian and French wars. Their 7 villages of 1644 were reduced to 5 in 1677. At the beginning of the Revolution the Mohawk took the side of the British, and at its conclusion the larger portion of them, under Brant and Johnson, removed to Canada, where they have since resided on lands granted to them by the British government. In 1777 the Oneida expelled the remainder of the tribe and burned their villages.

In 1650 the Mohawk had an estimated population of 5,000, which was probably more than their actual number; for 10 years later they were estimated at only 2,500. Thenceforward they underwent a rapid decline, caused by their wars with the Mahican, Conestoga, and other tribes, and with the French, and also by the removal of a large part of the tribe to Caughnawaga and other mission villages. The later estimates of their population have been: 1,500 in 1677 (an alleged decrease of 3,500 in 27 years), 400 in 1736 (an alleged decrease of 1,100 in 36 years), 500 in 1741, 800 in 1765, 500 in 1778, 1,500 in 1783, and about 1,200 in 1851. These estimates are evidently little better than vague guesses. In 1884 they were on three reservations in Ontario: 965 at the Bay of Quinté near the E. end of L. Ontario, the settlement at Gibson, and the reserve of the Six Nations on Grand r. Besides these there are a few individuals scattered among the different Iroquois tribes in the United States. In 1906 the Bay of Quinté settlement contained 1,320; there were 140 (including "Algonquins") at Watha, the former Gibson band which was removed earlier from Oka; and the Six Nations included an indeterminate number.

The Mohawk participated in the following treaties with the United States: Ft Stanwix, N. Y., Oct. 22, 1784, being a treaty of peace between the United States and the Six Nations and defining their

boundaries; supplemented by treaty of Ft Harmar, O., Jan. 9, 1789. Konondaugua (Canandaigua), N. Y., Nov. 11, 1794, establishing peace relations with the Six Nations and agreeing to certain reservations and boundaries. Albany, N. Y., Mar. 29, 1797, by which the United States sanctioned the cession by the Mohawk to the state of New York of all their lands therein.

The names of the following Mohawk villages have been preserved; Canajoharie, Canastota, Canienga, Caughnawaga, Chuchtononeda, Kanagaro, Kowogonnughariagugharie, Nowadaga, Onoalagona, Osquake, Saratoga, Schaunnacata (Schenectady), Schoharie, and Teatontaloga.

Mohawk. One of the Lakmiut bands of the Kalapooian stock, on Mohawk r., an E. tributary of the Willamette, just N. of Eugene City, Oreg.—U. S. Ind. Treat. (1855), 19, 1873; Sanders in Ind. Aff. Rep. 1863, 88, 1864.

Mohegan (from *māingan*, 'wolf'—Trumbull). An Algonquian tribe whose chief seat appears originally to have been on Thames r., Conn., in the N. part of New London co. They claimed as their proper country all the territory watered by the Thames and its branches N. to within 8 or 10 m. of the Massachusetts line, and by conquest a considerable area extending N. and E. into Massachusetts and Rhode Island, occupied by the Wabaquasset and Nipmuc. On the W. their dominion extended along the coast to East r., near Guilford, Conn. After the destruction of the Pequot in 1637 the Mohegan laid claim to their country and that of the western Nehantic in the S. part of New London co. The tribes W. of them on Connecticut r., whom they sometimes claimed as subjects, were generally hostile to them, as were also the Narraganset on their E. border.

The Mohegan seem to have been the eastern branch of that group of closely connected tribes that spread from the vicinity of Narragansett bay to the farther side of the Hudson (see *Mahican*), but since known to the whites the eastern and western bodies have had no political connection. At the first settlement of New England the Mohegan and Pequot formed but one tribe, under the rule of Sassacus, afterward known as the Pequot chief. Uncas, a subordinate chief connected by marriage with the family of Sassacus, rebelled against him and assumed a distinct authority as the leader of a small band on the Thames, near Norwich, who were afterward known in history as Mohegan. On the fall of Sassacus in 1637 the greater part of the survivors of his tribe fell under the dominion of the Mohegan chief, who thus obtained control of the territory of the two tribes with all their tributary bands. As the English favored his pretensions he also set up a claim to extensive adjoining territories in the possession of rival chiefs. He strengthened his position by an alliance with the English against all other tribes, and after the destruction of the Indian power in S.

New England, by the death of King Philip in 1676, the Mohegan were the only important tribe remaining S. of the Abnaki. As the white settlements extended the Mohegan sold most of their lands and confined themselves to a reservation on Thames r., in New London co., Conn. Their village, also called Mohegan, was on the site of the present town of that name on the W. bank of the river. Their ancient village seems to have been farther up, about the mouth of the Yantic. Besides the village at Mohegan, the villages of Groton and Stonington, occupied mainly by the remnant of the Pequot, were considered to belong to the Mohegan. They rapidly dwindled away when surrounded by the whites. Many joined the Scaticook, but in 1788 a still larger number, under the leadership of Occom, joined the Brotherton Indians in New York, where they formed the majority of the new settlement. The rest of the tribe continue to reside in the vicinity of Mohegan or Norwich, Conn., but are now reduced to about 100 individuals of mixed blood, only one of whom, an old woman, retained the language in 1904. They still keep up a September festival, which appears to be a survival of the Green Corn dance of the Eastern tribes. For interesting notes on this remnant, see Prince and Speck in Am. Anthropol., 1903 and 1904.

In 1643 the Mohegan were estimated to number from 2,000 to 2,500, but this included the Pequot living with them, and probably other subordinate tribes. In 1705 they numbered 750, and in 1774 were reported at 206. Soon after they lost a considerable number by removal to New York, and in 1804 only 84 were left, who were reduced to 69 five years later. They were reported to number 300 in 1825, and about 350 in 1832, but the increased numbers are probably due to the enumeration of negroes and mixed-bloods living with them, together with recruits from the Narraganset and others in the vicinity. The Mohegan villages were Groton, Mohegan, Showtucket, and Wabaquasset. For further information and synonyms, see *Mahican*. (J. M.) *Manheken*.—Brewster (1651) in Mass. Hist. Soc. Mohemencho. A tribe of the Monacan confederacy, formerly living on the upper waters of James r., Va. Jefferson locates them in Powhatan co., on the s. side of the river, a few miles above Richmond, but Strachey seems to place them higher up, in the mountains. (J. M.)

Mohemenchoes.—Jefferson, Notes, 179, 1801. **Mohe-menehoes**.—Macauley, N. Y., ii, 178, 1829 (misprint). **Mohemonsoes**.—Boudinot, Star in the West, 127, 1816. **Mowhemcho**.—Smith, Va., i, map, 1819. **Mowhemenchouch**.—Pots, *ibid.*, 196. **Mowhemenchuges**.—Strachey (ca. 1612), Va., 102, 1849. **Mowhemenchughes**.—Smith, op. cit., 134. **Mowhem-incke**.—Strachey (ca. 1612), Va., 131, 1849.

Moheton. An unclassified tribe living in 1671 in the mountains of s. w. Virginia, or the adjacent part of West Virginia, on the upper waters of a river flowing n. w.—perhaps New r. They had removed a short time previously from the headwaters of the Roanoke, in the mountains farther to the e. They were friends and neighbors of the Tutelo, and were possibly a cognate tribe, or they may have been Shawnee. (J. M.)

Mohetan.—Batts (1671) in N. Y. Doc. Col. Hist., iii, 197, 1853 (cf. Bushnell in Am. Anthropol., ix, no. 1, 1907). **Mohetons**.—*ibid.*, 196.

Mohickon John's Town. A village, probably occupied by a band of Mahican under a chief known as Mohickon John, formerly on the upper waters of Mohican r., probably on Jerome fork, in the present Ashland co., Ohio. It is probably the Mohickon Village mentioned by Croghan in 1760. (J. M.)

Mohican Johnstown.—Howe, Hist. Coll. Ohio, ii, 832, 1896. **Mohickon Village**.—Croghan (1760) in Mass. Hist. Soc. Coll., 4th s., ix, 378, 1871. **Mohickon John's Town**.—Hutchins map in Smith, Bouquet's Exped., 1766. **Ville de Jean**.—La Tour, map, 1784 ("Mohickon ou Ville de Jean").

Mohock. From the reputation of the Mohawk, an Iroquoian people of central New York and parts of Canada, their name was used by the colonists in the sense of 'fierce fellow,' then 'ruffian,' or 'tough' in modern parlance. The word was specially applied to one of the many bands of ruffians who infested the streets of London at the beginning of the 18th century. As it appears in English literature it is spelled Mohock. Gay, the poet and dramatist (1688-1732), asks—Who has not heard the Scowrer's midnight fame? Who has not trembled at the Mohock's name? (A. F. C.)

Mohominge. A village of the Powhatan confederacy near the falls of James r., at Richmond, Va., about 1610 (Strachey, ca. 1612, Va., 25, 1849). It is not marked on Capt. John Smith's map.

Mohongo (or Myhangah). The wife of Kihegashugah, an Osage chief. These two, with four other members of the tribe, sailed from New Orleans in 1827, and on July 27 arrived at Havre, France, under the care of David Delaunay, a Frenchman who had lived 25 years in St Louis, and who is said to have been a colonel in the service of the United States. The Indians later went to Paris, and, as at Havre, were the objects of marked attention, being showered with gifts, entertained by people of prominence, and received at court by Charles X. The desire of Kihegashugah to visit France was inspired by a journey to that country by his grandfather in the time of Louis XIV. Kihegashugah and two others of the party died of smallpox on shipboard while returning to America. It is said that the expense of their return was borne by La-

fayette. Landing at Norfolk, Va., the survivors of the party proceeded to Washington, where the accompanying portrait of Mohongo, from Kenney and Hall, was painted. See *Six Indiens rouges de la tribu Osages (with portraits)*, 1827; *Histoire de la tribu Osages*, par P. V., 1827; McKenney and Hall, *Ind. Tribes*, I, 29, 1858; Fletcher in *Am. Anthropol.*, II, 395, 1900.

MOHONGO (MCKENNEY AND HALL)

Mohonk Indian Conferences. A series of annual meetings of friends of the Indians intended to facilitate intelligent discussion and conscientious agitation for desirable reforms. In these conferences a novel and effective way of forming and disseminating sound public opinion has been devised and for a score of years successfully employed, and through their instrumentality public speakers and those who write for the press have been kept in touch with the experts who know the facts. The Mohonk conferences, in their inception and their maintenance, are the idea and the work of Albert K. Smiley, member of the U. S. Board of Indian Commissioners, formerly professor of natural science at Haverford College, later in charge of the Friends' Boarding School at Providence, R. I. Having purchased the picturesque hotel overlooking beautiful L. Mohonk, in the Catskill range, w. of lower Hudson r., N. Y., Mr Smiley made it a resort for people of education, high principle, and philanthropic interests. Led by the wish to promote reform in the management of Indian affairs, he conceived the idea of inviting each year,

as his personal guests for the greater part of a week in October, the people who knew most about Indian life, education, and mission work, and the relations of the Government to the Indians. Besides these experts in Indian affairs, were invited from 100 to 250 other people, leaders in shaping public opinion, such as editors of the secular and religious press, writers for reviews, clergymen of all denominations, presidents of universities and colleges, leading men and women teaching in public schools, lawyers and judges, Senators and Representatives in Congress, members of the Cabinet and heads of Departments, expert ethnologists, and, preeminently, such workers from the field as Indian agents of character and intelligence, teachers of Indian schools, army officers with a personal knowledge of Indians, and philanthropic people who had studied the Indians on the reservations. These meetings Mr Smiley, as a member of the Board of Indian Commissioners, called "Conferences with the Board," and until 1902 a member of the Board presided—Gen. Clinton B. Fisk, from 1883 until his death in 1890; Dr Merrill E. Gates, former president of Amherst College, chairman (now secretary) of the Board, from 1890 to 1902; in 1903, Hon. John D. Long, ex-Secretary of the Navy, and in 1904, Hon. Charles J. Bonaparte, present Secretary of the Navy. The proceedings of the conference for the first 20 years were printed as an appendix in the Annual Reports of the Board of Indian Commissioners.

During the four days of the meeting, in the mornings a three or four hours' session and in the evenings two to three hours have been given to addresses, papers, reports, and the freest discussion, in which the widest differences of opinion have been welcomed and carefully considered and discussed. Sympathetic attention to views the most divergent has resulted in such conservatively sound utterances in the annual Mohonk platform as have generally commanded the support of the great body of the best friends of the Indians. In the afternoon, in drives and walks about the lake and through the forest, congenial groups of interested friends often continued the discussions of the morning sessions, shaped resolutions, and devised plans for aiding reform.

At its first meeting in 1883 the conference reported in favor of larger appropriations for Indian education and more school buildings; the extension of laws relating to crime, marriage, and inheritance so as to cover Indians on reservations then "lawless"; more of religious education for Indians; the gradual withdrawal of rations from the able-bodied

Indians because rations pauperized them; the inexperience of leasing Indian grazing lands, and the need of greater care in selecting men of character as Indian agents. Still more progressive policies have been advocated in subsequent years. The conference early declared for land in severalty, with inalienable homesteads for Indian families; for educating Indians industrially as well as intellectually for citizenship, to be conferred as rapidly as practicable; and for uniform insistence upon monogamy, the sacredness of marriage, and the preservation at each agency of family records of marriages and relationships. The abolition of the system of appointing Indian agents as a reward for partisan service with little regard to fitness, was urgently advocated. The advantages of the "outing system," by which Indian children of school age were placed in carefully chosen homes of white people, to attend school with white children, and learn to work on white men's farms, were discussed and demonstrated. The breaking up of the tribal system in Indian Territory was advocated several years before the Commission to the Five Civilized Tribes (q. v.) was appointed; and the conference has advocated the division of the great tribal trust funds into individual holdings, each Indian to have control of his own share of that money as soon as he shows himself able to begin to use it wisely. The development of native Indian industries, wherever practicable, has been intelligently favored. Sympathetic appreciation of all that is fine, artistically suggestive, and worthy of development in the nature, institutions, and arts of the Indian, has been marked and constant. (M. E. G.)

Mohotlath (*Mō-hotl'ath*). A sept of the Opitchesaht, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Canada, 32, 1890.

Moicaqui. A former rancheria, probably of the Nevome, in Sonora, Mexico, visited by Father Kino in 1694.—Doc. Hist. Mex., 4th s., i, 253, 1856.

Moingwena. The name (the etymology of which is doubtful) of a small tribe of the Illinois confederacy, closely affiliated with the Peoria. The name was applied also to the village in which they resided. The first recorded notice of the tribe is by Marquette in the account of his descent of the Mississippi with Joliet in 1673, when he found them residing in the vicinity of the Peoria village on the w. side of the Mississippi near the mouth of a river supposed to have been the Des Moines. Franquelin's map of 1688 gives the name of the river as "Moingana," and marks the Indian village of "Moingona" on it. When Marquette returned from the S. in 1674, he passed up Illinois r. and found the Peoria in the vicinity of

L. Peoria, the tribe having removed hither after his descent the previous year. He does not mention the Moingwena in this connection, but from the fact that Gravier found them with the Peoria in this locality in 1700, it is presumed that they migrated thither with the latter tribe. As no mention is made of them after this time they probably were incorporated with the Peoria, thus losing their tribal distinction.

(J. M. C. T.)

MoengSena.—Joliet, maps in Coues, Pike's Exped., i, 13, 1895. **Moingona**.—La Salle (1681) in Margry, Déc., ii, 134, 1877. **Moingona**.—Pénicaut (1700), *ibid.*, v, 411, 1883. **Moingwenas**.—Shea, Cath. Miss., 404, 1855. **Moins**.—Nuttall, Journal, 251, 1821. **Moingouëna**.—Gravier (1701) in Jes. Rel., LXV, 101, 1900.

Moiseyu (*Mōisēyu*, a word of uncertain origin, sometimes rendered as a Cheyenne name meaning 'many flies' or 'flint people', but probably of foreign derivation). An Algonquian tribe which, according to the tradition of the Cheyenne, adjoined them on the N. E. in their old home in Minnesota, and started with them on their westward migration about the year 1700, but turned back before reaching the Missouri r. It is said that some of their descendants are still with the Cheyenne. They are possibly identical with the Monsoni.

(J. M.)

Arrow Men.—Dorsey in Field Columb. Mus. Pub. 103, pl. xix, 1905. **Mo wiś si yū**.—Grinnell, Social Org. Cheyennes, 136, 1905.

Moisie. A summer village of Montagnais and Nascapee at the mouth of Moisie r., on the N. shore of the Gulf of St Lawrence, Quebec (Hind, Lab. Penin., i, 290, 1863). In 1906 the Montagnais and Nascapee at Moisie and Seven Islands numbered 376.

Moiya. Given by Gibbs (Schoolcraft, Ind. Tribes, iii, 112, 1853) as the name of a Pomo village in the vicinity of Hopland, Mendocino co., Cal.

Mojualuna. A former Taos village in the mountains above the present Taos pueblo, N. Mex.

Mojual-u.—Bandelier in Arch. Inst. Papers, iv, 32, 1892. **Mojua-lu-na**.—*Ibid.*

Mokaich. The Mountain Lion clan of the Keresan pueblos of Laguna, Sia, San Felipe, and Cochiti, N. Mex. The Mountain Lion clan of Laguna went to that village from the Rio Grande, dwelling first at Mt Taylor, or Mt San Mateo. With the Hapai (Oak) clan it formed a phratry, but it is probably now extinct. The clans of this name at Sia and San Felipe are quite extinct.

(F. W. H.)

Mōhkach-hānuch.—Hodge in Am. Anthropol., ix, 351, 1896 (Cochiti name; *hānuch* = 'people'). **Mōkaich-hāno**.—*Ibid.* (Sia and San Felipe form). **Mōkaich-hāno^{oh}**.—*Ibid.* (Laguna form). **Mōkaite**.—Stevenson in 11th Rep. B. A. E., 19, 1894 (Sia form; *te=ch*). **Mōkatsh**.—Bandelier in Arch. Inst. Papers, iii, 293, 1890. **Mōkatsh hanutsh**.—Bandelier, Delight Makers, 464, 1890 (*hanutsh* = 'people').

Mokaskel. A former Luiseño village in the neighborhood of San Luis Rey

mission, s. Cal.—Taylor in Cal. Farmer, May 11, 1860.

Mokelumne. A division of the Miwok in the country between Cosumne and Mokelumne rs., in Eldorado, Amador, and Sacramento cos., Cal. See *Moquelumnan Family*.

Locklomnee.—Bancroft, Nat. Races, I, 450, 1874.
Mokelmnēs.—DuRoi de Mofras, Expl., II, 383, 1844. **Mo-kel-um-ne.**—Frémont, Geog. Memoir, 16, 1848. **Moquelumnes.**—Bancroft, Hist. Cal., IV, 73, 1886. **Mukeemnes.**—Bancroft, Nat. Races, I, 450, 1874. **Mukelemnes.**—Ibid. **Muthelemnes.**—Hale in U. S. Expl. Exped., VI, 630, 1846. **Socklumnes.**—Bancroft, Nat. Races, I, 450, 1874 (identical?).

Mokete. A village of the Powhatan confederacy, in 1608, on Warrasqueoc cr., Isle of Wight co., Va.—Smith (1629), Va., I, map, repr. 1819.

Mokohoko (*Mokohokot*, 'he who floats visible near the surface of the water'). A chief of the band of Sauk that took the lead in supporting Black Hawk (q. v.) in the Black Hawk war. He was of the Sturgeon clan, the ruling clan of the Sauk, and was a bitter enemy of Keokuk (q. v.). The band still retains its identity. It refused to leave Kansas when the rest of the tribe went to Indian Ter., and had to be removed thither by the military. It is now known as the Black Hawk band, and its members are the most conservative of all the Sauk. (W. J.)

Mokumiks ('red round robes') A band of the Piegan division of the Siksika.

Mo-kūm'-iks.—Grinnell, Blackfoot Lodge Tales, 210, 1892. **Red Round Robes.**—Ibid., 225.

Molala. A Wailatpuan tribe forming the western division of that family. Little is known of their history. When first met with they resided in the Cascade range between Mts Hood and Scott and on the w. slope, in Washington and Oregon. The Cayuse have a tradition that the Molala formerly dwelt with them s. of Columbia r. and became separated and driven westward in their wars with hostile tribes. Their dialect, while related, is quite distinct from that of the Cayuse, and the separation probably took place in remote times. The name Molala is derived from that of a creek in Willamette valley, Oreg., s. of Oregon City. A band of these Indians drove out the original inhabitants and occupied their land. Subsequently the name was extended to all the bands. The present status of the tribe is not certain. In 1849 it was estimated to number 100; in 1877 Gatschet found several families living on the Grande Ronde res., Oreg., and in 1881 there were said to be about 20 individuals living in the mountains w. of Klamath lake. Those on the Grande Ronde res. are not officially enumerated, but are regarded as absorbed by the other tribes with whom they live. With regard to the rest nothing is known. It is probable, however, that there are a few scattered survivors. The Molala joined with other bands of

Willamette valley in the treaty of Dayton, Oreg., Jan. 22, 1855, and by treaty at the same place, Dec. 21, 1855, they ceded their lands and agreed to remove to a reservation. Chakankni, Chimbuiha, and Mukanti are said to have been Molala bands or settlements. (L. F.)

Amole'lish.—Gatschet, Calapooya MS., B. A. E., 31, 1877 (Calapooya name). **Kúikni.**—Gatschet in Cont. N. A. Ethnol., II, pt. 2, 157, 1890 (Klamath name). **Láti-u.**—Gatschet, Molala MS., B. A. E. (own name). **La'tiwé.**—Ibid. **Malala.**—Sen. Ex. Doc. 48, 34th Cong., 3d sess., 10, 1857. **Molala.**—Treaty of 1854 in U. S. Stat., X, 675, 1854. **Molallalas.**—Treaty of Dayton (1855) in U. S. Ethnol., II, pt. 2, 157, 1890 (name for those on Grande Ronde res.). **Wrole Alley.**—Lane in Ind. Aff. Rep., 160, 1850. **Ya'-ide'sta.**—Gatschet, Umpqua MS. vocab., B. A. E., 1877 (Umpqua name).

Molma. A Maidu village near Auburn, Placer co., Cal.—Dixon in Bull. Am. Mus. Nat. Hist., XVII, pl. xxxviii, 1905.

Momi (*Mo'mi*, 'a people who eat no small birds which have been killed by larger ones'). A subgen of the Missouri gens Cheghita, formerly a distinct people.—Dorsey in 15th Rep. B. A. E., 240, 1897.

Momobi (*Mo'-mo-bi*, a species of lizard). A clan of the Lizard (Earth or Sand) phratry of the Ilopi.—Stephen in 8th Rep. B. A. E., 39, 1891.

Monacan (possibly from an Algonquian word signifying a digging stick or spade). A tribe and confederacy of Virginia in the 17th century. The confederacy occupied the upper waters of James r. above the falls at Richmond. Their chief village was Rasawek. They were allies of the Manahoac and enemies of the Powhatan, and spoke a language different from that of either. They were finally incorporated with other remnants under the names of Saponi and Tutelo (q. v.). The confederacy was composed of the Monacan proper, Massinacac, Mohemencho, Monahassano, Monasiccapano, and some other tribes.

The Monacan proper had a chief settlement, known to the whites as Monacantown, on James r. about 20 m. above the

falls at Richmond. In 1669 they still had 30 bowmen, or perhaps about 100 souls. Thirty years later, the Indian population having died out or emigrated, a Huguenot colony took possession of the site. Consult Mooney, Siouan Tribes of the East, Bull. B. A. E., 1894. (J. M.)

Manacans.—Smith, Va., i, 136, 1819. **Manachees.**—Neill, Va. Carolorum, 325, 1886. **Manakan.**—Doc. of 1701 in Va. Hist. Coll., n. s., v, 42, 1886. **Manakins.**—Smith (1747) quoted by Burk, Va., i, 128, 1804. **Manikin.**—Doc. of 1700 in Va. Hist. Coll., op. cit., 48. **Mannacans.**—Strachey (ca. 1612), Va., 41, 1849. **Mannachin.**—Doc. of 1701 in Va. Hist. Coll., op. cit., 45. **Mannakin.**—Lawson (1714), Hist. Carolina, 187, 1860. **Manskin.**—Herrman, map (1670) in Rep. Bound. Com., 1873 (erroneously located on Pamunkey r.). **Manyean.**—Doc. of 1700 in Va. Hist. Coll., op. cit., 51. **Monacans.**—Smith, Va., i, 116, 1819. **Monachans.**—Yong (1634) in Mass. Hist. Soc. Coll., 4th s., ix, 112, 1871. **Monakins.**—Lederer, Discov., 9, 1672. **Monanacah.** **Rahowacah.**—Archer (1607) in Smith, Works, Arber ed., xlvii, 1884. **Monanacans.**—Ibid., 1. **Monocans.**—Strachey, op. cit., 27.

Monack. See *Moonack*.

Monahassano (a name of uncertain etymology, but most probably connected with *Yesá*, the name which the Tutelo applied to themselves). A tribe of the Monacan confederacy, formerly living on the s. side of James r., near the mountains, in Bedford and Buckingham cos., Va. Lederer describes them as tall and warlike, and says their totem was three arrows. In 1671 they were 25 m. from the Saponi, on Staunton r. They seem to have been next in importance to the Monacan in the confederacy. See *Tutelo*. Consult Mooney, Siouan Tribes of the East, Bull. B. A. E., 1894. (J. M.)

Flanakaskies.—Batts (1671) quoted by Fernow, Ohio Val., 221, 1890 (misprint). **Hanahaskies.**—Batts (1671) in N. Y. Doc. Col. Hist., iii, 197, 1853. **Hanohaskies.**—Batts, ibid., 194. **Monahasanguh.**—Smith (ca. 1629), Va., i, map, 1819. **Monahassanoes.**—Jefferson, Notes, 134, 1794. **Monahassanughes.**—Strachey (ca. 1612), Va., 102, 1849. **Nahysans.**—Lederer, Discov., 9, 1672. **Nobissan.**—Ibid., map (misprint). **Yesah.**—Hale in Proc. Am. Philos. Soc., xxi, 11, 1883-4 (own name; see *Tutelo*). **Yesá.**—Hale, MS., B. A. E., 1877. **Yesang.**—Hale in Proc. Am. Philos. Soc., op. cit.

Monakatuatha. See *Half King*.

Monanauk. A village, possibly Conoy, on the Potomac in 1608, about Breton bay, or Clements branch, St Marys co., Md.

Monashackotoog. A tribe which, with the Wunnashowatuckoog, lived w. of Boston, Mass., in 1637. They were friends of the Pequot and enemies of the Narraganset. —Williams (1637) in Mass. Hist. Soc. Coll., 4th s., vi, 194, 1863.

Monasiceapano. A tribe of the Monacan confederacy, formerly living in Louisa and Fluvanna cos., Va., between the James and the headwaters of the Pamunkey. The derivation of the name is unknown, but it may have some connection with Saponi. See Mooney, Siouan Tribes of the East, Bull. B. A. E., 1894. (J. M.)

Massicapanoes.—Macauley, N. Y., ii, 178, 1829. **Monasiceapanoes.**—Jefferson, Notes, 134, 1794. **Monasiceapanoes.**—Boudinot, Star in the West, 127,

1816. **Monasiceapanoughs.**—Smith (ca. 1629), Va., i, 134, 1819. **Monasukapanough.**—Ibid., map.

Monax. See *Moonack*.

Moncachtape ('killer of pain and fatigue'). A Yazoo Indian, noted chiefly on account of his real or supposed travels and his knowledge of various Indian languages. Le Page du Pratz, during his residence in Louisiana about the middle of the 18th century, met Moncachtape and obtained from him an account of his wanderings, according to which (DuPratz, Hist. La., iii, 89-128, 1758), after the loss of his wife and children, he had devoted much of his time to traveling. One of his journeys was to the N. E., in which he passed up the Ohio, visited the Shawnee and Iroquois, and wintered among the Abnaki; thence he went up the St Lawrence and returned to his home by way of the Mississippi. His second trip was to the N. W. coast by the route subsequently traveled by Lewis and Clark. He mentions the Tamaroa, Kansa, and Amikwa, and although he alludes to numerous tribes seen during his passage down Columbia r., he mentions no tribal names. He finally reached the Pacific coast, where, in addition to Indians, he met with bearded white men, who "came from sun-setting, in search of a yellow stinking wood which dyes a fine yellow color." With other Indians he ambushed and killed 11 of these strangers, 2 of whom bore firearms. These whites are described as small, but having large heads and long hair in the middle of the crown and wrapped in a great many folds of stuff, while their clothes were soft and of several colors. This story, so far as it relates to the western trip, is very doubtful on its face, and the names of tribes which it gives extend only as far as DuPratz' own knowledge of them; yet Quatrefages (Human Species, 205, 1895) accepts the story as credible, and that Moncachtape understood a number of languages is clearly proven. See also Clarke, Pion. Days in Oreg., 1905. (C. T.)

Monemius. A village of the Mahican tribe, known as Monemius' Castle from the name of the resident chief, situated in the 17th century on Haver id., in Hudson r., near Cohoes falls, Albany co., N. Y. (J. M.)

Moenemines Castle.—Deed of 1630 in N. Y. Doc. Col. Hist., xiv, 1, 1883. **Moemeninnes Castle.**—Patent of 1630, ibid., i, 44, 1856. **Monemius' castle.**—Ruttenber, Tribes Hudson R., 85, 1872.

Mong (*Mang*, 'loon'). A gens of the Chippewa (q. v.). Cf. *Maak*.

Mahng.—Tanner, Narrative, 314, 1830. **Mäng.**—Wm. Jones, inf'n, 1906. **Mänk.**—Gatschet, Ojibwa MS., B. A. E., 1882. **Möng.**—Warren (1852) in Minn. Hist. Soc. Coll., v, 44, 1885.

Mongwa (*Mon-gwä'*, 'loon'). A gens of the Miami (q. v.).—Morgan, Anc. Soc., 168, 1877.

Monk's Mound. See *Cahokia Mound*.

Monnato (*Mon-nă'-to*, 'snow'). A gens of the Miami (q. v.).—Morgan, *Anc. Soc.*, 168, 1877.

Mono. A general term applied to the Shoshonean tribes of s. e. California by their neighbors on the w. The origin and meaning of the name are obscure, its identity with the Spanish *mono*, 'monkey,' and its similarity, at least in certain dialects, to the Yokuts word for 'fly' (*monai*, etc.), are probably only coincidences. For subdivisions, see *Mono-Paviotso*.

Monachees.—Bunnell quoted by Powers in Cont. N. A. Ethnol., III, 350, 1877. **Manache.**—Purcell in Ind. Aff. Rep., 87, 1870. **Moan'-au-zi.**—Powers in Cont. N. A. Ethnol., III, 320, 1877 (Nishinam name). **Monache.**—Belknap in Ind. Aff. Rep., 17, 1876 ("the usual form of the name as heard among the southern Yokuts; cf. the Maidu (Nishinam) name, preceding"—A. L. K.). **Monach'-chi.**—Powers in Cont. N. A. Ethnol., III, 350, 1877. **Monas.**—Johnston in Sen. Ex. Doc. 61, 32d Cong., 1st sess., 22, 1852. **Monoes.**—Johnston in Ind. Aff. Rep., 251, 1851. **Mono Pi-Utes.**—Campbell in Ind. Aff. Rep., 119, 1866. **Monos.**—Taylor in Cal. Farmer, May 8, 1863. **Noo-tah-ah.**—Wessels (1853) in H. R. Ex. Doc. 76, 34th Cong., 3d sess., 31, 1857. **Nutaa.**—A. L. Kroeber, inf'n, 1905 (Chukchansi name; denotes that they are e. or upstream). **Nut'-ha.**—Powers in Cont. N. A. Ethnol., III, 396, 1877.

Mono-Paviotso. One of the three great dialectic groups into which the Shoshoneans of the great plateau are distinguished. It includes the Mono of s. e. California, the Paviotso, or "Paiute," of w. Nevada, and the "Snakes" and Saidiyuka of e. Oregon. Part of the Bannock may be related to these, but the eastern Bannock have affinities with the Ute.

The bands which seem to have formed the social unit of these people were each under one chief, and several of these are said to have been united into confederacies, such as the "Paviotso confederacy," but it is doubtful whether the relations existing between the constituent parts should properly be so termed.

The bands or divisions mentioned within the area occupied by this group are the following: Agaivanuna, Genega's band, Hadsapoke's band, Holkoma, Hoone-booe, Intimbich, Itsaatiaga, Kaidatoiabie, Kaivanungavidukw, Koeats, Kokeheba, Kosipatuwiwagaiyu, Kotsava, Koyuhow, Kuhpattikutteh, Kuyuidika, Laidukatuwiwait, Lohim, Loko, Nahaego, Nim, Nogaie, Odukeo's band, Olanche, Oualuck's band, Pagantso, Pagwiho, Pamitoy, Pavuwiwuyai, Petenegotat, Petodseka, Piattuuiabbe, Poatsituhtikuteh, Poskesa, San Joaquins' band, Sawagativa, Shobarboober, Sunananahogwa, Temoksee, Togwiganani, Tohaktivi, Toiwait, Tonawitsowa, Tonoyiet's band, Toquimas, To Repe's band, Tosarke's band, Tsapakah, Tubianwapu, Tupustikutteh, Tuziyammos, Wahi's band, Wahtatkin, Walpapi, Warartika, Watsequeorda's band, Winnemucca's band, Woksachi, Yahuskin, and Yammostuwiwagaiya.

Numaltachi, given as a village on Tuolomne r., Cal., may in reality be another band.

From figures given in the report of the Indian office for 1903 it would appear that the total number in this division is in the neighborhood of 5,400.

Monongahela. A variety of whisky. Says Bartlett (Dict. of Americanisms, 401, 1877): "A river of Pennsylvania, so called, gave its name to the rye whisky of which large quantities were produced in its neighborhood, and indeed to American whisky in general, as distinguished from Usquebaugh and Inishowen, the Scotch and Irish sorts." The name is of Algonquian origin, but its etymology is uncertain. (A. F. C.)

Monsoni (*Mongsoaeythinguwook*, 'moose people.'—Franklin). An Algonquian tribe in British America, often classed as a part of the Cree, to whom they are closely related, although they seem to be almost as closely related to the northern Chippewa. The first notice of them is in the Jesuit Relation for 1671. In that of 1672 they are located on the shore of James bay, about the mouth of Moose r., which, according to Richardson, received its name from them. They are referred to under the name Aumonssonniks in the Proces verbal of the Prise de possession (1671), but were not represented at the ceremony, though Charlevoix asserts the contrary. Although Dobbs (1744) speaks of them as the Moose River Indians, he locates a village or band on the w. bank of Rainy r., near Rainy lake, and others on the n. shore of this lake. Some confusion has arisen in regard to the habitat and linguistic connection of the tribe from the fact that the geographic designation "Mosonee" is frequently used to include all that portion of Keewatin and adjacent territory stretching along Hudson bay from Moose r. northward to Nelson r., a region occupied chiefly by the Maskegon. The usual and most permanent home of the Monsoni, however, has been the region of Mooser. According to Chauvignerie their totem was the moose. There is no separate enumeration of them in the recent Canadian official reports. See *Mousonce*. (J. M. C. T.)

Aumonssonniks.—Prise de possession (1671) in Perrot, *Mém.*, 293, 1864. **Aumossonniks.**—Verwyst, *Missionary Labors*, 232, 1886. **Aumoussonnites.**—Prise de possession (1671) in Margry, *Déc.*, I, 97, 1875. **Crees of Moose Factory.**—Franklin, *Journ. to Polar Sea*, I, 96, 1824. **Gens de marais.**—Bacqueville de la Potherie, *Hist. Am. Sept.*, I, 174, 1753. **Mongsoa Eithynyook.**—Gallatin in *Trans. Am. Antiq. Soc.*, II, 24, 1836. **Mongsoa-eythinguwooc.**—Franklin, *Journ. to Polar Sea*, I, 96, 1824. **Monsaunis.**—Bacqueville de la Potherie, *Hist. Am. Sept.*, I, 174, 1753. **Monsonies.**—Keane in Stanford, *Compend.*, 523, 1878. **Monsonies.**—Franklin, *Journ. to Polar Sea*, 56, 1824. **Monsonis.**—Chauvignerie (1736) in N. Y. Doc. Col. Hist., IX, 1054, 1855. **Monsonic.**—Jes. Rel. 1671, 30, 1858. **Monzoni.**—Lahontan, *New Voy.*, I, 231, 1763. **Moose-deer Indians.**—Franklin,

Journ. to Polar Sea, I, 96, 1824. **Moose Indians.**—Horden, Bk. of Common Prayer in Language of Moose Indians, title-page, 1859. **Moose River Indians.**—Dobbs, Hudson Bay, 13, 1744. **Morisons.**—Chauvignerie (1736) quoted by Schoolcraft, Ind. Tribes, III, 556, 1853 (misprint). **Mousonis.**—McKenney and Hall, Ind. Tribes, III, 80, 1858. **Nation of the Marshes.**—Dobbs, Hudson Bay, 24, 1744. **Ou-Monssons.**—Tailhan, note to Perrot, Mém., 293, 1864. **Wamussoneuwug.**—Tanner, Narr., 316, 1830 (Ottawa name).

Monswidishianun (*Mōns wi'dish'anum*). The Moose phratry of the Menominee, also a subphratry or gens thereof.—Hoffman in 14th Rep. B. A. E., pt. 1, 42, 1896.

Montagnais (French 'mountaineers', from the mountainous character of their country). A group of closely related Algonquian tribes in Canada, extending from about St Maurice r. almost to the Atlantic, and from the St Lawrence to the watershed of Hudson bay. The tribes of the group speak several well-marked dialects. They are the Astouregamigoukh, Attikiriniouetch, Bersiamite, Chisedec, Escoumains, Espanichkon, Kakouchaki, Mauthépi, Miskouah, Mouchaouaouastiirinoek, Nascapee, Nekoubaniste, Otaguottouemin, Oukestigouek, Oumamiwek, Papinachois, Tadousac, and Weperigweia. Their linguistic relation appears to be closer with the Cree of Athabasca lake, or Ayabaskawiniwug, than with any other branch of the Algonquian family. Champlain met them at the mouth of the Saguenay in 1603, where they and other Indians were celebrating with bloody rites the capture of Iroquois prisoners. Six years later he united with them the Hurons and Algonkin in an expedition against the Iroquois. In the first Jesuit Relation, written by Biard (1611-16), they are spoken of as friends of the French. From that time their name has a place in Canadian history, though they exerted no decided influence on the settlement and growth of the colony. The first missionary work among them was begun in 1615, and missions were subsequently established on the upper Saguenay and at L. St John. These were continued, though with occasional and long interruptions, until 1776. The Montagnais fought the Micmac, and often the Eskimo, but their chief and inveterate foes were the Iroquois, who drove them for a time from the banks of the St Lawrence and from their strongholds about the upper Saguenay, compelling them to seek safety at more distant points. After peace was established between the French and the Iroquois they returned to their usual haunts. Lack of proper food, epidemics, and contact with civilization are reducing their numbers. Turner (11th Rep. B. A. E., 1894) says they roam over the areas s. of Hamilton inlet as far as the Gulf of St Lawrence. Their western limits are im-

perfectly known. They trade at all the stations along the accessible coast, many of them at Rigole and Northwest r. Sagard, in 1632, described them as Indians of the lowest type in Canada. Though they have occasionally fought with bravery, they are comparatively timid. They have always been more less nomadic and, although accepting the teachings of the missionaries, seem incapable of resigning the freedom of the forest for life in villages, nor can they be induced to cultivate the soil as a means of support. Mr Chisholm describes them as honest, hospitable, and benevolent, but very superstitious. Those who were induced to settle on the lower St Lawrence appear to be subject to sickness, which is thinning their numbers. All who have not been brought directly under religious influence are licentious. Conjuring was much practised by their medicine-men. Some of the early missionaries speak highly of their religious susceptibility. They bury their dead in the earth, digging a hole 3 ft deep and occasionally lining it with wood. The corpse is usually laid on its side, though it is sometimes placed in a sitting position. Above the grave is built a little birch-bark hut and through a window the relatives thrust bits of tobacco, venison, and other morsels. No reliable estimate can be given of their former numbers, but it is known that they have greatly decreased from sickness and starvation consequent on the destruction of game. In 1812 they were supposed to number about 1,500; in 1857 they were estimated at 1,100, and in 1884 they were officially reported at 1,395, living at Betsiamits, (Bersimis), Escoumains, Godbout, Grand Romaine, Lake St John, and Mingan, in Quebec. In 1906 they, together with the Nascapee, numbered, according to the Canadian official report, 2,183, distributed as follows: Bersimis, 499; Escoumains, 43; Natashquan, 76; Godbout, 40; Grand Romaine, 176; Lake St John, 551; Mingan, 241; St Augustine, 181; Seven Islands and Moisie, 376. Consult Chamberlain in Ann. Archæol. Rep. Ontario 1905, 122, 1906.

The bands and villages of the Montagnais are: Appeelatat, Assuapmushan, Attikamegue, Bonne Espérance, Chicoutimi, Esquimaux Point, Godbout, Ile Percée (mission), Itamameou (mission), Islets de Jeremie (mission), Kapiminkouetiik, Mauthépi, Mingan, Moisie, Mushkoniatawee, Musquarro, Nabisipipi, Natashquan, Pashasheeb, Romaine, and St Augustine. (J. M. C. T.)

Montagnais. An Athapascan group, comprising the Chipewyan, Athabasca, Etheneldeli, and Tatsanottine tribes, which, though now living on the plains and in the valleys of British North America, migrated from the Rocky mts.—Petitot, *Dict. Dènè-Dindjié*, xx, 1876. For synonymy, see *Chipewyan*.

Montagnard. An ethnic and geographic Athapascan group comprising the Tsatstine, Sarsi, Sekani, and Nahane tribes living in the Rocky mts. of British North America. The name was also formerly applied to the eastern Algonquian people now known as Montagnais.

Montagnardes.—Kingsley, *Stand. Nat. Hist.*, pt. 6, 143, 1885. **Montagnards.**—Petitot, *Dict. Dènè-Dindjié*, xx, 1876. **Mountaineers.**—Morgan in *N. Am. Rev.*, 58, 1870.

Montauk (meaning uncertain). A term that has been used in different senses, sometimes limited to the particular band or tribe known by this name, but in a broader sense including most of the tribes of Long Island, excepting those about the w. end. It is occasionally used incorrectly as equivalent to Metoac, q. v.

The Indians of Long Island were closely related to the Indians of Massachusetts and Connecticut. Tooker (Cockenose-de-Long Island, 1896) says that the dialect of the Montauk was more nearly related to

the Natick of Massachusetts than was the Narraganset.

The Montauk, in the limited sense, formerly occupied Easthampton tp., Suffolk co., at the E. end of Long Island, and controlled all the other tribes of the island, except those near the w. end. That these so-called tribes were but parts of one group or tribe, or the loosely connected elements of what had been an organized body, seems apparent. Ruttenber, speaking of the Montauk in the limited sense, says: "This chieftaincy was acknowledged both by the Indians and the Europeans as the ruling family of the island. They were indeed the head of the tribe of Montauk, the other divisions named being simply clans

DAVID PHARAOH, "LAST KING OF THE MONTAUK"

or groups, as in the case of other tribes.

Wyandance, their sachem, was also the grand sachem of Paumanacke, or Sewanhackey, as the island was called. Nearly all the deeds for lands were confirmed by him. His younger brothers, Nowedonah and Poygratasuck [Poggatacut], were respectively sachems of the Shinecock and the Manhasset." The Rockaway and Cannarsee at the w. end were probably not included. It is doubtful whether he is correct in including the west-end Indians in the confederacy. The principal Montauk village, which probably bore the name of the tribe, was about Ft Pond, near Montauk pt. The Pequot made them and their subordinates tributary, and on the destruction of that tribe in 1637, the Narraganset began a series of attacks which finally, about 1659, forced the Montauk,

who had lost the greater part of their number by pestilence, to retire for protection to the whites at Easthampton. Since 1641 they had been tributary to New England. When first known they were numerous, and even after the pestilence of 1658-59, were estimated at about 500. Then began a rapid decline, and a century later only 162 remained, most of whom joined the Brotherton Indians of New York, about 1788, so that in 1829 only about 30 were left on Long Island, and 40 years later these had dwindled to half a dozen individuals, who, with a few Shinnecock, were the last representatives of the Long Island tribes. They preserved a form of tribal organization into the 19th century and retained their hereditary chiefs until the death of their last "king," David Pharaoh, about 1875. A few mixed-bloods are still officially recognized by the state of New York as constituting a tribe under Wyandanch Pharaoh, son of David.

Monterey Indians. The Costanoan Indians of Monterey co., Cal., numbering more than 100 in 1856. A vocabulary taken by Taylor (Cal. Farmer, Apr. 20, 1860) at that time is Rumsen. There are probably also remnants of the Esselen and other divisions of the Mutsun in the region of Monterey.

Montezuma, Carlos. An educated full-blood Apache, known among his people in childhood as Wasajah ('Beckoning'), born about 1866 in the neighborhood of the Four Peaks of the Mazatzal mts., pres-

ent s. E. Arizona. In Oct., 1871, he was taken captive, with 16 or 18 other children including his two sisters, in a midnight raid by the Pima on his band, during the absence of the men on a mission of peace, while encamped in the Superstition mts., 40 or 50 m. w. of Globe. In this raid 30 or more of the Apache were killed. The captives were taken by the Pima to their rancherias on the Gila, whence, after a week's detention, Wasajah was taken to Adamsville, below Florence, and sold to Mr C. Gentile, a native of Italy, who was then prospecting in Arizona. Some months after the raid Wasajah's mother, who had escaped, was informed by an Indian runner that her boy had been seen at Camp Date Creek. Determined to recover her child, she applied to the agent for permission to leave the reservation, and being refused departed without leave. Her body was found later in a rugged pass in the mountains, where she had been shot by a native scout. Wasajah was taken by Mr. Gentile to Chicago and was called by him Carlos Montezuma—Carlos, from his own name, Montezuma, from the so-called Casa Montezuma (q. v.), near the Pima villages. He entered the public schools of Chicago in 1872, remaining until 1875, from which time until 1884 his education was continued in the public schools of Galesburg, Ill., Brooklyn, N. Y., and Urbana, Ill., and in the University of Illinois at the last-named place. In 1884 he entered the Chicago Medical School, from which he was graduated in 1889, receiving in the same year an appointment as physician in the U. S. Indian School at Stevenson, N. Dak. From 1890 until 1896 Dr Montezuma has served as physician successively* at the Western Shoshone agency in Nevada, the Colville agency in Washington, and at the Carlisle Indian School. In the latter year he resigned from the service of the Indian department and settled in Chicago, where he is now engaged in the practice of his profession, in teaching in the College of Physicians and Surgeons and in the Post-graduate Medical School, and in arousing interest in his people through his writings.

Montezuma Castle. A prehistoric cliff-dwelling on the right bank of Beaver cr., a tributary of Rio Verde, 3 m. from old Camp Verde, central Arizona; popularly so-called because supposed to have been once occupied by the Aztecs, whereas there is no ground whatever for the belief that any Southwestern pueblo or cliff-village is of Mexican origin. The building is constructed in a natural recess in the side of a limestone cliff, the base of which is 348 ft from the edge of the stream and about 40 ft above it. The

building, which is accessible only by means of ladders, consists of 5 stories, and in the same cliff are several cave-dwellings. The foundation of Montezuma Castle rests on cedar timbers laid longitudinally on flat stones on the ledge. The front wall is about 2 ft thick at the bottom and 13 in. at the top, and leans slightly toward the cliff. The first story consists of two small living rooms and a storeroom. The second floor, access to which is gained through a small opening in the ceiling of the first story, is more extensive, consisting of 4 apartments, bounded behind by the most massive wall of masonry in the entire structure, and resting on a ledge even with the floor of the second story. It is 28 ft in height, rising to the fifth story, around the front of which it forms a battlement 4½ ft high. It leans slightly toward the cliff, and is strongly but not symmetrically curved inward. The chord of the arc described by the top of the wall measures 43 ft, and the greatest distance from chord to circumference 8 ft. The third floor comprises the most extensive tier of rooms in the structure, extending across the entire alcove in the cliff in which the house is built. There are 8 of these rooms, in addition to 2 porches. The fourth floor consists of 3 rooms, neatly constructed, through the ceiling of one of which access is gained to the fifth or uppermost floor, which consists of a long porch or gallery having a battlement in front and an elevated backward extension on the right, with 2 rooms filling the corresponding space on the left. These 2 rooms are roofed by the rocky arch of the cliff, and are loftier than the lower chambers. Montezuma Castle, or Casa Montezuma, shows evidence of long occupancy in prehistoric times. Some of the rooms are smoothly plastered and smoke-blackened; the plas-

tering bears finger-marks and impressions of the thumb and hand. The rooms are ceiled with willows laid horizontally across rafters of ash and black alder; upon this is a thick layer of reeds placed transversely, and the whole plastered on top with mortar, forming a floor to the chamber above. The ends of the rafters exhibit hacking with stone implements. The building, which threatened to collapse, was repaired by the Arizona Antiquarian Association about 1895, and in 1906 it was declared a national monument by proclamation of the President of the United States. Its origin is unknown. See Mearns in *Pop. Sci. Month.*, Oct. 1890

(from whose description the above details are extracted); Hewett in *Am. Anthropol.*, VI, 637, 1904; Land of Sunshine, Los Angeles, x, 44, 1898.

Montezuma Well. A large depression in the form of a "tank" or well in the summit of a low mesa on Beaver cr., about 9 m. N. of old Camp Verde, Ariz., in which are the well-preserved remains of several cliff-dwellings.

Montochtana ('a corner in the back part of the hut'). A Knaiakhotana clan of Cook inlet, Alaska. — Richardson, *Arct. Exped.*, I, 407, 1851.

Montour. About 1665 a French nobleman named Montour settled in Canada, where, by an Indian woman, probably a Huron, he became the father of a son and two daughters. This son of Montour grew up among those Indians, who were at that time in alliance with the French. In 1685, while in the French service, he was wounded in a fight with two Mohawk warriors on L. Champlain. Subsequently he deserted the French cause to live with the "upper nations" of Indians. Through him, in 1708, Lord Cornbury succeeded in persuading 12 of these western tribes, including the Miami and the Hurons, to

MONTEZUMA CASTLE. (MEARNS)

trade at Albany. For this work, in alienating the upper nations from the French trade and cause, he was killed in 1709 by order of the Marquis de Vaudreuil, governor of Canada, who boasted that, had Montour been taken alive, he would have had him hanged. One of the two daughters of the French nobleman, while living on the Susquehanna and the Ohio, became a noted interpreter and friend of the English, and was known as Madam Montour. Her sister appears to have married a Miami Indian.

Authorities regarding the Montours are not always consistent and are sometimes not reconcilable as to statements of material facts. Madam Montour appears to have been born in Canada previous to the year 1684. When about 10 years of age she was captured by some Iroquois warriors and adopted, probably by the Seneca, for at maturity she married a Seneca named Roland Montour, by whom she had 4, if not 5, children, namely, Andrew, Henry, Robert, Lewis, and Margaret, the last becoming the wife of Katarioniecha, who lived in the neighborhood of Shamokin, Pa. Roland had a brother called "Stuttering John" and a sister variously known as Catherine, Kate, Catrina, and Catreen. After the death of Roland, Madam Montour married the noted Oneida chief named Carondowanen, or "Big Tree," who later took the name Robert Hunter in honor of the royal governor of the province of New York. About 1729 her husband, Robert, was killed in battle with the Catawba, against whom he was waging war. Madam Montour first appeared as an official interpreter at a conference at Albany in August, 1711, between the delegates of the Five Nations and Gov. Hunter of New York. This was probably the occasion on which her husband adopted the name Robert Hunter. The wanton murder of her brother Andrew by Vaudreuil was bitterly resented by Madam Montour, and she employed her great influence among the Indians with such telling effect against the interests of the French that the French governor sought to persuade her to remove to Canada by the offer of great compensation and valuable emoluments. His efforts were unsuccessful. Finally, in 1719, he sent her sister to attempt to prevail on her to forsake the people of her adoption and the English cause, whereupon the Commissioners of Indian Affairs, learning of the overtures of the French governor, appreciating the value of her services to the province, and fearing the effect of her possible disaffection, invited her to Albany. It was then discovered that for a year she had not received her stipulated pay, so it was agreed by the commission-

ers that she should thereafter receive a "man's pay," and she was satisfied. Madam Montour acted also as interpreter in 1727 in Philadelphia at a conference between Lieut. Gov. Gordon and his council on the one hand and the several chiefs and delegates of the Six Nations, the "Conestogas, Gangawese, and the Susquehanna Indians," on the other. It is claimed that Madam Montour was a lady in manner and education, was very attractive in mind and body, and that at times she was entertained by ladies of the best society of Philadelphia; but as her sister was married to a Miami warrior, and she herself was twice married to Indians of the Five Nations, it is probable that her refinement and education were not so marked as claimed, and that the ladies of Philadelphia treated her only with considerate kindness, and nothing more. Nevertheless, from the testimony of those who saw and knew her, but contrary to the statement of Lord Cornbury, who knew her brother, it seems almost certain that she was a French-Canadian without any admixture of Indian blood in her veins, and that for some unaccountable reason she preferred the life and dress of her adopted people.

Whatever Roland's attitude was toward the proprietary government, that of his wife was always uniformly friendly, and after her second marriage it was even more cordial. Such was the loyalty of the family of Madam Montour that at least two of her sons, Henry and Andrew, received large grants of "donation lands" from the government; that of the former lay on the Chillisquaque, and that of the latter on the Loyalsock, where Montoursville, Pa., is now situated.

Witham Marshe refers to Madam Montour as the "celebrated Mrs Montour, a French lady," who, having "lived so long among the Six Nations, is become almost an Indian." Referring to her visits to Philadelphia, he says, "being a white woman," she was there "very much caressed by the gentlewomen of that city, with whom she used to stay for some time." Marshe, who visited her house, saw two of her daughters, who were the wives of war chiefs, and a lad 5 years old, the son of one of the daughters, who was "one of the finest featured and limbed children mine eyes ever saw, . . . his cheeks were ruddy, mixed with a delicate white, had eyes and hair of an hazel colour." In 1734 Madam Montour resided at the village of Ostonswackin, on the Susquehanna, at the mouth of Loyalsock cr., on the site of the present Montoursville, Lycoming co., Pa. It was sometimes called Frenchtown. In 1737 Conrad Weiser, while on his way to Onondaga, lodged here with Madam

Montour, who, he states, was "a French woman by birth, of a good family, but now in mode of life a complete Indian." In 1744, at the great treaty of Lancaster between the Six Nations and the provinces of Virginia, Maryland, and Pennsylvania, Madam Montour was present with two of her daughters, on which occasion she related to Marshe the story of her life. He represented her as genteel, of polished address, and as having been attractive in her prime; he also learned that her two sons-in-law and her only son were then absent, at war with the Catawba. In 1745 Madam Montour was living on an island in the Susquehanna, at Shamokin, having left Ostonswackin permanently. Prior to 1754 she became blind, but she was still vigorous enough to make a horseback trip from Logstown, on the Ohio, to Venango, a distance of 60 m., in two days, her son Andrew, on foot, leading the horse all the way.

When Count Zinzendorf visited Shamokin in 1742 he was welcomed by Madam Montour and her son Andrew. Seeing the Count and hearing that he came to preach the gospel, the truths of which she had almost forgotten, she burst into tears. It was learned that she believed that Bethlehem, the birthplace of Christ, was situated in France, and that it was Englishmen who crucified him—a silly perversion of the truth that originated with French religious teachers.

In view of the fact that there is no record of a governor of Canada named Montour, the belief that she was the daughter of such a personage seems groundless, notwithstanding her own statement to this effect to Marshe. Equally doubtful is the assertion that she was alive during the American Revolution, a statement possibly arising from the fact that she was confounded with her reputed granddaughter, Catherine of Catherine's Town, situated near the head of Seneca lake and destroyed by Sullivan's army in 1779. Being more than 60 years of age in 1744, it is not probable that she could have been an active participant in the Wyoming massacre, 34 years later, and there is no authentic evidence connecting Madam Montour with the shedding of blood, white or Indian.

ESTHER MONTOUR, justly infamous as the "fiend of Wyoming," a daughter of French Margaret, hence a granddaughter of Madam Montour and a sister of French Catherine and Mary, and the wife of Eghohowin, a ruling chief of the Munsee, was living in 1772 at Sheshequin, 6 m. below Tioga Point; but in this year she removed 6 m. above, to a place where she founded a new settlement, later known as Queen Esther's

Town, which was destroyed by Col. Hartley in 1778. Thence she removed, probably to Chemung. It is known that there were Montours at the battle of Wyoming, for "Stuttering John" and Roland admitted it some years afterward. John and Catrina were always relentless enemies of the English colonies. That John, Roland, Esther, and Catherine and Mary were half-breeds is quite probable. But Esther's bloody work at Wyoming, July 3, 1778, has made her name execrated wherever known. Toward the end of June of the year named the Tory Colonel, John Butler, with about 400 British and Tories and about 700 Indians, chiefly Seneca, under Sagaiengwaraton, descended the Susquehanna on his way to attack the settlements in Wyoming valley, Pa. To defend the valley against this force there were 40 or 50 men under Capt. Detrick Hewitt, and the militia—about 400 men and boys, the residue of the three companies that had been enlisted in the Continental army. Col. Zebulon Butler, happening to be in the valley, took command of the little army, aided by Maj. Garret, Col. Dennison, and Lieut. Col. Dorrance.

The 400 undisciplined militia were soon outflanked and broken in the ensuing battle. After the enemy had gained the rear, an officer said to Hewitt: "See! the enemy has gained the rear in force. Shall we retreat?" "I'll be d—d if I do," was Hewitt's reply, and, like the other officers killed in action, he fell at the head of his men. The battle was lost. Then followed a most dreadful slaughter of the brave but overpowered soldiers of Wyoming. Without mercy and with the most fearful tortures, they were ruthlessly butchered, chiefly in the flight, and after having surrendered themselves prisoners of war. Placed around a huge rock and held by stout Indians, 16 men were killed one by one by the knife or tomahawk in the hands of "Queen Esther." In a similar circle 9 others were killed in the same brutal manner. From these two circles alone only one, a strong man named Hammond, escaped by almost superhuman effort. This slaughter, which made 150 widows and 600 orphans in the valley, gave Esther her bloody title.

CATHERINE MONTOUR, a noted character in the colonial history of Pennsylvania, and who gave the name of Catherine's Town to Sheoquaga, was another daughter of French Margaret, hence a granddaughter of Madam Montour. She became the wife of Telelemtu, a noted Seneca chief, named Thomas Hudson by the English, by whom she had a son named Amochol ('Canoe'), or Andrew, and two daughters. The statement that

Catherine was an educated and refined woman and was admitted into good society in Philadelphia is, under the circumstances, most improbable. On Sept. 3, 1779, Sullivan's army destroyed Catherine's Town. Catherine, with several friends, lived in 1791 "over the lake not far from Niagara." Her son Amochol joined the Moravian church and was living at New Salem, or Petquoting, in 1788. John and Roland Montour were her brothers, the latter being the son-in-law of Sagaiengwaraton, a leading Seneca chief. Both Roland and John were famous war chiefs in the border warfare against the English colonies.

MARY MONTOUR, a sister of Catherine, Esther, and Andrew, was the wife of John Cook, another noted Seneca chief named Kanaghragait, sometimes also called "White Mingo," who lived on the Allegheny and the Ohio, and died in 1790 at Ft. Wayne. From Zeisberger's Diary (II, 149, 1885) the curious information is obtained that Mary was a "Mohawk Indian woman," and that Mohawk was "her mother tongue." It is also stated that when a child Mary was baptized in Philadelphia by a Catholic priest. In 1791, on the removal of the Moravian mission from New Salem to Canada, among the new converts who accompanied the congregation was Mary, "a sister of the former Andrew Montour," and "a living polyglot of the tongues of the West, speaking the English, French, Mohawk, Wyandot [Huron], Ottawa, Chippewa, Shawnese, and Delaware languages."

ANDREW MONTOUR, whose Indian name was Sattelihi, the son of Madam Montour by her first husband, was for many years in the employ of the proprietary government of Pennsylvania as an assistant interpreter. In 1745 he accompanied Weiser and Shikellimy, the viceroy of the Six Nations on the Susquehanna, on a mission to Onondaga, the federal capital of the confederation. In 1748 Andrew was presented to the council of the proprietary government by Weiser as a person especially qualified to act as an interpreter or messenger. At this time he was prominent among the Delawares. Hitherto Weiser and Andrew were held asunder by jealousy, because of Andrew's efforts to secure the position of interpreter for Virginia in her negotiations with the Six Nations. But Weiser now needed Andrew to secure to the proprietary government the alliance of the Ohio Indians, and so sunk all personal differences. In introducing him to the council Weiser stated that he had employed Andrew frequently on matters of great moment and importance, and that he had found him "faithful, knowing, and prudent." At

this time Andrew was fully remunerated for what he had already done for Weiser. Deputies from the Miami were expected at Philadelphia, but instead they went to Lancaster. Andrew Montour was the interpreter for the western Indians and Weiser for the Six Nations. Scaroyady, a noted Oneida chief, living on the Ohio, and exercising for the Six Nations jurisdiction over the western tribes similar to that exercised by Shikellimy over those in Pennsylvania, was to have been the speaker on this occasion, but he was incapacitated by a fall, and so Andrew was chosen speaker for the western Indians. He enjoyed remarkable influence and power over the Ohio tribes, and by his work at the various conferences of the colonies with them came into enviable prominence in the province. His growing power and influence, about 1750, attained such weight that the management of Indian affairs by Pennsylvania was seriously embarrassed. In 1752 Gov. Hamilton commissioned him to go and reside on Cumberland cr., over the Blue hills, on unpurchased lands, to prevent others from settling or trading there. In the following year the French authorities set a price of \$500 on his head. In 1755 he was still on his grant, living 10 m. n. w. of Carlisle, Pa., and was captain, later major, of a company of Indians in the English service. In 1762 he was the King's interpreter to the united nations. Andrew served as an interpreter for the Delawares at Shamokin, where Conrad Weiser held a conference with the several tribes in that region for the purpose of bringing about peace between the southern confederation of Indians and the Six Nations and their allies. He also served as interpreter to the governor of Virginia at several important treaties. After receiving his grants from the government he was regarded as a man of great wealth, but in his public acts he found other means of swelling his fortune.

Consult Bliss, Zeisberger's Diary, I-II, 1885; Darlington, Gist's Journals, 1893; Freeze in Pa. Mag., III, 1879; Marshe in Mass. Hist. Soc. Coll., 1st s., VII, 1801; N. Y. Doc. Col. Hist., v, 65, 1855; Walton, Conrad Weiser, 1900. (J. N. B. H.)

MONTOWESE ('little god,' diminutive from *manito*, 'spirit.'—Trumbull). Applied by Rittenber (Tribes Hudson R., 82, 1872), to Indians on Connecticut r. s. w. of Middletown, Middlesex co., Conn., though De Forest (Hist. Inds. Conn., 55, 1853), his authority, does not give the name as that of a tribe, but says: "Southwest of the principal seat of the Wangunks [Middletown] a large extent of country was held by a son of Sowheag [chief of the Mattabesec, q. v.] named Montowese." This area probably lay partly in

Middlesex, but chiefly in New Haven co. This chief, in 1638, sold a tract N. of the site of New Haven comprising a large portion of that county. As his father was chief of the Mattabesec, his band probably belonged to that tribe. (J. M. C. T.)

Mantoweeze.—Davenport (1660) in Mass. Hist. Soc. Coll., 4th s., VII, 518, 1865.

Monts Pelés. A tribe, called from the nature of their country the Nation des Monts Pelés ('nation of the bare mountains'), living in the N. E. part of Quebec province in 1661. Hind (Lab. Penin., II, 1863) thinks they may have been a part of the Nascapée.

Mont Pelés.—Keane in Stanford, Compend., 523, 1878. **Nation des Monts pelez**.—Jes. Rel. 1661, 29, 1858.

Moosachaht ('deer people'). A tribe on the N. side of Nootka sd., Vancouver id. This is the tribe to which the term Nootka was applied by the discoverers of Vancouver id. Pop. 153 in 1906. Their principal village is Yucuatl. The noted Maquinna (q. v.) was chief of this tribe in 1803.

Bo-wat-chat.—Swan in Smithson. Cont., XVI, 56, 1870. **Bowatshat**.—Swan, MS., B. A. E. **Moachet**.—Mayne, Brit. Col., 251, 1862. **Mo'ateath**.—Boas in 6th Rep. N. W. Tribes Can., 31, 1890. **Moosachaht**.—Can. Ind. Aff., 188, 1883. **Moosachaht**.—Ibid., 357, 1897. **Moo-cha-ahts**.—Ibid., 52, 1875. **Moouchaht**.—Sproat, Sav. Life, 308, 1868. **Mouchatha**.—Swan, MS., B. A. E. **Mowaches**.—Armstrong, Oregon, 136, 1857. **Mo-watch-its**.—Jewitt, Narr., 36, 1849. **Mowatshat**.—Swan, MS., B. A. E. **Mowitchat**.—Swan in Smithson. Cont., XVI, 56, 1870. **Nootka**.—Schedule of Reserves, Can. Ind. Aff., Suppl. to Ann. Rep., 82, 1902.

Moodyville Saw Mills. The local name for a body of Salish of Fraser River agency, Brit. Col.; pop. 86 in 1889.

Moodyville Saw Mills.—Can. Ind. Aff. Rep. 1889, 268, 1890. **Moonyville Saw Mills**.—Can. Ind. Aff. Rep. 1886, 229, 1887.

Mooharmowikarnu (*Moo-har-mo-wi-kar'-nu*). A subdivision of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Mooskwungwahoki (*Moo-kwung-wa-ho'-ki*). A subdivision of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Moonack. A Maryland-Virginia name of the ground-hog (*Arctomys monax*); also, by transference, the name of a mythic animal feared by many Southern negroes. The word occurs very early. Glover, in his account of Virginia (Philos. Trans. Roy. Soc., XI, 630, 1676), speaks of *moonacks*. John Burroughs (Winter Sunshine, 25, 1876), says: "In Virginia they call woodchucks '*moonacks*.'" Lewis and Clark (Orig. Jour., II, IV, 1905) use the forms *moonax* and *moonox*. It is probable that the *monax* in the scientific name of this animal is a Linnean latinization of its aboriginal appellation. The Virginian *moonack*, or *monack*, is cognate with the Delaware *monachyeu* (German form), the Passamaquoddy *monimquess*, the Micmac *mun-umkwech*, etc. The word signifies 'the digger,' from the Algonquian radical

muna, or *mona*, 'to dig'; seen also in the Chippewa *monaïke*, 'he scratches up'; in Cree, *monahikeu*. The Sauk, Fox, and Kickapoo language has *monanā'e*, 'little digger', for woodchuck, according to Dr William Jones. (A. F. C.)

Moonhartarne (*Moon-har-tar-ne*, 'digging'). A subdivision of the Delawares (q. v.).—Morgan, Anc. Soc., 172, 1877.

Moors. See *Croatian Indians*.

Moose. The common name of a species of large deer (*Cervus alces*) found in Maine and parts of Canada and formerly over most of N. E. North America. An identical term for this animal occurs in many Algonquian dialects: Virginian, *moos*; Narraganset and Massachuset, *moos*; Delaware, *mos*; Passamaquoddy, *mus*; Abnaki, *moñz*; Chippewa, *mon's*; Cree, *monsua*. All these words signify 'he strips or eats off,' in reference to the animal's habit of eating the young bark and twigs of trees. The word came into English from one of the New England dialects. Derivative words and expressions are: Moose bird (Canada jay); moose call, moose horn, or moose trumpet (a bark trumpet used to imitate notes of this animal); moose elm (slippery elm); moose fly (a large brown fly common in Maine); moosewood (applied variously to the striped maple, *Acer pennsylvanica*); the leatherwood (*Dicra palustris*), and the hobblebush (*Viburnum lantanoides*); moose yard (the home and browsing-place of the moose in winter). (A. F. C.)

Moosehead Lake Indians. The common name of a band of Penobscot living on Moosehead lake, Me.—Vetromile, Abnakis, 22, 1866.

Moosemize. A name current in parts of New England, Vermont in particular, for the false wintergreen (*Pyrola americana*). The name seems to have been transferred from another plant, since in Chippewa and Nipissing *mon'somish*, signifying 'moose shrub,' designates the hobblebush (*Viburnum lantanoides*), called in Canadian French bois d'orignal. The word, which is written *moosemize* also, is derived from some Algonquian dialect of the Chippewa group or a closely related one of the E. (A. F. C.)

Mooshkazoze ('heron'). A gens of the Chippewa, q. v.

Moosh-kā-oo-ze'.—Morgan, Anc. Soc., 166, 1877. **Moshka'u'sig**.—Wm. Jones, inf'n, 1906.

Mooskwasuh ('muskrat'). A gens of the Abnaki, q. v.

Moos-kwā-suh'.—Morgan, Anc. Soc., 174, 1877. **Moskwas**.—J. D. Prince, inf'n, 1905 (modern St Francis Abnaki form).

Moctaeyuhew. A Luiseno village formerly in the neighborhood of San Luis Rey mission, s. Cal.—Taylor in Cal. Farmer, May 11, 1860.

Moqtavhaitaniū (*Moqta'vhitā'nin*, 'black men,' i. e. Ute; sing. *Moqta'vhitā'n*).

A band of the Cheyenne, possibly of mixed Ute descent. (J. M.)

Möhk ta hwa tan in.—Grinnell, Social Org. Cheyennes, 136, 1905 (misprint in *101010*). **Ute.**—Dorsey in Field Columb. Mus. Pub. no. 103, 62, 1905.

Moquats (*Mo'-quats*). A band of Paiute formerly living near Kingston mt., s. e. Cal.—Powell in Ind. Aff. Rep. 1873, 51, 1874.

Moquelumnan Family (adapted from Moquelumne, a corruption of the Miwok *Wakatumitoh*, the name of a river in Calaveras co., Cal.). A linguistic family, established by Powell (7th Rep. B. A. E., 92, 1891), consisting of three divisions, the Miwok, the so-called Olamentke, and the Northern or Lake County Moquelumnan. The territory originally occupied was in three sections, one lying between Cosumnes and Fresno rs.; another in Marin, Sonoma, and Napa cos., the territory extending along the coast from the Golden Gate to Salmon cr., n. of Bodega bay and e. as far as the vicinity of Sonoma; and the third a comparatively small area in the s. end of Lake co., extending from Mt. St. Helena northward to the e. extremity of Clear lake (see Kroeber in Am. Anthropol., VIII, no. 4, 1906). The Miwok division, which constituted the great body of the family, was described as late as 1876 as the largest Indian group of California, both in population and in extent of territory.

Their houses were very rude, those of the Miwok having been simply frameworks of poles and brush, which in winter were covered with earth. In the mountains cone-shaped summer lodges of puncheons were made. Acorns, which formed their principal food, were gathered in large quantities when the harvest was abundant and stored for winter use in granaries raised above the ground. It has been asserted that the Miwok ate every variety of living creature indigenous to their territory except the skunk. They were especially fond of jackrabbits, the skins of which were rudely woven into robes. From lack of cedar they purchased bows and sometimes arrows from the mountain Indians, the medium of barter being shell money.

With the Miwok, chiefship was hereditary when the successor was of commanding influence, but this was seldom the case. As with most of the tribes of California, marriage among the Miwok tribes was practically by purchase, but in return for the presents given by the groom the father of the bride gave the new couple various substantial articles, and gifts of food were often continued by the parents for years after the marriage. The father, in old age, was ill treated, however, being little else than a slave to his daughter and her husband. When twins were born one of the children was killed. Shamanistic

rites were performed by both men and women, and scarification and suction were the principal remedial agents. California balm of gilead (*Picea grandis*), and plasters of hot ashes and moist earth were also used in certain cases. Payment for treatment was made by the patient, and in case of non-recovery the life of the practitioner was demanded. The acorn dance, as well as a number of other ceremonies, principally for feasting or amusement, were formerly celebrated by the Miwok. They had no puberty dance, nor did they hold a dance for the dead, but an annual mourning and sometimes a special mourning were observed. All the possessions of the dead were burned with them, their names were never afterward mentioned, and those who bore the same name changed it for others. Formerly widows generally covered their faces with pitch and the younger women singed their hair short as signs of widowhood. Cremation generally prevailed among the Miwok tribes, but was never universal.

Comparatively few of the natives of the Miwok division of this stock survive, and these are scattered in the mountains, so that no accurate census has been taken. Six individuals of the so-called Olamentke division lived on Tomales bay in 1888.

The Moquelumnan tribes or rancherias that have been recognized are as follows:

Miwok.—Awani, Chowchilla, Chumidok, Chumtiya, Chumuch, Chumwit, Hittoya, Howeches, Koni, Lopotatimni, Machemni, Mokelumne, Newichumni, Nuchu, Olowit, Olowiya, Pohonichi, Sakaikumne, Servushanne, Talatui, Tamoleka, Tumidok, Tumun, Walaikumni, Yuloni.

Olamentke.—Bolas, Chokuyem, Guimen, Jukiusme, Likatuit, Nicassias, Numpali, Olumpali, Sonomi, Tamal, Tulares, Tumalehnias, Utechium.

Tribes or rancherias not classified according to the chief divisions are Apangasi, Aplache, Chupumni, Cosumni, Cotoplanemis, Hokokwito, Keeches, Kumaini, Lapapu, Lesamaiti, Macheto, Merced, Mikechuses, Nelcelchumnee, Notomidula, Numaltachi(?), Okechumne, Pahkanu, Petaluma, Potawackati, Potoyanti, Sakaya, Seantre, Siyante, Succaah, Suscols, Threse, Tiposies, Wahaka, and Wiskala.

La.*, n. s., 243, 1869. **Mucoço**.—Garcilasso de la Vega, *Fla.*, 28, 1723.

Moqwaio ('wolf'). A phratry and also a subphratry or gens of the Menominee. **Ma'hawaw**.—Wm. Jones, *inf'n*, 1906. **Moqwaio**.—Hoffman in 14th Rep. B. A. E., pt. 1, 42, 1896.

Mora. A rancheria near the presidio of La Bahía and the mission of Espíritu Santo de Zúñiga on the lower Rio San Antonio, Tex., in 1785, at which date it had 26 inhabitants (Bancroft, *No. Mexican States*, I, 659, 1886). The people were probably of Karankawan affinity.

Moratiggon. The village where Samoset lived in 1621. It was distant "one day from Plymouth by water with great wind, and five days by land." Probably in s. Maine, in Abnaki or Pennacook territory.

Moratiggon.—Harris, *Voy. and Trav.*, I, 853, 1705. **Moratiggon**.—Mourt (1621) in *Mass. Hist. Soc. Coll.*, 1st s., VIII, 226, 1802.

Moratoc. A tribe described in 1586 as living 160 m. up Roanoke r., perhaps near the s. Virginia line. A map of that period places their village on the n. side of the river, which then bore their name. They are said to have been an important tribe which refused to hold intercourse with the English.

Moratoco.—Simons in Smith (1629), Va., I, 176, repr. 1819. **Moratocks**.—Lane (1586), *ibid.*, 87. **Moratoks**.—*Ibid.* **Moratuck**.—Smith (1629), *ibid.*, map.

Moraughtacund. A tribe of the Powhatan confederacy, formerly living on the n. bank of the Rappahannock, in Lancaster and Richmond cos., Va. In 1608 they numbered about 300. Their principal village, of the same name, was near the mouth of Moratico r. in Richmond co. (J. M.)

Moranghtacouna.—Smith (1629), Va., I, map, repr. 1819 (the village; evidently a misprint for Moraughtacund). **Moratoco**.—Purchas, *Pilgrimes*, IV, 1713, 1626. **Moraughtacud**.—*Ibid.*, 1715. **Moraughtacunds**.—Strachey (*ca.* 1612), Va., 37, 1849.

Moravians. Mahican, Munsee, and Delawares who followed the teachings of the Moravian brethren and were by them gathered into villages apart from their tribes. The majority were Munsee. In 1740 the Moravian missionaries began their work at the Mahican village of Shekomeko in New York. Meeting with many obstacles there, they removed with their converts in 1746 to Pennsylvania, where they built the new mission village of Friedenshuetten on the Susquehanna. Here they were more successful and were largely recruited from the Munsee and Delawares, almost all of the former tribe not absorbed by the Delawares finally joining them. They made another settlement at Wyalusing, but on the advance of the white population removed to Beaver r. in w. Pennsylvania, where they built the village of Friedensstadt. They remained here about a year, and in 1773 removed to Muskingum r. in Ohio, in the neighborhood of the others of their tribes, and occupied the three villages of Gnadenhuetten, Salem, and Schoenbrunn. In 1781, during the border troubles of the Revolution, the Hurons removed them to the region of the Sandusky and Scioto, in N. Ohio, either to prevent their giving information to the colonists or to protect them from the hostility of the frontiersmen. The next spring a party of about 140 were allowed to return to their abandoned villages to gather their corn, when they were treacherously attacked by a party of border ruffians and the greater part massacred in the most cold-blooded manner, after which their villages were burned. The remaining Moravians moved to Canada in 1791, under the leadership of Zeisberger, and built the village of Fairfield on Retrenche r. Here a number were massacred by the whites in 1812. They finally settled on the Thames in Orford tp., Kent co., Ontario. The number in 1884 was 275, but had increased in 1906, according to the Canadian official report, to 348. There were until recently a few in Franklin co., Kans. See *Missions*. (J. M. C. T.)

Big Beavers.—Rupp, *W. Pa.*, 47, 1846 ("Christian Indians or Big Beavers," because of their residence about 1770 on (Big) Beaver cr. in W. Pa.), *Christian Indians*.—Schoolcraft, *Ind. Tribes*, V, 495, 1855 (frequently used as synonymous with

Munsee, but properly refers only to those of the tribe under Moravian teachers). **Moravins.**—*Can. Ind. Aff.*, pt. 2, 65, 1906 (misprint).

Morbah (*Mor-bäh*). The Parrot clan of the Pecos people of N. Mex.—Hewett in *Am. Anthropol.*, vi., 439, 1904.

Morbanas. A former tribe, probably Coahuiltecan, met in 1693 on the road from Coahuila to mission San Francisco, Texas.—*Salinas* (1693) in *Dictamen Fiscal*, Nov. 30, 1716, MS. cited by H. E. Bolton, *inf'n*, 1906.

Morongo. A reservation of 38,600 acres of fair land, unpatented, in Riverside co., s. Cal., occupied by 286 Mission Indians under Mission Tule River agency.—*Ind. Aff. Rep.*, 175, 1902; *ibid.*, 192, 1905; Kelsey, *Rep.*, 32, 1906.

Mortars. Utensils employed by Indian tribes for the trituration of food and other substances. The Southwestern or Mexican type of grinding stone is known as a metate, and its operation consists in placing the substance to be treated, dry or moist, on the sloping upper surface of the slab and crushing and rubbing it with a flattish hand-stone until it is reduced to the required consistency or degree of fineness (see *Metates*, *Mullers*). This form of the utensil passes with many variations in size and shape into the typical mortar, a more or less deep receptacle in which the substance is pulverized if dry, or reduced to pulp if moist, by crushing with a pestle, which may be cylindrical, discoidal, globular, or bell-shaped. Mortars are made of stone, wood, bone (whale vertebrae), or improvised of rawhide or other substances depending on the region and the materials nearest at hand. The more primitive stone forms are boulders or other suitable pieces hol-

ished, the stone in some cases, as in s. California, being obtained by quarrying from the rock in place. California fur-

GLOBULAR STONE MORTARS FROM AURIFEROUS GRAVELS, CALIFORNIA. (HOLMES)

nishes the greatest variety of these utensils. In one district globular concretions were used: a segment of the shell was broken away and the softer interior removed, thus affording a deep symmetrical receptacle. In other localities cylindrical forms were worked out of lava or sandstone. In others still, the

ALASKAN MORTAR WITH SCULPTURED ORNAMENT; 1-12.

conical, so as to be conveniently set in the ground. Ordinary mortars when in use are usually set in the ground to give them greater stability. The remarkable and handsome sandstone vessels and soapstone pots of s. California are not here classed as mortars. Occasionally the smaller mortars were embellished with

YOKUTS WOMEN GRINDING SEED. (SANTA FE RAILROAD)

engraved lines or sculptured to represent animal forms. Alaskan mortars, especially those of the Haida, are superior in this respect. An artistic mortar of this class, illustrated by Niblack, was used for pulverizing tobacco, and this is a type in very general use among the Northwestern tribes at the present time.

Perhaps the most remarkable mortars are those occurring frequently in the acorn-producing districts of the Pacific slope, where exposures of massive rock in place have worked in them groups of mortars, the conical receptacles numbering, in several observed cases, nearly a

SIMPLE FORMS OF STONE MORTARS. *a* CALIFORNIA (1-8); *b*, RHODE ISLAND (1-8)

lowed out on the upper surface sufficiently to hold the material to be reduced, while the more highly specialized forms are tastefully shaped and carefully fin-

hundred. Some of the Western tribes set a conical basket, after removing its bottom, within the rim of the mortar bowl to serve as a hopper for retaining the meal.

GROUP OF MORTARS IN GRANITE SURFACE, CALIFORNIA (HOLMES)

Primitive forms of this utensil are the rawhide mortars used by the Plains tribes for pounding pemmican, the piece of rawhide being forced into a depression in the ground, forming a basin. Again, the hide was placed beneath the stone or wooden mortar to catch the particles that fell over. The rough basket-like receptacle of sticks set in the ground by the Yuman tribes of lower Colorado r. is probably the rudest known form of this utensil. In

STONE MORTAR WITH BASKET HOPPER; CALIFORNIA

HUPA MORTAR WITH BASKET HOPPERS. (MASON)

size stone mortars vary from that of the tiny paint cup found among the toilet articles of the warrior to the substantial basin holding several gallons. The larger ones, especially those excavated in rock masses, were probably often used for "stone-boiling." (See *Food*.)

SMALL PAINT MORTAR, HUPA; 1-7 (MASON)

The substances pulverized in mortars were the various minerals used for paint, potsherds and shells for tempering clay, etc., medicinal and ceremonial substances

of many kinds, including tobacco, and a wide range of food products, as maize, seeds, nuts, berries, roots, bark, dried meats, fish, grasshoppers, etc. A noteworthy group of paint mortars or plates, the use of which has heretofore been regarded as problematical, are described under the heading *Notched plates*. The wooden mortar was usually made of a short section of a log, hollowed out at one end and in some cases sharpened at the other for setting in the ground; but the receptacles were sometimes made in the side of a log or were cut out as individual utensils in basin or trough shape. The wooden mortar was in much more general use in districts where suitable stone was not available, as in Florida, in portions of the Mississippi valley, and on lower Colorado r. Among the remarkable

WOODEN MORTAR, COCOPA

WOODEN MORTAR, CHIPPEWA; 1-16. (HOFFMAN)

archeologic finds made by Cushing at Key Marco, Fla., are a number of small cup-like mortars with mallet-shaped pestles, handsomely formed and carefully finished.

ANCIENT WOODEN MORTAR, FLORIDA; 1-4. (CUSHING)

WOODEN MORTAR, IROQUOIS (LAFITAU)

Speaking of the Indians of Carolina, Lawson says: "The savage men never beat their corn to make bread, but that is the women's work, especially the girls, of whom you shall see four beating with long great pestles in a narrow wooden mortar; and everyone keeps her stroke so exactly that 'tis worthy of admiration."

Mortars are referred to by numerous writers, including Abbott (1) in *Surveys West of 100th Merid.*, vii, 1879, (2) *Prim. Indus.*, 1881; Cushing in *Proc. Am. Philos. Soc.*, xxxv, 153, 1896; Fowke, *Archæol. Hist. Ohio*, 1902; Hoffman in *14th Rep. B. A. E.*, 1896; Holmes in *Nat. Mus. Rep.* 1902, 1903; Jones, *Antiq. So. Inds.*, 1873; Lawson (1701), *Hist. Car.*, repr. 1860; MacCauley in *5th Rep. B. A. E.*, 1887; Meredith in *Moorehead's Prehist. Impls.*, 1900; Morgan, *League of Iroquois*, 1904; Niblack in *Rep. Nat. Mus.* 1888, 1890; Nordenskiöld, *Cliff Dwellers of the Mesa Verde*, 1893; Powers in *Cont. N. A. Ethnol.*, iii, 1877; Rau in *Smithson. Cont.*, xxii, 1876; Schoolcraft, *Ind. Tribes*, i, 1851; Thruston, *Antiq. of Tenn.*, 1897; Yates in *Moorehead's Prehist. Impls.*, 1900. (w. h. h.)

Mortuary customs. Yarrow (1st Rep. B. A. E., 1881) classifies Indian modes of burial as follows:

(1) Inhumation, (2) Embalment, (3) Deposition in urns, (4) Surface burial, (5) Cremation, (6) Aerial sepulture, (7) Aquatic burial. As the second relates to the preparation of the body, and the third, fourth, sixth, and seventh refer chiefly to the receptacles or the place of deposit, the disposal of the dead by the Indians may be classed under the heads *Burial and Cremation*.

The usual mode of burial among North American Indians has been by inhumation, or interment in pits, graves, or holes in the ground, in stone cists, in mounds, beneath or in cabins, wigwams, houses, or lodges, or in caves. As illustrations it may be stated that the Mohawk formerly made a large round hole in which the body was placed in a squatting posture, after which it was covered with timber and earth. Some of the Carolina tribes first placed the corpse in a cane hurdle and deposited it in an outhouse for a day; then it was taken out and wrapped in rush or cane matting, placed in a reed coffin, and deposited in a grave. Remains of this kind of wrapping have been found in some of the southern mounds, and in one case in a rock shelter. The bottom of the grave was sometimes covered with bark, on which the body was laid, and logs or slabs placed over it to prevent the earth from falling on the remains. An ancient form of burial in Tennessee, s. Illinois, at points on Delaware r., and among ancient pueblo dwellers in n. New Mexico, was in box-shape cists of rough stone slabs. Sepulchers of this kind have been found in mounds and cemeteries. In some instances they were placed in the same general direction, but in excavations made by the Bureau of American Ethnology it was found that these cists, as well as the uninclosed bodies in mounds, were gen-

erally placed without regard to uniformity of direction. When uniformity did occur, it was generally an indication of

STONE GRAVE, SHOWING ORDINARY CONSTRUCTION

a comparatively modern interment. The Creeks and the Seminole of Florida generally buried in a circular pit about 4 ft deep; the corpse, with a blanket or cloth wrapped about it, being placed in a sitting posture. The sitting position in ancient burials has often been erroneously inferred from the bones occurring in a heap. It appears to have been a custom in the N. W., as well as in the E. and S.E., to remove the flesh by previous burial or otherwise, and then to bundle the bones and bury them, sometimes in communal pits. It was usual in grave burials to place the body in a horizontal position on its back, although the custom of placing on the side, often with the knees drawn up, was also practised; burial face downward,

STONE GRAVE, TOP VIEW; ILLINOIS. (THOMAS)

STONE GRAVE WITH OFFSET ARCH; IOWA. (THOMAS)

ARCHED STONE GRAVE; OHIO. (THOMAS)

however, was rare. In addition to those mentioned, modes of burials in mounds varied. Sometimes a single body and sometimes several were placed in a wooden vault of upright timbers or of logs laid horizontally to form a pen. Dome-shaped stone vaults occur over a single sitting skeleton. Not infrequently the body was laid on the ground, slightly covered with earth, and over this a layer of plastic clay

BURIAL UNDER HEAP OF STONES; HUDSON BAY ESKIMO. (TURNER)

was spread on which was built a fire, forming an earthen shield over the corpse before additional earth was added. Caverns, fissures in rocks, rock shelters, etc., were frequently used as depositories for the dead. According to Yarrow, a cave near the House mts., Utah, in which the Gosiute Indians were in the habit of depositing their dead, was quite filled with human remains in 1872.

Embalment and mummification were practised to a limited extent; the former chiefly in Virginia, the Carolinas, and

MUMMY FROM AN ALASKAN CAVE. (DALL)

Florida, and the latter in Alaska. Of the modes of disposing of the dead, included by Yarrow under "aerial sepulture," the following are examples: Burial in lodges, observed among the Sioux; these appear to have been exceptional and were merely an abandonment of the dead during an epidemic; a few cases of burial in lodges, however, have been observed in Alabama. Burial beneath the floor of the house and then at once burning the house were practised to some extent in E. Arkansas. Scaffold and tree burial was practised in Wisconsin, Minnesota, the Dakotas, Montana,

URN BURIAL ALABAMA MOUND; 1-22. (MOORE)

DAKOTA SCAFFOLD BURIAL. (YARROW)

etc., by the Chippewa, Sioux, Siksika, Mandan, Grosventres, Arapaho, and other Indians. The burial mounds of Wisconsin indicate this mode of disposing of the dead in former times, as the skeletons were buried after the removal of the flesh, and the bones frequently indicate long exposure to the air. The Eskimo of

the w. coast of Alaska sometimes placed the dead on a platform 2 or 3 ft above ground and built over it a double roofing, or tent, of driftwood. It was also the custom among the Indians of the Lake

DAKOTA TREE BURIAL. (YARROW)

region to have at certain periods what may be termed communal burials, in which the bodies or skeletons of a district were removed from their temporary

DAKOTA SCAFFOLD BURIAL. (YARROW)

burial places and deposited with much ceremony in a single large pit (see Brebeuf in Jes. Rel. for 1636, 128-139, 1858).

On the N. W. coast, n. of Columbiar., the dead were usually placed in little cabin-

shaped mortuary houses, or box-shaped wooden receptacles raised on posts, on the ground, or occasionally in trees, and sometimes in caves, though cremation, except of

BURIAL HOUSES, NORTHWEST COAST TRIBES. (YARROW)

the shamans, was formerly common in this section. The bodies of shamans were placed in small rectangular houses built up of poles; the bones of children were sometimes suspended in baskets. Another method of disposing of the dead is that known as canoe burial, the bodies being deposited in canoes which were placed on posts or in the forks of trees. This

CANOE BURIAL, CHINOOK. (SWAN)

method was practised by the Clallam, Twana, and other tribes of the N.W. coast. Cremation was formerly practised by a number of tribes of the Pacific slope. The ancient inhabitants of s. Arizona practised cremation in addition to house burial, the ashes of the cremated dead being placed in urns; but among the modern Pueblos, especially those most affected by Spanish missionaries, burials are made in cemeteries in the villages.

The ceremonies attending and following burial were various. The use of fire was common, and it was also a very general custom to place food, articles especially prized by or of interest to the dead, and sometimes articles having a symbolic signification, in or near the grave. Scaring the body, cutting the hair, and blackening the face by the mourners were common customs, as, in some tribes, were feasts and dancing at a death or funeral. As a rule the bereaved relatives observed some kind of mourning for a certain period; as cutting the hair, discarding ornaments and neglecting the personal appearance, carrying a bundle representing the husband (among the Chippewa, etc.), or the bones of the dead husband (among some northern Athapaskan tribes), and wailing night and morning in solitary places. It was a custom among some

tribes to change the name of the family of the deceased, and to drop the name of the dead in whatever connection.

New Sweden*, 1834; Jesuit Relations, Thwaites ed., i-LXXII, 1896-1901; Kroeber in *Bull. Am. Mus. Nat. Hist.*, xviii, pt. i, 1902; Owen, *Musquakie Folk-lore*, 1904; and the various reports of the B. A. E., especially the 1st Report, containing Yarrow's *Mortuary Customs of the N. A. Indians*, and authorities therein cited. See *Mourning, Religion, Urn Burial*. (c. t.)

Morzhovoi (Russian: 'walrus'). An Aleut village at the end of Alaska penin., Alaska, formerly at the head of Morzhovoi bay, now on the N. shore, on Traders cove, which opens into Isanotski bay. Pop. 45 in 1833 (according to Veniaminof), 68 in 1890.

Morshevoi.—Petroff in 10th Census, Alaska, 19, 1881. **Morshewskoje**.—Holmberg, *Ethnog. Skizz.*, map, 142, 1855. **Morzaivskoi**.—Elliott, *Cond. Aff. Alaska*, 225, 1875. **Morzhevskoe**.—Veniaminof, *Zapiski*, ii, 203, 1840. **Morzovoi**.—Post route map, 1903. **New Morzhovoi**.—Baker, *Geog. Dict. Alaska*, 1902. **Old Morzhovoi**.—Ibid. **Protasso**.—Petroff in 10th Census, Alaska, map, 1884 (strictly the name of the Greek church here). **Protassof**.—Ibid., 23. **Protassov**.—Petroff, *Rep. on Alaska*, 25, 1881.

Mosaic. An art carried to high perfection among the more cultured aborigines of Mexico, where superb work was done, several examples of which enrich European museums. The art was but little in vogue N. of Mexico. Hopi women of to-day wear pendants made of small square or oblong wooden tablets upon which rude turquoise mosaics are set in black piñon gum. These are very inferior, however, to specimens recovered from ancient ruins in the Gila and Little Colorado valleys in Arizona, and in Chaco canyon, N. Mex., which consist of gorgets, ear pendants, and other objects, some of which are well preserved while others are represented only by the foundation form surrounded by clusters of settings loosened by decay of the matrix. Turquoise was the favorite material, but bits of shell and various bright-colored stones were also employed. The foundation form was of shell, wood, bone, and jet and other stone, and the matrix of gum or asphaltum. Although the work is neatly executed, the forms are simple and the designs not elaborate. One of the best examples, from the Little Colorado drainage in Arizona, is a pendant rudely representing a frog, the foundation of which is a bivalve shell, the matrix of pitch, and the settings of turquoise are arranged in lines conforming neatly to the shape of the creature, a bit of red jasper being set in the center of the back (Fewkes). Unfortunately the head of the frog has dis-

integrated. Among the specimens of inlaying obtained by the Hyde Expedition of the American Museum of Natural History, from Pueblo Bonito ruin, N. Mex., are a jet or lignite frog with turquoise eyes and neck-band, a scraper-like implement of deer bone with encircling ornamental bands in turquoise and jet, and a small bird of hematite tastefully set with turquoise and shell (Pepper).

The ancient graves of s. California have yielded a number of specimens of rude mosaic work in which bits of abalone shell are set in asphaltum as incrustations for handles of knives and for other objects (Abbott). Inlaying in other sections of the country consists chiefly of the insertion of bits of shell, bone, or stone separately in rows or in simple figures

INCURSTED OBJECTS FROM PUEBLO BONITO, NEW MEXICO; 1-4. (PEPPER)

in the margins of utensils, implements, masks, etc. (Niblack, Rust).

Consult Abbott in Surv. West of 100th Merid., vii, 1879; Fewkes (1) in Am. Anthropol., ix, no. 11, 1896, (2) in Smithsonian Rep. 1896, 1898, (3) in 22d Rep. B. A. E., 1903; Nelson in 18th Rep. B. A. E., 1899; Niblack in Rep. U. S. Nat. Mus. 1888, 1890; Pepper in Am. Anthropol., n. s., vii, no. 2, 1905; Rust in Am. Anthropol., n. s., viii, no. 4, 1906. (W. H. H.)

Moshaich. The native name of the extinct Buffalo clans of Acoma and Sia pueblos, N. Mex.

Moshaich-hanog^{ch}.—Hodge in Am. Anthropol., ix, 349, 1896 (Acoma form; *hánog^{ch}* = 'people'). *Mu-sha'ch-hano.*—Ibid. (Sia form).

Moshoquen. A village or band apparently on or near the s. coast of Maine in 1616, and probably connected with the Abnaki confederacy. Mentioned by Smith (1616) in Mass. Hist. Soc. Coll., 3d s., vi, 107, 1837. (J. M.)

Moshulitubbee. See *Mushalatubbee*.

Mosilian. A division of the New Jersey Delawares formerly on the E. bank of

Delaware r. about the present Trenton. In 1648 they were estimated at 200.

Masselans.—Sanford, U. S., cxlvi, 1819. **Mosilian.**—Evelin (1648) in Proud, Pa., i, 113, 1797.

Mosookees. Mentioned only by McKenney and Hall (Ind. Tribes, iii, 82, 1854) in a list of tribes; unidentified, but possibly the Muskwaki (Foxes), or the Maskoki or Muskogee (Creeks).

Mosopelea. A problematic tribe, first noted on Marquette's map, where "Mon-soupelea," or "Monsouperca," is marked as an Indian village on the E. bank of the Mississippi some distance below the mouth of the Ohio. In 1682 La Salle found a Mosopelea chief with 5 cabins of his people living with the Taensa, by whom they had been adopted after the destruction of their former village by some unknown enemy.

Mansoleas.—Barcia, Ensayo, 261, 1723. **Mansope-la.**—Douay in Shea, Discovery, 222, 224 (note), 268, 1852. **Mansopelea.**—Hennepin, Cont. of New Discov., 48a, 1698. **Mausalea.**—McKenney and Hall, Ind. Tribes, iii, 81, 1858 (possibly identical). **Medchipouria.**—Iberville (1702) in Margry, Déc., iv, 601, 1880 (same?). **Monsopela.**—Coxe, Carolina, map, 1741. **Monspela.**—Marquette's map in Shea, Discov., 1852. **Monsopela.**—Theyvenot, ibid., 268. **Mosopelea.**—Allouez (1680) in Margry, Déc., ii, 95, 1877. **Mosopelleas.**—Tonti (1683), ibid., i, 610, 1876. **Mosopolca.**—Hennepin, Cont. of New Discov., 310, 1698. **Mosopelea.**—LaSalle (1682) in Margry, Déc., ii, 237, 1877.

Mosquito Indians. A tribe named from its habitat on Mosquito lagoon, E. coast of Florida, N. of C. Cañaveral and behind the sand bar that forms the coast line. During the Seminole war of 1835-42 they became notorious for their ferocity. The Timucua remnant settled in this region in 1706, and the Mosquito Indians may have been their descendants or a mixture of them and Seminole. See Bartram, Travels, 142, note, 1791; Roberts, Florida, 23, 1763; J. F. D. Smyth, Tour, ii, 21, 1784.

Moss-bag. Some of the Athapascan and Cree Indians of extreme n. w. Canada never use cradles for their infants, but employ instead a "moss-bag," made of leather or skin, lined in winter with hare skins. A layer of moss is put in, and upon this is placed the babe, naked and properly secured. "This machine," says Bernard Ross (Smithson. Rep. 1866, 304), "is an excellent adjunct to the rearing of children up to a certain age, and has become almost, if not universally, adopted in the families of the Hudson's Bay Company's employees." Consult also Milton and Cheadle, N. W. Passage, 3d ed., 85, 1865. (A. F. C.)

Motahtosiks (Mo-tah'-tos-iks, 'many-medicines'). A band of the Siksika.—Grinnell, Blackfoot Lodge Tales, 208, 1892.

Motahtosiks. A band of the Piegan. **Conjurers.**—Morgan, Anc. Soc., 171, 1877. **Many Medicines.**—Grinnell, Blackfoot Lodge Tales, 225, 1892. **Mo-tah'-tos-iks.**—Ibid., 209. **Mo-tá'-to-sis.**—Morgan, Anc. Soc. 171, 1878. **Mo-ta'-tôts.**—Hayden, Ethnog. and Philol. Mo., Val., 264, 1862.

Mota's Village. A former Potawatomi village, so called from the chief, just n. of Tippecanoe r., near Atwood, Kosciusko co., Ind. The reservation was sold in 1834.

Motepori. A village of the Opata in 1726, on the Rio Sonora, lat. 30°, n. central Sonora, Mexico (Bandelier in Arch. Inst. Papers, III, 71, 1890). The place is now civilized.

Motsai (possibly from *pä-motsan*, 'a loop in a stream'). A Comanche division, nearly exterminated in a battle with the Mexicans about 1845.

Moochas.—Hazen in Sen. Ex. Doc. 18, 40th Cong., 3d sess., 17, 1869. **Motsai'**.—Mooney in 14th Rep. B. A. E., 1045, 1896. **Müt-shā.**—Butcher and Lyndecher, Comanche MS. vocab., B. A. E., 1867 (trans., 'big noses').

Motwainaks ('all chiefs'). A band of the Piegan division of the Siksika.

All Chiefs.—Grinnell, Blackfoot Lodge Tales, 225, 1892. **Mo-twai'-naiks.**—Ibid., 209.

Mouanast. A village of the Powhatan confederacy in 1608, situated on the n. bank of Rappahannock r., in King George co., Va.—Smith (1629), Va., I, map, repr. 1819.

Mouchaouaouastiirinioek. A Montagnais tribe of Canada in the 17th century.—Jes. Rel. 1643, 38, 1858.

Mouisa. An unidentified tribe or village which according to Douay was found by Tonti in 1682 on or near the lower Mississippi. Cf. *Mosopelea*.

Mouisa.—Le Clercq, First Estab. of the Faith, II, 277, 1882; Shea, Discov. Miss., 226, 1852. **Mousas.**—Barcia, Ensayo, 261, 1723.

Mounds and Mound-builders. The term mounds has been used in America in two different senses as regards the scope intended. By a number of writers it has been applied in a broad sense to include not only the tumuli proper but also various other kinds of ancient monuments. In the more limited sense it refers only to the tumuli, or true mounds, whether of earth or stone. Following the usual custom the term is here used in the broader sense, and hence includes the true mounds, inclosures, walls, embankments, refuse heaps, and other fixed structures.

Although the tumuli are of various forms they may be classed, with few exceptions, as conical tumuli, elongate or wall-like mounds, pyramidal, and effigy or imitative mounds. The conical tumuli are artificial hillocks, not mere accumulations of débris. The form, except where worn down by the plow, is usually that of a low, broad, round-topped cone varying in size from a scarcely perceptible swell in the ground to elevations of 80 or even 100 ft, and from 6 to 300 ft in diameter. Most of the burial mounds are of this type. The elongate or wall-like mounds are earthworks having the appearance of walls, usually from 150 to 300 ft in length, though some are only 50

ft, while others extend to 900 ft. They seem to be confined exclusively to the effigy-mound region.

The typical form of the pyramidal mounds is a truncated quadrangular pyramid; some, however, are circular and a few are irregularly pentagonal, but are distinguished by the flat top. Some have terraces extending outward from one or two sides, and others a ramp or roadway leading up to the level surface. The sharp outlines showing the true form have been more or less obliterated in most instances.

The so-called effigy mounds are those representing animal forms, and with a few notable exceptions are confined to Wisconsin and the immediately adjoining

PLATFORM MOUND, MISSOURI; 150 FT. LONG, 25 FT. HIGH. (THOMAS)

SERPENT MOUND, OHIO. LENGTH OF WORK, 500 FT. (HOLMES)

states. The exceptions are two in Ohio, including the noted Serpent mound, and two bird mounds in Georgia. They vary in length from 50 to 500 ft, and in height from a few inches to 4 or 5 ft.

The conical mounds are sometimes composed of earth and stones intermingled, and in a few cases are wholly of stones;

CONICAL MOUNDS, MISSISSIPPI; HEIGHT 80 FT. (THOMAS)

they are also, as a rule, depositories of the dead, but burials also occur in the pyramidal mounds, although the flat-topped structures were usually the sites for buildings, as temples, council houses, and chiefs' dwellings. Burials were rarely made in the wall-like or the effigy mounds. As a rule no special order pre-

vailed in the arrangement of mounds in groups, but some exceptions occur, as, in the effigy-mound region, the small conical mounds are sometimes arranged in regular lines, somewhat evenly spaced and occasionally connected by low embankments; and in Calhoun co., Ill., and N. E. Minnesota they were frequently built in rows. Although a few mounds have been observed on the Pacific slope, N. of Mexico, they are limited chiefly to the Mississippi basin and the Gulf states, the areas of greatest abundance being along the banks of the Mississippi from La Crosse, Wis., to Natchez, Miss., the central and s. sections of Ohio and the adjoining portion of Indiana, and s. Wisconsin. The E. side of Florida is well dotted with shell-heaps.

Inclosures include some of the most important and interesting monuments of the United States. In form they are circular, square, oblong, octagonal, or irregular. Those which approach regularity in figure are either circular, square, or octagonal, and with few exceptions are found in Ohio and the adjoining portions of Indiana, Kentucky, and West Virginia. These works vary in size from an area of less than an acre to that of more

instances vary less than 10 ft in 1,000 ft, and the corners of the square in one or two other examples vary less than one degree from 90°.

In s. E. Missouri and in one or two other sections the inclosures have scattered through them small earthen circles marking the sites of circular dwellings. There are indications that some at least of the Ohio inclosures contained similar circles which were obliterated by cultivation.

Another important class of ancient monuments are the refuse or shell heaps found along tidewater and at a few points on the banks of inland streams and lakes, and the mound-like heaps which cover the ruined pueblo dwellings of the S. W. Many hundreds of the mounds and many of the refuse heaps have been opened and their contents examined. Although one or two artifacts, especially certain copper plates with stamped figures, have been discovered which are difficult to account for, the contents otherwise present nothing inconsistent with the conclusion that they are the works of the Indians who inhabited these regions prior to the advent of the whites. It has been contended that many of the artifacts found in the mounds indicate a higher degree of culture than that reached by the later Indians of the mound area. After excluding those derived from the whites or otherwise introduced, this is found to be a mistake, as it appears from the evidence that the historic Indians could and did make articles similar in type and equal in finish to those of the mounds. Some of the articles found show contact with Europeans, and hence indicate that the mounds in which they were discovered are comparatively modern. Notwithstanding these facts and many others tending to the same conclusion, it was maintained by the majority of writers on American archeology, until very recently, that the builders of the mounds of the Mississippi basin and the Gulf states were a specific people of higher culture than the Indians found inhabiting this region; that they were overrun by incoming Indian hordes and finally became extinct, leaving the monuments as the only evidence of their former existence. Other writers suppose that they were Mexicans (Aztec) who were driven s. into Mexico, while others concluded that they were driven into the Gulf states and were the ancestors of the tribes inhabiting that section. The more careful exploration of the mounds in recent years, and the more thorough study of the data bearing on the subject, have shown these opinions to be erroneous. The articles found in the mounds and the character of the various monuments indicate a culture stage much

MOUND WITH MOAT AND ENCIRCLING WALL, WEST VIRGINIA; DIAM. 100 FT. (THOMAS)

OBLONG INCLOSURE WITH MOAT; WEST VIRGINIA; LENGTH 287 FT. (THOMAS)

than 100 acres. Some are exceedingly interesting because of the near approach they make to true geometrical figures. The diameters of the circle in one or two

the same as that of the more advanced tribes found inhabiting this region at the advent of the whites. Moreover, European articles found in mounds, and the statements by early chroniclers, as those of De Soto's expedition, prove beyond question that some of these structures were erected by the Indians in post-Columbian times. The conclusion, reached chiefly through the investigations of the Bureau of American Ethnology, and now generally accepted, is that the mound builders were the ancestors of the Indians found inhabiting the same region by the first European explorers. The dearth of mounds east of the Allegheny mts., N. of Tennessee and North Carolina, seems to mark the mountain range along this stretch as a prehistoric boundary line. This would seem to indicate that the mound builders did not enter their territory from the Atlantic coast N. of North Carolina. The few ancient structures in New York

are now conceded to be Iroquoian, but the particular tribes or groups to which the other mounds are attributable can not always be stated with certainty. It is known that some of the tribes inhabiting the Gulf states when De Soto passed through their territory in 1540-41, as the

Yuchi, Creeks, Chickasaw, and Natchez, were still using and probably constructing mounds, and that the Quapaw of Arkansas were also using them. There is likewise documentary evidence that the "Texas" tribe still used mounds at the end of the 17th century, when a chief's house is described as being built on one (Bolton, inf'n, 1906). There is also sufficient evidence to justify the conclusion that the Cherokee and Shawnee were mound builders. No definite conclusion as to what Indians built the Ohio works has yet been reached, though it is believed that they were in part due to the Cherokee who once inhabited eastern Ohio. According to Miss Fletcher, the Winnebago build miniature mounds in the lodge during certain ceremonies.

The period during which mound building N. of Mexico lasted can not be determined with certainty. That many of the mounds were built a century or two before the appearance of the whites

is known from the fact that when first observed they were covered with a heavy forest growth. Nothing, however, has been found in them to indicate great antiquity, and the present tendency among archeologists is to assign them to the period subsequent to the beginning of the Christian era.

For the literature of the mounds consult the bibliography under *Archeology*; see also Thomas, (1) Catalogue Prehist. Works E. of Rocky Mts., Bull. B. A. E., 1891, (2) in 12th Rep. B. A. E., 1894, and authorities therein cited. See also *Antiquity, Archeology, Cahokia Mound, Elephant Mound, Etowah Mound, Fort Ancient, Fortifications, Grave Creek Mound, Newark Works, Popular fallacies, Serpent Mound, Shell-heaps.* (C. T.)

Mountain Crows. A name applied to the Crows who hunted and roamed in the mountains away from upper Missouri. They separated from the River Crows about 1859.

Essapookoon.—Henry, MS. vocab., B. A. E., 1808 (Sihasapa name). **Mountain Crows.**—Pease in Ind. Aff. Rep. 1871, 420, 1872. **Skois'chint.**—Giorda. Kalispelm Dict., pt. 2, 81, 1879 (Kalispelm name).

Mountain Lake. Officially mentioned as a body of 800 Indians under the Eastern Oregon (Dalles) agency in 1861. The name dropped

out of use after 1862, and they have not been identified. See Ind. Aff. Rep., 220, 1861; Taylor in Cal. Farmer, June 12, 1863.

Mountain Snakes. A name used by Ross (Fur Hunters, I, 250, 1855) for some of the northern Shoshoni; otherwise unidentified.

Mount Pleasant. A former Yuchi town in S. E. Georgia, on Savannah r., probably in Screven co., near the mouth of Brier cr.

Mourning. Mourning customs vary in different tribes, but there are certain modes of expressing sorrow that are common to all parts of the country, and indeed to all parts of the world, as wailing, discarding personal ornaments, wearing disordered garments, putting clay on the head and sometimes on the joints of the arms and legs, and the sacrifice of property. Other practices are widespread, as shedding one's blood by gashing the arms or legs, cutting off joints of the fingers, unbraiding the hair, cutting off locks and throwing them on the dead or into the grave, and blackening the face or

BIRDSEYE VIEW OF CAHOKIA MOUND, ILLINOIS. GREATEST LENGTH, ABOUT 1,000 FT.

body. These signs of mourning are generally made immediately at the death, and are renewed at the burial and again when the mourning feast takes place.

In some tribes it is customary when anyone dies for a priest or other respected person to stand outside the dwelling in which the deceased lies and, with hand uplifted, proclaim in a loud voice to the spirits of the kindred that their kinsman has started on his way to join them; meanwhile swift runners speed through the tribe, spreading the news of the death among the living.

More or less ceremony usually attends the preparation of the body for burial. Among the Hopi wailing takes place during the washing of the body. In some tribes the characteristic tribal moccasin must be put on the feet of the dead by a member of a certain clan, in order that the kindred may be safely reached. In others the face must be ceremonially painted for the journey and the best clothing put on, so that the dead may go forth properly attired and honored. Personal belongings are placed with the corpse. On the N. W. coast, after the body has been arrayed it is propped up at the rear of the house and surrounded by the property, and the relatives and mourners pass by the remains in token of respect. The conventional sign of mourning among the Salish, according to Hill-Tout, is the severing of the hair of the surviving relatives, who dispose of it in various ways according to the tribe—by burning it to prevent its falling into the hands of a sorcerer; by burying it where vegetation is dense, thus insuring long life and strength; by putting it away for final burial at their own death; by casting it into running water, and by fastening it to the branches on the eastern side of a red-fir tree. Among the Hopi wailing is confined to the day of the death and to anniversaries of that event. When a number die from an epidemic a date is officially fixed for the mourning anniversary, and this is kept even when it intercepts a festival or other rite. Professional mourners are employed among the Zuñi, Hopi, Mohave, and neighboring tribes. The observance of the anniversary of a death is common. Among some tribes it is observed with great ceremony; in all cases the guests are served with food, and gifts are made to them in honor of the dead. There are differences observed in mourning for a man or a woman and for an adult or a child. Among the Dakota the widow passed around the circle of the tribe, each circuit standing for a promise to remain single during a year. The general sign of widowhood is loosening the hair and cutting it short in a line with the ears. It was the wife's duty to light a

fire for four nights on her husband's grave and watch that it did not die out before dawn. She had to wail at sunrise and sunset, eat little, and remain more or less secluded. The length of her seclusion varied in different tribes from a few weeks or months to two years. At the expiration of the period relatives of her former husband brought her gifts and bade her return to her former pleasures. She was then free to marry again. In some tribes wives, slaves, or horses and dogs were formerly slain at the death of a man, for it was the general belief that relations of all kinds which were maintained on earth would continue in the dwelling place of spirits.

It was usual for the tribe to abstain from festivities when a death occurred in the community. The various societies omitted their meetings, and general silence was observed. In some tribes all the people wailed at sunrise and sunset. Where these general observances of sorrow were the custom, the mourners were visited by the leading men a few days after death, when the pipe was offered, and after smoking, the family of the deceased gave a feast, a signal for the tribe to resume its wonted pleasures.

The black paint that was put upon men, women, and children of some tribes as a sign of mourning might not be washed off, but must be worn until it disappeared by some other means. The announcement of the mourning feast was generally made in a formal way at the close of the burial ceremony. Among most of the Plains tribes black paint was a sign of victory and mourners refrained entirely from paint or other adornment.

The customs of mourning seem to have a twofold aspect—one relating to the spirit of the deceased, the other to the surviving relatives and friends. This dual character is clearly revealed in a custom that obtained among the Omaha and cognate tribes: On the death of a man or a woman who was respected in the community, the young men, friends of the deceased, met at a short distance from the lodge of the dead and made two incisions in their left arms so as to leave a loop of skin. Through this loop was passed a small willow twig, with leaves left on one end; then, with their blood dripping upon the willow leaves, holding a willow stem in each hand, they walked in single file to the lodge, and, standing abreast in a long line, they sang there the tribal song to the dead, beating the willow stems together to the rhythm of the song. At the sound of the music, a near relative came forth from the lodge and, beginning at one end of the line, pulled out the blood-stained twigs from the left arm of each singer, and laid a hand on

his head in token of thanks for the sympathy shown. The song continued until the last twig was thrown to the ground. The music of the song was in strange contrast to the bloody spectacle. It was a blithe major melody with no words, but only breathing vocables to float the voice. According to the Indian explanation the song was addressed to the spirit, bidding it go gladly on its way; the blood shed was the tribute of sorrow—grief for the loss of a friend and sympathy for the mourners. The same idea underlies the Omaha custom of ceasing the loud wail at the close of the burial ceremonies lest the sound make it harder for the spirit who must go to leave behind its earthly kindred. See *Mortuary customs*. (A. C. F.)

Mous (*Mos*, 'moose'). A gens of the Chippewa, q. v.

Mos.—Gatschet, Chippewa MS., B. A. E., 1882. **Mos.**—Wm. Jones, inf'n, 1906. **Moons.**—Tanner, Narrative, 314, 1830. **Mous.**—Warren (1852) in Minn. Hist. Soc. Coll., v, 45, 1885.

Mousonee (*Mosone*, 'moose'). A phratry of the Chippewa (q. v.). The Mous (Moose) gens is one of its leading gentes, as is also the Waubishashe (Marten). Warren calls the phratry the Waubishashe group. (J. M.)

Gens de Original.—Dobbs, Hudson Bay, 33, 1744 (same?). **Monsonie.**—Warren in Minn. Hist. Soc. Coll., v, 44, 1885 (misprint?). **Mosoné.**—Wm. Jones, inf'n, 1906. **Monsoni.**—Dobbs, Hudson Bay, 33, 1744 (same?). **Mosonique.**—Ibid. (same?) **Mous-o-neeg.**—Warren in Minn. Hist. Soc. Coll., v, 60, 1885.

Movas. A former Nevome pueblo and the seat of the mission of Santa Maria, founded in 1622; situated on one of the s. tributaries of the Rio Yaqui, lat. 28° 10', lon. 109° 10', Sonora, Mexico; pop. 308 in 1678, and 90 in 1730. Its inhabitants, known as Mova, or Moba, from the name of their settlement, probably spoke a dialect differing slightly from Nevome proper. (F. W. H.)

Concepcion Mobas.—Sonora Materiales (1730) quoted by Bancroft, No. Mex. States, I, 514, 1884. **Mobas.**—Zapata (1678) in Doc. Hist. Mex., 4th s., III, 361, 1857. **Movas.**—Rudo Ensayo (ca. 1762), 124, 1863. **Santa Maria Mobas.**—Zapata, op. cit., 360.

Movwiats (*Mo-wwi'-ats*). A Paiute band formerly living in s. e. Nevada; pop. 57 in 1873.

Mo-wwi'-ats.—Powell in Ind. Aff. Rep. 1873, 50, 1874. **Mowi'-ats.**—Gatschet in Wheeler Surv. Rep., VII, 410, 1879.

Mowhawa (*Mahwāwā*, 'wolf.'). A gens of the Miami, q. v.

Ma'hwāwā.—Wm. Jones, inf'n, 1906. **Mo-wah'-wā.**—Morgan, Anc. Soc., 168, 1877.

Mowhawissouk (*Ma'hwāwisōwig*, 'they go by the name of the wolf.'—W. J.). A gens of the Sauk and Foxes. See *Sauk*. **Ma'hwāwisōwig.**—Wm. Jones, inf'n, 1906. **Mo-wah'-wis'-so-uk.**—Morgan, Anc. Soc., 170, 1877.

Mowkowk. See *Mocuck*.

Moxus. A chief of the Abnaki, called also Agamagus, the first signer of the treaty of 1699, and seemingly the successor of Madokawando (Drake, Inds. of N. Am.,

294, 1880). He signed also the treaty with Gov. Dudley in 1702, but a year afterward unsuccessfully besieged the English fort at Casco, Me. He treated with the English in 1713, and again in 1717. It was he who in 1689 captured Pemauqid from the English. (A. F. C.)

Moyawance. A tribe living in 1608 on the n. bank of the Potomac, about Prince George co., Md. Their principal village; of the same name, was about Broad cr. They numbered about 400, but their name drops from history at an early date. They were probably a division of the later Conoy.

Moyaones.—Smith (1629), Va., II, 86, repr. 1819. **Moyaones.**—Bozman, Md., I, 119, 1837. **Moyaones.**—Simons in Smith (1629), Va., I, 177, repr. 1819. **Moyaones.**—Ibid., map. **Moyawance.**—Ibid., 118. **Moyaones.**—Strachey (ca. 1612), Va., 38, 1849. **Moyowahoes.**—Macaulay, N. Y., II, 168, 1829. **Moyawance.**—Bozman, Md., I, 139, 1837.

Moytoy. A Cherokee chief of Tellico, Tenn., who became the so-called "emperor" of the seven chief Cherokee towns. Sir Alexander Cuming, desirous of enlisting the Cherokee in the British interest, decided to place in control a chief of his own selection. Moytoy was chosen, the Indians were induced to accept him, giving him the title of emperor; and, to carry out the program, all the Indians, including their new sovereign, pledged themselves on bended knees to be the faithful subjects of King George. On the next day, April 4, 1730, "the crown was brought from Great Tennessee, which, with five eagle-tails and four scalps of their enemies, Moytoy presented to Sir Alexander, empowering him to lay the same at His Majesty's feet." Nevertheless, Moytoy afterward became a bitter enemy of the whites, several of whom he killed without provocation at Sitico, Tenn. See Mooney in 19th Rep. B. A. E., pt. 1, 1900.

Mozeemlek. A problematic people who, according to Lahontan, dwelt somewhere in the region of w. Dakota or Wyoming, in 1700. They wore beards, were clothed like the whites, had copper axes, and lived on a river which emptied into a large salt lake.

Mozeem-lek.—Vaugondy, map, 1778. **Mozamleeks.**—Featherstonhaugh, Canoe Voy., I, 280, 1847. **Mozeemlek.**—Lahontan, New Voy., I, 125, 1703. **Mozeemlek.**—Ibid., 119. **Mozeemlek.**—Barcia, Ensayo, 297, 1723. **Mozeemleeks.**—Harris, Voy. and Trav., II, 920, 1705.

Mriksah. The eldest son of Canonicus, the celebrated Narraganset chief; known also as Mexam, Mixam, Mixanno, and Meika. After the death of his father in 1647 he was made chief sachem of the tribe. He married a sister of Ninigret, who was the noted Quaiapen, called also Old Queen, Sunk Squaw, and Magnus (q. v.). Mriksah was one of the sachems to whom the English commissioners at Boston sent interrogations regarding their

connection with the Dutch of New York. He was in close relations with Ninigret in his movements. (c. r.)

Msepase (*Mëshpëshî*, 'big lynx.'—W. J.). A gens of the Shawnee, q. v.

Meshipeshi.—Win. Jones, inf'n, 1906. *M'-se'-pase*.—Morgan, Anc. Soc., 168, 1877. *Panther*.—Ibid.

Muanbissek. Mentioned in a letter sent by the Abnaki to the governor of New England in 1721 as one of the divisions of their tribe. Not identified.

Muayu. The Yaudanchi name of a village site on Tule r., Cal.; also known as Chesheshim. It is not the name of a tribe, as stated by Powers.

Chesheshim.—A. L. Kroeber, inf'n, 1903. *Mai-ai'-u*.—Powers in Cont. N. A. Ethnol., III, 370, 1877. **Muayu**.—A. L. Kroeber, inf'n, 1906.

Muchalat. A Nootka tribe on Muchalat arm of Nootka sd., w. coast of Vancouver id.; pop. 62 in 1906. Their principal village is Cheshish.

Match-clats.—Mayne, Brit. Col., 251, 1862. *Match-it-lah*.—Can. Ind. Aff. 1884, 186, 1885. *Michalits*.—Armstrong, Oregon, 136, 1857. *Mich-la-its*.—Jewitt, Narr., 36, 1849. *Mô'telath*.—Boas in 6th Rep. N. W. Tribes Can., 31, 1890. **Muchalaht**.—Brit. Col. map, 1872. **Muchlaht**.—Sproat, Sav. Life, 308, 1868.

Muckawis. A name of the whippoorwill. Wordsworth has the "melancholy *muckawis*" in his poem *The Excursion*. Carver (Travels, 468, 1778) writes, "the whippoorwill, or, as it is termed by the Indians, the *muckawiss*." This onomatopœic word is probably of Algonquian origin. It occurs as *muckkowheesce* in Stiles' Pequot vocabulary of 1762 (Trumbull, Natick Dict., Bull. 25, B. A. E., 1903). (A. F. C.)

Muertos (Span.: El Pueblo de los Muertos, 'the village of the dead'). A group of prehistoric ruined pueblos 9 m. s. e. of Tempe, in the Salt River valley, Ariz.—Cushing in *Compte-rendu Internat. Cong. Am.*, VII, 162, 1892.

Los Muertans.—Cushing, *ibid.*, 168 (referring to the former inhabitants).

Mugg. An Arosaguntacook chief in the latter half of the 17th century, conspicuous in the war beginning in 1675, into which he was drawn by the ill-treatment he received from the English. With about 100 warriors he made an assault, Oct. 12, 1676, on Black Point, now Scarborough, Me., where the settlers had gathered for protection. While the officer in charge of the garrison was parleying with Mugg, the whites managed to escape, only a few of the officers' servants falling into the hands of the Indians when the fort was captured; these were kindly treated. Mugg became embittered toward the English when on coming in behalf of his own and other Indians to treat for peace he was seized and taken a prisoner to Boston, although soon released. He was killed at Black Point, May, 16, 1677, the place he captured the preceding year. (c. r.)

Mugu. A former populous Chumashan village, stated by Indians to have been

on the seacoast near Pt Mugu, Ventura co., Cal., and placed by Taylor on Guadalupe ranch, near the point.

Mugu.—Cabrillo, Narr. (1542) in Smith, *Colec. Doc. Fla.*, 181, 1857; Taylor in Cal. Farmer, July 24, 1863. *Mu-wû*.—Henshaw, Buena Ventura MS. vocab., B. A. E., 1884.

Mugulasha. A former tribe, related to the Choctaw, living on the w. bank of the Mississippi, 64 leagues from the sea, in a village with the Bayougoula, whose language they spoke. They are said variously to have been the tribe called Quinipissa by La Salle and Tonti, and encountered by them some distance lower down the river, or to have received the remnants of that tribe reduced by disease. At all events their chief was chief over the Quinipissa when La Salle and Tonti encountered them. In January or February, 1700, the Bayougoula attacked the Mugulasha and killed nearly all of them. The name has a generic signification, 'opposite people'.—*Imuklasha* in Choctaw—and was applied to other tribes, as Muklassa among the Creeks and West Imongolasha on Chickasawhay r., and it is sometimes difficult to distinguish the various bodies one from another. Among the Choctaw it usually refers to people of the opposite phratry from that to which the speaker belongs. See *Imongolasha*, *Muklassa*. (A. S. G. J. R. S.)

Moglushah town.—H. R. Doc. 15, 27th Cong., 2d sess., 5, 1841. **Mogolushas**.—Ind. Aff. Rep., 877, 1847. **Mogoulachas**.—Sauvole (1699) in Margry, *Déc.*, IV, 453, 1880. **Mongontachas**.—McKenney and Hall, Ind. Tribes, III, 81, 1853. **Mongoulacha**.—La Harpe (1723) in French, Hist. Coll. La., III, 17, 1851. **Mongoulatches**.—Drake, Bk. Inds., IX, 1848. **Mongoulaches**.—Coxe, Carolana, 7, 1741. **Mongoulachas**.—Iberville (1699) in Margry, *Déc.*, IV, 113, 119, 124, 1880.

Mugwump. Norton (Political Americanisms, 74, 1890) defines this word as "an Independent Republican; one who sets himself up to be better than his fellows; a Pharisee." Since then the term has come to mean an Independent, who, feeling he can no longer support the policy of his party, leaves it temporarily or joins the opposite party as a protest. The term was applied to the Independent Republicans who bolted the nomination of Blaine in 1884, and it at once gained popular favor. The earlier history of the term is doubtful, though it seems to have been for some time previous in local use in parts of New England to designate a person who makes great pretensions but whose character, ability, or resources are not equal to them. The word is derived from the Massachusetts dialect of Algonquian, being, as Trumbull pointed out, the word *mukquomp*, by which Eliot in his translation of the Bible (Gen., xxxvi, 40-43; Matt. vi, 21, etc.) renders such terms as duke, lord, chief, captain, leader, great man. The components of the word are *moqki* 'great', *-omp* 'man.' In newspaper and political writings *mug-*

wump has given rise to *mugwumpery*, *mugwumpian*, *mugwumpism*. (A. F. C.)

Muhhowekaken (*Muh-ho-we-kū'-ken*, 'old shin'). A subdivision of the Delawares (q. v.).—Morgan, *Anc. Soc.*, 172, 1877.

Muhkarmhukse (*Muh-karm-huk-se*, 'red face'). A subdivision of the Delawares (q. v.).—Morgan, *Anc. Soc.*, 172, 1877.

Muhkrentharne (*Muh-krent-har'-ne*, 'root digger'). A subdivision of the Delawares (q. v.).—Morgan, *Anc. Soc.*, 172, 1877.

Muingpe. A former village, presumably Costanoan, connected with Dolores mission, San Francisco, Cal.—Taylor in *Cal. Farmer*, Oct. 18, 1861.

Muinyawu. The Porcupine clan of the Hopi, q. v.

Mu-i-nyan wuñ-wū.—Fewkes in *Am. Anthropol.*, vii, 405, 1894. **Muinyawu winwū**.—Fewkes in 19th Rep. B. A. E., 584, 1900. **Muñ-ya'u-wu**.—Stephen in 8th Rep. B. A. E., 39, 1891.

Muiva. A Sobaipuri rancheria in 1697, about which date it was visited by Father Kino. Situated on the Rio San Pedro, probably near the mouth of Arivaipa cr., s. Ariz.

Muihibay.—De l'Isle, map Am., 1703. **Muiva**.—Kino (1697) in *Doc. Hist. Mex.*, 4th s., i, 280, 1856.

Muk (*Amik*, 'beaver'). A gens of the Potawatomi, q. v.

Amik.—Wm. Jones, inf'n, 1906. **Muk**.—Morgan, *Anc. Soc.*, 167, 1877.

Mukanti. A band or village of the Molala formerly on the w. slope of the Cascade mts., Oreg. It is not definitely located. (A. S. G.)

Mukchiath. A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Canada, 32, 1890.

Muklasalgi (*Muxlāsālgi*, 'people of Muklassa town'). An extinct Creek clan.—Gatschet, *Creek Migr. Leg.*, i, 156, 1884.

Muklassa. Formerly a small Upper Creek town, a mile below Sawanogi and on the same side of Tallapoosa r., in Montgomery co., Ala. Its inhabitants were of the Alibamu tribe or division. Cf. *Mugulasha*.

Amooklasah Town.—Adair, *Am. Ind.*, 277, 1775. **Mackalassy**.—Robin, *Voy.*, ii, map, 1807. **Moadassa**.—Bartram, *Trav.*, i, map, 1799. **Mocalasa**.—Alcedo, *Dic. Geog.*, iii, 220, 1788. **Mookklausa**.—Pickett, *Hist. Ala.*, ii, 267, 1851. **Mookklausan**.—Hawkins (1813) in *Am. State Pap.*, Ind. Aff., i, 854, 1832 (misprint). **Mook-lau-sau**.—Hawkins (1799), *Sketch*, 35, 1848. **Muoclasse**.—Bartram, *Travels*, 446, 1791. **Muckeleses**.—Swan (1791) in *Schoolcraft, Ind. Tribes*, v, 262, 1855.

Mukugnuk. A former Aleut village on Agattu id., Alaska, one of the Near-id. group of the Aleutians, now uninhabited.

Mukuk. See *Mocuck*.

Mulamchapa ('long pond by the trees'). A former Nishinam village in the valley of Bear r., n. of Sacramento, Cal.

Moolamchapa.—Powers in *Overland Mo.*, xii, 22, 1874. **Mu-lam'-cha-pa**.—Powers in *Cont. N. A. Ethnol.*, iii, 316, 1877.

Mulatos. One of the tribes of w. Texas, some of whose people were baptized at

the mission of San José y San Miguel de Aguayo in 1784–85, together with people of other tribes called Gincape, Salaphueme, and Tanaicapeme (MS. Baptismal records, 1784–85, partidos 901–926). (H. E. B.)

Mulatito Girls' Town. A former Seminole town s. of Cuscowilla lake, probably in Alachua co., n. Fla.—Bell in *Morse, Rep. to Sec. War*, 307, 1822.

Mulchatna. A settlement of 180 Eskimo on Mulchatna r., a branch of Nushagak r., Alaska.

Malchatna.—Petroff, *Rep. on Alaska*, 48, 1881.

Molchatna.—Petroff in 10th Census, Alaska, 17, 1884. **Mulchatna**.—Baker, *Geog. Dict. Alaska*, 1902.

Mullers. Flattish stones employed by the native tribes for crushing and pulverizing food substances on a metate (q. v.) or other flat surface; sometimes called *mano*, the Spanish for 'hand.' They were in very general use, especially among the agricultural tribes, and in both form and use grade imperceptibly into the pestle. They may be merely natural boulders of shape suited to the purpose, or they may have been modified by use into artificial form or designedly shaped by pecking and grinding according to the fancy of the owner. In the Pueblo country mullers are usually oblong slabs of lava or other suitable stone, flat on the undersurface and slightly convex in outline and superior surface, and of a size to be conveniently held in the hand. In some sections, as in the Pacific states and in the Mississippi valley, they are frequently flattish or cheese-shaped cylinders or disks, smooth on the underside and somewhat roughened above. They are sometimes pitted on one or both surfaces, indicating a secondary use, perhaps for cracking nuts. Others show battering, as if subjected to rough usage as hammers. The term muller is properly applied only to grinders having a flat undersurface and shaped to be held under the hand; the pestle has a flat or rounded undersurface and is shaped to be held in the hand in an upright position. See *Metates*, *Mortars*, *Pestles*, and consult the authorities thereunder cited. (W. H. H.)

Mullinose. See *Maninose*.

Mulluk. A former Kusan village or tribe on the n. side of the mouth of Coquille r., on the coast of Oregon. It was on the site of the present town of Randolph. (L. F.)

Coquille.—Abbott, MS. Coquille Census, B. A. E., 1858. **Delmash**.—Huntington in Ind. Aff. Rep. 1867, 62, 1868. **Delwashes**.—Ind. Aff. Rep., 470, 1865. **Lower Coquille**.—Dorsey, *Mulluk MS. vocab.*, B. A. E., 1884. **Mul'luk**.—*Ibid.* (native name). **Nt'l-muc'-ci**.—Dorsey, *Tutu MS. vocab.*, B. A. E., 1884 (so called by Tututni, etc.). **Tal-hush-to-ny**.—Abbott, MS. Coquille Census, B. A. E., 1858.

Mulshintik (*Mul'-cin-tik*). A former Yaquina village on the s. side of Yaquina r., Oreg.—Dorsey in *Jour. Am. Folklore*, iii, 229, 1890.

Multnomah (*Né'maznōmax*, 'down river'). A Chinookan tribe or division formerly living on the upper end of Sauvies id., Multnomah co., Ore. In 1806 they were estimated at 800, but by 1835, according to Parker, they were extinct as a tribe. The term is also used in a broader sense to include all the tribes living on or near lower Willamette r., Ore. See Lewis and Clark, *Exped.*, II, 472, 1814. **Maltanabab**.—Franchère, *Narr.*, III, 1854. **Mathlanobes**.—Stuart in *Nouv. Ann. Voy.*, x, 115, 1821. **Mathlanobs**.—Morse, *Rep. to Sec. War*, 368, 1822. **Moltnomas**.—Ross, *Advent.*, 87, 1849. **Mulknomans**.—*Orig. Jour. Lewis and Clark* (1805), III, 198, 1905. **Multinoma**.—Palmer, *Jour. of Trav.*, 87, 1847. **Mult-no-mah**.—*Orig. Jour. Lewis and Clark* (1806), IV, 219, 1905. **Multnomia**.—Bond in *H. R. Rep.* 830, 27th Cong., 2d sess., 63, 1842. **Né'malnōmax**.—Boas, *inf'n*, 1905.

Mumitupio (*Mum-i'-tup-i-o*, 'fish people'). The Blackfoot name of an unidentified tribe.—Hayden, *Ethnog.* and *Philol. Mo. Val.*, 264, 1862.

Mummachog. See *Mummychog*.

Mummapacune. A tribe of the Powhatan confederacy, which, according to Strachey, lived on York r., Va., about 1612, and numbered about 350. Mentioned as distinct from the Mattaponi in the same neighborhood.—Strachey (*ca.* 1616), Va., 62, 1849.

Mummychog. The barred killifish (*Fundulus pisculentus*); also spelled *mummachog*. This word, in use in certain regions of the N. Atlantic coast of the United States, is corrupted from *moamitteauig* in the Narraganset dialect of Algonquian, which Roger Williams (1643) defined as "a little sort of fish, half as big as sprats, plentiful in winter." According to Trumbull (*Natick Dict.*, 298, 1903) the fish originally designated by this name was the smelt, whence the name was transferred to the killifish. The Narraganset word, a plural, signifies 'they go gathered together.' The word is sometimes abbreviated to *mummy*. (A. F. C.)

Mumtrak. A Kuskwogmiut Eskimo village on Good News bay, Alaska. Pop. 162 in 1880, and the same in 1890.

Mumtrahamut.—Eleventh Census, Alaska, 99, 1893. **Mumtrahamut**.—Nelson in 15th Rep. B. A. E., map, 1889. **Mumtrahamute**.—Petroff in 10th Census, Alaska, 17, 1884. **Mumtreklagamute**.—Petroff, *Rep. on Alaska*, 53, 1881. **Mumtrelega**.—Baker, *Geog. Dict. Alaska*, 96, 1902.

Mumtrelek ('smoke-house'). A Kuskwogmiut Eskimo village on the w. bank of lower Kuskokwim r., Alaska. Pop. 41 (and of the station 29) in 1880, 33 in 1890.

Mumtreklagamiut.—Eleventh Census, Alaska, 104, 1893.

Munceytown. A Munsee village in Ontario, N. W. of Brantford, on or near Thames r.

Ä'ci-hä'.—J. N. B. Hewitt, *inf'n*, 1887 (Tuscarora name). **Munceytown**.—Common name.

Munchinye (*Mün-tci'-nye*, 'short black bear'). A subgens of the Tunanpin gens

of the Iowa.—Dorsey in 15th Rep. B. A. E., 238, 1897.

Mundua (*Mondawä*, 'one that keeps calling or sounding [through the night]'; a word used for the whippoorwill by the Chippewa about Rat portage, Lake of the Woods.—W. J.). A tribe, or supposed tribe, which the Chippewa claim to have exterminated at an early period, with the exception of a remnant incorporated into their tribe and whose descendants constitute the Wabeshaze or Marten gens. The statements in regard to them, if identified with the Mantouek of the Jesuit writers, are at variance, and may relate to two different groups. The Mantouek of the Jesuit Relation of 1640 are located apparently on the upper peninsula of Michigan, not far w. of Sault Ste Marie, a little N. of the Noquet. In the Relation of 1658 they appear to be placed farther w. and associated with the Sioux. In the Relation of 1671 apparently the same people appear to be situated under the name Nantouek, near Fox r. and in the vicinity of the Miami band, which once resided in this region with or near the Mascoutens. In the tradition given by Warren the scene of the conflict between the Chippewa and this people is indefinite, but the period assigned appears to antedate the entrance of the people into Wisconsin, and thus Schoolcraft interprets it. The tradition, notwithstanding Warren's assertion that it can be considered history, is so exaggerated and indefinite as to date and locality as to render doubtful the propriety of identifying the Mundua of the tradition with the Mantouek of the Jesuit writers. Moreover, Warren's tradition in regard to the Marten gens can not be reconciled with the tradition regarding the Mundua and with what is stated by the Jesuit Relations in regard to the Mantouek. It has been suggested that Amikwa, Noquet, and Mundua or Mantouek, respectively Beaver, Bear, and Whippoorwill gentes, are all names for one and the same people. See *Amikwa, Noquet*. (J. M. C. T.) **Mantouek**.—Jes. *Rel.* 1640, 34, 1858. **Mantoueks**.—Bacqueville de la Potherie, *Hist. Am.*, II, 81, 1753. **Mantouek**.—Jes. *Rel.* 1658, 21, 1858. **Mantoueue**.—Map of 1671 (?) in *Wis. Hist. Soc. Coll.*, III, 131, 1856. **Meendua**.—Ramsay in *Ind. Aff. Rep.*, 83, 1850. **Mun-dua**.—Warren (1852) in *Minn. Hist. Soc. Coll.*, v, 50, 1885. **Mundwa**.—Schoolcraft, *Ind. Tribes*, v, 39, 1855. **Nantouek**.—Jes. *Rel.* 1671, 42, 1858.

Munnawhatteaug. See *Menhaden*.

Munominkasheenhug ('rice-makers'). A Chippewa division living on St Croix r., Wis. They had villages at Upper St Croix, Yellow, and Rice lakes, and on Snake r., and others named Namakagon and Pokegama. They were incorporated with the Betonukeengainubejig. (J. M.) **Foile avoine Chippeways**.—Schoolcraft, *Trav.*, 321, 1821. **Fols Avoine Sauteaux**.—Pike, *Trav.*, 130, 1811.

Fols-avoin-Sauters.—Schermerhorn (1812) in Mass. Hist. Soc. Coll., 2d s., II, 12, 1814. **Fols-avoise.**—*Ibid.*, 13. **la Fallorine.**—Lewis and Clark, Discov., 28, 1806 (misprint). **La Follovoine.**—*Ibid.*, 30. **Manöminikaciag.**—Wm. Jones, inf'n, 1905 (proper form). **Mun-o-min-ik-a-sheenh-ug.**—Warren (1852) in Minn. Hist. Soc. Coll., v, 38, 1855. **Mun o-min-ik-a-she-ug.**—Ramsey in Ind. Aff. Rep., 18, 1850. **Rice Makers.**—*Ibid.* **St Croix Indians.**—Warren (1852) in Minn. Hist. Soc. Coll., v, 335, 1855.

Munsee (*Min-asin-ink*, 'at the place where stones are gathered together.'—Hewitt). One of the three principal divisions of the Delawares, the others being the Unami and Unalachtigo, from whom their dialect differed so much that they have frequently been regarded as a distinct tribe. According to Morgan they have the same three gentes as the Delawares proper, viz, Wolf (*Tookseat*), Turtle (*Pokekoongo*), and Turkey (*Pullaook*). Brinton says these were totemic designations for the three geographic divisions of the Delawares and had no reference to gentes (see *Delaware*). However this may be, the Wolf has commonly been regarded as the totem of the Munsee, who have frequently been called the Wolf tribe of the Delawares.

The Munsee originally occupied the headwaters of Delaware r. in New York, New Jersey, and Pennsylvania, extending s. to Lehigh r., and also held the w. bank of the Hudson from the Catskill mts. nearly to the New Jersey line. They had the Mahican and Wappinger on the n. and e., and the Delawares on the s. and s. e., and were regarded as the protecting barrier between the latter tribe and the Iroquois. Their council village was Minisink, probably in Sussex co., N. J. According to Rutenber they were divided into the Minisink, Waoranec, Warranawonkong, Mamekoting, Wawarsink, and Catskill. The Minisink formed the principal division of the Munsee, and the two names have often been confounded. The bands along the Hudson were prominent in the early history of New York, but as white settlements increased most of them joined their relatives on the Delaware. In 1756 those remaining in New York were placed upon lands in Schoharie co. and were incorporated with the Mohawk. By a fraudulent treaty, known as the "Walking Purchase," the main body of the Munsee was forced to remove from the Delaware about the year 1740, and settled at Wyalusing on the Susquehanna on lands assigned them by the Iroquois. Soon after this they removed to Allegheny r., Pa., where some of them had settled as early as 1724. The Moravian missionaries had already begun their work among them (see *Missions; Moravians*), and a considerable number under their teaching drew off from the tribe and became a separate

organization. The others moved w. with the Delawares into Indiana, where most of them were incorporated with that tribe, while others joined the Chippewa, Shawnee, and other tribes, so that the Munsee practically ceased to exist as an organized body. Many removed to Canada and settled near their relatives, the Moravian Indians.

On account of the connection of the Munsee with other tribes, it is impossible to estimate their numbers at any period. In 1765 those on the Susquehanna were about 750. In 1843 those in the United States were chiefly with the Delawares in Kansas, and numbered about 200, while others were with the Shawnee and Stockbridges, besides those in Canada. In 1885 the only Munsee officially recognized in the United States were living with a band of Chippewa in Franklin co., Kans., both together numbering only 72. The two bands were united in 1859, and others are incorporated with the Cherokee in Indian Ter., having joined them about 1868. These Munsee were more commonly known in recent years as "Christians." In Canada the band of Munsee settled with the Chippewa on Thames r., in Caradoc tp., Middlesex co., Ontario, numbered 119 in 1886, while the Moravians, who are mainly Munsee, living near them in Oxford township, Kent co., numbered 275 in 1884. According to the Canadian Ind. Aff. Rep. for 1906, the Moravians of the Thames numbered 348 persons, and the "Munsees of the Thames" numbered 118. There are also a few with the Stockbridges at Green Bay agency, Wis.

The Munsee have been parties to the following treaties with the United States: Treaty of Fort Industry, O., July 4, 1805, with the Ottawa, Wyandot, and other tribes. Appendix to the Menominee treaty with the United States at Green Bay, Wis., Oct. 27, 1832, by the Stockbridges, Munsee, Brothertons, and others. Treaty of Stockbridge, Wis., Sept. 3, 1839, by Stockbridges and Munsee. Treaty of Stockbridge, Wis., Feb. 5, 1856, amending treaty of Sept. 3, 1839. Treaty at Sac and Fox agency, Kans., July 16, 1859, in connection with certain Chippewa.

(J. M.) **Humenthi.**—Gatschet, Shawnee MS., B. A. E. 1882 (Shawnee name; pl. Kroeber, in f'n, 1905. **Mur-ohs**.—Meyer, Nach dem Sacramento, 282, 1855.

Murum. A former Texas tribe, numerous members of which were baptized during the first half of the 18th century at the San Antonio missions. One individual by this name was baptized in 1707 at Mission San Francisco Solano, on the Rio Grande. At San Antonio their baptism was first recorded under "Baptisms of the Hyerbipiamos" (Ervipiamos) with those of the Ervipiamos destined for Mission San Xavier de Nájera, called the "Hyerbipiamo suburb" (1721-26). The records show that in their gentile state the Murum intermarried with these Ervipiamos, who were Tonkawan, and who came from Ranchería Grande (q. v.). This points to the conclusion that the Murum were Tonkawan. A difficulty is raised, however, by the fact that at the Ervipiamo suburb were also numerous Ticamameres, some of which tribe had been baptized at San Francisco Solano mission and were apparently natives of that region (Records

of Mission San Antonio de Valero, MS.). After 1726 the Murum neophytes were incorporated under Mission Valero (ibid.). Their name is most frequently found in the baptismal books of this mission before the year 1730, but members of the tribe were still living there as late as 1775. Compare *Mariames*, who may have been identical. (H. E. B.)

Moroame.—Baptismal Records, op. cit. **Morurames**.—Ibid. **Murum**.—Ibid. **Murumi**.—Ibid.

Murzibusi. The Bean clan of the Yoki (Rain) phratry of the Hopi. See *Patki*. **Mu'r-zi-bu-si**.—Stephen in 8th Rep. B. A. E., 39, 1891.

Mus ('mesquite'). Given by Bourke (Jour. Am. Folk-lore, II, 181, 1889) as a clan (properly gens) of the Mohave, q. v.

Musalakun. A name, originally that of a captain or chief of one of the villages in the vicinity of Cloverdale, Cal., applied to all the Pomo living along Russian r. from Preston southward to the vicinity of Geyserville. (S. A. B.)

Maj-su-ta-ki-as.—McKee (1851) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 144, 1853. **Masalla Magoons**.—Bancroft, Nat. Races, I, 449, 1874. **Mi-sal'-la Magun'**.—Powers in Cont. N. A. Ethnol., III, 183, 1877. **Mu-sal-la-kun'**.—Ibid.

Muscongus. A village on the coast of Maine in 1616, probably belonging to the Abnaki. It seems to have been near Muscongus id., in Lincoln co.

Muskoncus.—Smith (1624) in Me. Hist. Soc. Coll., v, 155, 1857. **Nusconcus**.—Smith (1616) in Mass. Hist. Soc. Coll., 3d s., VI, 107, 1837. **Nusconcus**.—Smith (1629), Va., II, 183, repr. 1819. **Nuskoncus**.—Ibid., 173. **Nuskoncus**.—Ibid., 192.

Muscupibi ('piñon place'). Mentioned by Rev. J. Cavalleria (Hist. San Bernardino Val., 39, 1902) as a village (probably Serrano) at a place now called Muscupiabe, near San Bernardino, s. Cal.

Musgrove, Mary. See *Bosomworth*.

Mushalatabbee. A Choctaw chief, born in the last half of the 18th century. He was present at Washington, D. C., in Dec., 1824, as one of the Choctaw delegation, where he met and became acquainted with Lafayette on his last visit to the United States. He led his warriors against the Creeks in connection with Jackson in 1812. He signed as leading chief the treaty of Choctaw Trading House, Miss., Oct. 24, 1816; of Treaty Ground, Miss., Oct. 18, 1820; of Washington, D. C., Jan. 20, 1825; and of Dancing Rabbit Creek, Miss., Sept. 27, 1830. He died of smallpox at the agency in Arkansas, Sept. 30, 1838. His name was later applied to a district in Indian Ter.

Mushkoniatawee. A Montagnais village on the s. coast of Labrador.—Stearns, Labrador, 271, 1884.

Music and Musical instruments. Indian music is coextensive with tribal life, for every public ceremony, as well as each important act in the career of an individual, has its accompaniment of song. The music of each ceremony has its pe-

cular rhythm, so also have the classes of songs which pertain to individual acts: fasting and prayer, setting of traps, hunting, courtship, playing of games, facing and defying death. An Indian can determine at once the class of a strange song by the rhythm of the music, but not by that of the drumbeat, for the latter is not infrequently played in time differing from that of the song. In structure the Indian song follows the outline of the form which obtains in our own music—a short, melodic phrase built on related tones which we denominate chord lines, repeated with more or less variation, grouped into clauses, and correlated into periods. The compass of songs varies from 1 to 3 octaves.

Some songs have no words, but the absence of the latter does not impair the definite meaning; vocables are used, and when once set to a melody they are never changed. Occasionally both words and vocables are employed in the same song. Plural singing is generally in unison on the plains and elsewhere, the women using a high, reedy, falsetto tone an octave above the male singers. Among the Cherokee and other Southern tribes, however, "round" singing was common. Men and women having clear resonant voices and good musical intonation compose the choirs which lead the singing in ceremonies, and are paid for their services. Frequently two or three hundred persons join in a choral, and the carrying of the melody in octaves by soprano, tenor, and bass voices, produces harmonic effects.

Songs are the property of clans, societies, and individuals. Clans and societies have special officers to insure the exact transmission and rendition of their songs, which members alone have the right to sing, and a penalty is exacted from the member who makes a mistake in singing. The privilege to sing individual songs must sometimes be purchased from the owner. Women composed and sang the lullaby and the spinning and grinding songs. Among the Pueblos men joined in singing the latter and beat time on the floor as the women worked at the metates. Other songs composed by women were those sung to encourage the warrior as he went forth from the camp, and those sung to send to him, by the will of the singers, strength and power to endure the hardships of the battle.

On the N. Pacific coast, and among other tribes as well, musical contests were held, when singers from one tribe or band would contend with those from another tribe or band as to which could remember the greatest number or accurately repeat a new song after hearing it given for the first time. Among all the tribes

accurate singing was considered a desirable accomplishment.

Among the Baffinland Eskimo grudges are settled by the opponents meeting by appointment and singing sarcastic songs at each other. The one who creates the most laughter is regarded as the victor. The Danish writers call these controversial songs "nith songs."

In ceremonial songs, which are formal appeals to the supernatural, accuracy in rendering is essential, as otherwise "the path would not be straight"; the appeals could not reach their proper destination and evil consequences would follow. Consequently, when an error in singing occurs, the singers stop at once, and either the song or the whole ceremony is begun again; or, as in some tribes, a rite of contrition is performed, after which the ceremony may proceed. Official prompters keep strict watch during a ceremony in order to forestall such accidents.

MUSICIANS, PEYOTE CEREMONY; KIOWA

The steps of ceremonial dancers follow the rhythm of the drum, which frequently differs from the rhythm of the song. The drum may be beaten in $2/4$ time and the song be in $3/4$ time, or the beat be in $5/8$ time against a melody in $3/4$, or the song may be sung to a rapid *tremolo* beating of the drum. The beat governs the bodily movements; the song voices the emotion of the appeal. The native belief which regards breath as the symbol of life is in part extended to song; the invisible voice is supposed to be able to reach the invisible power that permeates nature and animates all natural forms. The Indian sings with all his force, being intent on expressing the fervor of his emotion and having no conception of an objective presentation of music. The straining of the voice injures its tone quality, stress sharpens a note, sentiment flattens it, and continued *portamento* blurs the outline of the melody, which is often further confused by voice pulsations, making a

rhythm within a rhythm, another complication being added when the drum is beaten to a measure different from that

CHIPWEA DRUMS. (JENKS)

of the song; so that one may hear three rhythms, two of them contesting, sometimes with syncopation, yet resulting in a well-built whole.

KWAKIUTL RATTLES; 1-8. (BOAS)

It has always been difficult for a listener of another race to catch an Indian song, as the melody is often "hidden by overpowering noise." When, however, this difficulty has been overcome, these untrammelled expressions of emotions present a rich field in which to observe the growth of musical form and the beginning of musical thinking. They form an important chapter in the development of music. Apart from this historic value, these songs

TURTLE-SHELL RATTLE;
IROQUOIS (1-8)HUPA RATTLE; 1-3
(MASON)

offer to the composer a wealth of melodic and rhythmic movements, and that peculiar inspiration which heretofore has been

obtained solely from the folk songs of Europe.

Musical Instruments.—Drums vary in size and structure, and certain ceremonies have their peculiar type. On the N. W. coast a plank or box serves as a drum. Whistles of bone, wood, or pottery, some producing two or more tones, are employed in some ceremonies; they symbolize the cry of birds or animals, or the voices of spirits. Pandean pipes, which occur in South America, were unknown in the northern continent until recent times. In the S. W., notched sticks are rasped together or on gourds, bones, or baskets, to accentuate

rhythm. The flageolet is widely distributed and is played by young men during courtship; it also accompanies the songs of certain Pueblo ceremonies. Rattles (q. v.) were universal. The intoning of rituals, incantations, and speeches can hardly be regarded as of musical character. The musical bow is used by the Maidu of California and by the Tepehuane, Cora, and Huichol tribes of the Piman stock in Mexico. Among the Maidu this bow plays an important part in religion and much sorcery is connected with it.

Muskeg (Chippewa, *mūskig*; Kickapoo, *maskyāg*¹, 'grassy bog.'—W. J.). Low, wet land; a quagmire, marsh, swamp, the equivalent of *savane* in Canadian French. A word much used in parts of Ontario, the Canadian Northwest, and the adjoining regions of the United States; spelled also *maskeg*. In the N. W. *muskeg* is the usual form. (A. F. C.)

Muskelunge. See *Maskinonge*.

Muskhogeian Family. An important linguistic stock, comprising the Creeks, Choctaw, Chickasaw, Seminole, and other tribes. The name is an adjectival form of *Muskogee*, properly *Mūskōki* (pl. *Maskokālgi* or *Muscogulgee*). Its derivation has been attributed to an Algonquian term signifying 'swamp' or 'open marshy land' (see *Muskeg*), but this is almost certainly incorrect. The Muskhogeian tribes were confined chiefly to the Gulf states E. of the Mississippi, occupying almost all of Mississippi and Alabama, and parts of Tennessee, Georgia, Florida, and South Carolina. According to a tradition held in common by most of their tribes, they had reached their historic seats from some starting point W. of the Mississippi, usually placed, when localized at all, somewhere on the upper Red r. The greater part of the tribes of the stock are now on reservations in Oklahoma.

Through one or another of its tribes the stock early came into notice. Panfilo de Narvaez met the Apalachee of W. Florida in 1528, and in 1540-41 De Soto passed E. and W. through the whole extent of the Muskhogeian territory. Mission effort was begun among them by the Spanish Franciscans at a very early period, with such success that before the year 1700, besides several missions in

lower Georgia, the whole Apalachee tribe, an important single body, was civilized and Christianized, and settled in 7 large and well-built towns (see *Missions*.) The establishment of the French at Mobile, Biloxi, and other points about 1699-1705 brought them into contact with the Choctaw and other western branches of the stock. The powerful Creek confederacy had its most intimate contact with the English of Carolina and Georgia, although a French fort was long established in the territory of the Alibamu. The Chickasaw also were allies of the English, while the Choctaw were uncertain friends of the French. The devotion of the Apalachee to the Spaniards resulted in the destruction of the former as a people at the hands of the English and their Indian allies in the first years of the 18th century. The tide of white settlement, both English and French, gradually pressed the Muskhogeian tribes back from the shores of the Atlantic and the Gulf, some bands recrossing to the W. of the Mississippi as early as 1765. The terrible Creek war in 1813-14 and the long drawn-out Seminole war 20 years later closed the struggle to maintain themselves in their old territories, and before the year 1840 the last of the Muskhogeian tribes had been removed to their present location in Oklahoma, with the exception of a few hundred Seminole in Florida, a larger number of Choctaw in Mississippi, Alabama, and Louisiana, and a small forgotten Creek remnant in E. Texas. (See the several tribal articles.)

There existed between the tribes marked dissimilarities as to both physical and cultural characteristics. For instance, the Choctaw were rather thickest and heavy, while those farther E., as the Creeks, were taller but well-knit. All the tribes were agricultural and sedentary, occupying villages of substantially built houses. The towns near the tribal frontiers were usually palisaded, while those more remote from invasion were left unprotected. All were brave, but the Choctaw claimed to fight only in self-defense, while the Creeks, and more particularly the Chickasaw, were aggressive. The Creeks were properly a confederacy, with the Muskogee as the dominant partner, and including also in later years the alien Yuchi, the Natchez, and a part of the Shawnee. The Choctaw also formed a loose confederacy, including among others several broken tribes of alien stock.

In their government the Muskhogeian tribes appear to have made progress corresponding to their somewhat advanced culture in other respects. In the Creek government, which is better known than that of the other tribes of the family, the

unit of the political as well as of the social structure was the clan, as in many Indian tribes, marriage being forbidden within the clan, and the children belonged to the clan of the mother. Each town had its independent government, its council being a miniature of that of the confederacy; the town and its outlying settlements, if it had any, thus represented an autonomy such as is usually implied by the term "tribe." Every considerable town was provided with a "public square," formed of 4 buildings of equal size facing the cardinal points, and each divided into 3 apartments. The structure on the e. side was allotted to the chief councilors, probably of the administrative side of the government; that on the s. side belonged to the warrior chiefs; that on the n. to the inferior chiefs, while that on the w. was used for the paraphernalia belonging to the ceremony of the black drink, war physic, etc. The general policy of the confederacy was guided by a council, composed of representatives from each town, who met annually, or as occasion required, at a time and place fixed by the chief, or head *mico*. The confederacy itself was a political organization founded on blood relationship, real or fictitious; its chief object was mutual defense, and the power wielded by its council was purely advisory. The liberty within the bond that held the organization together was shown by the fact that parts of the confederacy, and even separate towns, might and actually did engage in war without reference to the wishes of the confederacy. The towns, especially those of the Creeks, were divided into two classes, the White or Peace towns, whose function pertained to the civil government, and the Red or War towns, whose officers assumed management of military affairs.

The square in the center of the town was devoted to the transaction of all public business and to public ceremonies. In it was situated the sweat house, the uses of which were more religious than medicinal in character; and here was the chunky yard, devoted to the game from which it takes its popular name, and to the *busk* (q. v.), or so-called Green-corn dance. Such games, though not strictly of religious significance, were affairs of public interest, and were attended by rites and ceremonies of a religious nature. In these squares strangers who had no relatives in the town—i. e., who possessed no clan rights—were permitted to encamp as the guests of the town.

The settlement of disputes and the punishment of crimes were left primarily to the members of the clans concerned; secondly, to the council of the town or tribe involved. The *busk* was

an important institution among the Muskhocean people, and had its analogue among most, if not all, other American tribes; it was chiefly in the nature of an offering of first fruits, and its celebration, which occupied several days, was an occasion for dancing and ceremony; new fire was kindled by a priest, and from it were made all the fires in the town; all offenses, save that of murder, were forgiven at this festival, and a new year began. Artificial deformation of the head seems to have been practised to some extent by all the tribes, but prevailed as a general custom among the Choctaw, who for this reason were sometimes called "Flatheads."

The Muskhocean population at the time of first contact with Europeans has been estimated at 50,000. By the census of 1890 the number of pure-bloods belonging to the family in Indian Ter. was as follows: Choctaw, 9,996; Chickasaw, 3,464; Creek, 9,291; Seminole, 2,539; besides perhaps 1,000 more in Florida, Mississippi, Louisiana, and Texas. In 1905 their numbers were: Choctaw by blood, 17,160; by intermarriage, 1,467; freedmen, 5,254; in Mississippi, 1,235. Chickasaw by blood, 5,474; by intermarriage, 598; freedmen, 4,695. Creeks by blood, 10,185; freedmen, 5,738. Seminole by blood, 2,099; freedmen, 950; in Florida (1900), 358.

The recognized languages of the stock, so far as known, each with dialectic variants, are as follows:

1. Muskogee (including almost half of the Creek confederacy, and its offshoot, the Seminole).
2. Hitchiti (including a large part of the Lower Creeks, the Mikasuki band of the Seminole, and perhaps the ancient Apalachee tribe).
3. Koasati (including the Alibamu, Wetumpka, and Koasati towns of the Creek confederacy).
4. Choctaw (including the Choctaw, Chickasaw, and the following small tribes: Acolapissa, Bayougoula, Chakchi-uma, Chatot, Chula, Huma, Ibitoupa, Mobile, Mugalasha, Naniba, Ofogoula, Tangipahoa, Taposa, and Tohome).

To the above the Natchez (q. v.) should probably be added as a fifth division, though it differs more from the other dialects than any of these differ from one another. The ancient Yamasi of the Georgia-South Carolina coast may have constituted a separate group, or may have been a dialect of the Hitchiti. The Yamacraw were renegades from the Lower Creek towns and in the main were probably Hitchiti.

Muskingum ('moose eye or face'.—Hewitt). A Delaware (?) village marked on old maps as on the w. bank of Muskingum r., Ohio.

Muskingom.—La Tour, map, 1779. **Muskingum**.—Gütsfeld, map, 1784. **Muskingum**.—Alcedo, Dic. Geog., III, 274, 1788. **Muskinkum**.—Esnauls and Rapilly, map, 1777.

Muskwawasepeotan ('the town of the old redwood creek'). A Potawatomi village formerly near Cedarville, Allen co., N. E. Ind., on land sold in 1828, and commonly known as Metea's Village from the name of its chief. (J. M.)

Metea's Village.—Mississinewa treaty (1826) in U. S. Ind. Treat., 670, 1873. **Muskwawasepeotan**.—Long cited by McKenney and Hall, Ind. Tribes, II, 61, 1849.

Muskwokakenut (*Mus-kwoi-ká-ke-nut*, 'He shoots bears with arrows'). A Cree band, so called after its chief, living in 1856 in the vicinity of Ft de Prairie, Northwest Ter., Canada.—Hayden, Ethnogr. and Philol. Mo. Val., 237, 1862.

Muskwokaupawit (*Mus-kwoi-káu-e-pá-wit*, 'Standing bear'). A Cree band, so called after its chief, living in 1856 about Ft de Prairie, Northwest Ter., Canada.—Hayden, Ethnogr. and Philol. Mo. Val., 237, 1862.

Musme (*Mús-mě'*). A former village of the Chastacosta on Rogue r., Oreg.—Dorsey in Jour. Am. Folk-lore, III, 234, 1890.

Muspa. A Calusa village on the s. w. coast of Florida about 1570 (Fontaneda), probably about the mouth of Caloosahatchee r. The people of Muspa were among the last of the Calusa to retain their name and territory. C. Romano is marked on old English maps as Punta de Muspa and the coast stripe extending thence northward to the entrance of Caloosahatchee r. is marked on some Spanish maps as La Muspa (B. Smith). The Muspa Indians, according to Brinton (Flor. Penin., 114, 1859), occupied the shore and islands of Boca Grande, the main entrance of Charlotte harbor, until toward the close of the 18th century, when they were driven to the keys by the Seminole; but according to Douglas (Am. Antiq., VII, 281, 1885) they were still in the vicinity of Pine id., in Char-

lotte harbor, as late as 1835. There is even reason to believe that they took part in some of the raiding in the Seminole war as late as 1840. (J. M.)

Muspa.—Fontaneda (ca. 1575), Memoir, Smith trans., 19, 1854.

Musquarro. A former Montagnais rendezvous and mission station on the n. shore of the Gulf of St Lawrence, opposite Anticosti id. The Indians deserted it in recent years for Romaine.

Mashquaro.—McLean, Hudson Bay, II, 53, 1849. **Maskouaro**.—Hind, Lab. Penin., II, 180, 1863. **Masquarro**.—Ibid., 26. **Musquahanos**.—Can. Ind. Aff. 1880, 313, 1881 (applied to the band there; misprint?). **Musquarro**.—Hind, Lab. Penin., II, 133, 1863.

Musquash. A name for the muskrat (*Fiber zibethicus*), used in Canada and n. and w. parts of the United States. In early writings on Virginia the forms *musascus* and *musquassus* (Capt. John Smith, 1616), *muscasus* (Hakluyt, 1609), and others, occur. Cognate words in other Algonquian dialects are the Abnaki *muskwessu*, and the Chippewa *miskwasi*, signifying 'it is red,' which was therefore the original signification of the Virginian name whereof Smith's word is a corruption, and referred to the reddish color of the animal. See *Mooskwashuh*. (A. F. C.)

Musqueam. A Cowichan tribe occupying the n. part of the Fraser delta, Brit. Col.; pop. 98 in 1906. Male is their village.

Miskwiam.—Tolmie and Dawson, Vocab., Brit. Col., 119B, 1884. **Misqueam**.—Can. Ind. Aff. for 1880, 316, 1881. **Musqueam**.—Ibid., 1901, pt. II, 158. **Musqueeam**.—Ibid., 1877, LI. **Musqueom**.—Ibid., 1902, 72. **Qmē' ekoyim**.—Boas in 64th Rep. Brit. A. S. S., 454, 1894. **Qmuski'Em**.—Hill-Tout in Ethnol. Surv. Can., 54, 1902.

Mussauro. A former village, probably near Hartford, Conn. Its chief, Arrhamamet, was conquered by Uncas, the Mohegan chief, about 1654.—Trumbull, Conn., I, 129, 1818.

Mussundummo ('water snake'.—Tanner, Narr., 314, 1830). Given as one of the totems among the Ottawa and Chippewa. It may be an Ottawa totem, as it is not mentioned by Morgan or Warren.

Mustak. A former village of the Kalindaruk division of the Costanoan family, connected with San Carlos mission, Cal. **Mustac**.—Taylor in Cal. Farmer, Apr. 20, 1860.

Mustoo. A name given by Dawson to a supposed town on Hippa id., Queen Charlotte ids., Brit. Col., but in reality the word is a corruption of Nastó, the Haida name for Hippa id., on which there were several towns. See *Atanus, Gatga-inans, Sulu-stins*. (J. R. S.)

Muswasipi (cognate with Chippewa *Mosuca-sibi*, 'moose river'.—W. J.). The name of one of the divisions of the Upeshipow, an Algonquian tribe of Labrador, living in 1770 on Moose r., Ruperts Land, Brit. Am.—Richardson, Arctic Exped., II, 38, 1851.

Mutchut. A village of the Powhatan confederacy, situated in 1608 on the N. bank of Mattapony r., in King and Queen co., Va.—Smith (1629), Va., i, map, repr. 1819.

Mutistul. An important Yukian Wappo village in Knight's valley, Sonoma co., Cal. (S. A. B.)

Mutistals.—Stearns in Am. Naturalist, xvi, 208, 1882. **Mu-tistul.**—Gibbs in Schoolcraft, Ind. Tribes, iii, 110, 1853.

Mutsiks (*Mit'-siks*, 'braves'). A society of the Ikuhukahtsi, or All Comrades, in the Piegan tribe; it consists of tried warriors.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

Mutsun. A Costanoan village near San Juan Bautista mission, San Benito co., Cal. The name was used for a group and dialect of the Costanoan family. The Mutsun dialect being better known than others allied to it, owing to a grammar and a phrasebook written by Arroyo de la Cuesta in 1815 (Shea, Lib. Am. Ling., i, ii, 1861), the name came to be used for the linguistic family of which it formed part and which was held to extend northward beyond the Golden Gate and southward beyond Monterey, and from the sea to the crest of the sierras. Gatschet and Powell used it in this sense in 1877. Subsequently Powell divided the Mutsun family, establishing the Moquelumnan family (q. v.) E. of San Joaquin r. and the Costanoan family (q. v.) W. thereof.

Motssum.—Engelhardt, Franciscans in Cal., 398, 1897. **Mutseen.**—Taylor in Cal. Farmer, Nov 23, 1860. **Mutsunes.**—Ibid., Feb. 22. **Mutzun.**—Simeon, Dict. Nahuatl, xviii, 1885. **Mutzunes.**—Taylor in Cal. Farmer, Apr. 20, 1860. **Nuthesum.**—Ibid.

Muttamussinsack. A village of the Powhatan confederacy in 1608, on the N. bank of the Rappahannock, in Caroline co., Va.—Smith (1629), Va., i, map, repr. 1819.

Mututicachi. A former pueblo, apparently of the Teguima division of the Opata, on the upper Rio Sonora, Sonora, Mexico. It is said to have been abandoned on the establishment of the mission of Suamca in 1730. According to the Rudo Ensayo (ca. 1762) it was a Pima settlement, but this is doubtless an error. The present hamlet of Mututicachi contained 27 persons in 1900.

Mututicatzí.—Rudo Ensayo (ca. 1762), 160, 1863. **Mututicachi.**—Bandelier in Arch. Inst. Papers, iv, 483, 1892.

Mutuzizti (from Cora *muuti*, 'head'). A subdivision of the Cora proper, inhabiting the central part of the Nayarit mts., Jalisco, Mexico.

Mutizcat.—Ortega, Vocab. en Lengua Castellana y Cora, 1732, 7, 1888 (sing. form). **Mutuzizti.**—Orozco y Berra, Geog., 59, 1864.

Muvinabore. Mentioned by Pimentel (Lenguas, ii, 347, 1865) as a division of the Comanche, but no such division is recognized in the tribe.

Muyi (*Mū'yì*). The Mole clan of the Hopi of Arizona.—Voth, Traditions of the Hopi, 37, 40, 1906.

Mwawa (*Ma'hwāwā*, 'wolf'). A gens of the Shawnee, q. v.

Ma'hwāwā.—Wm. Jones, inf'n, 1906. **M'-wa-wā.**—Morgan, Anc. Soc., 168, 1877.

Myeengun (*Ma'ingün*, 'wolf'). A gens of the Chippewa, q. v.

Mah-een-gun.—Warren (1852) in Minn. Hist. Soc. Coll., v, 44, 1885. **Ma'ingan.**—Gatschet, Ojibwa MS., B. A. E., 1882. **Ma'ingan.**—Wm. Jones, inf'n, 1906. **My-en-gun.**—Morgan, Anc. Soc., 166, 1877.

Myghtuckpassu. A village of the Powhatan confederacy in 1608, on the S. bank of Mattapony r., King William co., Va.—Smith (1629), Va., i, map, repr. 1819.

Myhangah. See *Mohongo*.

Mystic (from *missi-tuk*, 'great tidal river.'—Trumbull). The name of at least two former villages in New England, one on the river of the same name at Medford, Middlesex co., Mass., which was occupied in 1649 and was in the Massachusetts country. The other was a Pequot village on the W. side of Mystic r., not far from the present Mystic, New London co., Conn. It was burned by the English in 1637. (J. M.)

Mestecke.—Brewster (1657) in Mass. Hist. Soc. Coll., 4th s., vii, 82, 1865. **Mestick.**—Eliot (1649), *ibid.*, 3d s., iv, 88, 1834. **Mistick.**—Dudley (ca. 1630), *ibid.*, 1st s., viii, 39, 1802. **Mystick.**—Pike (1698) in N. H. Hist. Soc. Coll., iii, 49, 1870.

Mythology. The mythology of the North American Indians embraces the vast and complex body of their opinions regarding the genesis, the functions, the history, and the destiny not only of themselves but also of every subjective and of every objective phenomenon, principle, or thing of their past or present environment which in any marked manner had affected their welfare.

Among savage tribal men a myth is primarily and essentially an account of the genesis, the functions, the history, and the destiny of a humanized fictitious male or female personage or being who is a personification of some body, principle, or phenomenon of nature, or of a faculty or function of the mind, and who performs his or her functions by imputed inherent *orenda* (q. v.), or magic power, and by whose being and activities the inchoate reasoning of such men sought to explain the existence and the operations of the bodies and the principles of nature. Such a being or personage might and did personify a rock, a tree, a river, a plant, the earth, the night, the storm, the summer, the winter, a star, a dream, a thought, an action or a series of actions, or the ancient or prototype of an animal or a bird. Later, such a being, always humanized in form and mind, may, by his assumed absolute and mysterious control of the thing or phenomenon personified, become a hero, or a god to men, through his relations with them—relations which are in fact the action and interaction of men with the things of their environments. A mythology is

composed of a body of such myths and fragments thereof. But of course no myth that has come down to the present time is simple. Myths and parts of myths have necessarily been employed to define and explain other myths or other and new phenomena, and the way from the first to the last is long and often broken. Vestigial myths, myths whose meaning or symbolism has from any cause whatsoever become obscured or entirely lost, constitute a great part of folklore, and such myths are also called folktales.

A study of the lexic derivation of the terms "myth" and "mythology" will not lead to a satisfactory definition and interpretation of what is denoted by either term, for the genesis of the things so named was not understood when they received these appellations. In its broadest sense, *mythos* in Greek denoted whatever was uttered by the mouth of man—a saying, a legend, a story of something as understood by the narrator, a word. But in Attic Greek it denoted also any prehistoric story of the Greeks, and these were chiefly stories of gods and heroes, which were, though this fact was unknown to the Greeks themselves, phenomena of nature. And when the term received this specific meaning it fell into discredit, because the origin and true character of myths not being understood, these prehistoric stories by the advance in knowledge came into disrepute among the Greeks themselves, and after therise of Christianity they were condemned as the wicked fables of a false religion. Hence, in popular usage, and quite apart from the study of mythology, the term "myth" denotes what is in fact nonexistent—a nothing with a name, a story without a basis of fact—"a nonentity of which an entity is affirmed, a nothing which is said to be something." Besides *mythos* in Greek, *logos*, signifying 'word,' was employed originally with approximately the same meaning in ordinary speech at the time of Homer, who sometimes used them interchangeably. But, strictly speaking, there was a difference from the beginning which, by the need for precision in diction, finally led to a wide divergence in the signification of the two terms. *Logos*, derived from *legein*, 'to gather,' was seldom used by Homer to denote 'a saying, a speaking, or a signification,' but to denote usually 'a gathering,' or, strictly, 'a telling, casting up or counting.' In time this term came to mean not only the inward constitution but the outward form of thought, and finally to denote exact thinking or reason—not only the reason in man, but the reason in the universe—the Divine *Logos*, the Volition of God, the Son of God, God Himself. It is so employed in the opening lines of the

first chapter of the Gospel of St John. Such is a brief outline of the uses of the two terms which in their primal signification formed the term "mythology," from which but little can be gathered as to what constitutes a myth.

Up to a certain point there is substantial agreement among students in the use of the term myth. But this means but little. To the question, What is the nature and origin of a myth? wholly different replies, perplexing in number, are given, and for this reason the study of mythology, of a definite body of myths, has not yet become a science. By careful study of adequate materials a clue to the meaning and significance of myths may be found in the apprehension—vague in the beginning, increasingly definite as the study progresses—that all these things, these tales, these gods, although so diverse, arise from one simple though common basis or motive.

Every body, element, or phenomenon of nature, whether subjective or objective, has its myth or story to account for its origin, history, and manner of action. Portions of these myths, especially those concerning the most striking objects of an environment, are woven together by some master mind into a cycle of myths, and a myth of the beginnings, a genesis, or creation, story is thus developed. The horns and the cloven feet of the deer, the stripes of the chipmunk's back, the tail of the beaver, the flat nose of the otter, the rattles of the snake, the tides of rivers, the earthquake, the meteor, the aurora borealis; in short, every phenomenon that fixed the attention required and received an explanation which, being conventional, satisfied the commonsense of the community, and which later, owing to its imputation of apparently impossible attributes to fictitious personages to account for the operations of nature, became, by the growing knowledge of man, a myth.

A myth is of interest from three viewpoints, namely, (1) as a literary product embodying a wondrous story of things and personages; (2) for the character of the matter it contains as expressive of human thought and the interpretation of human experience, and (3) for the purpose of comparison with the myths of alien or of cognate peoples and for the data it contains relating to the customs, arts, and archeology of the people among whom it exists.

With the available data, it is as yet impossible to define with satisfactory clearness all the objective realities of the personal agencies or men-beings of the American Indian myths. In Indian thought these personages are constantly associated in function, and sometimes

they exercise derivative powers or are joined in mysterious kinship groups, always combining the symbolism of personified objective phenomena with imputed life, mind, and volition, and with the exercise of attributed *orenda*, or magic power, of diverse function and potency. Moreover, the size and the muscular power of the objective reality personified have little, if any, relation to the strength of the *orenda* exercised by the man-being.

To explain in part the multi-form phenomena of different and successive environments, the philosophic ancestors of the Indians of to-day subconsciously imputed mind and immortal life to every object and phenomenon in nature, and to nearly every faculty and affection of the human mind and body. Concomitantly with this endowment of lifeless things with life and mind was the additional endowment with *orenda*, which differed in strength and function with the individual. These dogmas underlie the mythology and religion of all the Indians, as they supplied to the latter's inchoate reasoning satisfactory explanations of the phenomena of nature—life and death, dreams and disease, floral and faunal growth and reproduction, light and darkness, cold and heat, winter and summer, rain and snow, frost and ice, wind and storm. The term "animism" has been applied by some to this doctrine of the possession of immortal life and mind by lifeless and mindless things, but with an insufficient definition of the objective for which it stands. The uses and definitions of this term are now so numerous and contradictory that the critical student can not afford to employ it without an exact objective definition. Primarily, animism, or the imputation of life to lifeless things, was selected to express what was considered the sole essential characteristic basis of the complex institutions called mythology and religion. But if the ascription of life to lifeless things is animism, then it becomes of fundamental importance to know exactly what kind of life is thus ascribed. If there is one difference between things which should be carefully distinguished, it is that between the alleged ghosts of dead human beings and those other alleged spiritual beings which never have been real human beings—the animal and the primal spirits. Does animism denote the ascription of only one or of all these three classes of spirits? Definite explanation is here lacking. So, as a key to the satisfactory interpretation of what constitutes mythology and religion, animism as heretofore defined has failed to meet the criticism of such scholars as Spencer, Max Müller, and Brinton, and so has fallen into that long category of equivocal words of which

fetishism, shamanism, solarism, ancestor-worship, personification, and totemism are other members. Every one of these terms, as commonly employed, denotes some important phase or element in religion or mythology which, variously defined by different students, does not, however, form the characteristic basis of mythology and religion.

The great apostle of ancestor-worship, Lippert, makes animism a mere subdivision of the worship of ancestral spirits, or ghosts. But Gruppe, adding to the confusion of ideas, makes animism synonymous with fetishism, and describes a fetish as the tenement of a disembodied human spirit or ghost, and erroneously holds that fetishism is the result of a widely prevalent belief in the power of the human ghost to take possession of any object whatsoever, to leave its ordinary dwelling, the remains of the human body, to enter some other object, such as the sky, the sun, the moon, the earth, a star, or what not. Even the chief gods of Greece, Rome, and India are by some regarded as fetishes developed through the exaltation of ancestral ghosts to this state. Their cult is regarded as a development of fetishism, which is an outgrowth of animism, which is, in turn, a development of ancestor-worship. To add to this array of conflicting definitions, Max Müller declares that fetishism is really the "very last stage in the downward course of religion." Gruppe further holds that when a sky fetish or a star fetish becomes a totem, then the idea of "sons of heaven," or "children of the sun," is developed in the human mind, and so, according to this doctrine, every religion, ancient and modern, may be explained by animism, fetishism, and totemism. Moved by this array of conflicting definitions, Max Müller declares that, to secure clear thinking and sober reasoning, these three terms should be entirely discarded, or, if used, then let animism be defined as a belief in and worship of ancestral spirits, whence arises in the mind the simplest and most primitive ideas of immortality; let fetishism be defined as a worship of chance objects having miraculous powers; and, finally, let totemism be defined as the custom of choosing some emblem as the family or tribal mark to which worship is paid and which is regarded as the human or superhuman ancestor. Müller has failed to grasp the facts clearly, for no one of these excludes the others.

Stahl (1737), adopting and developing into modern scientific form the classical theory of the identity of life and soul, employed the term "animism" to designate this doctrine.

Tylor (1871), adopting the term "animism" from Stahl, defines it as "the

belief in spiritual beings," and as "the deep-lying doctrine of spiritual beings, which embodies the very essence of spiritualistic as opposed to materialistic philosophy"; and, finally, he says, "animism is, in fact, the groundwork of the philosophy of religion, from that of savages up to that of civilized men." He further makes the belief in spiritual beings "the minimum definition of religion." Hence, with Tylor, animism is broadly synonymous with religion.

But, strict definition shows that a belief in spiritual beings, as such, did not, does not, and can not form the sole material out of which primitive thought has developed its gods and deities. To this extent, therefore, animism does not furnish the key to an accurate and valid explanation of mythology and religion.

Brinton (1896) denies that there is any special religious activity taking the form of what Tylor calls "animism," and declares that the belief that inanimate objects possess souls or spirits is common to all religions and many philosophies, and that it is not a trait characteristic of primitive faiths, but merely a secondary phenomenon of the religious sentiment. Further, he insists that "the acceptance of the doctrine of 'animism' as a sufficient explanation of early cults has led to the neglect, in English-speaking lands, of their profounder analysis."

So far as is definitely known, no support is found in the mythologies of North America for the doctrine of ancestor-worship. This doctrine seeks to show that savage men had evolved real gods from the shades of their own dead chiefs and great men. It is more than doubtful that such a thing has ever been done by man. Competent data and trained experience with the Indians of North America show that the dominant ideas of early savage thought precluded such a thing. One of the most fundamental and characteristic beliefs of savage thought is the utter helplessness of man unaided by the magic power of some favoring being against the bodies and elements of his environment. The deities, the masters and controllers—the gods of later times—differed greatly in strength of body and in the potency of the magic power exercised by them, in knowledge and in astuteness of mind; but each in his own sphere and jurisdiction was generally supreme and incomprehensible. Human shades, or ghosts, did not or could not attain to these godlike gifts. To change, transform, create by metamorphosis, or to govern, some body or element in nature, is at once the prerogative and the function of a master—a controller—humanly speaking, a god.

The attribution of power to do things magically, that is, to perform a function in a mysterious and incomprehensible manner, was the fundamental postulate of savage mind to account for the ability of the gods, the fictitious personages of its mythology, to perform the acts which are in fact the operations of the forces of nature. To define one such man-being or personage, the explanation, to be satisfactory, must be more than the mere statement of the imputation of life, mind, and the human form and attributes to an objective thing. There must also be stated the fact of the concomitant possession along with these of *orenda*, or magic power, differing from individual to individual in efficacy, function, and scope of action.

While linguistics may greatly aid in comprehending myths, it is nevertheless not always safe for determining the substance of the thought, the concept; and the student must eschew the habit of giving only an etymology rather than a definition of the things having the names of the mythic persons, which may be the subject of investigation. Etymology may aid, but without corroborative testimony it may mislead.

Many are the causes which bring about the decline and disintegration of a myth or a cycle of myths of a definite people. The migration or violent disruption of the people, the attrition or the superposition of diverse alien cultures, or the change or reformation of the religion of the people based on a recasting of opinions and like causes, all tend to the decline and dismemberment and the final loss of a myth or a mythology.

All tribes of common blood and speech are bound together by a common mythology and by a religion founded on the teachings of that mythology. These doctrines deal with a vast body of all kinds of knowledge, arts, institutions, and customs. It is the creed of such a people that all their knowledge and wisdom, all their rites and ceremonies, and all that they possess and all that they are socially and politically, have come to them through direct revelation from their gods, through the beneficence of the rulers of the bodies and elements of their environment.

The social and political bonds of every known tribe are founded essentially on real or fictitious blood kinship, and the religious bonds that hold a people to its gods are founded on faith in the truth of the teachings of their myths. No stronger bonds than these are known to savage men. The disruption of these, by whatever cause, results in the destruction of the people.

The constant struggle of man with his physical environment to secure welfare was a warfare against elements ever definitely and vividly personified and humanized by him, thus unconsciously making his surroundings quite unreal, though felt to be real; and his struggle with his environment was a ceaseless strife with animals and plants and trees in like manner ever mythically personified and humanized by him; and, finally, his tireless struggle with other men for supremacy and welfare was therefore typical, not only fundamentally and practically, but also mythically and ideally; and so this never-ceasing struggle was an abiding, all-pervading, all-transforming theme of his thoughts, and an ever-impending, ever-absorbing business of his life, suffered and impelled by his ceaseless yearning for welfare.

An environment would have been regarded by savage men very differently from what it would be by the cultured mind of to-day. To the former the bodies and elements composing it were regarded as beings, indeed as man-beings, and the operations of nature were ascribed to the action of the diverse magic powers, or *orendas*, exercised by these beings rather than to the forces of nature; so that the action and interaction of the bodies and elemental principles of nature were regarded as the result of the working of numberless beings through their *orendas*. Among most known tribes in North America the earth is regarded as a humanized being in person and form, every particle of whose body is living substance and potent with the quickening power of life, which is bestowed on all who feed upon her. They that feed upon her are the plants and the trees, who are indeed beings living and having a being because they receive life substance from the earth, hence they are like the primal beings endowed with mind and volition, to whom prayer (q. v.) may be offered, since they rule and dispose in their several jurisdictions unless they are overcome by some more powerful *orenda*. Now, a prayer is psychologically the expression of the fact that the petitioner in need is unable to secure what is required for the welfare, or in distress to prevent what will result in the ill-fare, of himself or his kind. The substance of the prayer merely tells in what direction or in what respect this inability exists. In turn, the animals and men live on the products of the trees and plants, by which means they renew life and gain the quickening power of life, indirectly from the earth-mother, and thus by a metaphor they are said to have come up out of the earth. As the giver of life, the earth is regarded affectionately and is called Mother, but as the

taker of life and the devourer of their dead bodies, she is regarded as wicked and a cannibal.

In the science of opinions mythology is found to be a fruitful field in which to gather data regarding the origin and growth of human concepts relating to man and the world around him. A study of the birth and evolution of the concepts of the human mind indicates clearly that the beginnings of conventional forms and ideas and their variations along the lines of their development are almost never quite so simple, or rather quite so direct, as they may seem—are seldom, even in the beginning, the direct product of the environmental resource and exigency acting together so immediately and so exclusively of mental agency as students are apt to assume. As a rule they are rather the product of these things—these factors and conditions of environment acting very indirectly and sometimes very subtly and complexly—through the condition of mind wrought by long-continued life and experience therein, or, again, acting through the state of mind borne over from one environment to another. It is the part of wisdom to be more cautious in deriving ideas and concepts, arts, or even technic forms of a people too instantly, too directly, from the environment natural objects or elements they may simulate or resemble. The motive, if not for the choice, at least for the persistency, of a given mode of a concept in relation to any objective factor is always a psychic reason, not a mere first-hand influence of environment or of accident in the popular sense of this term. This disposition of the “mere accident” or “chance” hypothesis of origins dispels many perplexities in the formation of exact judgment concerning comparative data, in the identifications of cognate forms and concepts among widely separated peoples; for instance, in the drawing of sound inferences particularly regarding their common or generic, specific or exceptional, origin and growth, as shown by the data in question.

As it is evident that independent processes and diverse factors combined can not be alike in every particular in widely separated parts of the world, there is found a means for determining, through minute differences in similarity, rather than through general similarities alone, howsoever striking they may appear, whether such forms are related, whether or not they have a common genesis whence they have inherited aught in common. Hence caution makes it incumbent on students to beware of the alluring fallacy lurking in the frequently repeated epigram that “human nature is everywhere the same.” The nature of men differs widely

from differences of origin, from differences of history, from differences of education, and from differences of environment. Hence, to produce the same human nature everywhere, these factors must everywhere be the same. The environments of no two peoples are ever precisely the same, and so the two differ in their character, in their activities, and in their beliefs.

To the primitive inchoate thought of the North American Indian all the bodies and elements of his subjective and objective environment were humanized beings—man-beings, or beings that were persons, that were man in form and attributes and endowed with immortal life (not souls in the modern acceptation of this term), with omniscience, and with potent magic power in their several jurisdictions. These beings were formed in the image of man, because man was the highest type of being known to himself and because of his subjective method of thought, which imputed to outside things, objective realities, his own form and attributes. He could conceive of nature in no other way. They sometimes, however, had the power of instant change or transmigration into any desired object through the exercise of peculiar magic power.

The world of the savage was indeed of small extent, being confined by his boundless ignorance to the countries bordering on his own, a little, if any, beyond his horizon. Beyond this, he knew nothing of the world, nothing of its extent or structure. This fact is important and easily verified, and this knowledge aids in fully appreciating the teachings of the philosophy of savage men. Around and through this limited region traveled the sun, the moon, the stars, the winds, the meteors and the fire dragons of the night, and the fitful auroral cherubim of the north. All these were to him man-beings. All trees and plants—the sturdy oak, the tall pine, and the wild parsnip—were such beings rooted to the earth by the mighty spell of some potent wizard, and so, unlike the deer, they do not ordinarily travel from place to place. In like manner, hills and mountains and the waters of the earth may sometimes be thus spellbound by the potency of some enchantment. Earthquakes are sometimes caused by mountains which, held in pitiless thralldom by the *orenda* of some mighty sorcerer, struggle in agony to be freed. And even the least of these are reputed to be potent in the exercise of magic power. But rivers run and rills and brooks leap and bound over the land, yet even these in the ripeness of time may be gripped to silence by the mighty magic power of the god of winter.

Among all peoples in all times and in all planes of culture there were persons whose opinions were orthodox, and there were also persons whose opinions were heterodox, and were therefore a constant protest against the common opinions, the commonsense of the community; these were the agnostics of the ages, the prophets of change and reformation.

Every ethnic body of myths of the North American Indians forms a circumstantial narration of the origin of the world of the myth-makers and of all things and creatures therein. From these narratives it is learned that a world, earlier than the present, situated usually above the visible sky, existed from the beginning of time, in which dwelt the first or prototypal personages who, having the form and the attributes of man, are herein called man-beings. Each of these man-beings possessed a magic power peculiar to himself or herself, by which he or she was later enabled to perform his or her functions after the metamorphosis of all things. The life and manner of living of the Indians to-day is patterned after that of these man-beings in their first estate. They were the prototypes of the things which are now on this earth.

This elder world is introduced in a state of peace and harmony. In the ripeness of time, unrest and discord arose among these first beings, because the minds of all, except a very small number, becoming abnormal, were changed, and the former state of tranquillity was soon succeeded by a complete metamorphosis of all things and beings, or was followed by commotion, collision, and strife. The transformed things, the prototypes, were banished from the sky-land to this world, whereupon it acquired its present appearance and became peopled by all that is upon it—man, animals, trees, and plants, who formerly were man-beings. In some cosmologies man is brought upon the scene later and in a peculiar manner. Each man-being became transformed into what his or her attributes required, what his primal and unchangeable nature demanded, and then he or she became in body what he had been, in a disguised body, before the transformation. But those man-beings whose minds did not change by becoming abnormal, remained there in the skyland—separate, peculiar, and immortal. Indeed they are but shadowy figures passing into the shoreless sea of oblivion.

Among the tribes of North American Indians there is a striking similarity in their cycles of genesis myths, in that they treat of several regions or worlds. Sometimes around and above the mid-world, the habitat of the myth, are placed

a group of worlds—one at the east, one at the south, one at the west, one at the north, one above, and one below—which, with the midworld, number seven in all. Even each of the principal colors is assigned to its appropriate world (see *Color symbolism*). Hence, to the primitive mind, the cosmos (if the term be allowed here) was a universe of man-beings whose activities constituted the operations of nature. To it nothing was what it is to scientific thought. Indeed, it was a world wholly artificial and fanciful. It was the product of the fancy of savage and inchoate thinking, of the commonsense of savage thought.

So far as is definitely known, the various systems of mythology in North America differ much in detail one from another, superficially giving them the aspect of fundamental difference of origin and growth; but a careful study of them discloses the fact that they accord with all great bodies of mythology in a principle which underlies all, namely, the principle of change, transmigration, or metamorphosis of things, through the exercise of *orenda*, or magic power, from one state, condition, or form, to another. By this means things have become what they now are. Strictly, then, creation of something from nothing has no place in them. In these mythologies, purporting to be philosophies, of course, no knowledge of the real changes which have affected the environing world is to be sought; but it is equally true that in them are embedded, like rare fossils and precious gems, many most important facts regarding the history of the human mind.

For a definite people in a definite plane of culture, the myths and the concomitant beliefs resting on them, of their neighbors, are not usually true, since the personages and the events narrated in them have an aspect and an expression quite different from their own, although they may in the last analysis express fundamentally identical things—may in fact spring from identical motives.

Among the Iroquois and the eastern Algonquian tribes, the Thunder people, human in form and mind and usually four in number, are most important and staunch friends of man. But in the Lake region, the N. W. coast to Alaska, and in the northern drainage of the Mississippi and Missouri valleys, this conception is replaced by that of the Thunderbird.

Among the Algonquian and the Iroquoian tribes the myths regarding the so-called fire-dragon are at once striking and important. Now, the fire-dragon is in fact the personification of the meteor. Flying through the air among the stars, the larger meteors appear against some

midnight sky like fiery reptiles sheathed in lambent flames. It is believed of them that they fly from one lake or deep river to another, in the bottom of which they are bound by enchantment to dwell, for should they be permitted to remain on the land they would set the world on fire. The Iroquois applied their name for the fire-dragon, 'light-thrower,' to the lion when first seen, thus indicating their conception of the fierceness of the fire-dragon. The Ottawa and Chippewa *missibizi*, or *missibizhu*, literally 'great lynx,' is their name for this mythic being. The horned serpent does not belong here, but the misnamed tigers of the Peoria and other Algonquian tribes do. Among the Iroquois it was the deeds of the fire-dragon that hastened the occasion for the metamorphosis of the primal beings.

As early as 1868 Brinton called attention to the curious circumstance that in the mythology of those Eskimo who had had no contact with European travelers, there were no changes or transformations of the world affecting the aspect and character of the earth. In this statement he is followed by Boas (1904), who also claims that the animal myth proper did not belong originally to Eskimo mythology, although there are now in this mythology some animal myths and weird tales and accounts regarding monsters and vampire ghosts and the thaumaturgic deeds of shamans and wizards. This is in strong contrast with the content of the mythologies of the Indian tribes that have been studied.

In its general aspects the mythology of the North American Indians has been instructively and profitably discussed by several American anthropologists, who have greatly advanced the study and knowledge of the subject. Among these are Powell, Brinton, Boas, Curtin, Fletcher, Matthews, Cushing, Fewkes, and Dixon.

Powell treated the subject from the philosophic and evolutionary point of view, and sought to establish successive stages in the development of the mythologic thought or concept, making them imputation, personification, and reification; and the product he divided into four stages from the character of the dominant gods in each, namely, (1) *hecastotheism*, wherein everything has life, personality, volition, and design, and the wondrous attributes of man; (2) *zoötheism*, wherein life is not attributed indiscriminately to lifeless things, the attributes of man are imputed to the animals and no line of demarcation is drawn between man and beast, and all facts and phenomena of nature are explained in the mythic history of these zoömorphous gods; (3) *physitheism*,

wherein a wide difference is recognized between man and the animals, the powers and phenomena of nature are personified, and the gods are anthropomorphic; and (4) *psychotheism*, wherein mental attributes and moral and social characteristics with which are associated the powers of nature are personified and deified, and there arise gods of war, of love, of revelry, plenty, and fortune. This last stage, by processes of mental integration, passes into monotheism on the one hand and into pantheism on the other. It is found that these four stages are not thus successive, but that they may and do overlap, and that it is best perhaps to call them phases rather than stages of growth, in that they may exist side by side.

Brinton learnedly calls attention to the distinctively native American character of the large body of myths and tales rehearsed among the American aborigines. His studies include also much etymological analysis of mythic and legendary names, which is unfortunately largely inaccurate, analysis being apparently made to accord with a preconceived idea of what it should disclose. This vitiates a large part of his otherwise excellent identifications of the objective realities of the agents found in the mythology. He also treats in his instructive style the various cults of the demiurge, or the culture-hero or hero-god; but it must be borne in mind that here the so-called hero-god is not solely or even chiefly such in character. In discussing the hero-myths of the n. w. Pacific coast tribes, Boas points out the fact that the culture-hero of that area was not always prompted by altruistic motives in "giving the world its present shape and man his arts." The hero is credited with failures as well as with successes, and in character is an "egotist pure and simple." On the other hand, Boas finds in the life and character of the Algonquian Nanabozho (q. v.) altruistic motives dominant. This tendency to displace the egotistic motives of the primitive transformer with preeminently altruistic ones is strongly marked in the character of the Iroquoian Tharonhiawagon (q. v.), a parallel if not a cognate conception with that of the Alonquian Nanabozho. As showing a transitional stage on the way to altruism, Boas states that the transformer among the Kwakiutl brings about the changes for the benefit of a friend and not for himself. While there are some Algonquian myths in which Nanabozho appears as a trickster and teller of falsehoods, among the Iroquois the trickster and buffoon has been developed alongside that of the demiurge, and is sometimes reputed to be the brother of Death. The mink,

the wolverene, the bluejay, the raven and the coyote are represented as tricksters in the myths of many of the tribes of the Pacific slope and the N. W. coast.

Matthews, in "The Night Chant, a Ceremony of the Navaho" (Mem. Am. Mus. Nat. Hist., v, 1902), introduces an interesting account of the striking symbolism and mythic philosophy of this remarkable people.

Miss Fletcher, in her many excellent and instructive writings on the customs and symbolism of the Indians whom she has studied, has placed the study of mythology on a scientific basis. In her "Hako: A Pawnee Ceremony" (22d Rep. B. A. E., 1903), Miss Fletcher treats in masterful manner this interesting series of rites, which, with marked sympathy and the skill of ripe experience, she analyzes and interprets in such wise that the delicately veiled symbolism and mythic conceptions are clearly brought to view.

In the Zuñi record of the genesis of the worlds, as recorded by Cushing (13th Rep. B. A. E., 1896), Awonawilona, the Maker and Container of all, alone and unperplexed awaiting fate, existed before the beginning of time in the darkness which knew no beginning. Then he conceived within himself, and projecting his thinking into the void of night, around him evolved fogs of increase—mists potent with growth. Then, in like manner, the All-container took upon himself the form and person of the Sun, the Father of men, who thus came to be, and by whose light and brightening the cloud mists became thickened into water, and thus was made the world-holding sea. Then from "his substance of flesh outdrawn from the surface of his person," he made the seed of two worlds, fecundating therewith the sea. By the heat of his rays there was formed thereon green scums, which increasing apace became "The Four-fold Containing Mother-earth" and the "All-covering Father-sky." Then from the consorting together of these twain on the great world-waters, terrestrial life was generated, and therefrom sprang all beings of earth—men and the creatures, from the "Four-fold womb of the World." Then the Earth-mother repulsed the Sky-father, and growing heavy sank into the embrace of the waters of the sea, and thus she separated from the Sky-father, leaving him in the embrace of the waters above. Moreover, the Earth-mother and the Sky-father, like all surpassing beings, were changeable, metamorphic, even like smoke in the wind, were "transmutable at thought, manifesting themselves in any form at will, as dancers may by mask-making." Then

from the nethermost of the four caves (wombs) of the world, the seed of men and the creatures took form and grew; even as within eggs in warm places worms quickly form and appear, and, growing, soon burst their shells and emerge, as may happen, birds, tadpoles, or serpents; so men and all creatures grew manifoldly and multiplied in many kinds. Thus did the lowermost world cave become overfilled with living things, full of unfinished creatures, crawling like reptiles one over another in black darkness, thickly crowding together and treading one on another, onespitting on another and doing other indecency, in such manner that the murmurings and the lamentations became loud, and many amidst the growing confusion sought to escape, growing wiser and more manlike. Then Poshaiyankya, the foremost and wisest of men, arising from the nethermost sea, came among men and the living things, and, pitying them, obtained egress from that first world cave through such a dark and narrow path that some seeing somewhat, crowding after, could not follow him, so eager mightily did they strive one with another. Alone then did Poshaiyankya come from one cave to another into this world, then, island-like, lying amidst the world waters, vast, wet, and unstable. He sought and found the Sun-father and besought him to deliver the men and the creatures from that nethermost world.

Speaking of the Maidu myths, Dixon (Bull. Am. Mus. Nat. Hist., xvii, pt. 3, 1905) says that from present knowledge of them, the facts of most interest are the large measure of system and sequence found in the mythology of the stock; the prominence given to the "creation episode" and to the events connected with it; the strongly contrasted characters of the "Creator" and the Coyote; the apparent absence of a myth of migration, and the diversity shown within the stock; that "beginning with the creation, a rather systematic chain of events leads up to the appearance of the ancestors of the present Indians, with whose coming the mythic cycle came to a close. This mythic era seems to fall into a number of periods, with each of which a group or set of myths has to deal." During the first era occurs the coming of Kōdōyanpē (Earth-namer) and Coyote, the "discovery" of this world by them,

and the preparation of it for the "first people"; next, the "creation" of the first people and the making and planting of the germs of human beings, the Indians (in the form of small wooden figures), who were to follow; third, the long period in which the first people were engaged in violence and conflict, and were finally transformed into the various animals in the present world. During this period Earth-maker (or Earth-namer) sought to destroy Coyote, whose evil ways and desires antagonized his own. In this struggle Earth-namer was assisted by the Conqueror, who destroyed many monsters and evil beings who later would have endangered the life of men who should come on the scene. In the final period comes the last struggle, wherein Earth-maker strives in vain with Coyote, his defeat and flight to the East synchronously with the coming of the human race, the Indians, who sprang up from the places where the original pairs had long before been buried as small wooden figures. Dixon further says: "Nor is the creation here merely an episode—a re-creation after a deluge brought on by one cause or another—as it is in some mythologies. Here the creation is a real beginning; beyond it, behind it, there is nothing. In the beginning was only the great sea, calm and unlimited, to which, down from the clear sky, the Creator came, or on which he and Coyote were floating in a canoe. Of the origin or previous place of abode of either Creator or Coyote, the Maidu knew nothing." But Dixon adds that the Achomawi, northern neighbors of the Maidu, push this history much farther back, saying that at first there were but the shoreless sea and the clear sky; that a tiny cloud appeared in the sky, which, gradually increasing in size, finally attained large proportions, then condensed until it became the Silver-Gray Fox, the Creator; that immediately there arose a fog which in turn condensed until it became Coyote. See *Cahmet, Fetish, Orenda, Religion*.

The bibliography of the mythology of the Indians N. of Mexico is very extensive. For an excellent summary of the literature of the subject, consult Chamberlain in Jour. Am. Folk-lore, xviii, 111, 1905, and the continuous Record of American Folk-lore published in the same magazine. (J. N. B. H.)
